4230. FS: Variable Transformer

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-01-01 13:43:02 UTC
From: Bry Carling
Topic: 4230 Message: 4230

For sale: Variable Transformer

0-120V AC. Rated for 1.25 Amps.
Someone wired this into a box with two AC outlets.
Box is now a little rusty, but control looks fine.
Needs standard 1/4" knob.
Can't read the brand name but it says Newark, NJ.

QTY 1 available for $6.00 plus shipping

4232. FS: Brown-Boveri Power IGBT Rectifiers.

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-01-01 13:38:42 UTC
From: Bry Carling
Topic: 4232 Message: 4232

FOR SALE:

Three Brown-Boveri Power IGBT Rectifiers.
Rated 1600V at 65 Amps

These are three terminal power block rectifiers
with a heat sinking base.

QTY 2 are type MRR50-12IR8
QTY 1 is a MCC40-16IO8

All three for $5.00 plus shipping.

4233. Low Pass TVI filters FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-01-01 16:05:01 UTC
From: Ken Simpson, W8EK
Topic: 3412 Message: 4233

Low Pass TVI filters For Sale:

B & W model 425 (Also know as FL-10/1500) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end.
I have two of these available. One is a fairly new model and
is in nice condition for $25.
The second is a much older model that seems much heavier
duty. It weighs almost twice as much, and looks like it would
take more power. It likely was made in the days that plate
modulated AM was the rule. $35

Kenwood LF-30 A
This is Kenwood's low pass filter, with a cut off of
about 30 MHz, and more than 90 db of attenuation
between 90 and 300 MHz. It will handle 1000 watts,
and has an SO-239 connector on each end. It is in
extremely nice condition. These are $65 new; get
this one, with paper work for $35.

Nye Viking Low Pass Filter Model 020-001
This filter is rated at 2000 watts, with over 65 db of
attenuation above 57 MHz. These are about $60 new;
this one is close to new for only $35.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut
off frequency of 45 MHz and 75 db of attenuation.
It is rated to take 1000 Watts of AM, or 5000 Watts
PEP SSB. It has SO-239 connectors on each end.
$30.

MFJ 704 low pass filter
This filter is made to go on the output of your rig to
help get rid of TVI and harmonic interference. It is
rated at 1500 Watts, even with a 2:1 SWR, and is
in a very study black metal case with SO-239
connectors on each end. Operating frequency is
listed as 1.5 to 30 MHz. It is a 50 ohm filter. This
one works fine and looks very close to new. These
are $50 new, but you can have this one for $30

Alinco ELP-60 D LX low pass filter
For 50 ohm systems, with up to 500 watts of power.
This one has an SO-239 on one end, and about a 2 foot

length of coax and PL-259 on the other end. $30

Ameco LN-2 low pass filter
This filter is rated at 100 Watts, with an SO-239
connector on each end. $12

Prices do not include shipping from Florida.

Thanks.

4234. Goodies For Sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-01-03 02:17:27 UTC
From: BSugarberg
Topic: 4104 Message: 4234

Hello,

I have the following for sale:

ARRL Handbooks:

1961, 1964, 1965, 1970, 1972, 1973, 1978.

$60.00 for all.

Antique Radio Classified:

Not just adds, but many great articles about
Radio from the early 1900s to the 1960s.

1998 - 12 issues.
1997 - 12 issues.
1996 - 10 issues. (Jan.-Oct.).

$34.00 for all.

A set of WW2 Navy Aircraft Manuals:

Advanced Work In Aircraft Radio
Airplane Structures
Aircraft Instruments
Aircraft Engines
Aircraft Fuel Systems
Aircraft Propellers
Flight Engineering

$75.00 for all.

A professional copy of the complete Collins
651S-1/S1A Manual:

Part 1

Description
Installation
Operation
Maintenance
Diagrams

Part 2

Parts List

$55.00.

Triplet 1232 Signal Generator. 100KC - 30MC. $15.00
1930s or 1940s. 6 3/4" W x 8" H x 4 1/2" D.

T & H Manufacturing Co. Car Electrical Tester. $20.00
Late 1920s or early 1930s. 8" W x 8 1/2" H x 4" D.

"Practical Radio Communications" by Nilson and Hornung. - $15.00
2nd Ed. 1943. Has foldout schematics of commercial radio gear.

Thank you,

Bruce WA8TNC

4241. TenTec HF xcvr FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-01-13 22:43:00 UTC
From: Ken Simpson, W8EK
Topic: 4241 Message: 4241

TenTec items for sale:

TenTec 585 Paragon HF transceiver
This rig covers 160 thru 10 meters, including the WARC
bands. It has a general coverage receiver, that includes
SSB, CW, and AM. An optional FM adapter is available
for it. Of course it has digital readout, memories, scan,
dual VFOs, PBT, notch filter, etc. It has an extremely
effective "Jones filter" to allow varying the passband,
and its location in the spectrum. It has up to 100 Watts
output, that can be adjusted down to milliwatts for QRP
use, if desired. This particular unit works 100% and looks
really great. Big inch thick manual is included. TenTec
sells these used for $795. This one is just as nice, but
is only $650.

TenTec 299 Voice synthesized frequency read out
This unit is used with the TenTec Omni 546 series A, B, C,
some Argonauts, Corsair, and others. It will work with
other rigs (such as the Triton), with minor mods to get
the right connections.
The 299 is used primarily for blind hams who can not read the
frequency readout on the transceiver. By pushing a button, it
will "speak" the frequency (to tenth of a KHz). A front panel
switch permits selection of the entire frequency, or you can
eliminate the MHz, and give only the KHz. There is also a
volume control on the front panel.
Of course it can also be used to give a "voice digital readout"
to any rig with an analog dial, or used a normal frequency counter.
This particular unit is in great shape electrically. Cosmetically
it looks very nice, but has some very minor wear. $ 190

Prices do not include shipping from Florida.

Thanks.

4242. MFJ items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-01-13 13:39:10 UTC
From: Ken Simpson, W8EK
Topic: 4242 Message: 4242

MFJ items for sale:

MFJ 704 low pass filter
This filter is made to go on the output of your rig to help get rid of TVI and harmonic interference. It is rated at 1500 Watts. It is a 50 ohm filter. This one works fine, includes paper work, and looks very close to new. $35.

Cables to connect transceiver to TNC

MFJ 5024 - connects Icom, Yaesu, and other HTs that use the 3.5 mm and 2.5 mm plug to a TNC that uses a 5 pin DIN plug, such as the MFJ 1214. 1270 B, 1270 BT, 1271, 1274, 1274 T, 1278, 1278 T, and others, as well as TNC-2s. This one is still in its original plastic bag, with paper work, for $12.

MFJ-5084 - connects most Icom radios that use the round 8 pin mic plug to a TNC that uses a 5 pin DIN plug, such as the MFJ 1214. 1270 B, 1270 BT, 1271, 1274, 1274 T, 1278, 1278 T, and others, as well as the TNC-2s. With paper work for $12.

MFJ 287 speaker microphone
This was used on a Kenwood TH-225 HT, but will fit many others as well. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. $15

MFJ 1305 "wall cube"
This produces 6 V DC at up to 200 ma, and is used to power such things as keyers, lights on tuners, and many other misc. applications. Of course it can power many things other than MFJ items, but this one is an actual MFJ. $10

Prices do not include shipping from Florida.

Thanks.

Radio Communications theory and reference books, antenna book, and VHF manuals for sale:

Radio Communication Handbook by Radio Society of Great Britain (RSGB) - Fifth edition - both Volume 1 and 2
Two hardback books. This is basically equivalent to the ARRL Handbook, but published by RSGB, with some ideas not found in the ARRL book.
These books are in close to new condition, complete with their dust covers. $20

Electronic Communication by Robert Shrader - 3rd edition
This text book is used in many community colleges, and is an exceptionally thorough, yet easy to understand book covering all aspects of communications, from Ohm's Law on up. 800 page hardback in close to new condition. $20

Modern Electronic Communication by Gary Miller
Similar to Shrader (above), but slightly more advanced.
578 page hardback. $18

Building and using Baluns and Ununs
Practical Designs for the Experimenter
By Jerry Sevick, W2FMI - 1996 - CQ Publishing
The title explains it all! Like new condition. $12

1974 ARRL Antenna book
13th edition of this classic antenna book includes chapters on antenna fundamentals, transmission lines, long wire antennas, multiband antennas, dipoles, and beams for HF and VHF/UHF, along with a lot of other information -- some of it not found in the newer antenna books.
This particular book is in very nice condition, with no torn pages, fading, etc. The covers are nice and are intact. $7

Six Meters - A Guide to the Magic Band
By Ken Neubeck, WB2AMU - 1998 by Worldradio Books
It covers most every aspect of 6 meters, and includes pictures of various 6 meter rigs, as well as a band chart.
Like new. $8

The VHF Amateur by Robert Brown, K2ZSQ/W9HBF
First Edition - 1968 by Editors and Engineers
A lot a information, including schematics and details for

making rigs, and many antenna projects. $4

ARRL "FM and Repeaters for the Radio Amateur"
1972 - First Edition - $ 5

Ham Notebook Volume 1 by Jim Fisk, W1DTY
Many practical hints and projects published by Ham
Radio Magazine. $7

Prices do not include shipping from Florida.

Thanks.

4252. Kenwood 2 m mobile, HT, plus many accessory items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-01-27 14:41:25 UTC
From: Ken Simpson, W8EK
Topic: 4252 Message: 4252

Kenwood 2 meter rigs, plus other Kenwood accessories for sale:

Kenwood TM-241 A, 2 meter FM transceiver
This 2 meter FM rig will receive from about 138 to
174 MHz, while transmitting on the entire 2 meter
band. It has memories, as well as VFO and "Call"
channel, with scan, and the normal bells and whistles.
Subaudible tone (PL) encoder is built in.
Output power is up to about 50 Watts, or about 5 watts
in low power.
This particular unit works 100%, and looks fine as well.
It was used for packet so I no longer have the microphone
or mobile bracket for it. It includes the rig, power cord,
and paper work for $75.

Kenwood TR-2400, 2 meter FM HT
The TR-2400 covers the 2 meter band with about 1.5
watts of power. It has memories, scan, DTMF Touch tone
pad, etc. Compared to some of the newer HTs, this one
is very easy to operate.
This particular TR-2400 works fine. It looks good, but not
mint. The battery pack has been replaced with NiMH
batteries, which seem to hold a charge fine.
The LCD display is clear, with no defects.
The TR-2400 had a place to install an optional PL subaudible
tone encoder. I have a new, still in the original package,
encoder that I will include with the HT. I planned to install it,
but never did.
Charger, rubber duck antenna, and paper work are included
for $60.

Kenwood MC-35 S hand microphone
This hand microphone is used with most all of the older
Kenwood rigs - TS-120, TS-180, TS-520, TS-820, etc.
It has 50 K ohm impedance, and is a noise canceling
mic. It has a four pin plug on it to match these rigs, and
is in good shape for $35.

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can
be plugged into a Kenwood rig with the round 8 pin
connector. Like new. $20

Kenwood TU-4 C
Subaudible (PL) encoder for Kenwood TW-4000
This unit provides separate tones for the VHF (2 m) portion

and the UHF (440 MHz) portion. It plugs in to the TW-4000
to provide the tones. No adjustments are normally needed.
This one is in its original box with paper work, hardware, etc.
$60

Kenwood PB-21 battery pack for TH-21 / 31 / 41 series HTs
This battery pack does not hold a charge well. Physically it is
fine, but it needs a new "insert" in it. $15

Special Rubber Duck antennas for Kenwood TH-21 series HTs
with the threaded connector
Aftermarket stubby, 3.3 inches long $10
Kenwood RA-8 Stubby, 4 inches long $12
Kenwood regular, 6.6 inches long $10
Combo set of long 11.5 inch "gain" antenna and 4 inch stubby - $22

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached. $5

Belt clip for TR-2400 HT, complete with hardware - $8

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Kenwood SMC-30 speaker mic
Fits the TH-21/31/41 series of HTs, plus some others.
It has a 3 conductor 3.5 mm plug, and a 2 conductor
2.5 mm plug. $18

Wrist strap - I think it fits most Kenwood (and maybe other) HTs - $4

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Prices do not include shipping from Florida.

Thanks.

4258. Hand microphones, touchtone mics, and HT speaker mics FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-02-03 14:47:44 UTC
From: Ken Simpson, W8EK
Topic: 4258 Message: 4258

Hand microphones for sale:

All work 100%, and look very nice.

Touchtone (DTMF) mics

Drake 1525 EM Touchtone Microphone
This is the mic that was used to add a touchtone pad
to a lot of rigs in the 70s and 80s. Normal hand mic
from the front, but has a touchtone pad on the back.
Four pin mic plug. It is in good shape and includes
paper work. $ 40

KDK TM-2 touchtone microphone
12 digit DTMF pad on the front, with up and down switches
I think this came from a KDK 2033, but am fairly certain it
will work with all of the KDK rigs with a 6 pin mic plug,
which is on this microphone. $40

Data Signal "Data-Coder 5" touchtone mic
This mic has a 12 digit touchtone (DTMF) pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $40

"Touchmatic" touchtone microphone
With 8 pin plug wired for Kenwood. $40

Regular hand microphones for sale:

Yaesu hand microphone
I don't know the number on this one, but it is the microphone
that was used with the FT-101 series of HF transceivers. It
has a 4 pin connector on it, works fine, and looks extremely
good. $35

Yaesu YM-40, 600 ohm impedance hand microphone
This one has a round 8 pin connector, and has up and
down buttons on it, in addition to a lock button on the
back, and the normal PTT switch.
It works fine and looks fine also. $35

Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

HT speaker microphones For Sale:

Icom HM-9 speaker microphone
This is the speaker mic that was used with all of the
early Icom HTs, including the IC-2 AT, IC-02-AT, IC-2G AT,
and many others. It also works with many non Icom HTs.
It has a 2.5 mm and 3.5 mm plug. $18

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HTs. $18

Kenwood SMC-30 speaker mic
Fits the TH-21/31/41 series of HTs, plus some others.
It has a 3 conductor 3.5 mm plug, and a 2 conductor
2.5 mm plug. $18

Radio Shack 19-310 speaker microphone
Has 3.5 mm and 2.5 mm plug; fits most Radio Shack
HTs, but also many Icom, Kenwood and Yaesu HTs. $20

AEA "HTM" microphone
This is an external microphone to use with the
AEA series of HTs. It is in nice shape for $25

Prices do not include shipping from Florida.

Thanks.

4264. Wanted KPC-3 Plus TNC

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-02-10 00:48:02 UTC
From: wb4u2002
Topic: 4264 Message: 4264

Hello All,

I am wanting an Kantronics KPC-3 Plus packet TNC w/128 Kb
memory, manual etc. I would like to trade for this TNC. I have a number
of items that are of equal value. I would also prefer to meet someone
halfway for the trade if you are close enough. Anyone out there with a
KPC-3 Plus they no longer need/want
and interested in a trade?

Contact me at wb4u@wrknradio.com and we will go from there.

BTW I may be intrested in other units so let me know about those also,
I may want a couple of units.

Johnny WB4U

From: Mike Short
Topic: 4263 Message: 4265

How much power do you need it to handle? What kind of antenna do you have?
How long is it? How high is it? What bands do you want to work?
I have an older Dentron Tuner that works well.

Mike

FOR SALE: Heath HO-10 Monitor Scope

This is a later model monitor scope that looks like new.
It turns on but I couldn't get a trace, so it may be that
I am just not using it correctly. Could be a bargain for
someone who knows how to get it going.

All complete and looks like it was never used.

Available for $49.00 plus shipping

Picture and details at:
http://www.af4k.com/miscpart.htm

Date: 2007-02-15 02:34:14 UTC
From: Bry Carling
Topic: 4273 Message: 4273

FOR SALE:

100 kHz Crystal Calibrator.

This marker generator is homebrew, but works very nicely,
since it has outputs on both 100 kHz and 500 kHz.
(switchable). The output is via a BNC connector.
Comes in a small black cabinet, measuring 6" X 4" X 2"

Power requirements - two C cells or external 3V DC power
supply.

Available for $21.00 plus shipping.

4274. HT rubber duck and telescoping antennas FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-02-17 14:16:05 UTC
From: Ken Simpson, W8EK
Topic: 4274 Message: 4274

For Sale:

Rubber Duck and telescoping antennas for your HT.

All are for 2 meters, with BNC connectors, unless
stated otherwise.

Larsen "Half Wave" KulDuck Gain antenna
Rubber duck antennas do not really have gain, but
compared to a standard rubber duck, this one has
about 3 db gain. About 10 inches long. $15

Larsen KD4-VHF2 Standard KulDuck antenna
Regular size about 7 inches long. $14

AEA "Hot Rod" Full 1/2 wave telescoping antenna
Actual gain antenna for 440 MHz. It has a very good
SWR, and really appreciable gain. $18

5/16 inch threaded, like used by Motorola and others - $10 each
Regular - 6.7 inches long
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long - $10

PL-259 connector - 6.5 inches long - $10
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long - $10
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Aftermarket stubby, 3.5 inches long - $10
Kenwood RA-8 stubby, 4 inches long - $12
Kenwood regular, 6.6 inches long - $10
Combo set of long 11.5 inch "gain" antenna and 4 inch stubby - $25

Prices do not include shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 1132 Message: 4278

ARRL Handbooks for sale:

Condition varies, and is described as accurately as possible.

These are in the smaller format (6 1/2 by 9 1/2 inch size).

1947 - 24th edition
This one is very used, as it should be at 60 years old. The spine is taped, and the cover is partially loose from the binding. This is a very good, usable handbook, but it is not collector quality. There are 150 pages of ads in the back, which show a lot of vintage equipment, tubes, parts, etc. $20

1964 - 41st edition
Extremely good condition. Close to new. Pages are NOT yellowed, cover and spine are in great shape, and all pages are intact. Collectable quality for sure. $35

1968 - 45th edition
Spine is taped, and cover is worn. It shows use, but all pages are intact and good. $10

1969 - 46th edition
Spine taped, and cover is worn. Pages are intact and good. $15

1971 - 48th edition
Spine is faded, pages are intact, and cover is good. Some pages have yellowed, and some have not. $ 14

1973 - 50th edition
Very nice condition throughout; some pages have yellowed. $ 14

1977 - 54th edition
Nice condition. Slight crease on cover $ 10

1978 - 55th edition
Extremely nice condition. $ 12

The following are in the larger 8 1/2 by 11 inch format:

1981 - 58th edition
Spine is faded, and there is a bit of dirt on the cover. Otherwise it is in great shape. $14

1983 - 60th edition
Great condition; no problems. $ 16

1985 - 62nd edition
Like new. $18

1986 - 63rd edition
Close to new condition, although some pages have
yellowed slightly. $18

1993 - 70th edition - Hardbound
Like new, with a very slight yellowing of some pages. $ 20

1996 - 73rd edition
Like new, with disk. $18

2000 - 77th edition
Like new. $20

Prices do not include shipping from Florida.
Shipping via "Media Mail" is inexpensive.

Thanks.

Want to listen to my FRG7700 rx again after many years. Unfortunately, can not locate my FRT7700 (tuner). Must have gotten lost or misplaced during moves.
Therefore, anyone have an FRT7700 for sale?
I also can not locate the notch filter. (Has slide switch allowing LW, MW or SW reception. Mounted to top of FRG7700 with a gray metal bracket.) Was this FT55? Anyone also have one of these for sale?
Shipping to VA.
Please let me know.

4290. Icom IC-229 H, 2 m FM xcvr FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-03-03 13:07:30 UTC
From: Ken Simpson, W8EK
Topic: 4290 Message: 4290

Icom IC-229 H, 2 meter FM transceiver For Sale:

The IC-229 H has about 50 Watts output, down to about 5 W
in 4 steps, and a good receiver. Of course it has memories,
scan, and all sorts of bells and whistles, including a subaudible
tone (PL) encoder built in. It uses the same heavy duty power
cord with the 6 pin molex connector that is used on many HF rigs.

This particular unit works 100%, and looks really great. It was
used on packet, so no longer has a mic or mobile bracket with
it. The display lights are out. Both operating and service
manuals are included on CD. If you need a high power 2 meter
rig, this one would do the job for you.

$95 plus shipping from Florida.

Thanks.

4297. TenTec HF xcvr and other TenTec items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-03-10 20:10:19 UTC
From: Ken Simpson, W8EK
Topic: 3411 Message: 4297

TenTec items for sale:

TenTec 561 Corsair II, HF transceiver
Some people consider the Corsair II to be the best rig that
TenTec made, prior to the Orion. It is not a synthesized rig,
so phase noise is basically nonexistent. This means that it
has a really superb receiver that is far better than most of the
Japanese rigs. It covers 160 thru 10 meters, including the
WARC bands, and features such things as pass band tuning,
Jones filter, variable band pass filtering, notch filter, etc. A
keyer is built in for CW, and of course it has the great QSK
that TenTec is famous for.
This particular unit is about as nice as you will find. Electrically,
everything works 100%. It had the PTO rebuilt about a year ago.
It was back to the factory for a complete health check up about
a year ago as well. Cosmetically, it is close to perfect. There
is a very small scratch on the top near the plastic end trim. No
other scratches that I can find. Manual is included for $550.

TenTec 299 Voice synthesized frequency read out
This unit is used with the TenTec Omni 546 series A, B, C,
some Argonauts, Corsair, and others. It will work with
other rigs (such as the Triton), with minor mods to get
the right connections.
The 299 is used primarily for blind hams who can not read the
frequency readout on the transceiver. By pushing a button, it
will "speak" the frequency (to tenth of a KHz). A front panel
switch permits selection of the entire frequency, or you can
eliminate the MHz, and give only the KHz. There is also a
volume control on the front panel.
Of course it can also be used to give a "voice digital readout"
to any rig with an analog dial, or used a normal frequency counter.
This particular unit is in great shape electrically. Cosmetically
it looks very nice, but has some very minor wear. $ 190

TenTec hand microphone
There is no model number on this mic, but I think it is a model
700 C; at least that is what the paper work says. It has the 4 pin
connector on it, works fine, and looks like new. $35

Prices do not include shipping from Florida.

Thanks.

4307. Coaxial antenna switches FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-03-17 17:00:06 UTC
From: Ken Simpson, W8EK
Topic: 3346 Message: 4307

Coaxial antenna switches for sale:

MFJ 1704 Coax Switch
This coax switch will switch 4 antennas, and also includes
a lightning protection "pill" in its heavy die cast housing. It
is very heavy duty, and features stripline construction for
good impedance matching at higher frequencies, and gives
50 db isolation, even up thru 500 MHz. Unused antennas
are grounded and a fifth position grounds all antennas.
This one works fine and looks like new. $55

MFJ 1702 B Coax Switch
Switches 2 antennas. Unused position IS grounded.
A third position grounds both antennas.
This coaxial antenna switch is in a heavy diecast
housing that utilizes "stripline" construction to keep
the impedance very close to 50 ohms. It also
permits good operation at higher frequencies.
This one works 100% and looks great also. $ 20

B & W Model 550 A coax switch
This model will switch up to 5 antennas, and does NOT
ground unused antennas. It has SO-239 connectors
on the sides, with the coax coming out like spokes of
a wheel. It works fine. $ 28.

B & W Model 550 A coax switch
As above, but includes a mounting bracket for $ 30.

B & W Model 55 A - 2
This is a 2 position coax switch, similar to the 550 A
(above), but only switches 2 antennas. The unused
position is not grounded. SO-239 connectors come
out like spokes of a wheel. It works fine and looks
fine also. $20

AmComm JV-104 coax switch
Switches 3 antennas, with SO-239 connectors. It is in
a nice black rectangular box about 4 x 3 x 3 inches in
size. Very nice condition. $25

Pace 5621, 4 position Coax Switch
This is in a 4 x 3 x 2 rectangular box, with 4 switched SO-239
connectors. Unused positions are NOT grounded. It works
fine, but cosmetically is not as nice as some. $8

Prices do not include shipping from Florida.

Thanks.

4308. Kenwood TM-G707 dual band xcvr, plus many other Kenwood items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-03-17 12:43:53 UTC
From: Ken Simpson, W8EK
Topic: 4308 Message: 4308

Kenwood TM G707 A dual band FM transceiver for sale:

The G707 is a very sophisticated dual band rig. It covers
both the 2 meter and 440 MHz bands (plus receives outside
the ham bands, so it is useful for weather frequencies, etc.),
and has three power levels, of about 50, 20, or 5 watts. It
has almost 200 memories, so you won't run out! Of course
subaudible tones, and scan features are included, as is a
cross band repeater (this means you can transmit on one
band and receive on the other at the same time). To put it
another way, this radio will do about anything one can think
of, and probably a whole lot more. It also features a very
large LCD display with a nice amber color back light. It is
also possible to separate the main unit from the "control
head" for remote mounting.

This particular rig has had almost no use. It is in its original
box, with manual, mobile bracket, microphone, power cord,
and even the little bag of screws and extra fuse that it came
with originally. There is not a scratch on the rig, and everything
works 100%. It is a really terrific rig! $195

Other Kenwood items:

Accessory items for Kenwood TR-2400 HTs

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Belt clip for TR-2400 HT, complete with hardware - $8

Wrist strap - I think it fits most Kenwood (and likely
other) HTs - $4

Battery charge cable for Kenwood TR-2400 HT
To charge battery outside of HT; uses original
charger. It is in good shape, and works fine. $3

Antenna adapter to fit the BNC connector on the HT and
provide an SO-239 connector that will permit a PL-259 to
be attached. This can be used with any HT that has a BNC
connector. $5

Original Operators manual for Kenwood TR-2400 - $15

Accessory items for Kenwood TW-4000 For Sale:

Kenwood TU-4 C
Subaudible (PL) encoder for Kenwood TW-4000
This unit provides separate tones for the VHF (2 m) portion
and the UHF (440 MHz) portion. With paper work, hardware,
etc. $55

Kenwood MC-48, touchtone (DTMF) microphone.
Round, 8 pin connector, will go with any Kenwood rig
taking this kind of connector. Has UP and DOWN
switches, along with 16 digit touchtone pad. It is often
used on 2 m / 440 MHz rigs that do not have touchtone
built in, but can also be used on HF rigs on 10 m
FM. It works fine and looks great also. $ 55

Original Operators manual for Kenwood TW-4000 $15

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can
be plugged into a Kenwood rig with the round 8 pin
connector. Like new. $20

Accessory items for Kenwood TH-21 / 31 / 41 series HTs:

Kenwood TU-6 PL encoder
Produces subaudible tones. With paper work. $30

Kenwood PB-21 battery pack for TH-21/31/41 series HTs
This battery pack does not hold a charge well. Physically it is
fine, but it needs a new "insert". $12

PB-21 H
As above, but heavy duty pack; needs insert. $14

Wrist strap - fits most Kenwood HTs $4

Kenwood SMC-30 speaker microphone
Fits the TH-21/31/41 series of HTs, plus some others. $18

Original Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E
HTs for 440 MHz, 220 MHz and 2 meters $10

Special Rubber Duck antennas for Kenwood TH-21 series
2 meter HTs with the threaded connector
Aftermarket stubby, 3.3 inches long $10
Kenwood RA-6 regular, 6.6 inches long $10

4309. Yaesu VX-2 compact dual band HT and accessories FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-03-18 13:27:54 UTC
From: Ken Simpson, W8EK
Topic: 4309 Message: 4309

For Sale:

Yaesu VX-2 dual band HT
This is a very nice, small HT that will transmit on the 2 meter and 440 MHz bands, and receive almost "DC to light". Obviously there are a few holes in the DC to light receive coverage, but it will receive AM on the AM broadcast band, up thru 30 MHz (so it covers the short wave bands), 6 meters, aircraft, VHF and UHF TV bands, commercial FM band, and most everything else up to 999 MHz, with cell phone frequencies blocked. Transmit power can be up to 3 W, depending on power source. It is about 1.5 W with the internal Lithium Ion battery.

This HT also has lots of memories. It has 900 "standard" memories, 100 "Frequency skip memories", plus several other special types, for a total of something like 1200 memories. You will not run out of memories with this HT! Subaudible (PL) tones are included, as is several scan modes. This HT will do a lot, all in a very small package.

This particular unit is in very nice condition. I can not find a scratch on it, and all lettering is very nice, and LCD display is clear with no defects. Basically, it looks very close to new. Everything works 100%. I never received a belt clip with it, so it does not have one, but one is not needed, as it slips easily into your shirt pocket. Wrist strap is included.

It includes the rubber duck antenna, a good Lithium Ion battery, wall wart charger which charges the battery in about 2.5 hours, wrist strap, paper work, and of course the HT itself. $120

Accessory items for the VX-2:

Yaesu CSC-90 protective case - like new - $18

Yaesu FNB82LI - spare Lithium Ion battery pack
1000 mahr capacity. It holds a charge fine and works like new. $25

"Aftermarket" spare Lithium Ion battery pack
1000 mahr capacity. It also holds a charge fine and works like it was new. $15

"Aftermarket" desk charger
This permits one to charge a spare battery outside of the HT, while the HT is in use. It still takes about 2 hours to

charge a battery, but gives added flexibility. It includes a separate wall wart supply which plugs in to the desk charger. It works fine, and looks close to new. $20

Accessory for Yaesu VX-1 HT:

Yaesu FBA-20 "Battery case" for use with Yaesu VX-1 HT
This unit permits one to use a single AA battery (alkaline, NiCad, NiMH, or whatever) in the VX-1 HT. It has smart circuitry in it to increase the voltage to 3.8 V as required by the HT. It is idea for use as an emergency spare. This one has been tested, and then put back in to its blister package, so it is basically new. $18

Prices do not include shipping from Florida.

Thanks.

FOR SALE:

EIMAC 4PR60 tetrode transmitting tube.
This is a similar tube to the 4-65 but pulse rated, and
lower interelectrode capacitance. 4-pin base. Would make
a neat glowbug transmitter, or a conversation piece.
Available for $5.00 plus shipping.

100 amp hash filter for 12V DC mobile radio use. Large terminals,
Heavy duty. Available for $5.00 plus shipping.

100 watt TVI filter with SO239 connectors, clean - made
by Realistic. Cutoff at 30 MHz. AVailable for $5.00 plus shipping.

Model BC457A mil surplus transmitter 4-5.3 Mc.
Two 1625 finals - all tubes, crystal etc., complete.
Reduced to $35.00 plus shipping

BC221 Frequency Meter - reduced to $35.00 plus
shipping.

10 ohm, 300 Watt NON-INDUCTIVE resistors.
Great for RF termination or power testing. These
will make a very high-powered RF or audio load.
QTY 12 available for $10.00 each plus shipping

11 Pin Octal style Plugs. These are brand new,
and look just like a male octal connector,
chassis mount. Same size only with eleven pins.
Black plastic, male. NOTE - these are NOT tube sockets.
QTY 2 available for $4.00 each plus shipping.

15-Pin Cinch-Jones female connector as used on
Multi Elmac and several other radios - Cable end or
chassis style.
Available for $7.00 plus shipping.

Power resistors - 20 KILOHMS at 10 Watts, 5% -
$3.00 each.

Much easier by using software.. Comes with mic,bracket,power cord,copy of manual. Offered for sale in the USA only! Asking $250.00, free shipping to the lower 48 states! Contact: N2TMT@...

4313. Kenwood TH-21 AT, 2 meter HT and many accessories FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-03-30 22:08:49 UTC
From: Ken Simpson, W8EK
Topic: 4313 Message: 4313

For Sale:

Kenwood TH-21 AT, 2 meter HT

Fully synthesized, small HT, about the size of a deck of cards. Thumbwheel selection of frequency. The + or - offset is selected by a switch on the back, as is high and low power. It is very easy to use, and has about 2 W output in high power and 1/2 W in low power. Touch tone (DTMF) pad is on the front.

This one is in good condition. It includes rubber duck antenna, good PB-21 H high capacity battery (about 3 times the capacity of a standard PB-21 pack), charge cord, and manual for $40.

Accessory items for Kenwood TH-21 / 31 / 41 series HTs:

Kenwood DC-21 DC adapter
Converts 13 V DC to 7.2 V DC that can be used by the HT. It includes an adapter pack that slides on to the HT and the actual converter unit that plugs into a cigarette lighter. It works fine. Paper work is included for $22.

Kenwood BT-2 "empty" battery pack
This is the "shell" battery pack that will take six AAA cells. You can fill it with alkalines, NiCads, or whatever. It is almost like new. $25

Kenwood TU-6 PL encoder
Produces subaudible tones. With paper work. $30

Kenwood PB-21 battery pack for TH-21/31/41 series HTs
This battery pack does not hold a charge well. Physically it is fine, but it needs a new "insert". With paper work for $10

PB-21 H
As above, but heavy duty pack; needs insert.
Includes paper work for $14.

Wrist strap - fits most Kenwood HTs $4

Kenwood SMC-30 speaker microphone
Fits the TH-21/31/41 series of HTs, plus some others. $18

Special Rubber Duck antennas for Kenwood TH-21 series 2 meter HTs with the threaded connector
Aftermarket stubby, 3.3 inches long $10

Kenwood RA-6 regular, 6.6 inches long $10
Combo set of long 11.5 inch "gain" antenna and 4 inch stubby $22

Prices do not include shipping from Florida.

Thanks.

4317. 2 m and 440 MHz mobile antennas FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-04-21 20:55:38 UTC
From: Ken Simpson, W8EK
Topic: 4317 Message: 4317

For Sale:

VHF (2 meter) and UHF (440 MHz) mobile antennas and mounts:

Larsen NLA-150 coil only for 2 meters
For use with a 5/8 wave (approx 4 foot) antenna.
Fits the Larsen NLA mount for 3 db gain. $11
-
The whips for these are hard to ship, and it is best to pick
up a whip at your local Radio Shack, or similar store. I do
have some whips, if you need them. $6

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
The whip can be cut for 2 meters, 220 MHz, or 450 MHz
bands. Good condition for $7.
-
Larsen Q
Fits a 5/16 inch stud. The quarter wave whip can be cut
for 2 meters, 220 MHz, or 440 MHz bands. Great condition. $6

Larsen NMO-Q
Precut for 450 MHz. New, still in bag. $8

Larsen NLA-450 coil and "stacked" whip
This fits the Larsen NLA mount, and has about 5 db gain
on the 70 cm band. It includes the coil, and the high gain
stacked whip. Nice condition. $14

Larsen OM-450 whip, coil and mount
This is made to mount on a flat surface, and requires 3
mounting bolts, plus a hole in the center for the coax.
Includes "stacked" whip for 5 db gain on 450 MHz. $20

Mobile antenna mounts for sale:

NMO-MM Magnetic Mount
Magnetic mount for any of the NMO antennas (Larsen, Motorola,
and many others). Includes coax. Very good condition. $18

Magnetic mount with coax
Standard 3/8 inch 24 thread, about 3 inches in diameter, and
black in color. Suitable for 2 meter, 440 MHz, or 6 meter antenna.
Very good condition. $15

HyGain TLM Trunk Lip Mount
This trunk lip mount has a 5/16 inch stud on it.

Ideal for 1/4 wave antenna. With coax for $14

Prices do not include shipping from Florida.

Thanks.

4318. Mounted CW key and cables FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-04-21 17:34:07 UTC
From: Ken Simpson, W8EK
Topic: 4318 Message: 4318

CW key for sale:

Mounted straight key
This is a clone of a J-38 straight key complete with ball bearings. It looks and works like new.
It is mounted on a very nice piece of Oak wood. This is real Oak, and not particle board that has been covered. The Oak has been finished, and has a bevel around the sides of it on the top. The bottom is finished, and has rubber feet to prevent it from walking across the table. It really looks extremely nice. $55

Other CW items:

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo connector on the end, like used by most rigs. It looks great. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch phone plug on it, as is used with a straight key. $5

Prices do not include shipping from Florida.

Thanks.

CW items for sale:

MFJ 422 B electronic keyer
This keyer includes sidetone, and has adjustments for
volume, tone frequency, and weighting, as well as speed.
It will key either positive or negative voltages, and is
powered by an internal 9 V battery, or external 5 to 9
volt supply.
It is made to go on the back of a Bencher Paddle.
It works 100%. With paper work for $45.

Bencher BY-1 Iambic Paddle.
True Bencher, and not the MFJ clone. This has the
black base, with chrome parts. It looks like new
(no scratches or blemishes of any sort), and works
the same. $65

MFJ 564 B Iambic Paddle
This is MFJ's "clone" on the Bencher BY-1. It has the
black base with chrome parts, works great, and looks
like new. $45

Buy either Iambic Paddle with the 422 keyer, and take $5 off.

Mounted straight key
This is a clone of a J-38 straight key complete with ball
bearings. It looks and works like new.
It is mounted on a very nice piece of Oak wood. This is
real Oak, and not particle board that has been covered.
The Oak has been finished, and has a bevel around the
sides of it on the top. The bottom is finished, and has
rubber feet to prevent it from walking across the table.
It looks extremely nice. $55

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8

Cable for paddles
As above, but with 1/8 inch mini stereo plug. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5

Prices do not include shipping from Florida.

Thanks.

4338. FS: Stancor P-4004 Power Transformer

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-05-05 15:06:10 UTC
From: Bry Carling
Topic: 4338 Message: 4338

FOR SALE:

STANCOR P-4004 upright power transformer with 6" flying leads.
Color code chart atttached to end bell.
400 - 400V AC rated for 175 mA DC
50V bias winding
5V CT at 3A
QTY 2 X 6.3V CT at 2.5A
2.5V at 1.75A
Primary has 107 and 117V AC taps

Available for $22.00 plus shipping.

4339. Microphones FS - several different types

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-05-05 16:22:03 UTC
From: Ken Simpson, W8EK
Topic: 4339 Message: 4339

Microphones for sale:

All work 100% and look very nice unless stated otherwise.

Touchtone (DTMF) mics

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone (DTMF) pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $40

"Touchmatic" touch tone microphone
Regular low Z mic, with a 12 digit touch tone pad and an
8 pin plug wired for Kenwood. Nice condition. $40

CES Model 630 touch tone microphone
This mic has a 12 digit touch tone pad on the front, with a
regular Low Z hand microphone. Round 6 pin mic plug. $40

CES "Micropad" touch tone microphone
No model number on this one, but it has a 12 digit pad on the
back. Round 8 pin connector wired for Kenwood. $40

Regular hand microphones:

Yaesu YM-40, 600 ohm impedance hand microphone
This one has a round 8 pin connector, and has up and
down buttons on it, in addition to a lock button on the
back, and the normal PTT switch.
It works fine and looks fine also. $35

Azden PCM-463 A hand microphone
This hand mic had up down buttons on the top, with an M1
call and PTT button on the side. It works with the Azden
PCS-5000, and maybe others. It has a round 8 pin connector
wired for Azden, and is in nice shape. $30

Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

HT speaker microphones For Sale:
All work 100% and look fine also.

Icom HM-9 speaker microphone
This is the speaker mic that was used with all of the
early Icom HTs, including the IC-2 AT, IC-02-AT, IC-2G AT,
and many others. It also works with many non Icom HTs.

It has a 2.5 mm and 3.5 mm plug. $18

Radio Shack 19-310 speaker microphone
Has 3.5 mm and 2.5 mm plug; fits most Radio Shack
HTs, but also many Icom, Kenwood and Yaesu HTs. $18

Kenwood SMC-30 speaker mic
Fits the TH-21/31/41 series of HTs, plus some others.
It has a 3 conductor 3.5 mm plug, and a 2 conductor
2.5 mm plug. $18

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HTs. $18

AEA "HTM" microphone
This is an external microphone to use with the
AEA series of HTs. It is in nice shape for $25

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can
be plugged into a Kenwood rig with the round 8 pin
connector. Like new. $20

Prices do not include shipping from Florida.

Thanks.

4340. 2.45GHz ISM BAND Antenna

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-05-05 07:55:46 UTC
From: Indonesia
Topic: 4340 Message: 4340

Model NEW
Patents No: 10-0713159-00-00.

2.45GHz ISM BAND Antenna
Impedance 50 Ohms
Antenna gain: 8dBi
Frequency
1.9 GHz to 3.1GHz (VSWR Under1.5)
2.45GHz(VSWR1.07)
Broad band turned antenna
Wide HOR beam widths 300 Degrees /VER beam widths 60 Degrees
Omni directional Antenna gain: 5dBi / Beam widths 360 Degrees

3.6GHz Antenna
Impedance 50 Ohms
Antenna gain: 8dBi
Frequency
2.9 GHz to 4.3GHz (VSWR Under1.5)
3.6GHz(VSWR1.05)
Broad band turned antenna
Wide HOR beam widths 300 Degrees /VER beam widths 60 Degrees
Omni directional Antenna gain: 5dBi / Beam widths 360 Degrees

5.8GHz ISM BAND Antenna
Impedance 50 Ohms
Antenna gain: 8dBi
Frequency
4.8 GHz to 6.9GHz (VSWR Under1.5)
5.8GHz(VSWR1.11)
Broad band turned antenna
Wide HOR beam widths 300 Degrees /VER beam widths 60 Degrees
Omni directional Antenna gain: 5dBi / Beam widths 360 Degrees

CDMA/GSM Low Band 900MHz Antenna
Antenna gain: 8dBi
Impedance 50 Ohms
Frequency
750 GHz to 1.5GHz (VSWR Under1.5)
830MHz to 960MHz(VSWR1.08)
Broad band turned antenna
Wide HOR beam widths 300 Degrees /VER beam widths 60 Degrees
Omni directional Antenna gain: 5dBi / Beam widths 360 Degrees

CDMA/GSM High Band 1.9GHz Antenna
Impedance 50 Ohms
Antenna gain: 8dBi

Frequency
1.53 GHz to 2.3GHz (VSWR Under1.5)
1.84GHz to 1.96GHz(VSWR1.08)
Broad band turned antenna
Wide HOR beam widths 300 Degrees /VER beam widths 60 Degrees
Omni directional Antenna gain: 5dBi / Beam widths 360 Degrees

920MHz ISM BAND Antenna
Impedance 50 Ohms
Antenna gain: 8dBi
Frequency
770MHz to 1.17GHz (VSWR Under1.5)
920MHz(VSWR1.1)
Broad band turned antenna
Wide HOR beam widths 300 Degrees /VER beam widths 60 Degrees
Omni directional Antenna gain: 5dBi / Beam widths 360 Degrees

UHF TV CH BAND Antenna
Antenna gain: 8dBi
Frequency
530 MHz to 880MHz (VSWR Under1.6)
UHF TV Broad band turned antenna
Wide HOR beam widths 300 Degrees

UHF 435MHz Amateur BAND Antenna
Impedance 50 Ohms
Antenna gain: 8dBi
Frequency
370 MHz to 530MHz (VSWR Under1.5)
435MHz(VSWR1.08)
Broad band turned antenna
Wide HOR beam widths 300 Degrees /VER beam widths 60 Degrees
Omni directional Antenna gain: 5dBi / Beam widths 360 Degrees

UHF 1.2GHz Amateur BAND Antenna
Impedance 50 Ohms
Antenna gain: 8dBi
Frequency
960MHz MHz to 1.48GHz (VSWR Under1.5)
1.28GHz(VSWR1.07)
Broad band turned antenna
Wide HOR beam widths 300 Degrees /VER beam widths 60 Degrees
Omni directional Antenna gain: 5dBi / Beam widths 360 Degrees

4341. Antenna rotor control boxes FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-05-05 19:28:33 UTC
From: Ken Simpson, W8EK
Topic: 4341 Message: 4341

For Sale:

Rotor control box for CDE TR-44

This control box looks just like the one designed for the
Ham M rotor (black squarish box, with large meter in the
middle, and control lever at the bottom), but is made for
the TR-44 lighter duty rotor. This is the control box that
uses only 7 wires, since it has no electrical brake.

This particular control box works fine, and looks very nice.

Paper work is included for $45

Control Box for 8 wire CDE and HyGain "Ham" rotors:

This is the control box only that can be used on any of the 8 wire
Ham M, Ham II, Ham III, Ham IV, Ham V, or Tailtwister rotors. It
can also be used on the smaller CD-44, etc. This particular box
is the one with the meter on the left, and three buttons on the right
for rotor control. It has a metallic colored front panel with a light
goldish or bronze cast to it. The top of the box is black, and the
bottom is off white.

This particular control box works fine, and looks fine as well.

Paper work is included for $75

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

4344. FS: Tube Power Supplies

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-05-07 02:25:45 UTC
From: Bry Carling
Topic: 4344 Message: 4344

FOR SALE: Power Supplies

I had thought I was going to use these in some projects last year,
but eventually made other plans - so they are both being sold now:

1) Nice homebrew tube tuype power supply - 120V AC primary.
Outputs: 400V DC at 250 mA
Also has 6.3V AC at 3A, 5V at 1A
Uses an excellent Thordarson upright power transformer with
gray end bells. Also included are some large dropping and
bleeder resistors, on/off switch, fuse etc.
Has a 5U4GB rectifier tube and a large Thordarson choke.
The filter capacitor needs to be mounted (FP Tab type)
Dual 40 uF at 450WV DC rating.
Otherwise it is all complete and is in working condition.

Power transformer is about 50% larger than the ones in the
Heath power supplies, so no doubt this is good for 100-200 watts.
Dropping resistor taps marked for other outputs of:
300V DC, 180V DC, 135V DC, 75V DC - but these may still
need to be connected.

Available for $36.00 plus shipping.

2) G.E. Commercial Plate supply Model 4EPGB1
Output 3400V DC at up to 1 amp ICAS. Has 120V AC primary.
This is a heavy AC supply built for continuous duty
FM Service. Will deliver the goods for a QRO linear amplifier
in AM, CW, FM or SSB amateur service.
Large SNC type P5789 plate transformer with bridge rectifiers
produces 2500V AC at 1 Amp. and is made in Oshkosh, WI.
Has large filter choke model P5060. Filter capacitors were
mounted externally and are not included.
Dimensions: 19" X 7" standard rack mounting space by 8" deep.

Available for $145.00 plus shipping

73 - Brian, AF4K

4345. FS: Transformers, Parts etc.

Yahoo group: ham4sale (2007 — 2015)

From: Bry Carling
Topic: 4345 Message: 4345

FOR SALE:

AC Power Transformer - 120V AC Primary with 18V at 3.5 Amp
secondary.
QTY 1 available for $10.00 plus shipping

AC Power Transformer - 120V/230V AC Primary with secondaries
for
12V AC at 8 Amps OR wire for 24V AC at 4 Amps.
QTY 2 Available for $14.00 each plus shipping

TRIAD Filament Transformer - 120V/230V AC Primary with TWO
6.3V CT at 3 Amps secondaries. Beautiful gray upright design with
end bells.
QTY 1 available for $10.00 plus shipping

Filament Transformer - 120V AC Primary with 6.3V at 8 Amps
secondary.
QTY 1 available for $12.00 plus shipping

UTC choke... Type F-3416 - nice round, gray potted case with
4 mounting holes. I measure it at 0.062 Hy and 0.04 Hy
This is a tapped choke or autotransformer. Has 4 terminals.
Dimensions 3" tall X 2" diameter. Exc. condition.
QTY 1 Available for $4.00 plus shipping

NEW Rubber duck antennas for 450 MHz Band -
reduced to $2.00 each.
NEW Rubber duck antennas for 902 MHz Band -
reduced to $2.00 each.

TOWER WARNING SAFETY SIGNS...
Flexible heavy duty plastic. No metal - will not
rust or fade.
It loudly proclaims: WARNING - DO NOT CLIMB.
Available for $2.50 each

Lacing cord for wiring harnesses in homebrew equipment or
restoration of
older radio and electronic equipment.
Brand new - comes as a 250 yard spool, so should last for a long
time.
Available for $12.50 per spool plus shipping.

Tektronix BNC 10X attenuator 011-061 rated 75 ohms at 1/2 watt.
Great for reducing amplifier drive, using oscilloscopes with high
power

testing etc.
QTY 1 available for $5.00 plus shipping

Miller Radio Products 6164 Wave Trap in an I.F. can.
Adjustable 75 - 150 Mc. with two screw terminals.
Looks new - QTY 1 Available for $4.00 plus shipping

4349. ARRL Handbooks and many other ham publications FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-05-12 13:08:14 UTC
From: Ken Simpson, W8EK
Topic: 4349 Message: 4349

Many Ham Publications For Sale:

ARRL Handbooks:

These are in the smaller format (6 1/2 by 9 1/2 inch size).
They are vintage, and contain tube tables and other
vintage information not in the newer handbooks.

1947 - 24th edition
This one is very used, as it should be at 60 years old. The spine
is taped, and the cover is partially loose from the binding. This is
a very good, usable handbook, but it is not collector quality. There
are 150 pages of ads in the back, which show a lot of vintage
equipment, tubes, parts, etc. $20

1971 - 48th edition
Spine is faded, pages are intact, and cover is good. Some
pages have yellowed, and some have not. $ 15

1973 - 50th edition
Very nice condition throughout; some pages have yellowed. $ 15

1977 - 54th edition
Slight crease on cover $ 13

1978 - 55th edition
Extremely nice condition. $ 15

The following are in the larger 8 1/2 by 11 inch format:

1983 - 60th edition
Great condition; no problems. $ 16

1985 - 62nd edition
Like new. $18

1986 - 63rd edition
Close to new condition, although some pages have
yellowed slightly. $18

1993 - 70th edition - Hardbound
Like new, with a very slight yellowing of some pages. $ 20

1996 - 73rd edition
Like new, with disk. $18

Other publications:

ARRL "Specialized Communications Techniques
for the Radio Amateur" - 1975 - First Edition - $7

ARRL "RFI Book"
1999 - First Edition - like new - $12

ARRL "Understanding Amateur Radio"
1977 - $5

ARRL "Satellite Anthology"
1999 - 5th edition - like new - $11

ARRL "Weather Satellite Handbook"
1990 - 4th edition - like new - $11

ARRL "Your Gateway to Packet Radio"
1989 - 2nd edition - $6

ARRL Operating an Amateur Radio Station
1983 - 61st edition - $3

FCC "Interference Handbook"
1986 edition - $4

ARRL "Radio Amateurs Operating Manual"
1985 - 2nd edition - $8

ARRL FCC Rule book
1988 - seventh edition - $3
1989 - eighth edition - $3
2004 - 13th edition - $10

RSGB "Amateur Radio Operating Manual"
1982 - 2nd edition - $8
1991 - 3rd edition - like new - $10

ARRL Public Service Communications
1985 - Ninth edition - $3
1990 - no edition number listed - $3

ARRL Amateur Radio Field Resources Directory
1986-87 - First edition - $ 8

FCC "Interference Handbook"
1986 edition - $4

Nostalgic ham licensing materials for sale:
All books are in very good, or better, condition.

General Class Amateur License Study Guide
By W0XI; published by Sams
First Edition - 1979 - $ 3

Amateur Radio Advanced Class License Study Guide
By Jim Kyle and Ken Sessions; Tab Publishing

1975 - 2nd edition - $ 3

Amateur Radio General Class License Study Guide
By Jim Kyle and Ken Sessions; Tab Publishing
1975 - 2nd edition - $ 3

ARRL License Manuals
1979 - 77th edition - $3
1984 - 79th edition - $3
1984 - 80th edition - $3
Technician - 1989 - First edition - $3
General - 1989 - First edition - $3
General - 1997 - Second edition - $6
Advanced - 1985 - First edition - $3
Extra - 1988 - Third edition - $3

ARRL Technician Class Exam course
1993 - First Edition - $5

1981 Foreign Callbook - Good condition - $ 4

Electronic "Cross Reference" Data Books

These books are detailed reference books listing 1000's
and 1000's of different transistors, diodes, ICs and other
solid state devices, and crossing them to NTE or EGC
devices. They also include base diagrams and other
pertinent information. Obviously, different years have
different devices. All are in extremely good physical
condition, and are 8 1/2 x 11 inch paperbacks.

RCA SK Series - Spring 1972 - 96 pages - $9

Semiconductors by GE - 1974 - 74 pages - $ 5

Sylvania ECG - 1976 - 241 pages - $ 7

Sylvania ECG - 1979 - 352 pages - $9

EGC Industrial MRO - 1980 - 207 pages - $7

RCA SK series - 1981 - 409 pages - $9

ECG Master Replacement Guide - 1987 -
700 pages - $11

NTE Technical Guide and Cross Reference
1988 - 604 pages - $9

Archer Semiconductor Reference Guide
1988 - 290 pages - $6

The following Texas Instrument Data Books are available.

BiCMOS Bus Logic Interface - 1988 - $ 2

Boundary-Scan Logic IEE Std 1149.1 (JTAG)
5V and 3.3 V Bus interface and scan support Products
1994 - $ 3

LVDS Application and Data Handbook - 2003 - $ 3

The Voltage Regulator Handbook - 1977 - $ 6

Prices do not include shipping from Florida.
"Media Mail" is inexpensive.

Thanks.

4350. ARRL Handbooks and many other ham publications FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-05-12 13:07:41 UTC
From: Ken Simpson, W8EK
Topic: 4349 Message: 4350

Many Ham Publications For Sale:

ARRL Handbooks:

These are in the smaller format (6 1/2 by 9 1/2 inch size).
They are vintage, and contain tube tables and other
vintage information not in the newer handbooks.

1947 - 24th edition
This one is very used, as it should be at 60 years old. The spine
is taped, and the cover is partially loose from the binding. This is
a very good, usable handbook, but it is not collector quality. There
are 150 pages of ads in the back, which show a lot of vintage
equipment, tubes, parts, etc. $20

1971 - 48th edition
Spine is faded, pages are intact, and cover is good. Some
pages have yellowed, and some have not. $ 15

1973 - 50th edition
Very nice condition throughout; some pages have yellowed. $ 15

1977 - 54th edition
Slight crease on cover $ 13

1978 - 55th edition
Extremely nice condition. $ 15

The following are in the larger 8 1/2 by 11 inch format:

1983 - 60th edition
Great condition; no problems. $ 16

1985 - 62nd edition
Like new. $18

1986 - 63rd edition
Close to new condition, although some pages have
yellowed slightly. $18

1993 - 70th edition - Hardbound
Like new, with a very slight yellowing of some pages. $ 20

1996 - 73rd edition
Like new, with disk. $18

Other publications:

ARRL "Specialized Communications Techniques
for the Radio Amateur" - 1975 - First Edition - $7

ARRL "RFI Book"
1999 - First Edition - like new - $12

ARRL "Understanding Amateur Radio"
1977 - $5

ARRL "Satellite Anthology"
1999 - 5th edition - like new - $11

ARRL "Weather Satellite Handbook"
1990 - 4th edition - like new - $11

ARRL "Your Gateway to Packet Radio"
1989 - 2nd edition - $6

ARRL Operating an Amateur Radio Station
1983 - 61st edition - $3

FCC "Interference Handbook"
1986 edition - $4

ARRL "Radio Amateurs Operating Manual"
1985 - 2nd edition - $8

ARRL FCC Rule book
1988 - seventh edition - $3
1989 - eighth edition - $3
2004 - 13th edition - $10

RSGB "Amateur Radio Operating Manual"
1982 - 2nd edition - $8
1991 - 3rd edition - like new - $10

ARRL Public Service Communications
1985 - Ninth edition - $3
1990 - no edition number listed - $3

ARRL Amateur Radio Field Resources Directory
1986-87 - First edition - $ 8

FCC "Interference Handbook"
1986 edition - $4

Nostalgic ham licensing materials for sale:
All books are in very good, or better, condition.

General Class Amateur License Study Guide
By W0XI; published by Sams
First Edition - 1979 - $ 3

Amateur Radio Advanced Class License Study Guide
By Jim Kyle and Ken Sessions; Tab Publishing

1975 - 2nd edition - $ 3

Amateur Radio General Class License Study Guide
By Jim Kyle and Ken Sessions; Tab Publishing
1975 - 2nd edition - $ 3

ARRL License Manuals
1979 - 77th edition - $3
1984 - 79th edition - $3
1984 - 80th edition - $3
Technician - 1989 - First edition - $3
General - 1989 - First edition - $3
General - 1997 - Second edition - $6
Advanced - 1985 - First edition - $3
Extra - 1988 - Third edition - $3

ARRL Technician Class Exam course
1993 - First Edition - $5

1981 Foreign Callbook - Good condition - $ 4

Electronic "Cross Reference" Data Books

These books are detailed reference books listing 1000's
and 1000's of different transistors, diodes, ICs and other
solid state devices, and crossing them to NTE or EGC
devices. They also include base diagrams and other
pertinent information. Obviously, different years have
different devices. All are in extremely good physical
condition, and are 8 1/2 x 11 inch paperbacks.

RCA SK Series - Spring 1972 - 96 pages - $9

Semiconductors by GE - 1974 - 74 pages - $ 5

Sylvania ECG - 1976 - 241 pages - $ 7

Sylvania ECG - 1979 - 352 pages - $9

EGC Industrial MRO - 1980 - 207 pages - $7

RCA SK series - 1981 - 409 pages - $9

ECG Master Replacement Guide - 1987 -
700 pages - $11

NTE Technical Guide and Cross Reference
1988 - 604 pages - $9

Archer Semiconductor Reference Guide
1988 - 290 pages - $6

The following Texas Instrument Data Books are available.

BiCMOS Bus Logic Interface - 1988 - $ 2

Boundary-Scan Logic IEE Std 1149.1 (JTAG)
5V and 3.3 V Bus interface and scan support Products
1994 - $ 3

LVDS Application and Data Handbook - 2003 - $ 3

The Voltage Regulator Handbook - 1977 - $ 6

Prices do not include shipping from Florida.
"Media Mail" is inexpensive.

Thanks.

4351. Motorola R100 Cables

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-05-15 18:09:04 UTC
From: Craig
Topic: 4351 Message: 4351

Need the internal interconnect cables for a Motorola R100 Repeater. Thanks so much for your time . Craig

4352. Antique keyer, etc., question

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-05-19 00:13:43 UTC
From: Oasis3223@aol.com
Topic: 4352 Message: 4352

I have an old keyer, made by the Electric Eye Equiment Company. I have tried to find out something about the company and the keyer, but can find nothing on it. It has a "bug " type key on one end, and electronic circuitry on the another, covered by a black crinkle finish painted case Has two tubes, a small transformer, says it can run on AC or DC. I have a feeling it was made in the 1940's, not sure.

Another item, a type of crystal set?? Made by Radio-Ore labs, Massachusetts. Can't find radio-Ore labs, or anything about it. Looks like it may have been a kit? 3 inch long cloil, etc., mounted on a small board 3x5 inches.
Any info?
Anyone know anything about these or value?

Bob W0DXZ Iowa EN-41

4353. Cleaning shack

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-05-20 13:02:04 UTC
From: Oasis3223@aol.com
Topic: 4353 Message: 4353

Getting ready for retirement, decided I dont ned a lot of the stuff I have collected. Some works, some doesn't, not cosmetically perfect. Great for spare parts, or just a "working radio", not collector quality.

Knight Star Roamer, works , case scratched, $25

Hallicrafters S-53 A, rusty spots on case, worked, but now I think audio xfrmr might be shot, good for parts, or re build -replace xfrmr..$15

Hallicrafters SW-500, works but broken dial face. $10

National NC SW-54, repainted, poorly, but works,, $20

IC-451 432 all mode rig. Very good shape works fine, audio knob a bit scratchy, good radio, comes with 30W linear. $300

Heath SB-200 6 meter converted amp... last time I used it, heard a pop, a flash... turned it off immediatly. Put out 500w on 6M, musta blown something, no time to repair, but great rig. $300 , heavy to ship,,,

Heath AT-1 not tested, on shelf for years, broken knob, case not perfect. $100

4354. Low Pass TVI filters FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-05-19 19:45:16 UTC
From: Ken Simpson, W8EK
Topic: 3412 Message: 4354

Low Pass TVI filters For Sale:

Add one of these filters to your transmitter to prevent TVI or RFI.

B & W model 425 (Also know as FL-10/1500) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each end.
This is an older model that seems much heavier duty. It weighs
almost twice as much as the newer model, and looks like it
would take more power. It likely was made in the days that
plate modulated AM was the rule. Paper work included. $35

Drake TV-5240-LP low pass filter
This filter is different than the typical low pass filter. Instead
of being long and skinny, the enclosure is about 5 inches
square. It says "For use in 52 ohm line of transmitters operating
below 30 Mc." printed on it. It is rated for 1 KW AM, so should
be good for 3000 watts PEP SSB. $30

Nye Viking Low Pass Filter Model 020-001
This filter is rated at 2000 watts, with over 65 db of attenuation
above 57 MHz. In extremely nice condition for only $35.

Johnson Nye Viking 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut off
frequency of 45 MHz and 75 db of attenuation.
It is rated to take 1000 Watts of AM, or 5000 Watts
PEP SSB. It has SO-239 connectors on each end. $35

Alinco ELP-60 D LX low pass filter
For 50 ohm systems, with up to 500 watts of power.
This one has an SO-239 on one end, and about a 2 foot
length of coax and PL-259 on the other end. $30

Ameco LN-2 low pass filter
This filter is rated at 100 Watts, with an SO-239
connector on each end. $12

Prices do not include shipping from Florida.

Thanks.

I'm retired and going to be moving across country to smaller quarters and have a lot of stuff that I'd like to take with but reality is reality. I'm not under any pressure to sell and am interested in getting a fair price. I think the best way to get a fair price is to put it on eBay or some other auction. I guess I could have my own. I'm not intersted in low ball offers (and may not respond) or trades unless it's an older US made acoustic guitar by Martin or Taylor or maybe a US made 5 string banjo. This stuff has been in storage for 10 years or so and I won't have the time to do much testing, describing will take enough time. I've fired up few pieces in the last few months and all worked and I know some have problems, but I would say like Fair Radio in Lima, repairable. This is a partial list, more to come as I get into the storage. On most of the stuff I have a fair idea of its hamfest value which is generally lower eBay. I'll structure my eBay posting based on the most requests for a certain piece. email direct to:

I have an IFR 1500, with Options 01, 02, and 03.
Option #01 which is the Remote Control Interface
Option #02 which is the .05 PPM Frequency Standard
Option #03 which is the Battery Pack

Everything is operational on this IFR 1500.
It has Cable Fault Finder, Tracking Generator and Spectrum Analyzer.

It has the electronic digital attenuator.

Email me at hotlrv at hotmail dot com if you need pictures or if you have more questions.

Butch, KE7FEL/r

4371. AEA PK-232 MBX and other AEA items FS

Yahoo group: ham4sale (2007 — 2015)

From: Ken Simpson, W8EK
Topic: 4371 Message: 4371

AEA items For Sale:

AEA PK-232 MBX, multi-mode digital controller.
More than just a TNC. It will handle packet, RTTY, Amtor,
ASCII, CW, etc. This is a late one with the multi-colored
LEDs, and newer circuit board. I think it has the latest
firmware, as it includes Pactor in it. It works fine, and
looks very close to new. The large, inch plus thick
manual is included for $120.

AEA AC-4 "Wall wort" 12 V DC power supply at 1 amp.
Can be used with PK-232. $ 18

Cable to connect AEA packet interface to computer
Originally used with the AEA CP-1, to interface it to a
Commodore computer. One end has the 5 pin plug on
it that AEA uses. The other end has an edge connector
with 12 positions on each side. It is in close to new
condition. $10

AEA "HTM" microphone
This is an external microphone to use with the
AEA series of HTs. It is in nice shape for $25

Prices do not include shipping from Florida.

Thanks.

4372. Wattmeters / SWR Bridges FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-06-16 13:19:46 UTC
From: Ken Simpson, W8EK
Topic: 4372 Message: 4372

Wattmeters / SWR Bridges For Sale:

All have SO-239 connectors and are designed for 50 ohm systems.

Diawa CN-101 L cross needle wattmeter
It covers from 160 thru 2 meters, so band coverage is more
than many of them. It also reads either peak or average power,
switch selected. It has 3 scales of 15, 150, or 1500 watts. Of
course it reads SWR at the same time, since it has a cross
needle meter. It can be back lighted, if you apply 12 V to it.
This one works 100%, and looks like it just came out of the
box. Of course paper work is included. $80

This HF wattmeter will read either average or peak power.
Full scale readings are 20, 200, and 2000 watts. Of course
it will also read SWR.
It works fine, and looks close to new, with no scratches or
blemishes. $40

Micronta 21-520 A HF wattmeter with large dual meters
LARGE dual meters read both forward and reflected power.
This is an HF wattmeter that covers from 3 to 30 MHz, with
full scale power readings of 10, 100, and 1000 watts.
It has a remote sensor, with about 3 feet of cable to connect
to the meter itself.
This particular meter works fine, and looks very, very nice.
I can not find a scratch on it, and it is in its original box. $50

Heath AM-2
This HF SWR Bridge matches the DX-40, although it can
be used with any HF transmitter. It is about 8 inches
wide and 4.5 inches high, with the meter in the middle,
and a gray colored knob at each side near the bottom.
It covers 160 thru 2 meters and will handle full power.
This particular unit is in very good shape. The front panel
has no defects, but there are a few small scratches on
the top and sides. Paper work is included for $20.

Archer Field Strength / SWR meter
This is a fairly generic HF SWR Bridge. It is in a nice
sloping panel enclosure with a wood grain finish. $10

Prices do not include shipping from Florida.

Thanks.

4373. Antenna Baluns FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-06-17 13:17:40 UTC
From: Ken Simpson, W8EK
Topic: 3287 Message: 4373

Antenna Baluns For Sale:

A balun is made to convert the unbalanced coaxial
cable to a balanced antenna, such as a beam or dipole.
These are 1:1 baluns, which means that they will preserve
the impedance, instead of acting like a transformer.
They will handle full legal power.

HyGain BN-86 Balun
The case of the BN-86 is constructed so that one can use it
to hang a dipole or inverted V, or a U-bolt can be added to
attach it to the boom of an HF beam antenna.
This particular balun is in nice shape.
It includes the paper work for $40.

Hi Q VanGorden Balun
This one is used primarily as a center insulator for a dipole
antenna. It has an eye to hang it.
Good condition for $15.

Prices do not include shipping from Florida.

Thanks.

4374. TS950SD For Sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-06-18 04:52:08 UTC
From: jon_knodel
Topic: 4374 Message: 4374

I have a beautiful Kenwood TS950SD for sale. I am the second owner of this rig and have had it for some time now. For the last 2 years, it has been sitting, carefully covered up in the temperature controlled shack, not getting any use. I do not have the original boxes or the microphone for it. A W7FG manual is included with it. For shipping, I will have it professionally packaged to prevent damage. It is in very, very good condition and I hate parting with it, but it is definitely surplus to my needs. I have another 950 plus quite a few other HF rigs. So, this nice radio is going up for sale. I would like to get $1200 for it plus shipping. Please contact me at jknodel@... if interested. Thanks. 73.

4375. Rohn 25 tower for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-06-18 21:08:25 UTC
From: Art
Topic: 4375 Message: 4375

I have the following Rohn 25 tower for sale:

70 feet prime tower
10 feet salvageable, but bent
8.5 foot top section
rotor plate minus u-bolts

All guy wires, turnbuckles and hardware necessary for installation of a 100 foot tower (3 corner tie points, galvanized turnbuckles with extra guy wire).

The top section has a reducer in it for lightweight 1 1/4 inch tubing, the reducer can be used or removed. Does not include tower bolts.

Tower is rust free, rotor plate has some light rust.

$575 for the entire package.

Also have Ham 4 rotor, tailtwister rotor and 20 foot hardened aluminum mast-make offer if interested in other items.

Located in Waterville, Maine or you can pickup in Harvard, MA (near Ayer/Littleton/Boxboro/Leominster, MA) over the July 4 holiday (will transport for free if paid in advance).

Regards,

Art

4376. CW keyers, keys, and cables FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-06-23 11:51:41 UTC
From: Ken Simpson, W8EK
Topic: 4376 Message: 4376

CW items for sale:

MFJ 492 Menu Keyer
This can function as a normal CW keyer, but it is so much more. It has multiple memories that can be linked. It also has special "serial number" provisions for automatically incrementing the number on each QSO. Many different functions can be changed from the CW key, or from the menu functions on the front panel. This keyer is ideal for a contester, but can be used by anyone. It is quite intuitive to use. This one works 100%, and looks very close to new. With paper work for $75.

MJF 484 "Grandmaster" keyer
This keyer has four memories that may be linked, or used separately. Front panel controls include speed, weight, tone, volume, delay, and memory select, all in a nice egg shell and wood grain case. With paper work for $60.

MFJ 422 B electronic keyer
This keyer includes sidetone, and has adjustments for volume, tone frequency, and weighting, as well as speed. It will key either positive or negative voltages, and is powered by an internal 9 V battery, or external 5 to 9 volt supply.
It is made to go on the back of a Bencher or MFJ Paddle.
It works 100%. With paper work for $45.

Trac Electronic keyer
This is a CMOS keyer that operates from a 9 V battery. The current consumption is so low, a switch is not needed to turn it off. A speed control and a volume control are on the front panel. No memories in this one -- just a good functioning keyer. It works fine and looks really great. $25

Mounted straight key
This is a clone of a J-38 straight key complete with ball bearings. It looks and works like new.
It is mounted on a very nice piece of oak wood. This is real oak, and not particle board that has been covered. The oak has been finished, and has a bevel around the sides of it on the top. The bottom is finished, and has rubber feet to prevent it from walking across the table.
It looks extremely nice. $55

LaPine straight key
This a relatively generic straight key on an aluminum base.
Nothing fancy, but it works fine, and looks fine as well. $12

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8

Cable for paddles
As above, but with 1/8 inch mini stereo plug. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5

Prices do not include shipping from Florida.

Thanks.

Date: 2007-07-04 01:59:57 UTC
From: dwebb84120
Topic: 4384 Message: 4384

I have a Heathkit TWOER with original mike, manual and power cord. Mint condition inside and out,looks brand new. Crystal socket moved to back panel and uhf connector installed are the only mods.
I also have a Heathkit HW17A with original mike, manual and power cord. It is also in Mint condition with the FM module installed. The HW17A is a 30 watt input two meter double conversion AM transceiver. Both were bench tested 2 or 3 years ago and worked fine.
I would like $65.00 for the TWOER and $119.00 for the HW17A. OBO for both or either. I would also consider a trade for 6 meter gear of equal value, or a 10 meter to 6 meter transverter. Contact by e-mail.
Thanks, Doug Webb K7TLX

4385. Low Pass TVI Filters FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-07-03 21:18:01 UTC
From: Ken Simpson, W8EK
Topic: 4385 Message: 4385

Low Pass TVI filters For Sale:

Add one of these filters to your transmitter to prevent TVI or RFI.
All filters have an SO-239 connector for input and output, and are
designed for 50 ohm systems.

Bencher YA-1, high power, low pass filter
If you need a more heavy duty filter for the output of
your amplifier, this one is ideal. It will take full legal
power, and has at least 80 db signal attenuation at
TV channel 2. It is also in a very sturdy metal case
with SO-239 connectors on each end, and is a 50
ohm filter.
This one works great, looks close to new, and is in
its original box for only $60.

B & W model 425 (Also know as FL-10/1500) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each end.
Maximum attenuation is at 52 MHz, with at least 70 db across
the band.
This is an older model that seems much heavier duty. It weighs
almost twice as much as the newer model, and looks like it
would take more power. It likely was made in the days that
plate modulated AM was the rule. Paper work included. $35

Drake TV-5240-LP low pass filter
This filter is different than the typical low pass filter. Instead
of being long and skinny, the enclosure is about 5 inches
square. It says "For use in 52 ohm line of transmitters operating
below 30 Mc." printed on it. It is rated for 1 KW AM, so should
be good for 3000 watts PEP SSB. $30

Nye Viking Low Pass Filter Model 020-001
This filter is rated at 2000 watts, with over 65 db of attenuation
above 57 MHz. In extremely nice condition for only $35.

Johnson Nye Viking 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut off
frequency of 45 MHz and 75 db of attenuation.
It is rated to take 1000 Watts of AM, or 5000 Watts
PEP SSB. It has SO-239 connectors on each end. $35

Alinco ELP-60 D LX low pass filter
For 50 ohm systems, with up to 500 watts of power.
This one has an SO-239 on one end, and about a 2 foot
length of coax and PL-259 on the other end. $30

Ameco LN-2 low pass filter
This filter is rated at 100 Watts, with an SO-239
connector on each end. $12

Prices do not include shipping from Florida.

Thanks.

4387. Wanted: HF radio

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-07-15 19:10:45 UTC
From: Woody
Topic: 4387 Message: 4387

Hey all, I'm looking for another HF radio for a specific project, on the low end...

We're looking for something under $400.

I'd consider Motorola, Yaesu, Icom... like Micom X, the 840 and 718, or older kenwoods like a TS440sat depending on price.

MUST be in good condition, tested/working and guaranteed. References required, etc, etc...

Trades on motorola radios and related items available....
thanks!

4388. Antenna tuner, wattmeter, dummy load and coax switch in one box

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-07-14 12:38:58 UTC
From: Ken Simpson, W8EK
Topic: 4388 Message: 4388

For Sale:

Vectronics VC-300 DLP HF antenna tuner, peak reading
wattmeter, coax switch and dummy load, all in one box

The VC-300 DLP has a fairly large cross needle meter
for reading both forward and reverse power simultaneously,
and hence the SWR. It will read either average or peak
power, with scales of 30 Watts and 300 Watts. In addition,
a dummy load is included inside, as is a 4 to 1 balun. The
meter can be back lighted if you apply 12 V DC. The tuner
also has an antenna switch built in, that will switch between
"tuned" and "straight thru" operation, in addition to various
antennas. It will tune 160 thru 10 meters. To put it another
way, this tuner will do everything!

This one is in extremely nice condition, both electrically
and cosmetically. The manual is included for $135, plus
shipping from Florida.

Thanks.

Hello Listers,

I was wondering if there is anyone selling a used either FT-8800 or 8900? I am looking to put a dual recieve back in my vibe again to replace my 7800R. The owner should be open to the idea of making payments. I will consider kenwood dual banders also depending on there age?

thanks,

Ben K0BLR

4392. VHF Spectra dash, SP50 UHF FS/FT

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-07-21 22:26:17 UTC
From: Woody
Topic: 4392 Message: 4392

SPECTRA Dash, VHF, 60w FOR SALE, may consider trades.

This radio has all new caps, a complete tune-up to spec, and the ignition wire sense disabled.
Cosmetics are probably 7/10, average for a used radio of this type.

RX is hot as can be, TX is right at 60w output.

Includes radio, mic, 15pin plug, bracket and speaker. Radio is in excellent condition, but mic is a bit yellowed.

It's the last radio from a lot I bought a while back and it needed the caps, so I figured just work it over completely.

So here is a working like new spectra, complete rig, with no worries about caps going bad, tuned and guaranteed to be up to spec, with no need for an ign sense wire.
D43KXA7JA5BK, 146-174MHz

Can have a few channels programmed if necessary.
$200 shipped.

SP50 UHF 10ch, includes radio/ant/charger and two good batteries. $100 plus shipping.
Excellent condition with only a few paint rubs on the case.

Partial trades considered on 2meter or dualband mobiles.
Thanks!

4393. 450 to 470 MHz Antenna for sa.e/trade

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-07-21 02:08:33 UTC
From: Noel Spears
Topic: 4393 Message: 4393

I bought at a recent Hamfest, an antenna described by the seller as a 440 amateur band antenna. It has a type "N" connector on the bottom. The connector had a short length of cable attached, which was discarded. The connector is in great shape. After checking the antenna on a club antenna analyzer, it was determined to be usable in the range of 450 MHz to 470 MHz. After consulting with people that are more knowledgeable, and after checking the web, this antenna appears to be a Stationmaster II Omni Fiberglass model PD201-7. It may be an earlier model. Since the ID tag is missing, it is impossible to determine the exact make or model.

Pictures are available. I will cheerfully send them to whoever sends me an email at Rascal132 at Bigfoot dot com or my ARRL.net email address. I will cheerfully sell this antenna, or trade it for an equivalent value 440 amateur band antenna.

Noel N2OEL

4394. Kenwood dual band FM transceiver FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-07-21 14:08:18 UTC
From: Ken Simpson, W8EK
Topic: 4394 Message: 4394

For Sale:

Kenwood TW-4000 A dual band mobile FM transceiver

First buyer says he sent money about 3 weeks ago, but
no $$ here, and no answer to e-mail, so it is available again.

The TW-4000 A covers 2 m and 440 MHz FM. It has 25
Watts output, or 5 W in low power. Of course it has
memories, scan, etc. It has a GASFET front end,
giving it a really great receiver.

This would make a great packet rig, which is what it has
been used for. All solid state switching makes silent
packet operation. Since it has been used on packet, it
does not have a mic or mobile bracket with it, although
it takes a standard 8 pin round mic connector, like most
Kenwood rigs.

It needs 13 V DC at 7 or 8 amps to operate. It works fine.
Manual and power cord are included for $95 plus shipping
from Florida.

Thanks.

73,

Ken, W8EK

Beautiful shape....
Linear horizontal scale - covers 160m through 10m ham bands.
Has many luxury features - extra filters, AGC, 100 kHz Calibrator.
Variable bandwidth with selectivity settings of 5 kHz, 3 kHz, 2 kHz,
1 kHz and 500 Hz.
A really good notch filter with frequency and depth controls.
Mode settings for CW, AM, LSB and USB. Great sounding audio.
Collector quality. Has only a minor scuff on the right side that will
easily polish out.
All original parts including the knobs. Main tuning dial has been
replaced.
Wonderful performance for the ham bands only - I prefer this to the
SX-62 I used to own.
The manual is available for an additional cost of $25.00
Absolutely beautiful - and it performs flawlessly. You won't find a
nicer one at any price.It could be shipped too though, and I can
pack it well, using heavy foam support.

Available for $375.00 plus shipping
Manual available for an additional $15.00 with the radio.

Picture and details at:

Moving SOON,,, (moving van here in one week!) would like to get rid of...

National HFS receiver, cannot say if it works, hasn't been turned on in 25 years, looks good, probably works? $100 plus shipping

Hallicrafters S20R not in great shape cosmetically, works, I use it for AM listening. Seems to be four holes in right side, probably not original holes? Not sure. Heavy to ship. $50 plus shipping.

Heath DX-20,,, something rattling around inside, probably a broken tube. $35 plus shipping. Too busy to take it apart and look.

Date: 2007-08-05 01:49:07 UTC
From: Woody
Topic: 4401 Message: 4401

Hey all, I just found the aforementioned radio in the basement of my neighbor's garage.. it looks dirty and missing the tuning knob, etc... maybe a bent vol knob. Either way tis an ugly radio, but not squashed flat or anything.
Has the proper mic, no bracket. Will need refurbed, knob straightened, tuning knob replaced and cleaned. It's hard to turn and the display flashed off/on as it turns, but it works properly. TX appears to work but I didn't test output.... the relay kicks, meter moves, etc. I'd say it works with 25w out.

The question... anyone looking for a collector's or toy item? I'm guessing it will cost more to ship it than anyone is willing to pay for it.
But if not, Lemme know if interested. Sale or trade. If it's a $40 item, it'll go to the local gift or loaner pile.
thanks,
Woody

From: Ken Simpson, W8EK
Topic: 4402 Message: 4402

Regular hand microphones For Sale:

Yaesu YM-40, 600 ohm impedance hand microphone
This one has a round 8 pin connector, and has up and
down buttons on it, in addition to a lock button on the
back, and the normal PTT switch.
It works fine and looks fine also. $35

Azden PCM-463 A hand microphone
This hand mic had up down buttons on the top, with an M1
call and PTT button on the side. It works with the Azden
PCS-5000, and maybe others. It has a round 8 pin connector
wired for Azden, and is in nice shape. $30

Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can
be plugged into a Kenwood rig with the round 8 pin
connector. Like new. $20

Touchtone (DTMF) microphones:

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone (DTMF) pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $40

"Touchmatic" touch tone microphone
Regular low Z mic, with a 12 digit touch tone pad and an
8 pin plug wired for Kenwood. Nice condition. $40

CES Model 630 touch tone microphone
This mic has a 12 digit touch tone pad on the front, with a
regular Low Z hand microphone. Round 6 pin mic plug. $40

CES "Micropad" touch tone microphone
No model number on this one, but it has a 12 digit pad on the
back. Round 8 pin connector wired for Kenwood. $40

HT speaker microphones:

Kenwood SMC-30 speaker mic
Fits the TH-21/31/41 series of HTs, plus some others.
It has a 3 conductor 3.5 mm plug, and a 2 conductor
2.5 mm plug. $18

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HTs. $18

AEA "HTM" microphone
This is an external microphone to use with the
AEA series of HTs. It is in nice shape for $25

Prices do not include shipping from Florida.

Thanks.

FS/FT:

See list below and these will fit each [some might fit two] in a flat-rate box for USPS priority mail at $9

SERIES 90 Desk Top Controllers, local/dc remotes, INSTRUCTION MANUAL
-factory, includes fold-out prints, schems and lots of info. $12

DESKTRAC Base/Control stations and repeaters, SERVICE MANUAL
-factory, to be used with band-specific maxtrac service manuals, $25

MCR-100 [R100 repeater] [RT] UHF INSTRUCTION MANUAL
-factory, 68P81071E50-A, inch-thick manual with tabbed instructions, and a maintenance section that includes tuning, adjustment, prints, parts lists, fold outs, schems, I'd want to call it a service manual there's so much in there. $20

MSR2000 VHF Base and Repeater Stations, INSTRUCTION MANUAL.
-factory, Same as above except thicker with more info, foldouts, prints, parts lists, adjustments and more. A few rough page edges. $16

MSF5000 Digital capable and analog plus stations, INSTRUCTION MANUAL.
-factory, 3-ring binder, same as above, loaded with info, adjustments, prints, schems, foldouts, etc. $25

MSF5000 Digital capable and analog plus stations, VHF SERVICE MANUAL.
-factory, 3-ring binder, same as above. $35

SYNTOR VHF INSTRUCTION MANUAL
-factory, same as above, loaded with info, tuning, foldouts, schems, maint, adjustments, etc. $12

NEC Tone and Voice radio pager SERVICE MANUAL.
-factory, same as above, tuning, re-crystal info, foldouts, more. TYPE R3V2-2B. $10

YAESU/VERTEX FTH-7009 SERVICE MANUAL.
-factory, lots of info as above. $20

HT1250 USER GUIDE, as found in a new radio box.
-factory, user manual. FREE with any manual above.

REGENCY HR-2B VHF/UHF radio user and maint. manual for tuning, adjusting, etc.
-photocopy, FREE, with any above manual.

SELL OR TRADE FOR ?? Will trade for most anything, but not looking for any more manuals.

Trade, Paypal +2%, or Postal MO,

thanks!

4416. FS/FT: Misc Motorola parts, pieces left over

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-08-24 14:44:41 UTC
From: Woody
Topic: 4416 Message: 4416

OK, here is a trade offer of everything I've got left over...

UHF SP50, 10ch, slo-chrgr, 2 batteries. Includes programming.

COBRA MicroTalk FRS radios. Tiny little radios, dual charger, needs batts.

Willem EPROM programmer, enhanced version, USB power, CD, cables, complete.

Two Spectra HHCH mics, one with bracket, YCN4021A and YCN4022A.

Two Spectra SIU boxes, one with bracket, one with lock drilled out.

One very old, nasty and barely working Yaesu CPU2500R, missing tuning knob, bent knobs, etc. Powers on.

GP300 type compression clamp for lapel mic plug. Nails down the lapel mic plug via the antenna jack.

GM300/Maxtrac, etc remote head conduit. Flat rubber conduit for protecting the ribbon cable in remote installs.

Telephone headset, boom mic. One-ear design, single stereo plug.

Make a fair trade offer of anything at all that would be useful; and take pieces or whole list.

Could use programming cables for kenwood, GP350 chargers, ham radios, or whatever.
Only interested in late model equipment please!

thanks,
rb

4422. Wanted - FT-990 Accessories

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-09-04 12:22:12 UTC
From: Chris Parnell
Topic: 4422 Message: 4422

Hi all,

I realise that the FT-990 filters are hard to come by (once they are soldered in, I guess no one
wants to take them out!!), but I need some! - Anyone have any for sale?
I read recently of some people using the 500Hz CW FT-1000 Filter as a cascaded 500Hz filter in the 990 (in the 250Hz slot)... is this right?

Thanks,

Chris Parnell - ZL1CDP

4423. Heath HN-31 "Cantenna" Dummy Load FS

Date: 2007-09-03 22:12:12 UTC
From: Ken Simpson, W8EK
Topic: 4423 Message: 4423

Heath HN-31 "Cantenna" RF Dummy Load For Sale:

This is the traditional Heath dummy load that will handle up
to 1000 Watts. It has a derating curve printed on the can,
as well as in the manual.

I measured the resistor and it is about 54 ohms, so obviously
it is not fried, and well within tolerance for a good match to 52
ohms. The cantenna itself is in extremely nice shape.

Paper work included for $40 plus shipping from Florida.

Thanks.

4424. Rubber Duck antennas for your HT FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-09-08 11:56:52 UTC
From: Ken Simpson, W8EK
Topic: 4424 Message: 4424

For Sale:

Rubber Duck antennas for your HT.
All are for 2 meters and are in good condition, unless
stated otherwise.

Larsen KD4-VHF2 Standard KulDuck antenna
Regular size about 7 inches long, with BNC Connector. $14

5/16 inch threaded, like used by Motorola and others - $10 each
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long - $10

PL-259 connector - 6.5 inches long - $10
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long - $10
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Aftermarket stubby, 3.5 inches long - $10
Kenwood RA-6 regular, 6.6 inches long - $10

Larsen HQ "Kul Duck" gain antenna for 220 MHz
BNC connector. This antenna is supposed to have about
3 db gain over a "normal" rubber duck.
It is for 220 MHz and is about 8 inches long. $15

BNC stubby for 440 MHz - 3 inches long - $10

BNC Antenna cut for 27.1 MHz
About 10 inches long. $12

4425. 2 m and 440 MHz mobile antennas and mounts FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-09-10 16:32:47 UTC
From: Ken Simpson, W8EK
Topic: 3460 Message: 4425

For Sale:

VHF (2 meter) and UHF (440 MHz) mobile antennas and mounts:

Larsen NLA-150 coil only for 2 meters
For use with a 5/8 wave (approx 4 foot) antenna.
Fits the Larsen NLA mount for 3 db gain. $9
-
The whips for these are hard to ship, and it is best to pick
up a whip at your local Radio Shack, or similar store. I do
have some whips, if you need them. $6

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
The whip can be cut for 2 meters, 220 MHz, or 450 MHz
bands. Good condition for $7.
-
Larsen Q
Fits a 5/16 inch stud. The quarter wave whip can be cut
for 2 meters, 220 MHz, or 440 MHz bands. Great condition. $6

Larsen NMO-Q
Precut for 450 MHz. New, still in bag. $8

Larsen NLA-450 coil and "stacked" whip
This fits the Larsen NLA mount, and has about 5 db gain
on the 70 cm band. It includes the coil, and the high gain
stacked whip. Nice condition. $12

Larsen OM-450 whip, coil and mount
This is made to mount on a flat surface, and requires 3
mounting bolts, plus a hole in the center for the coax.
Includes "stacked" whip for 5 db gain on 450 MHz. $18

Mobile antenna mounts for sale:

NMO-MM Magnetic Mount
Magnetic mount for any of the NMO antennas (Larsen, Motorola,
and many others). Includes coax. Very good condition. $18

Magnetic mount with coax
Standard 3/8 inch 24 thread, about 3 inches in diameter, and
black in color. Suitable for 2 meter, 440 MHz, or 6 meter antenna.
Very good condition. $15

HyGain TLM Trunk Lip Mount
This trunk lip mount has a 5/16 inch stud on it.

Ideal for 1/4 wave antenna. With coax for $14

Prices do not include shipping from Florida.

Thanks.

Hi all, have 6 Motorola GP350 radios for sale.
VHF commercial or ham band, 144-174MHz.
Have intellicharger bases, but 'wall wart' transformers are missing.
Radios are tested/working, in average condition with some sticker goo and professional engraving on front.
$105 shipped priority mail CONUS. Also have 2 intrinsically safe radios, add $30.
Will program to your freqs, or assist with programming.
thanks!
Woody

From: Rich
Topic: 4430 Message: 4430

Hi,
I have a beautiful Shure 333 Microphone for sale or trade.
It comes in the original case and looks great. The Mic works
perfectly and sound fantastic. The felt lined case is in great
condition too with the hinges and latches working fine.
I will be trying to get actual pics of it soon. These are very rare
microphones and it is even more rare to find one in this condition
with the original Shure case. I would like to trade for ham gear
like newer recievers, transievers or what have you. Please email
me off list at copake12516 at fairpoint dot net.
Thanks,
Rich

4432. Solid State AB1 Mobile HF Amp

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-09-19 15:44:20 UTC
From: kd4e
Topic: 4432 Message: 4432

Palomar Elite 600 solid state AB1 Mobile HF Amp.

1-MRF455 driving 4-SRF3749's (similar to MRF454's)

Information here:
<http://www.cbradio.nl/palomar/frames_palomar_600.htm>
[They call it a 600 Watt amp, I would guess 400W PEP.]

This may run clean on 10-12M and may even work to 40M
but changing a few easily accessed toroids w/coils
(transformers) one can make it a 160-10M or 80-10M
amp. You will want to add switched filters to keep
it FCC-legal.

$195. or reasonable offer. Can bring it to the Fest
in NPR this Saturday and save extra shipping cost.

4442. FS: DX200 Receiver

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-09-30 14:11:13 UTC
From: Bry Carling
Topic: 4442 Message: 4442

FOR SALE: REALISTIC DX200 Shortwave Receiver

Here is an excellent HF receiver with Dual tuning dials.
It is all checked out thoroughly and in excellent shape.

The Radio Shack DX-200 has good shortwave reception
performance. The receiver is an older model with an
analog frequency readout. The use of analog type tuning
eliminates noisy digital synthesizers so common with
inexpensive shortwave receivers.

The controls on the front panel includes Antenna trim,
AGC fast/slow, BFO pitch with USB/LSB indication,
Bandswitch (5 bands), RF gain, AF gain, Mode switch
with SSB/CW-Standby-AM-AM/ANL.

Has the calibrator, main tuning and bandspread tuning.
The front panel includes a headphone jack.
The bands as displayed on the upper drum type dial have
LED indicators. Both drum type dials have an adjustable
line to align the frequency readout. Using the frequency
calibrator assists in alignment.

The radio is very sensitive. It has a product detector for
SSB and the modes include:
AM, SSB and CW. The antenna input is a two terminal type
for 'twin lead.' You can simply use an end fed random
wire antenna to one terminal. The automatic noise limiter
is effective on most noise and it does not distort the audio.

This receiver is superior to the new handheld and portable type
receivers.

Included AC power cord in excellent shape. Everything works
on this radio as it should. This receiver comes with a
copy of both the service manual and the operators manual.

Available for $125.00 plus shipping

Hey all,

I've taken a radio back on trade that used to be my personal rig.

It's a VHF Spectra high-power with A7 head and siren box. Includes bracket, cables, wires, etc, everything except siren speaker and head bracket. [Was console mounted]. Started life as a HHCH drawer, and I converted it to A7 way back when it was the rave.
It's used, a bit dirty and drawer unit is scratched.
Tested/working/guaranteed.

FOR SALE: HALLLICRAFTERS 5R10 RADIO RECEIVER

Here's a great little Hallicrafters set. Model 5R10 - looks similar to
the other
S38 series receivers.

Here is a nice 5 tube shortwave set, AC-DC superhet design
for excellent reception. Has ALL NEW TUBES: 12SA7, 12SK7,
12SQ7, 50L6,
35Z5 and is in great working condition.
Covers 540 kHz to 31 MHz in 4 bands. Has main dial and
bandspread tuning.
This is an AM broadcast mode receiver and has no BFO. It has a
nice 5" PM speaker built-in.
Also, there is a headphone-speaker switch and headphone socket.
105-125V AC operation at 0.25 amps. It looks great, and
everything works
as it should. All of the tubes are brand new, and the radio has been
recently checked out and aligned. The cabinet has no dents or
dings and the back is in excellent shape too.
AC power cord in excellent shape. Comes with a good manual
copy and the
SAMS PHOTOFACT. Back is in good shape too. Photo does not
do it justice.
Available for $125.00 plus shipping

Pictures and details at:
http://www.af4k.com/radios.htm

E-mail me to arrange purchase... regards, Brian

YAESU FT101B and FT101EE parts.

Yaesu FT101B Front panel, meter switch, mic connector, has
the plastic wrap on it.
Reads "YAESU SSB TRANSCEIVER FT-101EE" which is on
the black raised "escutcheon" for VFO dial and meter.
Available for $9.00 plus shipping.

Yaesu FT101B Front panel sub chassis - has power switches
and other slide switches.
Excellent condition.
Available for $9.00 plus shipping.

Yaesu FT101B Front panel surround rail. Gray sub panel surround.
This is the rectangular ring that is attached to front.
Available for $6.00 plus shipping.

Yaesu FT101B rear panel. Complete with all connectors and fuse
holder. P.O. Adjust pot etc. Very clean.
Available for $9.00 plus shipping.

Yaesu insert panel for FT-101EE - excellent. This is the black
surround area "escutcheon" for the front panel. It reads
"YAESU SSB TRANSCEIVER FT-101EE."
Available for $6.00 plus shipping

4456. 10mtr Mobile Equipment for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-10-09 19:58:17 UTC
From: Kenneth Stringham
Topic: 4456 Message: 4456

Gentlemen,

I have three (3) Motorola 31.8MHz FM radios for sale:

1 - MoComm 10 5w mobile unit with a fixed stations
supply
1 - MoComm 10 25w mobile unit
1 - Moxy 25w mobile unit

I have the microphones, some cables, and mounting
brackets for these radios. It should be a simple
matter to move these to 10mtr FM.

In addition, I have the MoComm 10 service manual.

I would like to $30 a piece for these radios, but any
reasonable offer would be appreciated.

Ken - AE1X

4458. T3011DX KVL retrofit kit.

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-10-10 12:09:52 UTC
From: Woody
Topic: 4458 Message: 4458

Hey all, I just got a bunch of KVL's in and had some pulls from broken units...

Motorola factory part TVN6150A, a T3011DX retrofit kit. Converts T3011 keyloaders to DX, and allows loading of newer radios like the MTS, XTS and others.

Upgrade Kit for the T3011CX is $70 shipped.

Upgrade Kit for the T3011AX or T3011BX is $90.

Includes pdf manual with instructions.

Items are also listed FOR SALE elsewhere, please email for info
or use item number 110178491144.

Thanks much,
Woody

I have a Tempo S2 220 HT with keypad. These are known
to be somewhat indestructible - sometimes used for links
and even temporary simplex repeaters with the old RS box
or similar homebrew store-and-forward device made from
memory-type greeting cards.

Looks good for the vintage, I don't have the charger
so cannot test the battery, I do have the rubber duckie
antenna.

$38. including shipping.

4467. RE-OFFERED DX-200 receiver

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-10-18 00:49:32 UTC
From: Bry Carling
Topic: 4467 Message: 4467

Buyer reneged so this radio is again offered for sale:

Realistic DX200 receiver.

Here is an excellent shortwave receiver with Dual tuning dials. It is all checked out thoroughly and
in excellent shape.

The Radio Shack DX-200 has good shortwave reception performance. The receiver has an analog frequency readout.
The use of analog type tuning eliminates noisy digital
synthesizers so common with inexpensive shortwave receivers.

The controls on the front panel includes Antenna trim,
AGC fast/slow, BFO pitch with USB/LSB indication, Bandswitch (5 bands), RF gain, AF gain, Mode switch
with SSB/CW-Standby-AM-AM/ANL.
Has the calibrator, main tuning and bandspread tuning.
The front panel includes a headphone jack.

The bands as displayed on the upper drum type dial have LED indicators. Both drum type dials have an adjustable line to align the frequency readout.
Using the frequency calibrator assists in alignment.
The radio is very sensitive. The DX200 has a product detector
for SSB and the modes include:
AM, SSB and CW. The antenna input is a two terminal type.
You can simply use an end fed random wire antenna to
one terminal. The automatic noise limiter is effective
on most noise and it does not distort the audio.
The radio is superior to the new handheld and portable
type SW receivers.

Included AC power cord in excellent shape.
Everything
works on this radio as it should.
This receiver comes with a decent copy of both the
service manual and the operators manual.

Available for $125.00 plus shipping.

Picture and details at:

http://www.af4k.com/radios.htm

4471. Autek QF-1 A, Active Audio Filter FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-10-19 23:31:13 UTC
From: Ken Simpson, W8EK
Topic: 4471 Message: 4471

Active Audio Filter For Sale:

Autek QF-1 A, Active Audio Filter

This is an audio filter that goes between your rig and speaker.
It runs off of 110 V AC, and will peak, notch, or become a low
pass or high pass filter. Selectivity (bandwidth) and frequency
are adjustable from the front panel. This is the "A" model that
also has an additional notch filter added. The input is an 1/4 inch
phone plug, and the output is a 1/4 inch jack on the rear panel.

This particular unit looks very close to new, and works 100%.

With paper work for $ 55 plus shipping from Florida.

Thanks.

4472. Santec ST-144, 2 meter HT and Santec Accessories FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-10-20 12:38:09 UTC
From: Ken Simpson, W8EK
Topic: 4472 Message: 4472

For Sale:

Santec ST-144, 2 meter HT
This full featured 2 meter HT is capable of about 4 Watts,
1 Watt, or 0.1 W power output with a 3 position switch. It
covers the full 2 meter band in 5 KHz steps, like most
modern HTs. It also features a built in digital clock.

This particular unit also includes a PL encoder (which was
an optional extra), so you can access those repeaters
requiring subaudible tone. This one works 100% and
looks very, very nice. Its battery works, but is not holding
a charge for a long length of time. Of course it includes
a rubber duck antenna, carrying strap, and wall wart
battery charger, along with paper work for $65.

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $20

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $20

Santec speaker microphone
It has the small round plug (about 3/8 inch) with 6
pins, as used on most Santec HTs, and many
Wilson and Yaesu HTs. Works and looks great.$20

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

FS: ASTATIC 10-D Microphone & Cable Adapter

Neat looking classic chrome and grey mic.

I have discovered these musician's comments online:

"Frequency response 33-3000Hz, heavy on the midrange.
Doesn't get boomy like a Bullet nor have feedback
tendencies like the 545. It sounds more like a hot
crystal then a dynamic element. Raw. Gritty. Fat."

4483. WANTED! Mizuho 20mtr portable radio

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-10-27 16:36:25 UTC
From: nick_njp
Topic: 4483 Message: 4483

I'm looking to purchase a Mizuho MX14S handheld portable radio. Preferably from within the UK but all sources considered. Please contact directly with details of equipment state and extras, price and location.

4484. FOR SALE: GE Mastr II Low-Band Mobile

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-10-27 00:28:02 UTC
From: Christopher Zeman
Topic: 4484 Message: 4484

Combination Number: MC74KFN33A
M - Standard
C - 12VDC Negative Ground
7 - 100W
4 - 20kHz Channel Spacing
K - 8 Frequency
F - 4 TX, 4 RX
N - Noise Blanker
33 - 42-50 MHz
A - Oscillator Stability

Last Serviced - 1/22/2001
F1 - 42.2600MHz
F2 - 42.4000MHz
F3 - 42.1200MHz
F4 - 42.1600MHz
Squelch Threshold (F1-F4) - .1uV
Squelch Tight (F1-F4) - .36uV
20dB/12dB Sinad - .19uV
Disc./Detector (no signal) - 13

Radio has all the ICOMs (4 TX and 4 RX). I purchased this radio a couple years ago with the intention of duplexing it and putting up a 6M repeater, but that never happened. Radio is untested, and doesn't include

Asking $65.00 + shipping (25lbs via USPS Priority Mail from ZIP 53170). Personal check accepted, but requires a 7 business day clearing period. I also accept Postal Money Orders or PayPal.

I am most certainly open to trades. I'd like the Piexx IF-10C Kenwood PC Interface or the original Kenwood IF-10C PC Interface Board, or a dual-band HT (DJ-580 or something like that).

I have pictures of the radio online at http://n9xcr.com/ge

4485. Looking for Yaesu FT-2600M

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-10-27 17:17:45 UTC
From: John
Topic: 4485 Message: 4485

Hi All. I'm looking for a Yaesu FT-2600M for my first rig. If anyone has a good one or know where to look, Please let me know. Thanks!

4486. Kenwood HT accessories FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-10-27 13:26:34 UTC
From: Ken Simpson, W8EK
Topic: 367 Message: 4486

Kenwood HT accessory items For Sale:

Kenwood PB-21 battery pack for TH-21 / 31 / 41 series HTs
This battery pack does not hold a charge well. Physically it is
fine, but it needs a new battery "insert" in it. $12

Kenwood BH-2 belt clip for TH-21 / 31 / 41 series HTs
and maybe others as well. With hardware $5

Special Rubber Duck antennas for Kenwood TH-21 series HTs
with the threaded connector
Aftermarket stubby, 3.3 inches long $10
Kenwood RA-6 regular, 6.6 inches long $10

Original Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E
HTs for 440 MHz, 220 MHz and 2 meters $10

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached. $5

Wrist strap - I think it fits most Kenwood (and maybe other) HTs - $3

Belt clip for TR-2400 HT, complete with hardware - $8

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Original Operators manual for Kenwood TR-2400 - $15

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can
be plugged into a Kenwood rig with the round 8 pin
connector. Like new. $20

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

I am looking for several UHF Band-Reject (aka: Notch) cavities...prefer 3in or larger diameter. Can use BandPass ONLY cans that I can modify to notch but cannot use BpBr cans. NO mobile duplexers, thanks. Please get with me direct.

Thanks
Chris

4494. RE: [ham4sale] Wanted: tone encoder

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-10-30 14:01:24 UTC
From: n9wys
Topic: 4491 Message: 4494

Al,

Have you considered either one of these units?
http://www.com-spec.com/ss64.htm
http://www.com-spec.com/te32.htm

I have no pecuniary interest in Com Spec - I merely use their products and think they work very well for the cost.

I think that maybe AES is a Com Spec distributor... If not, Tessco is and they will sell to a private party.

4495. Need to Sell My Rig

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-10-30 18:12:35 UTC
From: Kenneth Stringham
Topic: 4495 Message: 4495

I have had my FT-817 since spring. I love it, but I have to sell it to raise funds to pay some immediate bills. My rig is a NON ND model. I have the following:

1 - Radio
2 - Dry Battery Pack
3 - Charger
4 - Non-functional chargable battery pack
5 - Manual, including schematics
6 - CAT cable
7 - Car cable
8 - Cable for connecting to an external power supply.
9 - Shoulder Strap

To date, I have not used it on HF, on 2mtrs and 70cms with a dual band BNC antenna connected to the front panel. I have had no problems with the unit on the bands in question. In addition, I have received aircraft (123.000) AM, VHF and UHF Police calls and WBFM broadcast signals.

I believe that I paid $350 for the unit. It is used with some paint scrapped off the case, but works well on the bands where it has been used. I would hope that I could get $325 + shipping for what I believe to be a great radio.

4500. FT: Astro Saber 1 and Saber III VHF

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-11-08 05:33:17 UTC
From: Woody
Topic: 4500 Message: 4500

Hey all,

Have for trade these 2 radios:

Astro Saber 1 in VHF, no encryption, analog flash. Excellent condition, radio/antenna only.

Saber III in a systems saber case. Looks new, but is NOT a systems saber. Has DES/XL module installed. Radio/antenna only.

Astro is 3.34.00, dsp N05.01.06, H35 flash, 136-174mhz.

Saber III is 5D core and currently has 146-163mhz freqs programmed in so it's the wide VFO for ham and commercial.

I'm STILL looking for an FT60 or V8000 in excellent condition.

thanks!
rb

Have some radio fun this winter...

FOR SALE:

Hallicrafters Model HT-17 Transmitter.
Here is a really nice, and rare transmitter - Comes with
two 5-pin, plug-in coils for 80m and 40m.
The HT-17 is a crystal controlled transmitter designed
to operate from a 105-125 volt 50/60 cycle AC power
source.
The power input is 25 watts, on all bands from 3.5 to 30
Mcs.
Tubes used are a 6V6 Crystal oscillator, an 807 power
amplifier
and a 5U4 rectifier.

The transmitter comes with two different coils for 80m
and 40m. Also has some crystals and an adapter
which allows the use of smaller crystals. The adapter
is removable if you have the larger sized crystals. May
need some minor repair. Top cover and dial pointer are
sticking slightly. Comes with a copy of the manual.

Available for $135.00 plus shipping
= = =

National SW-54 Receiver.
5 Tube shortwave receiver has 12BA6, 12BE6, 12AV6,
50C5,
35Z5 and covers 540 kHz to 30 MHz.
This 4 band hammertone gray SW radio is in nice
shape,
and in very good working condition. It does have
a little hum but that can easily be fixed. The case has
no dents or dings, and the back is in great shape too.
Built in PM speaker is working just fine. AC power cord
is in excellent shape. Comes with a copy of the
complete
manual with schematic and alignment instructions etc.

Available for $115.00 plus shipping.
= = =

Yaesu FRG7700 General Coverage Receiver.

Mint, collector quality example of this fine desktop
receiver from Yaesu.

The Yaesu FRG-7700 is a multi-mode receiver covering
150 kHz to 30 MHz in 1 MHz bands to include all
longwave,
medium wave (AM) and shortwave frequencies.
Modes of reception include LSB/CW, USB, AM and FM.
An analog dial supplements the 1 kHz yellow LED
digital display. The built in clock-timer includes
remote activation terminals on the rear panel.
Convenience features include: Variable RF Attenuator,
S-Meter, Dimmer, AGC Fast/Slow, Squelch, Tone
Control
and Noise Blanker.
The rear panel has dual antenna inputs, remote timer
activation jacks and speaker output.

The receiver features many extra items such as tone
control, switchable AGC, and a very nice sounding
front speaker unit.

This receiver has a high serial number - 21-200289

120V AC operation with a good, original AC cable.
Comes with a copy of the manual.

This excellent receiver available for $300.00 plus
shipping
= = =

Yaesu FRT-7700 Antenna Tuner.
Mint, collector quality example of this rare antenna tuner
from
Yaesu. It is the matching tuner for the FRG7700
receiver
above.

The Yaesu FRT-7700 Antenna Tuner covers the range
of
150 kHz to 30 MHz in six bands.
It features a variable gain control. The rear panel and
has
two antenna inputs. One is for wire antennas and one
is
for coaxial fed antenna. There is a hardwired output
cable
to connect to the receiver.

Available for $150.00 plus shipping

4505. FS - Standard C168 VHF Handheld Transceiver

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-11-08 20:50:13 UTC
From: Don Kovalchik - W8DPK
Topic: 4505 Message: 4505

Standard C168 VHF Handheld Transceiver - LIKE NEW - $65 includes
shipping CONUS

One of the first really small full-featured HTs, but built like a tank.
All-metal case, lots of audio.

Has all of the usual features: Tone encode/decode,
2.5W with included CNB161 7.2V battery, (5W with optional CNB162 12V
battery or external 13.8VDC)
144-148 TX, 108-174 RX, including Aircraft AM RX
Direct frequency entry or dial
Scanning, paging, memories, etc.
Small - only 47mm X 120mm X 31mm

I bought this new in 1992 to give to my son, but he never got his
license. I've only used it a few times over the years. It still has the
original NiCd battery. It charges OK and will run the radio all day,
but will not hold a charge for more than a few weeks. Replacement
batteries are still available from the usual sources.

Includes original AC charger, wrist strap, rubber antenna, and printed
copy of the Operator's Manual.

Prefer PayPal, or Postal Money Order.

73,
Don W8DPK

4508. (FS) FT-200 transceiver

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-11-09 20:12:06 UTC
From: militaryoperator
Topic: 4508 Message: 4508

I have a nice FT-200 transceiver and mains psu for sale.

Set covers 80-10Mtr (old bands), comes with mic, leads etc.

Set is working but, I feel needs a good overhaul, tune up etc. I have a few spare valves for it as well. So, sold basically as a project rather than a full blown working ham station.

£50

can be posted but will be about £15 (UK), finalised on finished packed weight.

picture at: www.military-radio.150m.com

cheers, Ben.

4509. FS - Box of Wafer switches & hardware

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-11-10 00:51:17 UTC

Topic: 4509 Message: 4509

Cleaning out some stuff in the shack...
Box of about 40~50. (box in picture 12" x 9")
Ceramic, phenolic and plastic.
Most new, some used.
Extras - wafer sections, shafts, knobs, nuts, spacers and screws.

Take a look at them here:
http://img.villagephotos.com/p/2007-11/1286207/Switches.jpg

Asking $25 + shipping (may be 5~7 lbs packed)

Mike - n8oep@...

4510. HF Wattmeter / SWR Bridges FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-11-10 13:34:44 UTC
From: Ken Simpson, W8EK
Topic: 4510 Message: 4510

HF wattmeter / SWR Bridges For Sale:

Micronta 21-520 A, HF wattmeter with large dual meters

This is an HF wattmeter that covers from 3 to 30 MHz, with
full scale power readings of 10, 100, and 1000 watts.
LARGE dual meters -- one reads forward power and one
reads reflected power -- both at the same time.
It has a remote sensor, with about 3 feet of cable to connect
to the meter itself.

This particular meter works fine, and looks very, very nice.
I can not find a scratch on it, and it is in its original box. $50

Micronta 21-521 A, SWR Bridge, coax switch combination

This unit is a standard HF SWR Bridge, but in addition,
it also has a built in 2 position coax antenna switch.
If you only have two antennas, or one antenna and a
dummy load, this unit would be ideal for you, eliminating
the need for separate units.

This particular unit is in extremely nice condition.
It includes the paper work, and the original box, although
the box is not in as good condition as the meter.
Of course it works fine. $20

Archer Field Strength / SWR meter
This is a fairly generic HF SWR Bridge. It is in a nice
sloping panel enclosure with a wood grain finish, and
works fine. $10

Prices do not include shipping from Florida.

Thanks.

4512. FS: Hi Wattage ATU Parts

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-11-10 22:08:15 UTC
From: militaryoperator
Topic: 4512 Message: 4512

Hi Wattage motorised ATU parts.

All items are fitted with stepper motors, these could be removed and shafts turned maunally. Unsure of stepper V but relays are marked 24v. Some items have additional relays and hi voltage caps, see pics.

Coil 1, 4.5 dia 4 long 16 turn £20

coil 2, 4.5 dia 5 long 23 turns £30

cap 1 3 long by 2 wide, probably 200-300pf £15

cap 2 7 long 2.75 wide maybe 1000pf £35

pics at www.military-radio.150m.com

cheers, Ben.

From: Bry Carling
Topic: 4518 Message: 4518

Brand new HEATHKIT SSB FILTER 2.1 kc. for the HW-
series
and SB-series radios.

Here is a new-in-the-box Heathkit filter for your
HW-series
or SB-series radio.

Used typically in rigs like the SB-101 and SB-301
but
will fit others.

Has never been used in a radio, and is brand new
in the box.
Center frequency is 3395 kHz as in most of those
Heathkit radios. 2.1 kHz bandwidth, perfect for
SSB....
Model 404-283.
Available for $39.00 plus shipping.

Picture and details available at:
http://www.af4k.com/miscpart.htm

4519. RF Dummy Loads FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-11-13 12:11:58 UTC
From: Ken Simpson, W8EK
Topic: 4519 Message: 4519

RF Dummy Loads For Sale:

Heath HN-31 "Cantenna" RF Dummy Load

This is the traditional Heath dummy load that will handle up
to 1000 Watts. It has a derating curve printed on the can,
as well as in the manual.

I measured the resistor and it is 50.2 ohms, so obviously it
is not fried, and well within tolerance for a good match to 50
ohms. The cantenna itself is in good shape.

Paper work is included for $40.

Archer 21-628 Dummy Load
Rated at 5 watts, it is not high power, but is very precision.
Ideal if you need a good termination. It measures exactly 52.0 ohms
In like new condition. $10

Prices do not include shipping from Florida.

Thanks.

FOR SALE: NATIONAL SW-54 RECEIVER

This is a nice tube type shortwave receiver in good
working condition.

5 Tube receiver has 12BA6, 12BE6, 12AV6, 50C5, 35Z5
Covers 540 kHz to 30 MHz in 4 bands...
Hammertone gray radio in nice shape, and in very good working
condition.

No dents or dings, back in great shape too.
Built in PM speaker working just fine.
AC power cord is in excellent shape.

Comes with a copy of manual with schematic.

Available for $115.00 plus shipping

Picture and details at:
http://www.af4k.com/radios.htm

4521. Vintage Electrical Books FS

Vintage Electrical Books For Sale:

Radio Physics Course - An Elementary Text Which
Explains the Principles of Electricity and Radio
By Alfred Ghirardi - Published 1932 by Murray Hill Books
I know that is a long title, but that is what the book is called!
This is a book just under 1000 pages that is very detailed.
It has many interesting topics.
This book is in fairly good shape, although it certainly is not
new! $15

Electrical Engineering by Dawes
Volume 1 - Direct Currents
Third Edition - 1937
I would call this a basic text. 750 pages. It includes
a separate insert that has the answers to the problems.
Book is in nice shape, but does have a name on the
inside cover with a 1938 date. $ 15

Direct and Alternating Currents
By Oppenheimer and Borchers
1963 - McGraw Hill
392 pages of "Modern" info, compared to the 1930's books
Very nice shape, with name in front cover. $12

Unit Outlines in Physics by Colen and Newman
Paperback (I didn't know they made paperbacks then!)
Revised edition, 1940
Some wear, and writing. $ 12

Prices do not include shipping from Florida.

Thanks.

Heavy duty power supply for sale:

Pyramid PS-35
This supply is good for 32 Amps Constant or 35 Amps Surge.
The output voltage is adjustable over a 12 to 15 volt range
with a multi turn pot. It has crowbar over voltage protection,
short circuit & thermal protection and features a pair of nice
large edgewise meters to measure output voltage and output
current. There is an internal fan. This is a very healthy, heavy
duty supply!

This particular unit works 100% and looks very close to new.

$135 plus shipping from Florida.

Thanks.

4526. 2 meter and 440 MHz mobile antennas FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-11-18 23:07:35 UTC
From: Ken Simpson, W8EK
Topic: 4526 Message: 4526

For Sale:

VHF (2 meter) and UHF (440 MHz) mobile antennas and mounts:

Larsen NLA-150 coil and whip for 2 meters
This is a 5/8 wave (approx 4 foot) antenna.
Fits the Larsen NLA mount for 3 db gain. $18

Deduct $6 if you do not need the whip, which is hard to ship.

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
The whip can be cut for 2 meters, 220 MHz, or 450 MHz
bands. Good condition for $7.

Larsen Q
Fits a 5/16 inch stud. The quarter wave whip can be cut
for 2 meters, 220 MHz, or 440 MHz bands. Great condition. $6

Larsen NMO-Q
Precut for 450 MHz. New, still in bag. $8

Larsen NLA-450 coil and "stacked" whip
This fits the Larsen NLA mount, and has about 5 db gain
on the 70 cm band. It includes the coil, and the high gain
stacked whip. Nice condition. $14

Larsen OM-450 whip, coil and mount
This is made to mount on a flat surface, and requires 3
mounting bolts, plus a hole in the center for the coax.
Includes "stacked" whip for 5 db gain on 450 MHz. $20

Mobile antenna mounts for sale:

NMO-MM Magnetic Mount
Magnetic mount for any of the NMO antennas (Larsen, Motorola,
and many others). Includes coax. Very good condition. $18

HyGain TLM Trunk Lip Mount
This trunk lip mount has a 5/16 inch stud on it.
Ideal for 1/4 wave antenna. With coax for $14

Prices do not include shipping from Florida.

Thanks.

4527. MOTOROLA RADIUS GR500 UHF 40 SOLID WATTS

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-11-19 02:03:35 UTC
From: Carl Walthall
Topic: 4527 Message: 4527

*** MOTOROLA RADIUS GR500 UHF 40 SOLID WATTS (MEASURED) ***

OFB (Operating Freq. Band): 438-470 MHz.

Here's what you'll get:

1 Motorola GR500 repeater w/ built in user programmable CW IDer made by Communications Specialist. It's wired into the accessory port in the RICK controller & is powered off of it through the internal power supply.

2 Motorola M120 2 Channel Mobile radios (Linked together in repeater case for RX & TX).

1 UHF 6 Cavity Mini-Celwave duplexer (Installed in case).

Repeater was used for approx. 8 months as a ham radio repeater & duplexer is currently tuned for 442.775 out / 447.775 in. I will have the radios reprogrammed for no extra charge to your specs. However, the buyer is responsible for retuning the duplexer.

The repeater also supports battery back-up power in case of a power failure.

The repeater was taken offline due to lack of use. Our interest group was not using it & it was costing us too much in electricity as a result. We even kept the dust out of it by blowing pressurized air cans on it every few months. Trust me when I say, it will be very clean. Note some light scratches on the case from being moved around from place to place. So, it has had very light usage its entire life so far.

Guranteed not DOA & fully tested & operational (Looks very clean both inside & out).

$800.00 OBO

Email any Q's to: n8cdw@... for pics or details.

Our club's website is: www.ww9p.com.

[Please note that buyer is responsible for standard calculated shipping charge. Shipping will be only as much as is required to ship to your location from Rockford, IL.]

4528. 2 meter FM transceiver FS

4539. Heathkit QP-1 Q-Multiplier

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-11-30 23:20:54 UTC
From: Kenneth Stringham
Topic: 4539 Message: 4539

I have a Heathkit QP-1 Q-Multiplier for sale. This unit comes in the original box with the original manual. It is in perfect condition. It was assembled by my father-in-law, who was meticulous in work. I have no need for this item and would like to find a good home for it. Contact me off list if you are interested.

4540. Kenwood TS-2000 HF/VHF/UHF radio for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-12-02 06:52:25 UTC
From: Steve Carroll
Topic: 4540 Message: 4540

I can no longer have my outside antenna here in the apartment complex where I live (I had a Comet CHA-250B). I also have a Kenwood TS-520 that I will be using with my super-duper wire indoor antenna. Christmas is also coming up and the money could certainly help. I have the radio, VS-3 voice synth., mic., power cable, all original docs., original boxes and service manual. I am asking $1250 plus shipping if outside US. I will consider trades but only for a part of the asking price. I would be interested in a DSLR camera system.

Pictures available upon request.

I accept money orders or Paypal.

Contact me at steve@... or (956) 579-2638. I live in Lees Summit, Mo. (part of the greater Kansas City area.)

4541. Kenwood dual band mobile FM transceiver FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-12-02 14:24:27 UTC
From: Ken Simpson, W8EK
Topic: 4541 Message: 4541

For Sale:

Kenwood TW-4000 A dual band mobile FM transceiver

First buyer says he sent money about 3 weeks ago, but
no $$ here, and no answer to e-mail, so it is available again.

The TW-4000 A covers 2 m and 440 MHz FM. It has 25
Watts output, or 5 W in low power. Of course it has
memories, scan, etc. It has a GASFET front end,
giving it a really great receiver.

This would make a great packet rig, which is what it has
been used for. All solid state switching makes silent
packet operation. Since it has been used on packet, it
does not have a mic or mobile bracket with it, although
it takes a standard 8 pin round mic connector, like most
Kenwood rigs.

It needs 13 V DC at 7 or 8 amps to operate. It works fine.
Manual and power cord are included for $95 plus shipping
from Florida.

Thanks.

73,

Ken, W8EK

FOR SALE: HALLICRAFTERS 5R10 Receiver

WORKS ON ALL BANDS.
COMPLETE SET OF NEW TUBES INSTALLED.

Here's a nice 5 tube shortwave set, superhet design for
excellent reception.
Has new 12SA7, 12SK7, 12SQ7, 50L6, 35Z5 tubes.
Covers 540 kHz to 31 MHz in 4 bands. Has main dial and
bandspread tuning. It has a nice 5" PM speaker built-in.
Also, there is a headphone-speaker switch and headphone socket.
105-125V AC operation at 0.25 amps. It looks great, and
everything works as it should.
All of the tubes are brand new, and the radio has been recently
checked out
and works well on all bands. This receives AM mode, no BFO.
The cabinet has no dents or dings and the back is in excellent
shape too.
Comes with a good manual copy and the SAMS PHOTOFACT.

120V AC Operation. AC power cord in excellent shape.

Available for $95.00 plus shipping

Picture and details at:

4549. Icom IC-4 AT, 440 MHz HT FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-12-08 00:26:35 UTC
From: Ken Simpson, W8EK
Topic: 4549 Message: 4549

Icom IC-4 AT, 440 MHz HT for sale:

The Icom IC-4 AT is a fairly generic HT for the 440 MHz band.
It has a 16 digit touch tone pad on the front, and is fully synthesized,

with the frequency controlled by thumbwheel switches on the top.
It has about 3 watts output in high power and just under a watt in low.

A stubby duck antenna (about 3 inches long), belt clip, and wrist
strap is included, along with a battery charger.
This HT works fine, and looks fine also.
Paper work included for $55.

"Empty" Battery pack for alkaline cells
This is not the actual Icom BP-4, but is a Mr NiCd clone, with a
value added addition. It is both a pack for AA cells, but it is also
a 13.8 V DC adapter. It can be used on the IC-2, IC-3, IC-4 and
that series of HTs, as well as the IC-02 AT series of HTs.
This particular unit works fine and looks like new. $ 30

Prices do not include shipping from Florida.

Thanks.

4550. Dentron GLA-1000B for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-12-08 01:40:55 UTC
From: k2bic
Topic: 4550 Message: 4550

I have a 1000B that is in really nice shape inside and out. I am the second owner and we have never fully driven this rig. If you have done your homework, you know that this is the Sweetheart of the Desk size amps, you don't get more power/size anywhere...good looks too. Hate to sell it but I have two and am downsizing. Last one on Ebay weny for 400 plus shipping.
Please make reasonable offers. Tnx, Nick, 201-425-4150....I return all calls.
PS. I have never failed to reach any one I could Hear, With 50 Watts in and 400 Watts out, no TVI or RF problems.

4551. IC-701 breakup, parts available for homebrew

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-12-08 13:16:13 UTC
From: militaryoperator
Topic: 4551 Message: 4551

I have the following from an IC-701 HF transceiver.

RF and convertor pcb. 160-10 (old bands), each band has separate amp, mixer onboard, (needs vfo i/p) and gives 9MHz if o/p. Also tx mixer (9Mhz in, same vfo, hf o/p) Use as front end or a pre amp board. £15.

9MHz filter and carrier xtals, plus pcb, which also carries passband filter and tuning, mic amp, agc amp, cw filter and other bits. £25.

Can supply circuits and pcb layouts so easy to use and incorporate into homebrew projects.

cheers, Ben.

4552. REDUCED AGAIN - Hallicrafters Receiver

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-12-08 13:38:54 UTC

REDUCED AGAIN - GOOD WORKING HALLICRAFTERS RCVR.

If no one buys this by Christmas I am going to either put it on
eBay or give it to a kid or something. Hate to see it go to waste
and no one has experessed any interest so far.

So I am reducing the price again, to a firm $75.00 plus shipping.

HALLICRAFTERS 5R10 Receiver

WORKS ON ALL BANDS.
COMPLETE SET OF BRAND NEW TUBES INSTALLED.

Here's a nice 5 tube shortwave set, superhet design for
excellent reception.
Has new 12SA7, 12SK7, 12SQ7, 50L6, 35Z5 tubes.
Covers 540 kHz to 31 MHz in 4 bands. Has main dial and
bandspread tuning. It has a nice 5" PM speaker built-in.
Also, there is a headphone-speaker switch and headphone socket.
105-125V AC operation at 0.25 amps. It looks great, and
everything works as it should.
All of the tubes are brand new, and the radio has been recently
checked out
and works well on all bands. This receives AM mode, no BFO.
The cabinet has no dents or dings and the back is in excellent
shape too.
Comes with a good manual copy and the SAMS PHOTOFACT.

120V AC Operation. AC power cord in excellent shape.

WAS $125.00 Now available for $75.00 plus shipping

Giving it away free if it is not sold by Christmas!

From: Steven Hays
Topic: 4553 Message: 4553

I have an Icom IC-730 for sale.

AM/LSB/USB/CW 80 thru 10 Meter with WARC Bands.

It is a 7 out of 10 cosmetically and works 9 out of 10.
Full 100W output on all bands.
The Pre Amp works most of the time (Dirty relay contacts).

Comes with Original box, manual on CD and other neet stuff on CD.
Stuff like instructions to repair the dirty relay contacts, and the
factory mod too correct the problem for good.

$325 or Make me an offer.

Call Steve @ 309-371-0540

Please, no emails. Sometimes it takes me days to check.

4558. Ameritron AL-811H and MFJ-962D

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-12-10 16:59:02 UTC
From: Randal Jarrett
Topic: 4558 Message: 4558

I have an AL-811H and the companion MFJ-962D that for financial
reasons I need to sell.

http://www.ameritron.com/products.php?prodid=AL-811H ($850 at HRO)

http://www.mfjenterprises.com/Product.php?productid=MFJ-962D
($299 new price)

This pair has very low operational hours on them. I do mainly
VHF/UHF and very little HF. The amp has very good output, 800+
watts.

I'm asking $700 for the pair and I won't sell the amp separately
unless someone buys the MFJ-962D first ($100)

Topic: 4559 Message: 4559

Hi everyone,

I have a critical need for several items to send to a friend who is a missionary in very remote Honduras. He is a US guy living in Ahaus, Honduras working at a remote medical clinic. He is Gerard Rudy and his Honduran call is HR8GAR.

If anyone has the following items to donate, they would be VERY much appreciated:

Mic for a TS-50
power cords for a TS-50 and a TS-430
VHF marine band radio (to talk with the local villages)
HF tuner (his is intermitent on some bands corroded from humidity down there)

I and several other hams and doctors go down there each Feb. Gerard works with us then so I know his unique radio setup and know he puts it all to good use through out the year to keep things going with the clinic, etc. You can certainly call me to discuss equipment, the mission, his work, etc.

4561. Suitcase spy set project

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-12-14 20:38:43 UTC
From: militaryoperator
Topic: 4561 Message: 4561

Here's an ideal starting chassis for a Suitcase Spy set. £30.

Rx unit, tx unit and spare panel, psu ? etc. Its something I thought about a while back but other projects took over so someone else can have the fun.

Would make great trf/regen rx with 2 tube tx. The coils are available so multi band use could be arranged.

Pic at www.military-radio.150m.com

cheers, Ben

4562. FT: VHF Saber III w/DES-XL module

From: Woody
Topic: 4562 Message: 4562

Hey all, have for trade a very nice VHF SIII in a Systems Saber III case, looks brand new...
Includes radio, antenna and DES-XL module. It'll do 144-174mhz.

Looking to trade for an FT50 or V8000

thanks!
Woody

From: kd4e
Topic: 4569 Message: 4570

Do any of these include SAME for emergency alerts?

With the weird storm fronts rolling through here it
would be nice to be able to have the scanner quiet
unless there is an alert specific to our area.

Great for mounting any kind of electronic equipment.

Dimensions approx 2-3/8" square with large threaded hexnut
on top, these are new and clean units.

Set of 4 available for $30.00 plus shipping.

4577. Wattmeters and SWR Bridges FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2007-12-29 12:07:27 UTC
From: Ken Simpson, W8EK
Topic: 3778 Message: 4577

Wattmeters and SWR Bridges For Sale:

Vintage Wattmeter

This wattmeter is made by M.C. Jones Electronics Co. of
Bristol, Conn. It is called a MicroMatch, Model 261.1.

It is a wattmeter that covers frequencies from .5 to 225 Mcs.
Yes, it says Mcs, and not MHz. From the looks of it, I would
guess that it is slightly post WW II vintage. It has the same
type of styling as General Radio, Millen, Measurements Corp,
and similar test equipment of that era. The case itself is gray
crinkle, with a black meter bezel.

The unit is in two parts. There is a sensing unit that is
similar to the pick up unit that E.F.Johnson used as a remote
pick up for the Matchboxes, except this remote pick up is
a bit larger in diameter, and about half as long. The meter
portion says model 262, and has 10, 100, and 1000 Watt
scales in both forward and reverse. It is connected by a
cable about 3 feet long, that has a 1/4 inch plug that plugs
into the remote pick up.

Cosmetically, it is exceptionally good. The paint looks very
good. I can not find a scratch on it. I would say that is it
collectable quality.
Electrically it works fine. $60

Micronta 21-520 A, HF wattmeter with large dual meters

This is an HF wattmeter that covers from 3 to 30 MHz, with
full scale power readings of 10, 100, and 1000 watts.
LARGE dual meters -- one reads forward power and one
reads reflected power -- both at the same time.
It has a remote sensor, with about 3 feet of cable to connect
to the meter itself.

This particular meter works fine, and looks very, very nice.
I can not find a scratch on it. $50

SWR Bridges

Both SWR Bridges are designed primarily for HF operation,
although they still function well on 6 and 2 meters. Both have
SO-239 connectors on each end, and are designed for 52
ohm antenna systems.

Quements SWB-3 (same meter also sometimes labeled Swan)
This meter has two separate meters. One is for forward power
and one for reverse. This particular unit has a crack on the face
of the SWR (reflected power) meter, although the meter still
functions fine. It is strictly a cosmetic issue. $15

Swan FS-2
This SWR bridge has a single meter, and a switch to switch
between forward and reflected power. It can also be used for
a field strength meter. This one works fine, and looks great
also. $12

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

I have a homebrew transmitter for sale.
This transmitter was purchased at a flea market, I have never tried it out, it comes with all 7 tubes. It seems to cover all the ham bands, 3.5 through to 30 mhz. Output transformer is a hammond. It seems to be very well built with top notch parts. The tube sockets are ceramic, it seems to have switchable band set, through a taped coil on a ceramic form. There are lots of good parts, and the cabinet is well build and shielded, it would make a nice reciever cabinet ect. The whole thing measures 12'' wide, 7'' high, 8'' deep, and weighs about 5 lbs. Price is $20 + shipping Canadian. Photos can be seen at the following url

http://salephotos.freewebpages.org/

4581. Two 440 HTs for sale....

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-01-02 01:09:52 UTC
From: Mike
Topic: 4581 Message: 4581

These have been "modified" ...

The picture shows all of the gear; a pair of Motorola HT 90's, pair antenna, pair of dead batteries and a 120 V charger, operator manual and service manual.

The ribbon cable, (in the photo) taps into; PTT, RX audio, TX enable, Squelch open, Discr out... etc. (identified in the service manual) is easily removed if desired.

These radios were used for a "packet communication development application".

Photo here:
http://www.villagephotos.com/pubbrowse.asp?folder_id=1951005

Yes, they work as simple HT's...but their best usage would further develop different ham radio aspects.

Please put them to use... $20 + shipping (no these will not fit in the $7.95 USPS box)

Mike - N8OEP

4582. FS: Box of 29 Panel Meters and Gauges

Clear face. Dimensions: 1-3/4" square.

Marion dBm Measurements. Like most dBm meters,
displays signal levels above and below the Zero
dBm point. 2.5" Diameter.

Marion Electrical Instruments -100 / 0 / +100 mA DC.
FSD = 1mA DC. Center zero.
Dimension: 3-1.2" diameter.

DC Voltmeter with scales for 300V DC and 600V DC.
Requires series shunt of 400K-ohms for 300V and 800K-ohms
for 600V scales. Slight chip

Panel Meter - Milliwatts and dBm - by Roller Smith Co.
Meter is 2.5" diameter, and has dual scales.

Burlington 0 - 10V DC. FSD = 1V DC.
Dimension: 3" square.

Burlington 0 - 10V AC. Glass loose, works OK.
Dimensions: 3-1/2" diameter

Triplett 0 - 1 mA DC round panel meter. Great for homebrew.
Dimension: 2-5/8" diameter.

Triplett Type #232 0 - 10V AC.
Dimension: 2-1/2" diameter.

0 - 50V AC WACLINE panel meter.
Excellent shape. Dimension: 2-5/8" diameter.

Weston Type #301 0 - 2 Amps DC.
Dimensions: 3-1/4" diameter.

Weston Type #506 -50 / 0 / +50 uA DC.
Dimensions: 2-5/8" diameter.

Westinghouse Meter with 0 - 10 scale and marked 'FILAMENT.'
Measures 4" square with rounded corners. Very classy looking.
Unsure whether this is amps or volts, AC or DC.

Quantity TWO: Weston Type #506 0 - 1 mA DC
Dimension: 2-5/8" diameter.

A&M Instruments Type #265-108 reads 0-100 Watts.
and 0 - 1000 Watts on two scales. FSD = 200 uA DC.
Ruggedized type. Dimensions: 2-5/8" diameter.

Westinghouse 0 - +/- 3V DC Center zero meter.
Type SX-33 protruding design for surface mount.
Slightl crack. Dimensions 2-1/2" diameter.

Pressure Gauges - used for measuring gas pressures.
I have two with the following ranges. One is 0 - 50 P.S.I.
Other one is 0 to 15 P.S.I.

Vectron Panel Meter - Center Zero - Current meter.
Neat little round meter about 1.5" diameter.

Small VU meter for easuring audio levels.

Will sell ALL of the above meters for a total of $55.00 plus shipping

4583. Motorola, AOR, trade/sell?

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-01-03 06:25:58 UTC
From: Woody
Topic: 4583 Message: 4583

Hey all,

Still have for sale/trade:

AOR AR8200 MkII scanner/receiver, European version.

VHF Saber III handheld, ham and commercial bands. radio and antenna.

UHF SP50 handheld, 10ch, radio/charger/2 good batts.

Radios include programming for 16 conventional channels.

....

Looking for:

Ham handheld, dualband such as the FT60 or other late model.

Ham Mobile, V8000 or similar late model.

SELL or TRADE....

if I don't know ya, it'll have to be 'you first' on the trades.

thanks!
Woody

4584. LOOKING FOR YAESU FL2100Z AMPLIER or 10to160m 1to2KW

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-01-02 23:17:09 UTC
From: Massimiliano DP
Topic: 4584 Message: 4584

Hi, I am looking for a second hand amplifier for ?10m to 160m?, from 1KW to 2KW in working order, tested by previous user, with ?healthy? and ?well enough? Tubes and circuit. An old YAESU FL2100Z will be ok or even any other ?equivalent? amplifier like Dentron Clipperton L or Dentron MLA-2500 or even a Yaesu FL2500. I can afford to pay 400$ up to 550$ depending on the amplifier brand and conditions.. Let me know your USPS EMS shipment price to Europe. Paypal or bank ok. Regards & ?73

From: Ken Simpson, W8EK
Topic: 4589 Message: 4589

Touchtone (DTMF) microphones For Sale:

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, along with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
Paper work included for $40.

Drake 1525 EM Touchtone Microphone
This is the mic that was used to add a touchtone pad to
a lot of rigs in the 70s and 80s. Normal hand mic from
the front, but has a touchtone pad on the back. Four
pin mic plug. This particular unit has been used, but is
in good shape and includes paper work. $ 40

KDK Model TM-2
With touch tone pad and up-down switches. It presently
has a 6 pin connector for the KDK 2030, but that can
be changed. Nice condition. $45

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone (DTMF) pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $40

CES "Micropad" touch tone microphone
No model number on this one, but it has a 12 digit pad on the
back. Round 8 pin connector wired for Kenwood. $40

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

4594. for sale Amaritron AL-811H and LDG tuner

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-01-09 17:55:04 UTC
From: John Miller
Topic: 4594 Message: 4594

Hi all, I have for sale a very close to new Amaritron AL811H amplifier, about 800 watts out, and an LDG AT-1000 antenna tuner, that can take up to 1000 watts.
Both were purchased about a month ago and sat in the boxes until about 2 weeks ago, I hooked them up and they work, but where I'm setup I just can't get full enjoyment out of them. I'm setup in the corner of the bedroom and between the insufficient grounding on the second floor, for RF, and I'm probably pushing the circuit breaker with everything I have in here, and on 1 band I'm getting RFI complaints and that's where I'd be likely to use it most, I figure it's best to just sell it. I don't have room anyway I could work on all that but the fact is, I don't think We're staying here more than a couple more years and it's just not worth the time and effort to get that all straightened out and then to have to pack it all up and move later along with all the other equipment I have here. Then I may have to go through all that again, it's just not worth it. I was happy with out an amp for 13 years I won't miss it. I'd say it's got maybe 2 hours of use at the absolute most. I have boxes and manuals for the amp and tuner. I bought both brand new, who ever buys this is pretty much getting the same thing but tested. I'm asking $1050 for the package plus help with shipping. I'll split it up if the amp goes first, but the tuner will not go first. I'm open to reasonable offers, I have enough radio equipment now, but if someone wants to try a partial or full trade if it's reasonably close to value and condition, try me, I'm always up to trying a different peace of ham gear. You might be pleasantly surprised.
email n1umj@... if interested or any questions, my price is negotiable to a point. I'd just rather see it go to someone who can use it right and have fun with it.

4605. Antennas for your HT FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-01-17 19:28:49 UTC
From: Ken Simpson, W8EK
Topic: 4605 Message: 4605

Two meter antennas for your HT for sale:

All antennas are for two meters, work fine, and are in good condition.

VoCom 5/8 wave gain antenna for 2 meters
This antenna is about 4 feet long when extended, so it is unwieldy
on an HT, but it really has gain when you need it. It has 3 db gain
over a quarter wave antenna which likely has about 6 db gain over
a rubber duck. To put it another way, this antenna likely has about
9 db gain over a rubber duck. It telescopes to about 9 inches long.
In that position it is still usable, with about the same gain as a
rubber
duck. This antenna is idea for parades, walk-a-thons, and other
events where you need a gain antenna on your HT. It has a BNC
connector on it. $18

Telescoping quarter wave antenna
This antenna extends to a full 19 inches, but telescopes down to
about 4 inches. It has about 6 db gain over the typical rubber
duck antenna. It has a BNC connector. $12

Quarter wave telescoping antenna
As above, but with PL-259 connector. $12

Quarter wave telescoping antenna
As above, but with a right angle bend in it, and PL-259 connector. $15

Standard rubber duck antenna
With BNC connector, about 7 inches long. $10

PL-259 connector - 6.5 inches long $10
HyGain 275, in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, in original package - $10

5/16 inch threaded, like used by Motorola and others
Regular - about 6 inches long - $10
Stubby - 4 inches long - $10

Type F connector - 6.5 inches long - $10

Special Rubber Duck antennas for Kenwood TH-21 series
2 meter HTs with the threaded connector
Aftermarket stubby, 3.3 inches long - $10
Kenwood RA-6 regular, 6.6 inches long - $10

BNC stubby for 440 MHz - 3 inches long - $10

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

4608. DDS VFO kit forsale

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-01-18 15:55:40 UTC
From: Art
Topic: 4608 Message: 4608

Greetings all,

I have several DDS VFO kits for sale.

For those unfamiliar with a DDS, it is a low level signal generator based on a direct digital synthesis chip made by Analog Devices. These devices produce rf output like a vfo, except they have quartz-crystal-like stability.

Recent technological advances have made the output of these units much cleaner than first generation DDS units (such as the DDS-60), which is based on the old technology 9850 DDS chip. This project uses the much improved AD9951 through AD9954 DDS chips, hence it is called the AD995X or just 995x DDS.

So that more amateurs can afford to experiment, I have undertaken the coordination of Group Buys and have just concluded the second Group Buy. I have several kits left over and available for immediate shipment (worldwide, via PMO or Paypal)

Basic info is here:

http://wb6dhw.com/For_Sale.html

The project is open sourced and fully documented. Firmware can be loaded to the onboard PIC controller via any PC with a USB connection. The device can operate without a USB connection if firmware is written (currently, there is no firmware to allow it to operate as a stand alone unit). However, all the control lines for the DDS chip are brought out via several connectors-just in case someone wants to make a stand alone unit.

Full technical specs and documentation is available at the designers website, click on the various links on the left hand side of the page.

http://wb6dhw.com/AD995x.html

There is a users group on yahoo (dds_controller) and a group for those who are interested in joining a Group Buy (995x_group_buy_here), also on Yahoo.

This is a very stable and clean signal generator with 2 stages of active amplification after the generator chip. It uses some expensive parts (mostly smt) and is not a beginners level project. If the idea of soldering smt makes you squeamish, building of kits purchased from the Group Buys is available from Chris Waldrup (<kd4pbj@...).

This is not a money making commercial operation, it is coordination of Group Buys, thus providing a significantly reduced component cost because the components are bought in higher quantities.

Feel free to drop me a line or to join any of the mailing lists.

Regards,

Art

4610. CW keyer, paddles, and cables FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-01-19 17:45:57 UTC
From: Ken Simpson, W8EK
Topic: 4610 Message: 4610

CW keyer, paddles, and cables for sale:

Trac Electronics CMOS Memory Keyer
This CW keyer has two very large memories built in to it.
Either can be selected independently.
Of course it works fine as a plain CW keyer if you do not need
the memories.
It can be powered by a 9 Volt battery or wall wort.
This one works fine, and looks very good also. $45

Bencher BY-1 Iambic Paddles
Standard Bencher Paddles with black base and chrome parts.
In very nice condition for $65.

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8

As above, but with coiled cord. $10

As above (straight cord), but with 1/8 inch plug. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5

As above, but 1/8 inch plug. $5

Gordon West "Radio School" code tapes
This is a set of four cassette tapes to take a person
up thru 13 WPM. It was designed for use when the General
test was 13 WPM, to make one proficient at that speed.
This set is in nice shape, in its original "binder". $12

Prices do not include shipping from Florida.

Thanks.

4614. Coaxial antenna switches and connectors FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-01-26 23:54:56 UTC
From: Ken Simpson, W8EK
Topic: 4614 Message: 4614

Coaxial antenna switches For Sale:

All have SO-239 connectors.

Para Dynamics PDC 3HD
This is a high quality coax switch, with printed circuit board
stripline type of construction, to keep the impedance constant.
It has the common connector coming out of the bottom, with
the 3 switched connectors coming out of the top.
It looks very similar to the Diawa CS-201 or MFJ 1702, but
is made to switch three antennas. Unused positions are NOT
grounded. $20

Pace 3 position switch
This switch is in a rectangular box. It has the common connector
on the bottom and the three switched connections coming out
of the top. Unused positions are NOT grounded. $15

AmComm JV-104 coax switch
Switches 3 antennas. It is in a nice black rectangular box
Very nice condition. $18

B & W Model 550 A coax switch
This model will switch up to 5 antennas, and does
ground unused antennas. It has SO-239 connectors,
with the coax coming out like spokes of a wheel.
It is in good condition and works fine. $ 35

Waters (B & W) 341 two position coax switch
This switch is very much like the B & W 375 five position
switch, except it only has two position. It has the coax
coming out the back, and it does NOT ground the unused
antenna. This one is in very nice electrical and mechanical
shape. $30

Coax connectors and adapters For Sale:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

UHF female (SO-239) to type "F" Male (as used on cable TV) $5

Type "F" (cable TV) female to BNC male - $5

Prices do not include shipping from Florida.

Thanks.

4615. Motorola Sabers, one VHF, one UHF $150 shipped.

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-01-27 07:33:56 UTC
From: Woody
Topic: 4615 Message: 4615

Hey all,

Still have two Motorola Saber radios for sale.

1ea. VHF Saber III, DES-XL module installed, ham/commercial band currently programmed, 136-174mhz. Looks new. In a sys-saber III case. Radio/antenna only.

1ea. UHF Saber II, non-secure. Does have secure type switch, but is short case, not secure capable. Has model III full shield underneath.
Used/worn/engraved surplus, but not beat to death. Currently has original freqs 463-468mhz programmed, haven't checked the vco, so just assume
450-470mhz. Radio only.

Both tested/working. Will assist with programming.

$150 shipped for both.

4629. Icom HTs and accessories FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-02-02 14:28:16 UTC
From: Ken Simpson, W8EK
Topic: 4629 Message: 4629

Icom HTs and related accessories For Sale:

Icom IC-2 AT, 2 meter HT
The Icom IC-2 AT is a fairly generic HT for the 2 meter band.
It is fully synthesized, with the frequency controlled by thumbwheel
switches on the top, and has a 16 digit touchtone pad on the front.
As some may recall, the IC-2 AT originally came with a 12 digit
touch tone pad on it, but some people needed the 16 digit pad
for control operations, so they ordered a new "front" for the 220 or
440 versions of this HT, which had a 16 digit pad on it, and replaced
this front on the 2AT. This is what has been done with this unit. The
label says Icom IC-3AT but it is really an IC-2AT, with the changed
front. The rubber has deteriorated on the 16 digit pad, so it looks
ugly. Even though it looks ugly, all of the 16 digits work fine.
The HT has about 3 watts output in high power and just under a
watt in low. A rubber duck antenna, belt clip, and wrist strap are
included, along with a battery charger. This HT works fine. If you
want an inexpensive, easy to operate HT, this is it. Paper work
included for $35.

Icom IC-4 AT, 440 MHz HT
The Icom IC-4 AT is a fairly generic HT for the 440 MHz band.
It has a 16 digit touch tone pad on the front, and is fully synthesized,
with the frequency controlled by thumbwheel switches on the top.
It has about 3 watts output in high power and just under a watt in
low. A stubby duck antenna, belt clip, and wrist strap is included,
along with a battery charger.
This HT works fine, and looks fine also.
Paper work included for $55.

Icom BC-35 Desk Charger.
It will charge these batteries:
BP-2, BP-3, BP-4 (w/NiCads), BP-5, BP-5A, BP-7, BP-8, BP-70,
CM-2, CM-2G, CM-3, CM-3G, CM-5, CM-5G, CM-5A, CM-5AG,
CM-7, CM-7G, CM-8, CM-8G, CM-96. To put it another way, it
charges all of the batteries used on Icom HTs from about 20
years ago.
This one works fine and looks very close to new.
It is in its original box, with paper work for $25.

Icom DC-1, 13 V DC adapter for many Icom HTs
This adapter slides on the HT, in place of the battery pack. If
13 V DC is applied, it converts the voltage to the proper voltage
for the HT. It can be used with the IC-2, IC-3, IC-4, IC-02, IC-03,
IC-04, and others. This one works fine, and looks very nice.
With paper work for $12.

Icom BP-4 / CM-4 battery case
This is the "empty" battery case, that one may add six AA cells
for extra long battery life. It will take either rechargeable or
alkaline
AA batteries. When used with rechargeable batteries, it can be
charged on a BC-35 desk charger. This will work on the 2GAT,
02AT, 2AT, 4GAT, 04AT, 12GAT or 03AT, plus many of Icom's
commercial radios. This unit is in very nice condition. With
paper work for $15.

"Empty" Battery pack for alkaline cells
This is not the actual Icom BP-4, but is a Mr NiCd clone, with a
value added addition. It is both a pack for AA cells, but it is also
a 13.8 V DC adapter. It can be used on the IC-2, IC-3, IC-4 and
that series of HTs, as well as the IC-02 AT series of HTs.
It is similar to a DC-1 and a BP-4 in one unit.
This particular unit works fine and looks like new. $ 30

Selectone ST-131 Subaudible PL tone encoder
If you need subaudible tones, this unit will add them to the Icom
IC-2AT, 3AT, 4AT, and others of that series that lacked the tones
originally. It is a postage stamp size unit. This one has never been
used, and is still in its original plastic bag, with the instructions.
$20

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

Shipping to most countries inc us is normally 3 to 5 days fully insured and is only $50

Thanks

4638. For your consideration a Kenwood TS-850SAT In great condition

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-02-10 19:17:31 UTC
From: arby7115805
Topic: 4638 Message: 4638

I have for sale or trade. I am looking for a working combo older HF Rig and HF amplifier set in trade or I will sell this 850SAT for $750 + $35 shipping.
The 850SAT come with the original manual, a copy of the service manual, a CD with copies of manuals and other 850 downloads all of them in a nice loose-leaf notebook. It has the original hand mic and DC power cord. Does not have original box but will be double boxed for shipping.
The radio functions on TX & RX and works up or better than factory spec's!! The antenna tuner works flawlessly and the radio is in good cosmetic condition too.

Pictures upon request email me at

kd6rhr at msn dot com

Thanks for your interest
Steven

4639. Boat Anchors for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-02-11 01:24:28 UTC
From: Bob
Topic: 4639 Message: 4639

I have 5 boat anchors for sale, best offer, any offer, I received these from a guy who cleans out houses.
These all are dusty, have been sitting for a while (years??)They are complete as far as I can tell, cases intact, power cords, all there.

1. Hallicrafters SX-140 80-6 M, all controls and switches turn, except the 'ANL-OFF' switch. No S/N visible, plugged in, nothing happened. Wt 12 lbs +/- .

2. Gonset G-50 "6 Meter Communicator" Missing 1 knob,(squelch), all else intact. # on rr panel "B 1848" There is a mic connector on the back as well as what could be a low pass filter. Plugged in, tubes lit, spkr made noise, static. This runs 20 + lbs.

3. Hammerlund HQ 110 160-6 M No ## visible, cast face looks like it would clean up, no pits, all knobs / switches move,, did not plug in. This one is 15Lbs, +/- .

4. Knight T-150A 80-6 M band switch frozen, all others move, not plugged in. wt 20-25 lbs.

5. Hallicrafters 32-B Nice looking rig,all knobs turn, needs cleaning, heavy, 40+ lbs.

All are sold as is, NO papers or manuals, all are complete, thats the only thing I can say about them. I'm located in Eastern Mass.

Thanks for looking, Bob WA1RM

QTY 10 available for $30.00 each plus shipping.

4642. Shure 444 desk microphone and other mics FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-02-14 16:05:10 UTC
From: Ken Simpson, W8EK
Topic: 4642 Message: 4642

Microphones For Sale:

Shure 444 desk microphone
This desk mic is ideal for many rigs, especially those
that are vintage. The 444 has voice shaping built in to
it that gives it more "punch" than most mics. There is a
switch on the bottom to select PTT or VOX operation.
This particular 444 is in its original box. Not a scratch
or blemish on it. Of course it works well also! $60

Microphone for Heath "Lunchbox" Series
This is the ORIGINAL microphone for the Twoer, Sixer,
and others of the "Lunch Box" series.
It is the original Turner microphone, with the Turner name
on the front, cotton covered cord, and single button
microphone connector.
It is in extremely nice shape. No problems with the cord or
connector, and the mic itself even has a bit of the "sheen"
left on it. I no longer have a rig to test it on, but I did connect
it to a scope and get a nice pattern, indicating all is working
well. $35

High Impedance Heath Hand Microphone
Not a GH-12 mic, but similar. It is a white mic that came
with Heath gear, and says Heath on the front. It is Hi Z,
and has the 2 pin Amphenol connector on it, as used by
much of the older Heath gear. It would be ideal for the SB
and HW series, plus many others, including non-Heath rigs.
It works fine, and is in good shape. $30

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Touch tone (DTMF) microphones:

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, along with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
Paper work included for $40.

Drake 1525 EM Touchtone Microphone
This is the mic that was used to add a touchtone pad to
a lot of rigs in the 70s and 80s. Normal hand mic from

the front, but has a touchtone pad on the back. Four pin mic plug. This particular unit has been used, but is in good shape and includes paper work. $ 40

KDK Model TM-2
With touch tone pad and up-down switches. It presently has a 6 pin connector for the KDK 2030, but that can be changed. Nice condition. $45

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the back. Low Z mic element with round 8 pin connector wired for Kenwood. $40

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a normal low impedance microphone. With 4 pin plug. Like new. $40

HT speaker microphones:

Santec speaker microphone
It has the small round plug (about 3/8 inch) with 6 pins, as used on most Santec HTs, and many Wilson and Yaesu HTs. Works and looks great.$20

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HTs. $18

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can be plugged into a Kenwood rig with the round 8 pin connector. Like new. $20

Speech Processor

MFJ "Super Logarithmic Speech Processor"
Model LSP-520BX II

This unit is one of the "good" speech processors. It uses techniques that will boost your average talk power, without introducing large amounts of distortion. Some processors only add to distortion, but this one works.

It is housed in one of the nice TenTec wood grain / eggshell white enclosures that are a perfect match for some of the earlier TenTec rigs like the Argonaut 505, 509, Triton I and II, and others. Of course it can be used with any rig you want, as it inserts in the microphone audio line. In other words, plug your mic into this unit, plug the unit into your rig, add 12 V DC to power it, and you are set to go.

This unit works fine and looks fine also. $40

Prices do not include shipping from Florida.

Thanks.

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-02-17 10:05:32 UTC
From: kn4tvjimi
Topic: 4651 Message: 4651

I have the last ut-2000b tuner ever made. I purchased this from a guy who was friends with Mr. Murch. The plant was closed and turned in to a seafood processing business some years ago. This tuner was assembled from the leftover parts inventory. It works and looks great. I can e-mail pics upon request. I enjoy playing around with different equipment and would like to swap this for another legal limit tuner that i have not owned. this is a serious tuner. please no mfj. i will consider any other. one tuner i like the looks of is the dentron rt-3000 but there are many others. thanks for looking and let me know. jim

Available for $5.00 plus shipping

4653. Autek QF-1 audio filter FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-02-18 15:04:05 UTC
From: Ken Simpson, W8EK
Topic: 4653 Message: 4653

For Sale:

Autek QF-1 audio filter

This is an audio filter that goes between your rig and
speaker. It runs off of 110 V AC, and will peak, notch,
or become a low pass filter. Selectivity (bandwidth)
and frequency are adjustable from the front panel.
The input is a 1/4 inch phone plug, and the output is
a 1/4 inch jack on the front panel. This particular unit
looks very good, and works the same. Paper work
is included for $40 plus shipping from Florida.

Thanks.

4654. Wattmeters and SWR Bridges FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-02-23 00:34:54 UTC
From: Ken Simpson, W8EK
Topic: 3778 Message: 4654

Wattmeters and SWR Bridges For Sale:

Daiwa CN-520 "Cross needle" Wattmeter
This wattmeter does it all. It covers from 1.8 to 60 MHz,
which means this one meter will measure power on all HF
ham frequencies, plus six meters. It would be ideal for
some of the new multiband rigs that have 1.8 to 55 MHz
coming from one antenna connector, and 2 meters and
440 MHz from a separate connector. It has 2 power
scales of 2000, and 200 watts on forward power, and
400 or 40 watts reflected, and uses a nice cross needle
meter to read both forward and reflected power at the
same time, with a cross scale for SWR. It works great,
and looks OK also. $50

Heath HM-102 HF wattmeter.
Covers 1.8 to 30 MHz, with 200 W and 2000 W full
scale. It can also be used to check SWR, and has a
remote sensor that can either be left inside the meter,
or separated from the actual meter by about 3 feet.
SO-239 connectors in and out. This particular meter
works fine and is in good shape. With paper work
included for $38.

Micronta 21-520 A, HF wattmeter with two large meters
This is an HF wattmeter that covers from 3 to 30 MHz, with
full scale power readings of 10, 100, and 1000 watts.
Two LARGE meters -- one reads forward power and one
reads reflected power -- both at the same time. This gives
the same info as some of the cross needle meters, but many
people find it is easier to read.
It has a remote sensor, with about 3 feet of cable to connect
to the meter itself.
This particular meter works fine, and looks very, very nice. $50

Heath HM-15 SWR Bridge
This unit matches the Heath SB (and also HW) line in styling.
It is an SWR Bridge that covers from 160 thru 6 meters, with
SO-239 connectors on the back. The front has the meter on
the left, and two knobs to the right. It is the same size as the
HD-15 phone patch. This one is in very nice shape.
Paper work included for $20.

Heath AM-2
This HF SWR Bridge matches the DX-40, although it can
be used with any HF transmitter. It is about 8 inches

wide and 4.5 inches high, with the meter in the middle,
and a gray colored knob at each side near the bottom.
It covers 160 thru 2 meters and will handle full power.
This particular unit is in good shape.
Paper work is included for $18.

Midland 23-126
This SWR bridge has a single meter, and a switch to switch
between forward and reflected power. It can also be used for
a field strength meter. This one works fine, and looks great
also. $15

Archer Field Strength / SWR meter
This is a fairly generic HF SWR Bridge. It is in a nice
sloping panel enclosure with a wood grain finish. $10

Prices do not include shipping from Florida.

Thanks.

I have a Sideband Engineers (SBE) Model 34 SSB Transceiver with an SBE microphone. Manufactured in the late 1960s, this radio is a true classic with a built in power supply. When on AC operation transmit/165 watts. It's part of an estate sale and hasn't been used in years. Appearance is good. It weighs 20 lbs. Reviewed in QST July 1966 pp 38-40. Make me (KG2DV)an offer.

4665. FT Drake TR4

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-02-27 00:14:28 UTC
From: RAY FRIESS
Topic: 4665 Message: 4665

Have an extra Drake TR4 transceiver that is excess to my needs.
Wondering if anyone would be interested in trading for a Heathkit SB 101 or SB 102 or SB 110. Would really like a 110 as I'd like to get on six meters.
Would also consider another brand of 6 meter rig as well.
(As you might be able to tell, I'm a Heathkit fan)

This TR4 is in great shape cosmetically. I would rate it about an 8 to 9.
Measures between 90 and 120 watts out on a wattmeter (Heathkit wattmeter).
The bandswitch needs cleaning and because of this the receiving is somewhat flaky at times, meaning in and out due to the contacts.
Should be an easy fixup for a Drake fan. No power supply comes with it. I'm using the one I have with the remaining TR4 station. That's one reason I'm opting for the Heathkit rigs ... I will take one without a power supply because I have one already.

4666. Two meter FM transceiver w/ tones FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-02-29 20:53:01 UTC
From: Ken Simpson, W8EK
Topic: 4666 Message: 4666

For Sale:

KDK FM-2030, Two meter FM transceiver, with tones

This transceiver covers two meters with 26 W in high
power and 6 W in low power. A PL (CTCSS subaudible)
tone encoder is built in. The microphone has a touchtone
(DTMF) pad on it. Of course it has memories and scan
capabilities. It is very easy to operate.
This one looks fine, and works fine.

Included with the radio is the power cord, touchtone
microphone, mobile bracket and paperwork, all in the
original box for $75 plus shipping from Florida.

Thanks.

4667. Many Microphone and related items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-03-01 15:02:48 UTC
From: Ken Simpson, W8EK
Topic: 4667 Message: 4667

Microphones and related items for sale:

Desk Microphone:

Shure 444 desk microphone
This desk mic is ideal for many rigs, especially those
that are vintage. The 444 has voice shaping built in to
it that gives it more "punch" than most mics. There is a
switch on the bottom to select PTT or VOX operation.
This particular 444 is in its original box. Not a scratch
or blemish on it. Of course it works well also! $60

Regular hand microphones:

Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Microphone for Heath "Lunchbox" Series
This is the ORIGINAL microphone for the Twoer, Sixer,
and others of the "Lunch Box" series.
It is the original Turner microphone, with the Turner name
on the front, cotton covered cord, and single button
microphone connector.
It is in extremely nice shape. No problems with the cord or
connector, and the mic itself even has a bit of the original
"sheen" left on it. It works fine. $33

High Impedance Heath Hand Microphone
This mic came with Heath gear, and says Heath on the front
of it. It is Hi Z, and has the 2 pin Amphenol connector on it, as
used by much of the older Heath gear. Of course it can also
be used on Johnson, Hallicrafters, and other transmitters
needing a Hi Z mic.
It works fine, and is in good shape. $30

Touch tone (DTMF) microphones for sale:

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, along with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
Paper work included for $40.

Drake 1525 EM Touchtone Microphone
This is the mic that was used to add a touchtone pad to

a lot of rigs in the 70s and 80s. Normal hand mic from
the front, but has a touchtone pad on the back. Four
pin mic plug. This particular unit has been used, but is
in good shape and includes paper work. $ 37

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $37

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $37

HT speaker microphone:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HTs. $18

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can
be plugged into a Kenwood rig with the round 8 pin
connector. Like new. $20

Speech Processor

MFJ "Super Logarithmic Speech Processor"
Model LSP-520BX II

This unit is one of the "good" speech processors. It uses
techniques that will boost your average talk power, without
introducing large amounts of distortion. Some processors
only add to distortion, but this one works.

It is housed in one of the nice TenTec wood grain / eggshell
white enclosures that are a perfect match for some of the
earlier TenTec rigs like the Argonaut 505, 509, Triton I and
II, and others. Of course it can be used with any rig you want,
as it inserts in the microphone audio line. In other words,
plug your mic into this unit, plug the unit into your rig, add
12 V DC to power it, and you are set to go.

This unit works fine and looks fine also. $40

Digital interface / Phone Patch

Johnson Viking Phone Patch - Model 250-46

This device can be used as a digital interface, even
though it was designed to be used as a phone patch.
It can easily be converted into a digital interface (such
as between rig and sound card), as it contains the

same components used in the expensive digital
interface boxes being sold today.

This unit is made to be mounted vertically
beside the rig. It is about 6 inches high, 2 inches
wide and 3 inches deep. It has 3 pots on the
front for Null, Receive Volume, and transmit gain,
along with a switch for phone patch or microphone.
On the back is a terminal strip for speaker and
phone line. The microphone input has the 2 pin
Amphenol connector like used by Johnson, Heath,
Hallicrafters.

This one is in nice shape for $30.

Icom HM-8 hand mic with Touch Tone (DTMF) Pad

This mic is being sold for parts only. The dynamic element
in it is open. A part of the plastic holding the PTT button
does not seem quite right, but the actual touch tone pad
and electronics is OK, as far as I can tell. So if you have
an HM-8 with bad electronics or actual touch tone pad,
this unit will get you up and going again. Actually, the unit
probably can be repaired and used. $12

Prices do not include shipping from Florida.

Thanks.

4668. Keithley 169 Lab Quality Digital Multi Meter FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-03-01 21:03:25 UTC
From: Ken Simpson, W8EK
Topic: 4668 Message: 4668

For Sale:

Keithley 169 Lab Quality Digital Multi Meter

This is a bench type DMM, with good accuracy.

3 1/2 digit LCD display
Voltage ranges are protected to 1400 volts
Resistance ranges are protected to 300 V RMS
(This means you can accidentally apply up to 300 V
RMS when measuring resistance, and the meter
will survive.)
Voltage ranges from 200 mv to 1000 V
Current ranges from 100 microamps to 2 amps
Resistance ranges from 200 ohms to 20 Meg

It is in very nice condition, both electrically and cosmetically.
Manual included for $90 plus shipping from Florida.

Thanks.

4678. Ameritron AL 80B 4 Months Old MINT!

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-03-05 20:37:10 UTC
From: Mal Speer
Topic: 4678 Message: 4678

Ameritron Al 80B. Purchased Nov.2007 from HRO. This unit is in mint condition. It has maybe one or two hours use tops. I was on vacation the last two months in Fl. It puts out over 900 watts on 20 meters. Wired for 120 volts. The 10 meter mod is done. I decided to run a 220 line and purchase an AL 82.
I have the original boxes and papers. The warrantee card has not been sent in.
I am asking $1100. Plus shipping
If you are in the New York area and want to see it under power, that would be fine.

4681. FS: Pyramid PS-32LAB Variable Power Supply

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-03-08 14:54:58 UTC
From: kd4e
Topic: 4681 Message: 4681

FS: Pyramid PS-32LAB Variable Power Supply

* Input: 110/60 Hz
* Input Current: 230mA @ 0A Load 2.21A @ 5A Load
* Output Current: 0-5A Adjustable
* Output Power: 0-30V Adjustable
* Fine & Coarse Voltage Adjustments for Accurate Settings
* Ripple: 50mV Peak to Peak Max @ 5A Load
* Load Regulation: ?2%
* Short Circuit Protection
* Overload Protection with Reset Button
* Dual Gauges (Current/Voltage)
* Safety In-line Jack
* Positive, Negative and Ground Output Terminals
* Complete with Test Leads and Manual
* Suitable for Scientific & Technical Applications
* Dimensions: 11.5?L x 9?W x 4.75?H

Terrific for any bench! I don't need two.
Very good cosmetic and operating condition.

$65. if picked up here in the Tampa Bay area.

Plus actual shipping (no handling fees) if elsewhere.

4688. Low Pass TVI filters FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-03-08 15:27:53 UTC
From: Ken Simpson, W8EK
Topic: 3412 Message: 4688

Low Pass TVI filters For Sale:

Low Pass for your transmitter
Add one of these filters to your transmitter to help prevent
TVI or RFI.
All filters have an SO-239 connector for input and output,
and are designed for 52 ohm systems.

B & W model 425 (Also know as FL-10/1500) low pass filter
It cuts off just above 10 meters, and will handle 1500 Watts.
Maximum attenuation is at 52 MHz, with at least 70 db across
the band.
This is an older model that seems much heavier duty. It weighs
almost twice as much as the newer model, and looks like it
would take more power. It likely was made in the days that
plate modulated AM was the rule. Paper work included. $30

B & W FL-10/1500 Low Pass Filter
This is the more modern, current, latest version of the 425 filter
as listed above. Like new condition. With paper work $35

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation
in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
also has the single page "manual" with it. $ 33

Johnson Nye Viking 250-20 Low Pass Filter
This cylindrical low pass filter has a cut off frequency of
45 MHz and 75 db of attenuation.
It is rated to take 1000 Watts of AM, or 5000 Watts
PEP SSB.
Filter only $33
Filter with mounting bracket $35

Alinco ELP-60 D LX low pass filter
For 50 ohm systems, with up to 500 watts of power.
This one has an SO-239 on one end, and about a 2 foot
length of coax and PL-259 on the other end. $25

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

4690. FS: Parts for HP-23 Power Supply

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-03-11 14:10:18 UTC
From: kd4e
Topic: 4690 Message: 4690

FS: Parts for HP-23 Power Supply

The big HV transformer, smaller filament transformer,
and the choke are believed to be OK but not guaranteed.
When tested the PS showed 800v but due to loose components
it was not tested further.

Three large high power resistors, three edge meters, three
large electrolytic cans, the power cable for Heath rigs, and
various other parts.

Probably not worth shipping the chassis and 12x16x8" wood
cabinet. The supply could be restored but would require lots
of re-soldering, insulation of the electrolytic cans, and the
replacement of some parts. Best if picked up locally in the
Tampa area.

Asking only $25. picked up here in Hudson.

I may attend the Fest in NPR March 22nd gulfcoastarc.org
I will bring it there, otherwise TARCFest in Tampa in April.

Here are the specs that this homebrew PS was designed to
meet for a Heathkit HW-101:

Input:
120 volts AC, 50-60 cycles, 350 watt maximum.

High voltage output:
820 volts DC, no load; 100 watts DC @ 250 ma.
Duty cycle: 150 ma continuous, 150 ma to 300 ma @ 50%.

Low voltage output:
(High Tap) 350 volts DC no load; 300 volts DC @ 150 ma.
(Low Tap) 275 volts DC, no load; 250 volts DC @ 100 ma.

Fixed bias:
?130 volts DC, no load; ?100 volts DC @ 30 ma.

Adjustable bias:
?40 to ?80 volts DC @ 1 ma maximum. Continuous duty to 20 ma.\

Filament voltage:
6.3 V. AC @ 11 amps; 12.6 V. AC @ 5.5 amps.

The power supply is in a nice wood cabinet with a marbled
faceplate, three voltage meters, a pilot light, the power
cable, the ac cable, and the speaker cable. It is 12x16x8"

Approximate specs from:
http://www.heathkit-museum.com/ham/hvmhp-23.shtml

4691. FS: Military VHF amp

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-03-12 19:25:03 UTC
From: Radio WC6W
Topic: 4691 Message: 4691

VHF Amplifier -- Late '70's vintage likely Military, probably airborne, VHF power amplifier assembly. It consists of 7 almost identical amplifier assemblies clustered around a central housing that has splitter combiner networks which are plugged onto each end with a bunch of SMB connectors. There are TNC's for the main in's & outs. I think it was originally configured as one amp, driving two, driving four boards.

The complete assembly measures 7.5" x 5" x 3.5" overall -- the individual RF amp boards are 4.5" by 2". Each amplifier is a push pull design -- they appear to be 50 ohm in & out impedance with either PT6747 or PT6702 TRW transistors. I would guess this unit operates on 28VDC. Six of the modules are marked OK and one, the input stage I think, is marked NO Good. The individual amps have integral heat sink plates so, they could be removed from the assembly and used separately.

Think of it as 7 amplifier boards at $10 ea -- Bare PCB's would cost as much! -- $60

4706. Alpha Delta Coax Switches FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-03-21 16:41:47 UTC
From: Ken Simpson, W8EK
Topic: 4706 Message: 4706

For Sale:

Coax switches by Alpha Delta

Delta 4
This is a coax switch designed to switch four antennas.
It actually has a fifth position that will ground all antennas.
There is also a special lightning arrester "plug" built in
that can be changed if you get hit. The switch is of strip
line type construction so that it provides a good impedance
match at higher frequencies; it is rated for use through 450
MHz. Of course it will handle a full 1500 Watts. SO-239
connectors. This is a very high quality coax switch!
This particular switch works just like it should, and looks
very close to new. With paper work for $65 .

Delta 2
Same as Delta 4 above, except it will only switch two
antennas, and has a third position to ground all antennas.
This one also works great and looks great also.
With paper work for $40

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

Topic: 4708 Message: 4708

FS: JingTong 440-470MHz HT w/charger

Approximately 2.5W, 38 CTCSS selectable tones
Manual here:
http://www.g4ilo.com/files/Jing%20Tong%20Users%20Manual.pdf
I have some additional docs which I will include.
Powers up and seems OK, just no time to work through the
manual. 2.5W on 440 not enough way out here in the woods!

Looks good, protective plastic is still on the display.
The little dog of the prior owner left teeth marks on
the tip of the rubber-duckie antenna, purely cosmetic.
No belt clip or case is included.

Asking $35. shipped in USA

Date: 2008-03-22 18:50:45 UTC
From: Ken Simpson, W8EK
Topic: 4710 Message: 4710

For Sale:

A variety of HTs (both 2 m and 440 MHz) and associated
accessories

Realistic HTX-202 for 2 meters
This HT has about 5 W output, or 1 W in low power. It
has an exceptional receiver on it, with extremely good
front end characteristics. Of course it has memories,
scan, and all the normal bells and whistles, including a
very readable LCD display. A touchtone DTMF pad is
included on it, as are PL (subaudible) tones.
This particular unit works fine, and looks very close to new.
It includes a good battery, charger, belt clip, carrying strap,
rubber duck antenna and paper work for $70.

Realistic HTX-404 for 440 MHz
Similar to the HTX-202 above, but for the 440 MHz band.
It also works fine, and looks really great. It includes a good
battery, charger, belt clip, rubber duck antenna and paper
work for $70.

Radio Shack 119-310 speaker microphone
Can be used on either of the above HTs, or on many others
such as Icom, Yaesu etc. It works fine, and looks good also.
$18

Radio Shack 19-300 Battery pack for HT-202 and HTX-404
This is a good battery pack for the Realistic HTs. It also fits
some of the Icom HTs such as the IC-2 AT, IC-02 AT, IC-4 AT,
etc. This is the 7.2 volt, 600 ma hour NiCad pack.
It works fine and looks great. $25

Alinco DJ-191, 2 meter HT
This unit has about everything except the kitchen sink in it. It
has a very large, readable LCD display that I can read without
my glasses! It has about 7 watts max output, and the receiver
is great. It covers from 136 to 174 MHz, so it covers all of the
weather and VHF public service frequencies. Of course it has
memories and all sorts of scan features. Touchtones (DTMF)
and PL (subaudible) tones are included.
This unit works 100% and looks extremely nice. It includes a
good battery pack, belt clip, rubber duck, and paper work for $100.

Kenwood TH-41 AT HT for 440 MHz.
This compact HT has thumbwheel switches to select the operating
frequency. The HT has about 1.5 watts output, and a decent receiver.

It has a touchtone pad on it, and is very simple to operate. You likely

will not need to read to manual to use this one!
It includes a good battery (new insert a couple months ago), charger, rubber duck, carrying strap, and paper work for $60.

Alinco DJ-G5 dual band 2 meter and 440 MHz HT
I said earlier that the Alinco DJ-191 2 meter HT has about everything except the kitchen sink in it. I think they must have included the kitchen sink in this one! It has all of the features of the DJ-191 above,
but also works on the 440 MHz band. It will even cross band repeat, if you talk to it right. But I am certain you will need to read the manual
on this one! It has three power levels of about 6, 3.5 and 1 watts. The receiver covers from 108 to 174 MHz, and then from 420 to 480 MHz. This means it covers the AM aircraft band, as well as the VHF public service, weather frequencies, and UHF public service. I can not think of anything a ham would want it to do that it will not do. This particular unit works fine, and looks extremely nice. It includes a good battery, belt clip, rubber duck antenna, and paper work for $250.

Speaker microphone for Alinco HTs above.
I thought it was actually an Icom HM-9, but I can not find that written on it any place. I do know that it works fine with the Alinco HTs. It looks OK also. $18

BNC to PL-259 antenna adapter
For use with the Realistic HTX-202 and HTX-404 HTs and also Alinco DJ-191 and DJ-G5 HTs above, or any other HT with BNC connector. It will convert the BNC connector on the HT, so that you can use a normal antenna with a PL-259 connector. Like new. $5

Prices do not include shipping from Florida.

Thanks.

4728. Extensive Ham Publications - Both Vintage and Modern - FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-04-05 10:28:18 UTC
From: Ken Simpson, W8EK
Topic: 4728 Message: 4728

Ham Publications For Sale (Both Vintage and Modern):

I realize this is a long list; I have tried to group the books
as much as possible. All are in good condition or better.

ARRL Handbooks:

These are in the smaller format (6 1/2 by 9 1/2 inch size).
They include tube charts and ads for vintage equipment,
which are not in the newer handbooks.
1958 - 35th edition - Actual book is in very good condition
.....Cover has been repaired by laminating. $15
1967 - 44th edition - Very nice condition $15
1973 - 50th edition - Very nice condition throughout $12
1977 - 54th edition - Good condition $10
1978 - 55th edition - Extremely nice condition $12

More modern, larger 8 1/2 by 11 inch format:
1981 - 58th edition - Nice shape $13
1982 - 59th edition - Good condition $11
1983 - 60th edition - Great condition; no problems $15
1985 - 62nd edition - Like new $17
1986 - 63rd edition - Close to new condition $17
1993 - 70th edition - Hardbound - Like new $20
2006 - 83rd edition - with CD, like new $35

Radio Physics Course - An Elementary Text Which
Explains the Principles of Electricity and Radio
By Alfred Ghirardi - Published 1932 by Murray Hill Books
This is a book just under 1000 pages that is very detailed.
It has many interesting topics.
This book is in fairly good shape, although certainly not
new! $15

Electrical Engineering by Dawes
Volume 1 - Direct Currents
Third Edition - 1937
I would call this a basic text. 750 pages. It includes
a separate insert that has the answers to the problems.
Book is in nice shape, but does have a name on the
inside cover with a 1938 date. $15

Direct and Alternating Currents
By Oppenheimer and Borchers
1963 - McGraw Hill - 392 pages of "Modern" info,
compared to the 1930's books
Very nice shape, with name in front cover. $12

Unit Outlines in Physics by Colen and Newman
Paperback (I didn't know they made paperbacks then!)
Revised edition, 1940
Some wear, and writing. $ 12

Modern Electronic Communication by Gary Miller
This text book is used in many community colleges, and is an
exceptionally thorough, yet easy to understand book covering all
aspects of communications, from Ohm's Law on up.
Hardback in very nice condition. $18

Books about Operating an Amateur Radio Station:

ARRL "Stealth Amateur Radio - Operate from Anywhere"
By Kirk Kleinschmidt, NT0Z - like new - $25

RSGB "Amateur Radio Operating Manual"
1982 - 2nd edition $8
1991 - 3rd edition - like new $10

ARRL "Radio Amateurs Operating Manual"
1985 - 2nd edition $8
2000 - 7th edition - Inch thick with "Ham Desktop
.....Reference" included - Like New - $18

ARRL "Operating an Amateur Radio Station"
1983 - 61st edition $3
1984 - 62nd edition $3

ARRL "Public Service Communications Manual"
1985 - 9th edition - $3
No date listed, but appears to be about 1990-1992 $3

ARRL "Specialized Communications Techniques
for the Radio Amateur" - 1975 - First Edition $7

ARRL "Practical Packet Radio"
By Stan Horzepa, WA1LOU
First Edition - 1998 - Like new - $10

"Digital Communications with Amateur Radio"
By Radio Shack, Jim Grubbs, K9EI
1988 - $4

ARRL "FM and Repeaters for the Radio Amateur"
By W1XZ - 1978 - Second edition - $5

ARRL "Radio Frequency Interference"
1981 - 2nd edition - like new - $10

FCC Interference Handbook
Published by the FCC - 1986 edition - $3

ARRL "Your Ham Antenna Companion"
A guide to understanding and building antennas

1995 - First edition - $8

ARRL "Lightning Calculator"
Circular slide rule type to figure inductance,
resonance, etc.
1932 copyright date - good shape - $18

ARRL "Understanding Basic Electronics"
By WR1B - inch thick course - $12

ARRL "Weekend Projects for the Radio Amateur"
1979 - First Edition - $8

Sears "Simplified Electric Wiring Handbook"
1962 - Lots of diagrams - $3

Archer "Getting Started in Electronics"
By Forrest Mims - many diagrams - 9th edition - $4

Radio Shack "Basic Digital Electronics"
By Alvis Evans - water stain on back - 1996 - $3

ARRL Amateur Radio Field Resources Directory
1986-87 - First Edition - About an inch thick - $5

Ham Price Guide - 2nd Edition
Lists prices of used ham gear - $5

Radio Amateur's World Atlas
Published by Callbook - 12th edition - $8

Radio Amateur's World Atlas
Published in Germany - $8

National Geographic World Map
As seen from the satellites - $1

Time Selector
Round "circular slide rule" type of
device to select time in other areas.
By PanAm Airlines - no date I can find, but looks
about 1950 vintage $2

ARRL DXCC Countries List
Sept 1997 - marks in it - $2

FCC Interference Handbook
Published by the FCC - 1986 edition - $3

ARRL "FCC Rulebook"
Eighth Edition - 1989 - $4
As above, but "Newly Revised to include Codeless
.....Technician" - 1989, updated to 1991 - Like New - $6

W5YI "Rules and Regulations - Part 97 Amateur Radio Service"
1993 - Fourth Edition - $3
2002 - 17th Revised Edition - $4

Tab Books: "Oscar: The Ham Radio Satellites"
by Dave Ingram, K4TWJ - 1979 - First Edition
Hardback - Like new - $15

ARRL "Weather Satellite Handbook"
1990 - 4th edition - like new - $10

General and Technician License Study Material:

To the best of my knowledge, this is current material.

ARRL Ham Radio License Manual - Technician Level
This is the book you need to get your first license, or to
get someone started in ham radio. It is used by most
of the Tech licensing classes. Like new for $18

ARRL General Class License Manual - 5th edition
This book has not only the questions, but also an
explanation of the theory behind the questions.
Like new for $12

ARRL General Q & A Manual - 2nd edition
This book has the questions and a brief explanation. It
is not nearly as thorough as the actual License Manual
above. Like new for $10

General Class License Manual by Gordon West, WB6NOA
Second Edition - Like New - $3
Fifth Edition - Like new - $5

Upgrade to General Class by Don Stone, W6TNS
1992 - $4

Advanced Class License Manual by Gordon West, WB6NOA
"New Edition" - Second Edition - 1995 - $4

Extra Class Test Guide - The Final Exam, by Disk Bash, KL7IHP
This is the book that started it all, with the first publication
of the actual exam questions.
Second Edition - 1990 - well used - $6

Ameco "Mastering the Morse Code" by Martin Schwartz
First Edition - 1957 - $8

Ameco "Radio Amateur License Guide" by Schwartz
Covers Novice, Tech, and General questions with diagrams
and tube info needed for the tests - 1956 - $5

Ameco "Novice License Radio Amateur FCC Test Manual"
By Martin Schwartz - 1984 - like new - $4

Ameco "Amateur Radio Novice Class Theory Course"
By Martin Schwartz. Far more in depth than the test manual.
First Edition - 1978 - $5

Ameco "Complete Technician Radio Amateur FCC Test Manual"
By Martin Schwartz - 1992 - $3

Ameco "General Class Radio Amateur FCC Test Manual"
By Martin Schwartz - 1984 - Like new - $4
As above, but includes 1988 questions and answers - $4

Ameco "Advanced Class Radio Amateur License Guide"
By Martin Schwartz - First Edition - 1981 - like new - $5

Ameco "Advanced Class Radio Amateur FCC Test Manual"
By Martin Schwartz - Copyright 1987, with added 1991 material
First Edition - Like New - $6

Vintage ARRL Licensing material:

ARRL License Manuals - $3 each
1979 - 77th edition - All classes
1984 - 79th edition - All classes
1984 - 80th edition - All classes
Technician Class - 1989 - First edition
General Class - 1989 - First edition
.........1997 - Second Edition
Advanced Class - 1985 - First edition
.........1990 - Third Edition
Extra Class - 1988 - Third edition

Sam, Tab Publishing, and Hayden Vintage Licensing material:

General Class Amateur License Study Guide
By Phil Anderson, W0XI; published by Sams
First Edition - 1979 - $3

Amateur Radio General Class License Study Guide
By Jim Kyle and Ken Sessions; Tab Publishing
1975 - 2nd edition - $3

Amateur Radio Advanced Class License Study Guide
By Jim Kyle and Ken Sessions; Tab Publishing
1975 - 2nd edition - $3

Hayden "Radio Operator's License Q & A Manual" by Kaufman
For commercial tests - Eighth Edition - 1976
About 1 1/2 inches thick - $5

Sams Photofact "Master Index"
Lists what is in the various Sam's Aug 1960 - Good condition - $8

Sams Tube Substitution Manual
1970 It looks like cover has been replaced, but it is in nice shape.

$4

Elements of Radio Servicing

Original Operating Manuals for Kenwood Rigs:

All manuals are original, in very nice condition, for
Kenwood radios.
All are operating manuals, and not service manuals.

Operating manual for TH-21 A / AT HT for 2 meters $8

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E
HTs for 440 MHz, 220 MHz and 2 meters $10

Operating manual for TM-221/421 2 m mobile $15

Operating manual for TM-231 / 331 / 431 / 531 mobile FM
transceivers for 2 meters, 220 MHz, 440 MHz, and 1200 MHz. $12

Operating manual for TR-2200, 2 meter "portable"
This is very similar to the Drake TR-22. $15

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $14

Operating manual for TR-2600, 2 meter HT $12

Operating manual for TW-4000 dual bander $15

ORIGINAL Heath manuals. These are manuals
only. They are all originals, in exceptionally
good condition, and are not copies.

Heath CO-1 Code Practice Oscillator
1959 - Extremely nice condition, with NO check marks
in the book. Separate pictorials included. $7

HD-15 Hybrid Phone patch - 1965
Check marks in book,
Schematic is part of book. $8

Heath HM-2102 VHF Wattmeter Assembly Manual
1972 - Looks very close to new, but does have check
marks in the book. Schematic included. $10

Heath HN-31 A "Cantenna" Dummy Load
For the "A" model dated 1982
No check marks in book. $10

Heath HW-2021 Assembly manual - 1975
2 meter hand held transceiver
No check marks in book. $10

GD-600 Photoelectric Light Switch
Schematic is part of book. $6

Heath IM-5284 Multimeter
Large schematic only - $ 3

These are original manuals only.

The following Texas Instrument Data Books are available.
All are in very nice, close to new, condition, with very little use.

Analog Applications Journal - $2 each
August 1999
Nov 1999
Feb 2000
May 2000
August 2000
Nov 2000

AHC/AHCT Designer's Guide - June 1999 $2

Mixed-Signal and Analog Products Designer's Guide
And Reference w/CD - January 1999 $4

Analog and Mixed Signal Products Designer's Guide
And Reference - August 1999 $3

Analog/Mixed-Signal Products Designer's Guide
With CD - February 2000 $5

Logic Selection Guide - August 1998 $4

BiCMOS Bus Logic Interface - 1988 $2

Boundary-Scan Logic IEE Std 1149.1 (JTAG)
5V and 3.3 V Bus interface and scan support Products
1994 $2

LVDS Application and Data Handbook - 2003 $2

The Voltage Regulator Handbook - 1977 $5

Prices do not include shipping from Florida.
Shipping via "Media Mail" is relatively inexpensive.

Thanks.

Alpha Delta Pathfinder 200 watt tuner
From their website: http://www.alphadeltacom.com/pathfinder.html
Continuous coverage tuning from 1.8 thru 30 MHz plus 6 meters.
It runs under microprocessor control with an average tuning time of 3
to 4 seconds automatically.
Front panel pushbutton switched outputs for coax, long wire or
balanced line antennas--using a built-in balun. Select between 2 coax
or 1 coax and 1 long wire/balanced type antenna.
10:1 SWR tuning range on HF and 3:1 on 6 meters. Will match coax
outputs from 6 thru 800 ohms and long wire/balanced outputs from 24
thru 3200 ohms (HF). Will match a wide variety of antennas.
200 watt power rating on HF and 100 watts on 6 meters with 50% duty cycle.
Requires 12 VDC @1 AMP; 7.5 in. W, 2.5 in. H and 11 in. D; Wt 5.5 lbs.
The Alpha Delta PathFINDER auto tuner is available thru Alpha Delta
dealers or direct. Price is $399.95 ea. plus 8.00 s/h
As New with original manual Asking $275 shipped US

4739. Gap Titan DX All Band Vertical Antenna

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-04-06 13:14:28 UTC
From: wa4onv
Topic: 4739 Message: 4739

Greetings to all,
Up for sale is a Gap Titan DX vertical antenna in Miami, Florida. This would be a LOCAL PICKUP only as I won't ship this antenna, too much hassle and expensive. Antenna is boxed up and ready to go. I'm expecting a Stepper IR Beam to replace this antenna. I'll take 200.00 dollars for it. Antenna is in excellent condition since it's only 18 months old. Thank you and best 73. Joe, WA4ONV

4743. Drake L-4B in Vermont

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-04-10 22:13:15 UTC
From: Bob Bruno - K2KI
Topic: 4743 Message: 4743

Hi all,

Last summer I received a Drake L-4B HF amp from a ham that was going into a "skilled" facility. It's in great shape with a few scratches on the top cover. It is wired for 220V.

I have never used it as I do not have 220V yet in the shack. He hadn't used it in over a year so I think the tubes needs to getter for a little while to burn off any gases. The owner said that no work has ever been done on this amp and I seriously doubt that the cover has ever been off for any reason! I also have the manual that came with the amp.

Anyway, At this point in time, it is excess to my needs. What I need more is an R-390A receiver. So, I am selling it to help pay for one. I hate to part with it but have little else of any worth to sell (unless kidneys are worth anything on the open market or it has become legal to sell the XYL). :-)

I would prefer not to ship this due to the weight of the AMP & PS plus fragility of the tubes. I can deliver it to Near-Fest or within 75 Miles of Burlington, VT. I will ship if really, REALLY necessary. :-)

I am asking $700 plus shipping. Or trade???

Contact me off list if you are interested!

Thanks es 73...

4746. Wanted: Gonset Communicator & Large Round Heat Sinks

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-04-11 15:37:04 UTC
From: kd4e
Topic: 4746 Message: 4746

Wanted: Gonset Communicator & Large Heat Sinks

The Gonset need not be working. I am really only
interested in the cabinet and it only needs to be
non-rusty, not cosmetically perfect.

I'd like a matched pair of round heat sinks at
least 6" diameter. They will host ten 60A 100V
MOSFETs between them for a 500A 12vdc load tester.

Other heat sink configurations are possible -
whatcha got? The ten devices are .6" x .8" each.

I have a Heatkit HW-30 "Twoer" with matching
mic and power cord to swap, as well as some
other stuff, and maybe a dollar or two!

See you at TARCfest in Tampa this Saturday!

4759. Two GM300 UHF, trade for V8000, other.

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-04-28 00:35:19 UTC
From: Woody
Topic: 4759 Message: 4759

Hey all, have a couple of GM300 UHF units, M44GMC20D3AA.
16ch/40w. Tested, working, guaranteed. Radio and mic only. Will program to suit.
Radios are cosmetically in good condition, a little dirty, a fade, scratch or crack here or there, and used, but not abused.
Not for sale.

Looking for VHF amateur in trade.
As a TM271ak, or V8000.
Must be tested, working, guaranteed, above average condition, etc.

Just email if interested.
thanks,
Woody

Date: 2008-04-28 03:10:39 UTC
From: Charles Mumphrey Kc5ozh
Topic: 4760 Message: 4760

Hello Group!
Two of the Decibel DB224-A antennas have been donated to me for the purpose of funding improvements to my Amateur-use machines. Recently taken from tower service because of digital upgrading on their 154 MHz systems. They are for sale, local pick-up in the Dallas, Texas area. Each has a harness and a set of pole clamps.
If interested, please respond direct, "off-list" for asking price, results of antenna analyzer, or wanted trading goodies for these antennas.
'73 and Thank You all for looking!
Charlie

FOR SALE: Yaesu FT-101F Transceiver, 160 - 10 meters transceiver, AM/CW/USB/LSB last model of the original FT-101 series; hard to find and the most desirable of the 101 series.

Speech Processor, NB, 25/100KC calibrator + 10Mhz WWV, front panel attenuator, AC power cable, fan, original manual, and a Kane Corp. 7804 mike on a D104 stand.

Receives great, but no transmit. Good condition considering it's age; black leather handle is
chipping, and has one area on the top left where there is a little surface rust, but nothing
major.

From: Ruben
Topic: 4765 Message: 4765

Selling my TS830S with MC50 mic and SP230 ext.speaker also PC1 phone patch.
The radio is very clean and working.
Sell only as package deal for $650.00
Trade for later model Kenwood no junk.
Buyer pays shipping costs. Will not break up.
Contact me direct ka2hhb_2000@...
I'm trying to raise $$$ for a newer rig. Although it doesn't make a difference it is not a "GOLD", has no extra filters.
Shipping would be in 2 separate boxes 1 for the radio and 1 for everything else. Have original owners manual too.

4770. Kenwood TS-130SE

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-05-07 17:35:24 UTC
From: Steven Hays
Topic: 4770 Message: 4770

Kenwood TS-130SE.....I have a very clean Kenwood TS-130SE for sale.
My wife got me a TS-850S for my birthday and I don't need this old girl (The rig, not the YL) anymore.
I have gotten good audio reports with this rig, and it has worked very well for me.
I'm asking $300 plus help with the shipping for it and would consider trading for a clean, dual receive, dual band (2M/70cm) mobile or a screwdriver antenna with controller. I am also looking for a PS-53 and a MC-60 Mic in very good condition.
This would be a great starter rig for a new General.
This radio has no issues and is as it should be (no rig ups, CB mods, etc...).
kc0rey at gmail dot com. Or it would be best to call 309-371-0540 as I check my email infrequently.
73,
Steve kc0rey

4772. Kenwood TH-F6A with Accessories

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-05-10 03:32:59 UTC
From: lovefladiving
Topic: 4772 Message: 4772

I purchased my TH-F6A brand new on February 8th of this year. I've decided that I want to get some money out of it and buy a 2m/440 base for satellite work. While I won't get enough to buy one, it's a start.

There have been no modifications done to this radio. It is as good a new, no scratches, and I'm a non-smoker. I also have the PG4-Y programming cable, the software is a free download from Kenwood, and I also have an MFJ295K mini speaker mike.

I still have the box for the radio, the manual, everything that came with it. It's an excellent radio, but I want to get into the amateur satellites. HRO has the rig for $330, the PG4-Y for $35, and the speaker mike for $15. Everything new is $380.

I'll sell the package for $300 plus shipping. I prefer USPS money orders, but will take PayPal if you pay their fees. Pictures are available, reply to w4as at arrl.net.

73 de W4AS

4773. 2 meter and 440 MHz HTs and accessory items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-05-10 12:28:37 UTC
From: Ken Simpson, W8EK
Topic: 4773 Message: 4773

For Sale:

A variety of HTs (2 meter and 440 MHz) and associated accessories:

I know this is a long list, but I have tried to group items.

Kenwood TH-41 AT HT for 440 MHz.
This compact HT has thumbwheel switches to select the operating frequency. The HT has about 1.5 watts output, and a decent receiver. It has a touchtone pad on it, and is very simple to operate. You likely will not need to read to manual to use this one! It includes a good battery (new insert a couple months ago), charger, rubber duck, carrying strap, and paper work for $60.

Alinco DJ-191, 2 meter HT
This unit has about everything except the kitchen sink in it. It has a very large, readable LCD display that I can read without my glasses! It has about 7 watts max output, and the receiver is great. It covers from 136 to 174 MHz, so it covers all of the weather and VHF public service frequencies. Of course it has memories and all sorts of scan features. Touchtones (DTMF) and PL (subaudible) tones are included.
This unit works 100% and looks extremely nice. It includes a good battery pack, belt clip, rubber duck, and paper work for $100.

Speaker microphone for Alinco HT above, plus many others.
I thought it was actually an Icom HM-9, but I can not find that written on it any place. I do know that it works fine with the Alinco HT. It looks OK also. $18

Yaesu FT-26, 2 meter HT
This HT has a nice LCD display, with memories, scan, and subaudible tones. Basically, all the things one would expect in an HT. This unit comes with the desk charger, and not a wall charger. The battery seems to hold a charge OK, but seems somewhat weak, so it may need an "insert" soon. It works 100%, and looks very nice.
Rubber duck and paper work included for $75.

Realistic HTX-202 for 2 meters
This HT has about 5 W output, or 1 W in low power. It has an exceptional receiver on it, with extremely good front end characteristics. Of course it has memories, scan, and all the normal bells and whistles, including a very readable LCD display. A touchtone DTMF pad is included on it, as are PL (subaudible) tones.

This particular unit has a problem, however.
There is no transmit audio when using it strictly as an HT.
It does have audio when using it with a speaker mic,
which would indicate that the mic element in the HT itself
is bad. My eyesight is no longer good enough to work on
these small parts. Fix the mic element, and you should be
in great shape. As an alternative, use it with a speaker
mic, and don't worry about it! Subaudible tone, touchtone
pad, and all of those parts appear to work fine, as does the
receiver.
Cosmetically, the unit looks very close to new.
I am selling the HT only, with no accessories. $35

Radio Shack 19-300 Battery pack for HT-202 and HTX-404
This is a good battery pack for the Realistic HTs. It also fits
some of the Icom HTs such as the IC-2 AT, IC-02 AT,
IC-4 AT, etc.
This is the 7.2 volt, 600 ma hour NiCad pack.
It works fine and looks great. $25

BNC to PL-259 antenna adapter
For use with the Realistic HTX-202 and HTX-404 HTs and also
Alinco DJ-191 above, or any other HT with BNC connector.
It will convert the BNC connector on the HT, so that you
can use a normal antenna with a PL-259 connector. Like new. $5

Antenna adapter for Kenwood TH-21 / 31 / 41 HTs
This adapts the antenna connector found on these HTs to a
standard BNC connector. $5

Antenna adapter to fit the antenna connector on the TH-21/31/41
series of HTs and provide an SO-239 connector that will permit
a regular PL-259 to be attached. $5

Rubber Duck and telescoping antennas for your HT.
All are for 2 meters, are in good condition, and are $10
each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others - $10 each
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long - $10

PL-259 connector - 6.5 inches long - $10
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long - $10
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Aftermarket stubby, 3.5 inches long - $10
Kenwood RA-6 regular, 6.6 inches long - $10

BNC stubby for 440 MHz - 3 inches long - $10

Telescoping quarter wave antenna
This antenna extends to a full 19 inches, but telescopes down
to about 4 inches. It has about 6 db gain over the typical rubber
duck antenna, and has a BNC connector. $12

Quarter wave telescoping antenna
As above, but with PL-259 connector. $12

Quarter wave telescoping antenna
As above, but with a right angle bend in it, and PL-259
connector. $15

HT speaker microphones:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HTs. $16

Speaker microphone for many different HTs
I think this is actually an Icom HM-9, but I can not find that
written on it any place. It has the 2.5 mm and 3.5mm connector
pins and will work on most Icom HTs including IC-02, 03, 04,
2/3/4SA/T, 24AT, P2/3/4, T21, T41, W21, 2GXA/T,and others.
It will also work on Radio Shack HTs like the HTX-202,
HTX-404, HTX-420, HTX-400, etc., plus many Alinco and
Yaesu HTs. $18

Belt Clips for various HTs:
Motorola, with hardware - $8
Kenwood TR-2400, with hardware - $8
Radio Shack HTX-202/404, with hardware - $10
Yaesu FT-209, with hardware - $8

Icom BP-3 battery packs
I found four of the BP-3 battery packs that are all dead.
These packs were used on the IC-2 AT, 3 AT, 4 AT,
02 AT, 03 AT, 04 AT, and maybe some others. They can
also be used on the Radio Shack HT-202 and HTX-404,
and maybe others.
All of these are dead, but if you need a battery shell, to
put a new "insert" in to, they would be ideal. $8 each

Santec HT Accessories For Sale:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a service pack. It has schematics, circuit explanations, voltages, etc. $18

Accessories for Yaesu FT-209:

Belt clip with mounting screws - $8

Carrying strap (likely fits other HTs as well) $4

Accessories for Kenwood TR-2400 HT:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HTs. $16

Belt clip for TR-2400 HT, complete with hardware - $8

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually, one must have the battery inside the HT, but this lets you charge a second battery outside of the HT. The original charger is used. It is in good shape, and works fine. $3

Wrist strap - I think it fits most Kenwood (and maybe other) HTs - $4

Original Kenwood Operating Manuals For Sale:

All are original operating manuals in very nice, close to new condition, for Kenwood radios, unless stated otherwise.

Operating manual for TW-4000 dual bander $15

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E HTs for 440 MHz, 220 MHz and 2 meters $10

Operating manual for TH-225, 2 meter HT - Good condition $12

Operating manual for TM-221/421 2 m mobile $15

Operating manual for TR-2200, 2 meter "portable"
This is very similar to the Drake TR-22. $15

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $14

Operating manual for TR-2600, 2 meter HT $12

Service manual for Kenwood TR-2600 HT - $10

Prices do not include shipping from Florida.

Thanks.

4775. Mobile HF antennas and related items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-05-11 17:10:43 UTC
From: Ken Simpson, W8EK
Topic: 4775 Message: 4775

Mobile HF antennas and antenna related items for sale:

Outbacker Perth HF Mobile antenna
The PERTH antenna covers 80-75-40-30-20-17-15-12-10m,
which means all of the HF bands, including the WARC bands.
The length is about 7 feet long (fully extended) with a 3 foot tip.
The Outbacker is constructed of fiberglass with pre-tuned copper
helical windings and covered with smooth epoxy-resin and a
coating of polyurethane for strength, and durability. The mounting
ferrule is nickel-plated brass with industry standard 3/8x24 threads.
Frequency coverage is broadband but the top of the antenna is
adjustable which allows tuning for the lowest possible VSWR even
on 75 meters and 10 meters. Tap points are clearly engraved for
each band. Changing bands is accomplished manually by plugging
the exclusive Outbacker "Wander Lead" into the proper tap.
The Outbacker antennas have a beautiful, shiny black finish.
This antenna works well and is in good shape. Included is a
package of "Penetrox" which should be used on the "Wander
Lead" to prevent corrosion, and make good contact. $250

Hamstick HF mobile antennas:

These are the original honest to goodness Hamsticks,
made by Lakeview, and are not one of the clones.

Each antenna, when fully assembled and tuned, is about
7 feet long, in a slim design that does not catch much wind.
Each has a 3/8 inch, 24 thread stud on the base, so they
fit a standard ball mount.

Two are available -- one for 20 meters and one for 40 meters.

These antennas are new, still in their original package, unused.

They are $30 each.

Hustler mobile antennas:

All work fine and are in good mechanical condition.

"Standard" Hustler resonators:
40 meter resonator RM-40 $17
20 meter resonator RM-20 $15
15 meter resonator RM-15 $14
10 meter resonator RM-10 $12

Hustler mobile masts:
MO-2 (folds about 27 inches above ball) $22

MO-1 mast that has a start of a split where it folds
.....over. It can be used as an MO-3 (non tilt mast)
.....or needs care when tilting. $ 15

RSS-2, Stainless steel resonator spring $10

MFJ 902 "Travel Tuner"
This HF tuner is small and compact, and is made to be
used with some of the new, small compact rigs, such as
the Icom 706, Yaesu FT-100, Kenwood TS-50, etc.,
although it will work fine with a larger fixed station rig.
It is designed for 80 thru 10 meter operation, and will
handle 150 watts.
It has provisions to bypass the tuner, if you so desire.
This particular unit works fine, and looks very close to new.
It is in its original box, with paper work. $65

Wattmeter/SWR Bridges:

Micronta 21-520 A wattmeter with large dual meters
This meter is designed primarily for HF operation, although
it still functions well on 6 and 2 meters. It has SO-239
connectors, and is designed for 52 ohm antenna systems.
This wattmeter has full scale power readings of 10, 100, and
1000 watts. LARGE dual meters -- one reads forward power
and one reads reflected power -- both at the same time.
It has a remote sensor, with about 3 feet of cable to connect
to the meter itself.
This particular meter works fine, and looks very, very nice.
I can not find a scratch on it. It is still in its original box. $55

Diamond SX-100 Wattmeter / SWR Bridge
This meter has scales of 30 W, 300 W, and 3000 W.
It is for use from 1.6 thru 60 MHz, so is ideal for some
of the modern HF rigs that include 6 meters on them.
It has a fairly large meter that can be backlit if 12 V DC is
applied. It will also read either peak or average power,
and even includes an off switch.
This particular meter works fine, and looks like new.
Not a scratch on it. It is in its original plastic in the
original box, with paper work for $90.

Radio Works T-6 VHF Isolator
This unit is designed for VHF frequencies, and provides
isolation to keep RF where it belongs, and out of your
shack. The purpose of this device is to "decouple" the
feedline from all of the things in your shack, so that the
RF would not get in places it did not beyond. To put it
another way, this device might help keep RF out of your
computer, as an example.
This one is out of the package, but has never been on
the air. $30

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Prices do not include shipping from Florida.

Thanks.

Date: 2008-05-14 17:32:54 UTC
From: lovefladiving
Topic: 4777 Message: 4777

The D-104 is wired for the FT-101 series, and the 444 doesn't have a mike plug. I haven't tested either of these items, as they were from a SK.

The base of the D-104 has the usual scratches, and the 444 has a small piece of plastic that is broken near the front left.

$45 EACH plus shipping. 73s de W4AS

4778. Icom IC-208H VHF/UHF Mobile

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-05-14 17:43:34 UTC
From: lovefladiving
Topic: 4778 Message: 4778

I have an Icom IC-208H dual band VHF/UHF mobile for sale. It is in very good condition. To my knowledge there haven't been any modifications done to it; and I receive good reports with it from other hams.

It comes complete with the original box, manual, mike and separation cable. I also have one of those "Nifty Quick Reference" cards that I'll include.

The face plate is in excellent condition. The radio does have one minor scratch on the top where the cooling fins are, but since most people would use the separation cable, it shouldn't be a problem. The scratch isn't deep, and it's only about an inch long. I'll be glad to send you pictures if you'd like.

I'm selling it for $225 plus shipping. 73 de W4AS

4779. Kenwood TK-431 & KDM-6 DTMF Key Panel

From: Ken Simpson, W8EK
Topic: 4785 Message: 4785

Antenna tuner and wattmeter/SWR Bridges For Sale:

MFJ 902 "Travel Tuner"
This HF tuner is small and compact, and is made to be
used with some of the new, small compact rigs, such as
the Icom 706, Yaesu FT-100, Kenwood TS-50, etc.,
although it will work fine with a larger fixed station rig.
It is designed for 80 thru 10 meter operation, and will
handle 150 watts.
It has provisions to bypass the tuner, if you so desire.
This particular unit works fine, and looks very close to new.
It is in its original box, with paper work. $65

HF wattmeter / SWR Bridges:

Diamond SX-100 Wattmeter / SWR Bridge
This meter has scales of 30 W, 300 W, and 3000 W.
It is for use from 1.6 thru 60 MHz, so is ideal for some
of the modern HF rigs that include 6 meters on them.
It has a fairly large meter that can be backlit if 12 V DC is
applied. It will also read either peak or average power,
and even includes an on-off switch.
This particular meter works fine, and looks like new.
Not a scratch on it. It is in its original plastic in the
original box, with paper work for $90

Micronta 21-520 A, HF wattmeter with two large meters
This is an HF wattmeter that covers from 3 to 30 MHz, with
full scale power readings of 10, 100, and 1000 watts.
Two LARGE meters -- one reads forward power and one
reads reflected power -- both at the same time. This gives
the same info as some of the cross needle meters, but many
people find it is easier to read.
It has a remote sensor, with about 3 feet of cable to connect
to the meter itself.
This particular meter works fine, and looks like new. It is
still in its original box. $55

Prices do not include shipping from Florida.

Thanks.

1000 watt Isolation Transformer. for 120V AC.
by Northlake Engineering Co.

Has four IEC outlets and heavy duty industrial power cable.
Heavy gauge, light gray metal case with rubber feet.
Like new condition.

Has a nice breaker switch for power ON/OFF.

Available for $45.00 plus shipping

Picture available on request.

4787. Icom IC-746 (non-pro) great condition

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-05-22 05:35:51 UTC
From: lovefladiving
Topic: 4787 Message: 4787

This transceiver is in great condition. You won't find a scratch on it. I get excellent audio reports from it with the stock mike. It has been TX modified to use it on 60 meters (note the automatic antenna tuner doesn't work on 60 meters, it's not broken, it's just that 60 meters wasn't around when this rig was produced).

I'm a non-smoker and I have the original box, manual, mike, etc. It also has the optional 1.9khz SSB filter installed. I will double box this, and ship it via FedEx - no international sales, sorry. If you're looking for a clean, great looking and turn key rig, this is it. Check the reviews on this rig if you haven't already.

Looking to get $850 plus shipping. I can get it on the air for you, or if you are in the south Florida area, I'll make arrangements to deliver. I'll be glad to send you some high resolutions photos if you'd like.

I do have a couple of extras for this rig. First I have a Shure 444 mike with a Heil HC-5 element wired for the 746, and I also have a Donner's Digital Interface wired for the 746. If you buy the rig, you can have the mike & interface for $60 more. Or contact me if you are interested in buying them separately, but at a slightly higher price.

4790. Extensive list of HF related items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-05-24 12:11:13 UTC
From: Ken Simpson, W8EK
Topic: 4790 Message: 4790

Extensive list of HF related items for sale:

I realize that this list is long; I have attempted to group
items as much as possible.

CW related items:

Vibroplex "Blue Racer Iambic" CW Paddle
The Brass Racer Iambic is unique in that there are no
springs in the design. Tension on the paddle is infinitely
adjustable through the use of magnets. The Brass Racer
Iambic is a convenient, keyer paddle unit crafted from
solid brass with a lacquer coated brushed finish
mounted on a hardwood base.
This one works great, is in very nice condition, and
includes cord and paper work for $110.

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8

As above, but 1/8 inch plug. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5

As above, but 1/8 inch plug. $5

Wattmeter/SWR Bridges:

These meters are designed primarily for HF operation, although
they still function well on 6 and 2 meters. They have SO-239
connectors, and are designed for 52 ohm antenna systems.

Micronta 21-520 A wattmeter with large dual meters
This wattmeter has full scale power readings of 10, 100, and
1000 watts. LARGE dual meters -- one reads forward power
and one reads reflected power -- both at the same time.
It has a remote sensor, with about 3 feet of cable to connect
to the meter itself.
This particular meter works fine, and looks very, very nice.
I can not find a scratch on it. It is still in its original box. $55

Diamond SX-100 Wattmeter / SWR Bridge
This meter has scales of 30 W, 300 W, and 3000 W.
It is for use from 1.6 thru 60 MHz, so is ideal for some

of the modern HF rigs that include 6 meters on them.
It has a fairly large meter that can be backlit if 12 V DC is
applied. It will also read either peak or average power,
and even includes an on-off switch.
This particular meter works fine, and looks like new.
Not a scratch on it. It is in its original plastic in the
original box, with paper work for $85

MFJ 902 "Travel Tuner"
This HF tuner is small and compact, and is made to be
used with some of the new, small compact rigs, such as
the Icom 706, Yaesu FT-100, Kenwood TS-50, etc.,
although it will work fine with a larger fixed station rig.
It is designed for 80 thru 10 meter operation, and will
handle 150 watts.
It has provisions to bypass the tuner, if you so desire.
This particular unit works fine, and looks very close to new.
It is in its original box, with paper work. $60

Outbacker Perth HF Mobile antenna
The PERTH antenna covers 80-75-40-30-20-17-15-12-10m,
which means all of the HF bands, including the WARC bands.
The length is about 7 feet long (fully extended) with a 3 foot tip.
The Outbacker is constructed of fiberglass with pre-tuned copper
helical windings and covered with smooth epoxy-resin and a
coating of polyurethane for strength, and durability. The mounting
ferrule is nickel-plated brass with industry standard 3/8x24 threads.
Frequency coverage is broadband but the top of the antenna is
adjustable which allows tuning for the lowest possible VSWR even
on 75 meters and 10 meters. Tap points are clearly engraved for
each band. Changing bands is accomplished manually by plugging
the exclusive Outbacker "Wander Lead" into the proper tap.
The Outbacker antennas have a beautiful, shiny black finish.
This antenna works well and is in good shape. Included is a
package of "Penetrox" which should be used on the "Wander
Lead" to prevent corrosion, and make good contact. $250

Hamstick HF mobile antennas:

These are the original honest to goodness Hamsticks,
made by Lakeview, and are not one of the clones.

Each antenna, when fully assembled and tuned, is about
7 feet long, in a slim design that does not catch much wind.
Each has a 3/8 inch, 24 thread stud on the base, so they
fit a standard ball mount.

Two are available -- one for 20 meters and one for 40 meters.

These antennas are new, still in their original package, unused.

They are $29 each.

Hustler mobile antennas:

All work fine and are in good mechanical condition.

"Standard" Hustler resonators:
40 meter resonator RM-40 $17
15 meter resonator RM-15 $14
10 meter resonator RM-10 $12

Hustler mobile masts:
MO-2 (folds about 25 inches above ball) $22
MO-1 mast that has a start of a split where it folds
.....over. It can be used as an MO-3 (non tilt mast)
.....or needs care when tilting. $ 15

RSS-2, Stainless steel resonator spring $10

Regular hand microphones:

Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic
mic is needed. Stripped and tinned leads.
It works fine, and looks good also. $25

Microphone for Heath "Lunchbox" Series
This is the ORIGINAL microphone for the Twoer, Sixer,
and others of the "Lunch Box" series.
It is the original Turner microphone, with the cotton
covered cord, and single button microphone connector.
It is in extremely nice shape. No problems with the cord or
connector, and the mic itself even has a bit of the original
"sheen" left on it. It works fine. $33

High Impedance Heath Hand Microphone
This mic came with Heath gear. It is Hi Z, and has 1/4 inch
stereo plug on it, as used by Swan, TenTec, and others.
It can be used on any rig needing a Hi Z mic.
It works fine, and is in good shape. $30

Touch tone (DTMF) microphones for sale:

Kenwood MC-45 DM, DTMF mic plus other functions
In addition to the touch tone pad and PTT switch, this mic
has up-down switches, plus a row of four switches above
the touch tone pad. They are used for "Call Button", VFO
key, Memory recall key, and the fourth one is programmable.
The back has a lock switch. It has an RJ-45 connector (like
a computer LAN).
This particular mic works fine, and looks fine also. It is still
in its original box, with paper work for only $60.

Kenwood MC-48, touch tone (DTMF) microphone.
Round, 8 pin connector, will go with any Kenwood rig
taking this kind of connector. Has UP and DOWN
switches, along with 16 digit touchtone pad. It is often used
on the 2 m and 440 MHz rigs that do not have touchtone
built in, but can also be used on HF rigs for touchtone on
10 m FM. It works fine and looks great also.
With paper work for $ 55.

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, along with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
Paper work included for $40.

Drake 1525 EM Touchtone Microphone
This is the mic that was used to add a touchtone pad to
a lot of rigs in the 70s and 80s. Normal hand mic from
the front, but has a touchtone pad on the back. Four
pin mic plug. This particular unit has been used, but is
in good shape and includes paper work. $ 37

KDK Model TM-2
With touch tone pad and up-down switches. It presently
has a 6 pin connector for the KDK 2030, but that can
be changed. Nice condition. $45

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $37

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $37

Icom HM-8 hand mic with Touch Tone (DTMF) Pad
This mic is being sold for parts only. The dynamic element
in it is open. A part of the plastic holding the PTT button
does not seem quite right, but the actual touch tone pad
and electronics is OK, as far as I can tell. So if you have
an HM-8 with bad electronics or actual touch tone pad,
this unit will get you up and going again. Actually, the unit
probably can be repaired and used. $12

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can
be plugged into a Kenwood rig with the round 8 pin
connector. Like new. $20

Kantronics Cable
This cable is made to plug in to the 9 pin DB-9 connector
that is on the back of many of Kantronics TNCs and other digital
units (KAM, KPC-3, and others), and is made to interface it to
the radio.
It has a DB-9 connector on one end, and is in extremely good condition.
The connectors are labeled "1" and "2", with "1" having a red 3.5
mm plug, a white 3.5 mm plug, and a black 2.5 mm plug. The "2"
is the same as "1" except it does not have the white 3.5 mm plug.
It is $20

Digital interface / Phone Patch

Johnson Viking Phone Patch - Model 250-46

This device can be used as a digital interface, even
though it was designed to be used as a phone patch.
It can easily be converted into a digital interface (such
as between rig and sound card), as it contains the
same components used in the expensive digital
interface boxes being sold today.

This unit is made to be mounted vertically
beside the rig. It is about 6 inches high, 2 inches
wide and 3 inches deep. It has 3 pots on the
front for Null, Receive Volume, and transmit gain,
along with a switch for phone patch or microphone.
On the back is a terminal strip for speaker and
phone line. The microphone input has the 2 pin
Amphenol connector like used by Johnson, Heath,
Hallicrafters.

This one is in nice shape for $30.

Kenwood PC-1 phone patch/digital interface
This is the model with the 4 pin connectors, although
they can be changed, if needed. It includes a nice meter
for adjusting the null so VOX will work OK.
This particular unit works fine, and looks very, very good.
No scratches. With paperwork for $ 40

Low Pass TVI filters:

Low Pass for your transmitter
Add one of these filters to your transmitter to help prevent
TVI or RFI.
All filters have an SO-239 connector for input and output,
and are designed for 52 ohm systems.

B & W model 425 (Also know as FL-10/1500) low pass filter
It cuts off just above 10 meters, and will handle 1500 Watts.
Maximum attenuation is at 52 MHz, with at least 70 db across
the band.

This is an older model that seems much heavier duty. It weighs
almost twice as much as the newer model, and looks like it
would take more power. It likely was made in the days that
plate modulated AM was the rule. Paper work included $35

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter that has been optimized to
have more attenuation in the 40 MHz region, where many
TVs have their IF. According to the manual it is good for
1000 Watts "average", which would be about 2000 watts
PEP, and has over 80 db attenuation at 41 MHz. SO-239
connectors on each end. This one looks close to new, and
also has the single page "manual" with it. $ 40

Alinco ELP-60 D LX low pass filter
For 50 ohm systems, with up to 500 watts of power.
This one has an SO-239 on one end, and about a 2 foot
length of coax and PL-259 on the other end. $30

Heavy duty power supply
Pyramid PS-35
This supply is good for 32 Amps Constant or 35 Amps Surge.
The output voltage is adjustable over a 12 to 15 volt range
with a multi turn pot. It has crowbar over voltage protection,
short circuit & thermal protection and features a pair of nice
large edgewise meters to measure output voltage and output
current. There is an internal fan. This is a very healthy, heavy
duty supply!
This particular unit works 100% and looks very close to new.
$135

Heath IP-27 DC "lab type" power supply
This supply is capable of up to 50 V DC at up to 1 1/2
amps of current. It is set up in 5 volt ranges (0 to 5 V,
5 to 10 V, etc), with a bit of overlap on the ranges, and
then has a pot to set the fine voltage. Heath used a neat
design, where the power transformer has many taps,
and is switched as one changes ranges, keeping heat
and power dissipation to a minimum. The current
limit has 4 ranges (50, 150, 500 ma, and 1.5 amps),
with a pot to set the fine adjustment. It also has a very
large (approx 5 inch) meter to read the voltage and current.
This one works great, and looks fine also. It has had the
Heath recommended updates done to it.
With paper work for $85.

Expanded Scale AC Voltmeter
This is an AC Voltmeter with an expanded scale. It reads
from 0 to 150 volts AC, but the scale is expanded so that
one can read in the 120 V area easier. The middle of the
scale is about 95 volts. It is ideal to have in line constantly,

to check your line voltage. This is a Weston Model 476,
and is about 2 1/2 inches in diameter, with 3 mounting holes.
Of course it works fine, and looks fine also. $18

Keithley 169 Lab Quality Digital Multi Meter
This is a bench type DMM, with good accuracy.
3 1/2 digit LCD display
Voltage ranges are protected to 1400 volts
Resistance ranges are protected to 300 V RMS
..... (This means you can accidentally apply up to 300 V
..... RMS when measuring resistance, and the meter
..... will survive.)
Voltage ranges from 200 mv to 1000 V
Current ranges from 100 microamps to 2 amps
Resistance ranges from 200 ohms to 20 Meg
It is in very nice condition, both electrically and cosmetically.
Manual included for $80.

Variac
General Radio Model W5MT3
This variac is designed for 115 V AC lines, and will vary
the line voltage from zero to about 120 percent of the line
voltage. It is very useful for slowly bring the line voltage
up on older rigs.
The General Radio W5MT3 is in a very nice case, with a
3 wire cord, and 3 wire receptacle. Of course it has General
Radio quality. This one is rated at 5 amps.
In checking prices of used units on the internet, they seem
to go for anywhere from $170 to $400. This one works fine,
and is in excellent cosmetic condition as well. You can have
it for $125.

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Prices do not include shipping from Florida.

Thanks.

4791. FOR SALE Cases for radio gear

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-05-24 17:15:38 UTC
From: kc8ddq@aol.com
Topic: 4791 Message: 4791

Hey everyone,

I know this may be somewhat off topic. I have 3 nice Cabbage Cases that I origionally planned to use to transport my radio equipment in but haven't had a chance to do that in 2 years. They are taking up needed space in my radio room so I need to sell them. Two of them are 27"x24"x9" and one is 22"x19.5"x10.75". They were origionally used for computer equipment within a bank environment. They have wheels and handles. The small case locks with a 3 number combination. All latches work. The small case looks like new whereas the larger cases have been shipped here and there and have some shipping tape and labels on them that need cleaned off. The small case is $100 and the larger cases are $125 plus shipping. I have plenty of pics if interested. Please email me off list. I'm including my cell # if you wish to call. You can also see some pics of these cases on the manufacturers web site at _www.cabbagecases.com_ (http://www.cabbagecases.com/) . I don't work for the company.

Thanks and 73's

Paul

From: Doug
Topic: 4795 Message: 4795

I have come across a large quantity of LCD Display modules,
These are great for QRP homebrew radios, and or digital displays for
vintage gear.

I'm selling them for 99cents ea. I have a photo and data on this web
page:
http://www.pongrance.com/slcd.html

I also have a frequency counter/digital dial kit I'm offering for
$9.99 here:
http://www.pongrance.com/

4796. Icom IC-2200H D-Star VHF Mobile

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-06-05 13:29:23 UTC
From: Sebastian
Topic: 4796 Message: 4796

About 3 weeks ago, I purchased an Icom IC-2200H 2 meter mobile, with the D-Star module. I live in deep south Florida. I purchased it from Mike's Electronics, who donated a D-Star repeater to their local club. Unfortunately, the location they are using doesn't allow me to hit the repeater, even with a beam and 65 watts of the rig's maximum output power. The owner of the store and I discussed that possibility, but I decided to buy it anyway. Unfortunately, the owner has had a health problem, and has closed the store. I don't know if it will be temporary, or permanent, however I'm sure that he won't be able to reopen it until a couple of months from now, if not longer.

Since I can't hit the only repeater around here, I've only been able to use the digital side with 2 other local hams, on simplex.

But based on the above, I've decided that at this time, my best bet is to sell the rig, and get myself a DV Dongle.

I think $275 plus shipping for it would be fair. It's in mint condition, has never been mobile, I have the box and everything else that came with it (less the UPC label).

From: Gary Glaenzer
Topic: 4800 Message: 4800

Hello all;

I have a couple of Quintron RC-451 receivers here with the factory
line-level output + COR boards on the rear panel

454.075
454.350

Good for repeater receiver or control-link receiver

great frequency response, -3 dB points are 50 hZ and 5600 Hz

copy of factory manual included, can also re-tune to your frequency

E-mail if interested

Thanks!

Gary in IL

Topic: 4803 Message: 4803

Hello Folks, need to generate some cash here. Have the following for your consideration.

Thanks,

Tim Durkin

N3LQK

All prices OBO + shipping costs from Philadelphia 19127

Can provide photos for serious inquiries.

iQpac battery conditioner analyzer with manual,
mint condition, jedi adapter. $120

?

HT1000 rack charger, very good condition, all ports
work, mild dust. $130

?

Aftermarket RIB with homebrew?JEDI prog cable and
serial port computer cable, has jack for ethernet cable to?program mobiles, all
in great condition. Can be powered from 9VDC battery or wallwart.? $20 for all.

?

JEDI speaker mic, PTT button is a little soft, but
works great, good condition. $15

?

HT1000 UHF 16CH?H01SDC9AA3DN; whip antenna, good
used condition.

?

HT1000 UHF 16CH H01RDC9AA3BN, stub antenna, good
used condition, engraving on front.

?

HT1000 VHF 2CH?H01KDC9AA1BN,? antenna, fair-good
used condition.

?

All radios?come with
antenna, rapid charger (2 piece type), port cover, belt clip, and a battery that

is probably not good for much more than turning the radio on to make sure it works. All will power up and talk/hear.? $90 for each radio.

?

1 JEDI desktop trickle charger. Working, good condition. $12.

?

1 JEDI desktop trickle charger cup, no wall-wart. Working, good condition, $4

?

2 JEDI rapid desktop chargers, maybe needing TLC, described below. Make offer for all.

Cup #1 lights up when powered (does a normal test thing), does not recognize my crappy batteries.

Cup #2 lights up when powered (does a normal test thing), goes into "complete" green light mode almost immediately with my crappy batteries.

Power Supply #1 is DOA, unknown why, have done no testing other than does not power up the cups.

Power Supply #2 is working fine, but has some abrasions/melts on the 120VAC cord with some minimal bare copper.

From: Roberto C. Vicencio
Topic: 4805 Message: 4805

I just passed my Philippine Class C operator's license which is equivalent to a Technician's license in the US. I am building up my equipment and am now in need of a microphone, headset and a Morse key. I am not new to ham radio as I was licensed back in 70. I served in the uS Navy for 24 years and have now retired and returned to the Phiippines. Pls include the proposed price and include postage to Holland Michigan. I am familiar with the Vibroplex bugs so those are acceptable.

Appreciate your kind response.

I have a 10 Ft. center section avail for sale ($75),in fair-to-good condition. I believe it is a Rohn 45G, not sure. Must pick up from Miami Lakes area (NW Miami-Dade area). Leave contact info and best time to call.

4807. Extensive list of ham items FS - Antenna tuner, HTs, many misc accessories

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-06-14 15:17:13 UTC
From: Ken Simpson, W8EK
Topic: 4807 Message: 4807

For Sale:

I know this is a long list; I have tried to group similar items
together.

High Power Antenna Tuner

This TenTec high power antenna tuner will do it all!
It uses an "L" network instead of the "T" network.
This means that there is only one correct match. With the "T"
network, there are many places that will give a 1:1 SWR, but
only one of these positions is best. With the "L" network, this
is not a problem, and results in a tuner that is much more efficient.

It will easily handle full legal power, and has a roller inductor
so one can get an exact match over any of the HF bands,
including WARC bands.
It also has a balun for use with twin lead.

This is not only a tuner. It also has a four position antenna
switch built in, plus an illuminated wattmeter with 200 and
2000 watt positions, and an SWR bridge.

This particular tuner works 100%, and looks close to new.
I can not find a scratch on it.

With paper work for $325.

Kenwood TH-41 AT HT for 440 MHz.
This compact HT has thumbwheel switches to select the operating
frequency. The HT has about 1.5 watts output, and a decent
receiver. It has a touchtone pad on it, and is very simple to
operate. You likely will not need to read to manual to use this
one! It includes a good battery (new insert a couple months ago),
charger, rubber duck, carrying strap, and paper work for $60.

Alinco DJ-191, 2 meter HT
This unit has about everything except the kitchen sink in it. It
has a very large, readable LCD display that I can read without
my glasses! It has about 7 watts max output, and the receiver
is great. It covers from 136 to 174 MHz, so it covers all of the
weather and VHF public service frequencies. Of course it has
memories and all sorts of scan features. Touchtones (DTMF)
and PL (subaudible) tones are included.
This unit works 100% and looks extremely nice. It includes
a good battery pack, belt clip, rubber duck, and paper work

for $100.

Radio Shack 19-300 Battery pack for HT-202 and HTX-404
This is a good battery pack for the Realistic HTs. It also fits
some of the Icom HTs such as the IC-2 AT, IC-02 AT,
IC-4 AT, etc.
This is the 7.2 volt, 600 ma hour NiCad pack.
It works fine and looks great. $25

Dead Radio Shack 19-300 Battery pack for HT-202 and HTX-404
As above, except battery is dead. Use it to put new insert in,
or for other projects. $8

HF wattmeter / SWR Bridges:

Diamond SX-100 Wattmeter / SWR Bridge
This meter has scales of 30 W, 300 W, and 3000 W.
It is for use from 1.6 thru 60 MHz, so is ideal for some
of the modern HF rigs that include 6 meters on them.
It has a fairly large meter that can be backlit if 12 V DC is
applied. It will also read either peak or average power,
and even includes an on-off switch.
This particular meter works fine, and looks like new.
Not a scratch on it. It is in its original plastic in the
original box, with paper work for $89

Micronta 21-520 A, HF wattmeter with two large meters
This is an HF wattmeter that covers from 3 to 30 MHz, with
full scale power readings of 10, 100, and 1000 watts.
Two LARGE meters -- one reads forward power and one
reads reflected power -- both at the same time. This gives
the same info as some of the cross needle meters, but many
people find it is easier to read.
It has a remote sensor, with about 3 feet of cable to connect
to the meter itself.
This particular meter works fine, and looks like new. It is
still in its original box. $55

Microphones:

High Impedance Heath Hand Microphone
This mic came with Heath gear. It is Hi Z, and has 1/4 inch
stereo plug on it, as used by Swan, TenTec, and others.
It can be used on any rig needing a Hi Z mic.
It works fine, and is in good shape. $30

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Microphone for Heath "Lunchbox" Series
This is the ORIGINAL microphone for the Twoer, Sixer,
and others of the "Lunch Box" series.
It is the original Turner microphone, with the cotton covered
cord, and single button microphone connector.
It is in extremely nice shape. No problems with the cord or
connector, and the mic itself even has a bit of the original
"sheen" left on it. It works fine. $33

Touch tone (DTMF) microphones for sale:

Kenwood MC-45 DM, DTMF mic plus other functions
In addition to the touch tone pad and PTT switch, this mic
has up-down switches, plus a row of four switches above
the touch tone pad. They are used for "Call Button", VFO
key, Memory recall key, and the fourth one is programmable.
The back has a lock switch. It has an RJ-45 connector (like
a computer LAN).
This particular mic works fine, and looks fine also. It is still
in its original box, with paper work for only $60.

Kenwood MC-48, touch tone (DTMF) microphone.
Round, 8 pin connector, will go with any Kenwood rig
taking this kind of connector. Has UP and DOWN
switches, along with 16 digit touchtone pad. It is often used
on the 2 m and 440 MHz rigs that do not have touchtone
built in, but can also be used on HF rigs for touchtone on
10 m FM. It works fine and looks great also.
With paper work for $ 55.

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, along with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
Paper work included for $40.

Drake 1525 EM Touchtone Microphone
This is the mic that was used to add a touchtone pad to
a lot of rigs in the 70s and 80s. Normal hand mic from
the front, but has a touchtone pad on the back. Four
pin mic plug. This particular unit has been used, but is
in good shape and includes paper work. $ 38

KDK Model TM-2
With touch tone pad and up-down switches. It presently
has a 6 pin connector for the KDK 2030, but that can
be changed. Nice condition. $40

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Icom HM-8 hand mic with Touch Tone (DTMF) Pad
This mic is being sold for parts only. The dynamic element
in it is open. A part of the plastic holding the PTT button
does not seem quite right, but the actual touch tone pad
and electronics is OK. So if you have an HM-8 with bad
electronics or actual touch tone pad, this unit will get you
up and going again. Actually, the unit probably can be
repaired and used. $10

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HTs. $18

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can
be plugged into a Kenwood rig with the round 8 pin
connector. Like new. $20

Heavy duty power supply
Pyramid PS-35
This supply is good for 32 Amps Constant or 35 Amps Surge.
The output voltage is adjustable over a 12 to 15 volt range
with a multi turn pot. It has crowbar over voltage protection,
short circuit & thermal protection and features a pair of nice
large edgewise meters to measure output voltage and output
current. There is an internal fan. This is a very healthy, heavy
duty supply!
This particular unit works 100% and looks very close to new.
$135

Expanded Scale AC Voltmeter
This is an AC Voltmeter with an expanded scale. It reads
from 0 to 150 volts AC, but the scale is expanded so that
one can read in the 120 V area easier. The middle of the
scale is about 95 volts. It is ideal to have in line constantly,
to check your line voltage. This is a Weston Model 476,
and is about 2 1/2 inches in diameter, with 3 mounting holes.
Of course it works fine, and looks fine also. $18

Keithley 169 Lab Quality Digital Multi Meter
This is a bench type DMM, with good accuracy.
3 1/2 digit LCD display
Voltage ranges are protected to 1400 volts
Resistance ranges are protected to 300 V RMS
..... (This means you can accidentally apply up to 300 V
..... RMS when measuring resistance, and the meter
..... will survive.)
Voltage ranges from 200 mv to 1000 V
Current ranges from 100 microamps to 2 amps

Resistance ranges from 200 ohms to 20 Meg
It is in very nice condition, both electrically and cosmetically.
Manual included for $80.

Variac
General Radio Model W5MT3
This variac is designed for 115 V AC lines, and will vary
the line voltage from zero to about 120 percent of the line
voltage. It is very useful for slowly bring the line voltage
up on older rigs.
The General Radio W5MT3 is in a very nice case, with a
3 wire cord, and 3 wire receptacle. Of course it has General
Radio quality. This one is rated at 5 amps.
In checking prices of used units on the internet, they seem
to go for anywhere from $170 to $400. This one works fine,
and is in excellent cosmetic condition as well. You can have
it for $125.

Vibroplex "Brass Racer Iambic" CW Paddle
The Brass Racer Iambic is unique in that there are no
springs in the design. Tension on the paddle is infinitely
adjustable through the use of magnets. The Brass Racer
Iambic is a convenient, keyer paddle unit crafted from
solid brass with a lacquer coated brushed finish
mounted on a hardwood base.
This one works great, is in very nice condition, and
includes cord and paper work for $110.

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8

As above, but 1/8 inch plug. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5

As above, but 1/8 inch plug. $5

Kantronics Cable
This cable is made to plug in to the 9 pin DB-9 connector
that is on the back of many of Kantronics TNCs and other digital
units (KAM, KPC-3, and others), and is made to interface it to
the radio.
It has a DB-9 connector on one end, and is in extremely good condition.
The connectors are labeled "1" and "2", with "1" having a red 3.5
mm plug, a white 3.5 mm plug, and a black 2.5 mm plug. The "2"
is the same as "1" except it does not have the white 3.5 mm plug.
It is $20

Phone patches or digital interfaces:

Although designed to be used as a phone patch, to
connect your rig on both transmit and receive to a
telephone line, these can also be used to interface your
rig to a sound card. There is an internal audio
transformer inside, just like on some of the "interface
boxes" being sold today.

Johnson Viking Phone Patch - Model 250-46
This phone patch is made to be mounted vertically
beside the rig. It is about 6 inches high, 2 inches
wide and 3 inches deep. It is possible that the face
plate can be removed, and it made to be mounted
horizontally, but I have not done that. The reason I
say this is that there are feet on the bottom, and on
the left side. Maybe the feet on the left side are to
protect the rig. In any case, it has 3 pots on the
front for Null, Receive Volume, and transmit gain,
along with a switch for phone patch or microphone.
On the back is a terminal strip for speaker and
phone line. The microphone input has the 2 pin
Amphenol connector like used by Johnson, Heath,
Hallicrafters, and many others in that era.
It works fine and looks OK also. $30

Kenwood PC-1 phone patch/digital interface
This is the model with the 4 pin connectors, although
they can be changed, if needed. It includes a nice meter
for adjusting the null so VOX will work OK.
This particular unit works fine, and looks very, very good.
No scratches. With paperwork for $ 40

Low Pass TVI filters:

Low Pass for your transmitter
Add one of these filters to your transmitter to help prevent
TVI or RFI.
All filters have an SO-239 connector for input and output,
and are designed for 52 ohm systems.

B & W model 425 (Also know as FL-10/1500) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each end.
Maximum attenuation is at 52 MHz, with at least 70 db across
the band.
This is an older model that seems much heavier duty. It weighs
almost twice as much as the newer model, and looks like it
would take more power. It likely was made in the days that
plate modulated AM was the rule. Paper work included. $35

Alinco ELP-60 D LX low pass filter
For 50 ohm systems, with up to 500 watts of power.

This one has an SO-239 on one end, and about a 2 foot
length of coax and PL-259 on the other end. $30

BNC to PL-259 antenna adapter
For use with the Realistic HTX-202 and HTX-404 HTs and also
Alinco DJ-191 and DJ-G5 HTs above, or any other HT with BNC
connector. It will convert the BNC connector on the HT, so that you
can use a normal antenna with a PL-259 connector. Like new. $5

Antenna adapter for Kenwood TH-21 / 31 / 41 HTs
This adapts the antenna connector found on these HTs to a
standard BNC connector. $4

Avanti / Antenna Specialists "On Glass" antennas

These antennas were made by Avanti, and then later by
Antenna Specialists, to mount on a windshield, or other
glass. They do not require a ground plane, as they are
1/2 wave antennas, rated to have 3 db gain. They are
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Antenna for 2 meters
This one is in extremely nice condition, with a new packet
of the special mounting glue that is furnished by Antenna
Specialists. $28

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Rubber Duck and telescoping antennas for your HT.
All are for 2 meters, are in good condition, and are $10
each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others - $10 each
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long - $10

PL-259 connector - 6.5 inches long - $10
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long - $10
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Aftermarket stubby, 3.5 inches long - $10
Kenwood RA-6 regular, 6.6 inches long - $12

BNC stubby for 440 MHz - 3 inches long - $10

Telescoping quarter wave antenna
This antenna extends to a full 19 inches, but telescopes down
to about 4 inches. It has about 6 db gain over the typical rubber
duck antenna, and has a BNC connector. $12

Quarter wave telescoping antenna
As above, but with PL-259 connector. $12

Quarter wave telescoping antenna
As above, but with a right angle bend in it, and PL-259
connector. $15

Belt Clips for various HTs
$8 each
Motorola, with hardware
Kenwood TR-2400, with hardware
Radio Shack HTX-202/404, with hardware
Yaesu FT-209, with hardware

Wrist Straps for various HTs
$4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

Icom BP-3 battery packs
I found four of the BP-3 battery packs that are all dead.
These packs were used on the IC-2 AT, 3 AT, 4 AT,
02 AT, 03 AT, 04 AT, and maybe some others. They can
also be used on the Radio Shack HT-202 and HTX-404,
and maybe others.
All of these are dead, but if you need a battery shell, to
put a new "insert" in to, they would be ideal. $8 each

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Santec HT Accessories For Sale:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a service pack. It has schematics, circuit explanations, voltages, etc. $18

Original Kenwood Operating Manuals For Sale:

All are original operating manuals in very nice, close to new condition, for Kenwood radios, unless stated otherwise.

Operating manual for TW-4000 dual bander $15

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E HTs for 440 MHz, 220 MHz and 2 meters $10

Operating manual for TH-225, 2 meter HT - Good condition $12

Operating manual for TM-221/421 2 m mobile $15

Operating manual for TR-2200, 2 meter "portable"
This is very similar to the Drake TR-22. $15

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $14

Operating manual for TR-2600, 2 meter HT $12

Service manual for Kenwood TR-2600 HT - $10

Prices do not include shipping from Florida.

Thanks.

4815. FS: Eddystone 358 HF receiver in US.

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-06-22 21:37:07 UTC
From: Tom B
Topic: 4815 Message: 4815

Hello All,

Pickup Only

I have for sale an Eddystone 358 HF receiver for sale. It is complete with all coils and PSU. It is in good to fair physical condition. It has not been operated for quite a while and I have not tested it. So, I am selling as-is. The manual can be downloaded from BAMA here: ftp://bama.sbc.edu/downloads/eddyston/eddy358/

Because of size and problems shipping, the buyer must pick it up in person. These are very rare in the United States. The price is $400. I am located in Silver Spring, Maryland, just north of Washington DC.

Date: 2008-06-29 16:14:17 UTC
From: Tom B
Topic: 4821 Message: 4821

Hello All,

Pickup Only

I have for sale three British military R1155 aircraft receviers and one T1154 transmitter. The receivers have not been signifiantly modified. Two are in good physical condition, and one is only fair. The transmitter I would call in good physical condition. These have never been electrically checked. So, I am selling all as-is.

Because of size and problems shipping, the buyer must pick it up in person. These are very rare in the United States. The price is $600 for the lot. I am located in Silver Spring, Maryland, just north of Washington DC.

4824. WTB : Outbacker OUTREACH vertical and OUTPOST tripod

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-07-01 04:06:17 UTC
From: captain_magic
Topic: 4824 Message: 4824

I want to buy a used OUTREACH vertical antenna and the matching OUTPOST ground tripod made by Outbacker. I believe their tripod is actually supplied by Alpha Delta.

4825. Many ham items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-07-04 12:06:19 UTC
From: Ken Simpson, W8EK
Topic: 4825 Message: 4825

I know this is a long list; I have tried to group similar items
together.

High Power Antenna Tuner

This TenTec high power antenna tuner will do it all!
It uses an "L" network instead of the "T" network.
This means that there is only one correct match. With the "T"
network, there are many places that will give a 1:1 SWR, but
only one of these positions is best. With the "L" network, this
is not a problem, and results in a tuner that is much more efficient.

It will easily handle full legal power, and has a roller inductor
so one can get an exact match over any of the HF bands,
including WARC bands.
It also has a balun for use with twin lead.

This is not only a tuner. It also has a four position antenna
switch built in, plus an illuminated wattmeter with 200 and
2000 watt positions, and an SWR bridge.

This particular tuner works 100%, and looks close to new.
I can not find a scratch on it.

With paper work for $325.

Band Modules for TenTec 555 Scout HF transceiver
These also work in the 556 Argo QRP rig.
I have band modules for
160 meters - 1.8 to 2.0 MHz
30 meters - 10 to 10.5 MHz
10 meters - 28 to 29 MHz.
All work fine. With paper work for $65 each.

TenTec 296 mobile mount for 555 Scout HF transceiver
Nice clam shell type of mount in very good condition.
With paper work (in case you need it to install a mobile
bracket !) for $30.

Alinco DJ-191, 2 meter HT
This unit has about everything except the kitchen sink in it. It
has a very large, readable LCD display that I can read without
my glasses! It has about 7 watts max output, and the receiver
is great. It covers from 136 to 174 MHz, so it covers all of the
weather and VHF public service frequencies. Of course it has
memories and all sorts of scan features. Touchtones (DTMF)
and PL (subaudible) tones are included.

This unit works 100% and looks extremely nice. It includes
a good battery pack, belt clip, rubber duck, and paper work
for $100.

Radio Shack 19-300 Battery pack for HT-202 and HTX-404
This is a good battery pack for the Realistic HTs. It also fits
some of the Icom HTs such as the IC-2 AT, IC-02 AT,
IC-4 AT, etc.
This is the 7.2 volt, 600 ma hour NiCad pack.
It works fine and looks great. $25

HF wattmeter / SWR Bridge:

Micronta 21-520 A, HF wattmeter with two large meters
This is an HF wattmeter that covers from 3 to 30 MHz, with
full scale power readings of 10, 100, and 1000 watts.
Two LARGE meters -- one reads forward power and one
reads reflected power -- both at the same time. This gives
the same info as some of the cross needle meters, but many
people find it is easier to read.
It has a remote sensor, with about 3 feet of cable to connect
to the meter itself.
This particular meter works fine, and looks like new. It is
still in its original box. $55

Headphones:

Kenwood HS-5 headphones
These deluxe communications headphones are engineered
and tuned for radio communications to provide distinctive
voice sound (150-4000 Hz).
With ¼ inch mono plug; 8 ohms, and 6 foot cord.
In very nice shape. With paper work for $55.

Generic headphones
Similar to the HS-5 above, but with plastic ear pads.
"Made in USA" stamped on them. About 100 ohm impedance,
With 1/4 inch mono plug, and about 5 foot cord.
Nice shape. $25.

Single headphone
Keep one ear clear, so you can hear what is going on
in the room! With 1/8 inch mono plug; 32 ohm impedance.
Good condition. $20

Generic headset
Smaller ear pieces than those above. These are just over
an inch in diameter, so they do not completely cover your ear.
With 1/4 inch mono plug; 16 ohm impedance.
Good condition. $18

Vibroplex "Brass Racer Iambic" CW Paddle
The Brass Racer Iambic is unique in that there are no springs in the design. Tension on the paddle is infinitely adjustable through the use of magnets. The Brass Racer Iambic is a convenient, keyer paddle unit crafted from solid brass with a lacquer coated brushed finish mounted on a hardwood base.
This one works great, is in very nice condition, and includes cord and paper work for $110.

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo connector on the end, like used by most rigs. It looks great. $8

As above, but 1/8 inch plug. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch phone plug on it, as is used with a straight key. $5

As above, but 1/8 inch plug. $5

Microphones:

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing voltage. $25

Touch tone (DTMF) microphones:

Kenwood MC-45 DM, DTMF mic plus other functions
In addition to the touch tone pad and PTT switch, this mic has up-down switches, plus a row of four switches above the touch tone pad. They are used for "Call Button", VFO key, Memory recall key, and the fourth one is programmable. The back has a lock switch. It has an RJ-45 connector (like a computer LAN).
This particular mic works fine, and looks fine also. It is still in its original box, with paper work for only $60.

Kenwood MC-48, touch tone (DTMF) microphone.
Round, 8 pin connector, will go with any Kenwood rig taking this kind of connector. Has UP and DOWN switches, along with 16 digit touchtone pad. It is often used on the 2 m and 440 MHz rigs that do not have touchtone built in, but can also be used on HF rigs for touchtone on 10 m FM. It works fine and looks great also.
With paper work for $ 55.

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, along with a low impedance microphone. This one has the 8 pin

modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
Paper work included for $40.

Drake 1525 EM Touchtone Microphone
This is the mic that was used to add a touchtone pad to
a lot of rigs in the 70s and 80s. Normal hand mic from
the front, but has a touchtone pad on the back. Four
pin mic plug. This particular unit has been used, but is
in good shape and includes paper work. $ 38

KDK Model TM-2
With touch tone pad and up-down switches. It presently
has a 6 pin connector for the KDK 2030, but that can
be changed. Nice condition. $40

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Icom HM-8 hand mic with Touch Tone (DTMF) Pad
This mic is being sold for parts only. The dynamic element
in it is open. A part of the plastic holding the PTT button
does not seem quite right, but the actual touch tone pad
and electronics is OK. So if you have an HM-8 with bad
electronics or actual touch tone pad, this unit will get you
up and going again. Actually, the unit probably can be
repaired and used. $10

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HTs. $18

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can
be plugged into a Kenwood rig with the round 8 pin
connector. Like new. $20

Heavy duty power supply
Pyramid PS-35
This supply is good for 32 Amps Constant or 35 Amps Surge.
The output voltage is adjustable over a 12 to 15 volt range
with a multi turn pot. It has crowbar over voltage protection,
short circuit & thermal protection and features a pair of nice
large edgewise meters to measure output voltage and output
current. There is an internal fan. This is a very healthy, heavy
duty supply!

This particular unit works 100% and looks very close to new.
$135

Expanded Scale AC Voltmeter
This is an AC Voltmeter with an expanded scale. It reads
from 0 to 150 volts AC, but the scale is expanded so that
one can read in the 120 V area easier. The middle of the
scale is about 95 volts. It is ideal to have in line constantly,
to check your line voltage. This is a Weston Model 476,
and is about 2 1/2 inches in diameter, with 3 mounting holes.
Of course it works fine, and looks fine also. $18

Keithley 169 Lab Quality Digital Multi Meter
This is a bench type DMM, with good accuracy.
3 1/2 digit LCD display
Voltage ranges are protected to 1400 volts
Resistance ranges are protected to 300 V RMS
..... (This means you can accidentally apply up to 300 V
..... RMS when measuring resistance, and the meter
..... will survive.)
Voltage ranges from 200 mv to 1000 V
Current ranges from 100 microamps to 2 amps
Resistance ranges from 200 ohms to 20 Meg
It is in very nice condition, both electrically and cosmetically.
Manual included for $80.

Variac
General Radio Model W5MT3
This variac is designed for 115 V AC lines, and will vary
the line voltage from zero to about 120 percent of the line
voltage. It is very useful for slowly bring the line voltage
up on older rigs.
The General Radio W5MT3 is in a very nice case, with a
3 wire cord, and 3 wire receptacle. Of course it has General
Radio quality. This one is rated at 5 amps.
In checking prices of used units on the internet, they seem
to go for anywhere from $170 to $400. This one works fine,
and is in excellent cosmetic condition as well. You can have
it for $125.

Kantronics Cable
This cable is made to plug in to the 9 pin DB-9 connector
that is on the back of many of Kantronics TNCs and other digital
units (KAM, KPC-3, and others), and is made to interface it to
the radio.
It has a DB-9 connector on one end, and is in extremely good condition.
The connectors are labeled "1" and "2", with "1" having a red 3.5
mm plug, a white 3.5 mm plug, and a black 2.5 mm plug. The "2"
is the same as "1" except it does not have the white 3.5 mm plug.
It is $20

Phone patches or digital interfaces:

Although designed to be used as a phone patch, to
connect your rig on both transmit and receive to a
telephone line, these can also be used to interface your
rig to a sound card. There is an internal audio
transformer inside, just like on some of the "interface
boxes" being sold today.

Johnson Viking Phone Patch - Model 250-46
This phone patch is made to be mounted vertically
beside the rig. It is about 6 inches high, 2 inches
wide and 3 inches deep. It is possible that the face
plate can be removed, and it made to be mounted
horizontally, but I have not done that. The reason I
say this is that there are feet on the bottom, and on
the left side. Maybe the feet on the left side are to
protect the rig. In any case, it has 3 pots on the
front for Null, Receive Volume, and transmit gain,
along with a switch for phone patch or microphone.
On the back is a terminal strip for speaker and
phone line. The microphone input has the 2 pin
Amphenol connector like used by Johnson, Heath,
Hallicrafters, and many others in that era.
It works fine and looks OK also. $30

Kenwood PC-1 phone patch/digital interface
This is the model with the 4 pin connectors, although
they can be changed, if needed. It includes a nice meter
for adjusting the null so VOX will work OK.
This particular unit works fine, and looks very, very good.
No scratches. With paperwork for $ 40

BNC to PL-259 antenna adapter
For use with any HT that has a BNC connector (such as the
DJ-191 above, but many others). It will convert the BNC
connector on the HT, so that you can use a normal antenna
with a PL-259 connector. Like new. $5

Antenna adapter for Kenwood TH-21 / 31 / 41 HTs
This adapts the antenna connector found on these HTs to a
standard BNC connector. $4

Avanti / Antenna Specialists "On Glass" antennas

These antennas were made by Avanti, and then later by
Antenna Specialists, to mount on a windshield, or other
glass. They do not require a ground plane, as they are
1/2 wave antennas, rated to have 3 db gain. They are
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Antenna for 2 meters
This one is in extremely nice condition, with a new packet
of the special mounting glue that is furnished by Antenna
Specialists. $28

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Rubber Duck and telescoping antennas for your HT.
All are for 2 meters, are in good condition, and are $10
each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others - $10 each
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long - $10

PL-259 connector - 6.5 inches long - $10
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long - $10
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Aftermarket stubby, 3.5 inches long - $10
Kenwood RA-6 regular, 6.6 inches long - $12

BNC stubby for 440 MHz - 3 inches long - $10

Telescoping quarter wave antenna
This antenna extends to a full 19 inches, but telescopes down
to about 4 inches. It has about 6 db gain over the typical rubber
duck antenna, and has a BNC connector. $12

Quarter wave telescoping antenna
As above, but with PL-259 connector. $12

Quarter wave telescoping antenna
As above, but with a right angle bend in it, and PL-259
connector. $15

Belt Clips for various HTs
$8 each
Motorola, with hardware
Kenwood TR-2400, with hardware
Radio Shack HTX-202/404, with hardware
Yaesu FT-209, with hardware

Wrist Straps for various HTs
$4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

Icom BP-3 battery packs
I found four of the BP-3 battery packs that are all dead.
These packs were used on the IC-2 AT, 3 AT, 4 AT,
02 AT, 03 AT, 04 AT, and maybe some others. They can
also be used on the Radio Shack HT-202 and HTX-404,
and maybe others.
All of these are dead, but if you need a battery shell, to
put a new "insert" in to, they would be ideal. $8 each

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Santec HT Accessories For Sale:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Original Kenwood Operating Manuals For Sale:

All are original operating manuals in very nice, close to new
condition, for Kenwood radios, unless stated otherwise.

Operating manual for TW-4000 dual bander $15

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E
HTs for 440 MHz, 220 MHz and 2 meters $10

Operating manual for TH-225, 2 meter HT - Good condition $12

Operating manual for TM-221/421 2 m mobile $15

Operating manual for TR-2200, 2 meter "portable"
This is very similar to the Drake TR-22. $15

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $14

Operating manual for TR-2600, 2 meter HT $12

Service manual for Kenwood TR-2600 HT - $10

Prices do not include shipping from Florida.

Thanks.

Wanted: RH Italy KL-500 Solid State Amp

I have one for which I paid $125.

I am willing to pay that, or to work a swap,
for a second one in good working order.

I may be willing to consider an amp from a
different manufacturer that also uses four
SD1446's.

Date: 2008-07-05 00:16:03 UTC
From: kc8ddq@aol.com
Topic: 4829 Message: 4829

Hey everyone,

I'm selling my Yaesu FT-8800. It is in excellent condition. Includes box, manual, mobile mounting bracket, factory hand mic, remote mounting kit, Yaesu factory service manual on CD (like to have service manuals for all my rigs in case it is ever needed), programming cable and 2 types of programming software. Email for pictures. Pics available on request. Power cable and remote cable are still in vehicle so aren't in the pics but are included. $300 plus shipping.

Thanks
Paul

From: Tom B
Topic: 4832 Message: 4832

Hello All,

Pickup Only

I have for sale three British military R1155 aircraft receivers and one T1154 transmitter. The receivers have not been signifiantly modified. One is in good physical condition, one is fair, and one is poor. The transmitter I would call in good physical condition, paint is about like you would expect after over 60 years. None of this equipment has been electrically checked. So, I am selling all as-is.

Because of size and problems shipping, the buyer must pick it up in person. These are very rare in the United States. The price is $500 for the lot. I am located in Silver Spring, Maryland, just north of Washington DC.
Pictures are available.

4839. Headphones, Microphones, and other ham items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-07-12 14:36:05 UTC
From: Ken Simpson, W8EK
Topic: 4839 Message: 4839

Ham Items For Sale:

I know this is a long list; I have tried to group similar items
together.

Headphones:

Generic headphones
Similar to the Kenwood HS-5, but with plastic ear pads.
"Made in USA" stamped on them. With 1/4 inch mono
plug, and about 5 foot cord. Nice shape. $25.

Single headphone
Keep one ear clear, so you can hear what is going on
in the room! With 1/8 inch mono plug; 32 ohm impedance.
Good condition. $20

Generic headset
Smaller ear pieces than those above. These are just over
an inch in diameter, so they do not completely cover your ear.
With 1/4 inch mono plug; 16 ohm impedance.
Good condition. $18

Regular Microphones:

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic
mic is needed. Stripped and tinned leads.
It works fine, and looks good also. $25

Touch tone (DTMF) microphones:

Kenwood MC-45 DM, DTMF mic plus other functions
In addition to the touch tone pad and PTT switch, this mic
has up-down switches, plus a row of four switches above
the touch tone pad. They are used for "Call Button", VFO
key, Memory recall key, and the fourth one is programmable.
The back has a lock switch. It has an RJ-45 connector (like
a computer LAN).
This particular mic works fine, and looks fine also. It is still
in its original box, with paper work for only $60.

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, along with a low impedance microphone. This one has the 8 pin modular plug (like a computer LAN) on it. This mic has not been used, so it is in really great condition. Paper work included for $40.

Drake 1525 EM Touchtone Microphone
This is the mic that was used to add a touchtone pad to a lot of rigs in the 70s and 80s. Normal hand mic from the front, but has a touchtone pad on the back. Four pin mic plug. This particular unit has been used, but is in good shape and includes paper work. $ 38

KDK Model TM-2
With touch tone pad and up-down switches. It presently has a 6 pin connector for the KDK 2030, but that can be changed. Nice condition. $40

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the back. Low Z mic element with round 8 pin connector wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a normal low impedance microphone. With 4 pin plug. Like new. $38

Icom HM-8 hand mic with Touch Tone (DTMF) Pad
This mic is being sold for parts only. The dynamic element in it is open. A part of the plastic holding the PTT button does not seem quite right, but the actual touch tone pad and electronics is OK. So if you have an HM-8 with bad electronics or actual touch tone pad, this unit will get you up and going again. Actually, the unit probably can be repaired and used. $10

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HTs. $18

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can be plugged into a Kenwood rig with the round 8 pin connector. Like new. $20

Alinco DJ-191, 2 meter HT
This unit has about everything except the kitchen sink in it. It has a very large, readable LCD display that I can read without my glasses! It has about 7 watts max output, and the receiver is great. It covers from 136 to 174 MHz, so it covers all of the weather and VHF public service frequencies. Of course it has memories and all sorts of scan features. Touchtones (DTMF)

and PL (subaudible) tones are included.
This unit works 100% and looks extremely nice. It includes
a good battery pack, belt clip, rubber duck, and paper work
for $100.

Band Modules for TenTec 555 Scout HF transceiver
These also work in the 556 Argo QRP rig.
I have band modules for
10 meters - 28 to 29 MHz.
All work fine. With paper work for $65 each.

TenTec 296 mobile mount for 555 Scout HF transceiver
Nice clam shell type of mount in very good condition.
With paper work (in case you need it to install a mobile
bracket !) for $30.

HF wattmeter / SWR Bridge:

Micronta 21-520 A, HF wattmeter with two large meters
This is an HF wattmeter that covers from 3 to 30 MHz, with
full scale power readings of 10, 100, and 1000 watts.
Two LARGE meters -- one reads forward power and one
reads reflected power -- both at the same time. This gives
the same info as some of the cross needle meters, but many
people find it is easier to read.
It has a remote sensor, with about 3 feet of cable to connect
to the meter itself.
This particular meter works fine, and looks like new. It is
still in its original box. $55

Vibroplex "Brass Racer Iambic" CW Paddle
The Brass Racer Iambic is unique in that there are no
springs in the design. Tension on the paddle is infinitely
adjustable through the use of magnets. The Brass Racer
Iambic is a convenient, keyer paddle unit crafted from
solid brass with a lacquer coated brushed finish
mounted on a hardwood base.
This one works great, is in very nice condition, and
includes cord and paper work for $110.

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8

As above, but 1/8 inch plug. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5

As above, but 1/8 inch plug. $5

Heavy duty power supply
Pyramid PS-35
This supply is good for 32 Amps Constant or 35 Amps Surge.
The output voltage is adjustable over a 12 to 15 volt range
with a multi turn pot. It has crowbar over voltage protection,
short circuit & thermal protection and features a pair of nice
large edgewise meters to measure output voltage and output
current. There is an internal fan. This is a very healthy, heavy
duty supply!
This particular unit works 100% and looks very close to new.
$125

Expanded Scale AC Voltmeter
This is an AC Voltmeter with an expanded scale. It reads
from 0 to 150 volts AC, but the scale is expanded so that
one can read in the 120 V area easier. The middle of the
scale is about 95 volts. It is ideal to have in line constantly,
to check your line voltage. This is a Weston Model 476,
and is about 2 1/2 inches in diameter, with 3 mounting holes.
Of course it works fine, and looks fine also. $18

Prices do not include shipping from Florida.

Thanks.

4844. Icom batteries for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-07-16 01:59:54 UTC
From: John Geiger
Topic: 4844 Message: 4844

I have for sale batteries for 2 different series of Icom HTs. Prices include shipping in the US:

1. a like new Maha BP173 9.6V 650mah NIMH battery for the IC-Z1A/W31A/T7H/W32A/T22 HTs. It lists for $62, I am asking $25 shipped.

2. a Batteries America BP-200XL which fits the Icom T8A and T81A HTs. This is the 9.6 volt (for 5 watts out) battery which has a capacity of 1350mah. It seems to hold a good charge but I can't guarantee the life of it. It also comes with the heavy duty spring belt clip on it (much better than the Icom clip). These sell new for $60 plus shipping. I am asking $17 shipped.

I can take paypal, check, or MO.

4845. CQ equipment buyers guides for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-07-16 02:00:40 UTC
From: John Geiger
Topic: 4845 Message: 4845

I have for sale a 1990 and a 1994 edition of CQ magazine's Equipment Buyer's guide. These are interesting to look at as they contain descriptions of all of the equipment offered for sale in that year, but they also contain quite a few articles about different facets of amateur radio. For this reason they make good reference guides for the new ham also. I am asking $8 shipped for both.

73s John AA5JG

4848. Trade AOR AR-8200 Mk II

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-07-16 05:22:22 UTC
From: Woody
Topic: 4848 Message: 4848

Hey all, I'm looking to trade this portable for either the AOR Desk model; or a solid-state HF rig would suffice.
An IC-718 or older TS-440 would be superb, but
I'd consider late model/freq agile marine radios, micom x, that sort of thing, but NO shortwaves please.

The AOR is the AR-8200 Mk-II, black case, and covers all frequencies from 100kHz to 2.04gHz without gaps.

I have the radio, generic ducky and factory medium-wave antenna, and factory spring beltclip.

Manual available here: http://www.aoruk.com/archive/manuals.htm

and info here: http://www.universal-radio.com/catalog/ ... /3265.html

And if I'm totally insane on my trade requests, just say so... this radio does exactly what I need, I'd just
prefer it to be bigger and less portable...

NOT FOR SALE.

4849. FS: Icom W32A dualband HT

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-07-16 14:20:29 UTC
From: John Geiger
Topic: 4849 Message: 4849

I have for sale an Icom W32A dualband (2m/70cm) HT with the BP173 and BP180 battery packs, and the BC-110 wall charger. This is the dualband model that also does dual receive, and dual inband receive. It also will do wide receive up into 800mhz. A couple of the keys have the lettering on them a little worn off, but they are still readable. The rest of the HT looks good. It also has an aftermarket 17 inch long high gain dualband antenna instead of the stock antenna.

I am asking $160 shipped in the US, and can take paypal, check, or MO. International shipping can be worked out.

4858. Icom 751A for repair or parts

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-07-20 19:15:44 UTC
From: John Geiger
Topic: 4858 Message: 4858

I have for sale a repair or parts unit Icom 751A. It comes with a photocopy of the manual but no mic or power cord. It has a problem in that it seems "brain dead" but it can't be the RAM battery problem that occured with this model.
The 751A has the Piexx ROM board installed, with a good battery, so that isn't the problem. I can't guarantee that the ROM board isn't bad, but in talking to Scott Malcom at MTS he didn't think that was the problem. Here is what else I can tell you about the 751A:

It is in surpurb condition for its age. The face is really clean and both halves of the case look really nice also. It has the FL32 500hz filter in it, and the FL44 SSB filter. It is the 3rd generation 751A with the new Icom logo and PBT enabled from the factory. The serial number is 9500.

Now for the problem with it: The S meter light comes on, the green receive LED comes on, and the red LED will come on when you put the rig into transmit by the transmit/receive switch.
There is no sound coming out of the speaker, but the green receive LED will go out if you increase the squelch. I tried putting it into RTTY mode and transmitting to see if there is any power out, and it didn't show anything, but I cant be sure I was in RTTY mode as there is nothing on the digital display. Pushing the FUNC button does not light up that LED, though.

So, there is no transmit and receive on it, and no display. Here is what Scott Malcom at MTS had to say when I described the problem to him:

Hi John:

>From the description, I would think repair would be under $100 (plus return shipping). It is either a PLL or a Logic unit issue.

Scott Malcom
MTS

I am asking $205 shipped in the US for it. I can take paypal, check, or MO.

FS: RM Italy KL500 HF Amp

I have the original box and the amp looks new.
Amp has been tested and appears to work 100%.

Picture here:
http://www.rigpix.com/linears/rmitaly_kl500.htm

Type: All-mode HF linear amplifier
Frequency range: 3.5-30 MHz
Voltage: 12-14 VDC
Current drain: Max 34 A
Drive power: AM/FM: 1-15 W
SSB/CW: 2-30 W
Maximum Power output: AM/FM: 60-300 W
SSB/CW: 120-600 W
Impedance: 50 ohms, SO-239
Dimensions (W*H*D): 170*295*62 mm
Weight: 1.6 Kg
Manufactured: Italy, 199x-200x
Other: Built-in 26 dB preamp

I am modifying a larger one for Ham use so will
not be using this one.

Asking $145. (or reasonable offer) plus actual shipping.

4862. Recent debate

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-07-24 16:55:48 UTC
From: Ray_Vaughan_99
Topic: 4862 Message: 4862

List owner here. Sorry to deviate from the usual rules about off-topic posting here.

I know a post from earlier today has generated a debate in another mailing list. I think debates are healthy and a good way for all to learn. Just so there's no confusion, here are the rules as I understand them. Please read (b)(3) under the exceptions. (source, ARRL web site.) As I read it, I do not consider the posting a R&R violation. Please continue the debate in the other list if you wish. But this list is for buying and selling only.

Again, sorry for the distraction but I know many of you wanted to comment on it. As list owner, I wanted to cite the rules so we can move on.

Thanks. Ray, KD4BBM

§97.315 Certification of external RF power amplifiers.

(a) Any external RF power amplifier (see § 2.815 of the FCC Rules) manufactured or imported for use at an amateur radio station must be certificated for use in the amateur service in accordance with subpart J of part 2 of the FCC Rules. No amplifier capable of operation below 144 MHz may be constructed or modified by a non-amateur service licensee without a grant of certification from the FCC.

(b) The requirement of paragraph (a) does not apply if one or more of the following conditions are met:

(1) The amplifier is constructed or modified by an amateur radio operator for use at an amateur station.

(2) The amplifier was manufactured before April 28, 1978, and has been issued a marketing waiver by the FCC, or the amplifier was purchased before April 28, 1978, by an amateur radio operator for use at that operator's station.

(3) The amplifier is sold to an amateur radio operator or to a dealer, the amplifier is purchased in used condition by a dealer, or the amplifier is sold to an amateur radio operator for use at that operator's station.

4865. Extensive list of HT and HT related accessories FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-07-26 13:01:49 UTC
From: Ken Simpson, W8EK
Topic: 4865 Message: 4865

Extensive list of HT and HT related accessories For Sale:

I know this is a long list; I have tried to group similar items
together.

Alinco DJ-191, 2 meter HT
This unit has about everything except the kitchen sink in it. It
has a very large, readable LCD display that I can read without
my glasses! It has about 7 watts max output, and the receiver
is great. It covers from 136 to 174 MHz, so it covers all of the
weather and VHF public service frequencies. Of course it has
memories and all sorts of scan features. Touchtones (DTMF)
and PL (subaudible) tones are included.
This unit works 100% and looks extremely nice. It includes
a good battery pack, belt clip, rubber duck, and paper work
for $100.

Radio Shack 19-300 Battery pack for HT-202 and HTX-404
This is a good battery pack for the Realistic HTs. It also fits
some of the Icom HTs such as the IC-2 AT, IC-02 AT,
IC-4 AT, etc.
This is the 7.2 volt, 600 ma hour NiCad pack.
It works fine and looks great. $25

Icom BP-3 battery packs
I found four of the BP-3 battery packs that are all dead.
These packs were used on the IC-2 AT, 3 AT, 4 AT,
02 AT, 03 AT, 04 AT, and maybe some others. They can
also be used on the Radio Shack HT-202 and HTX-404,
and maybe others.
All of these are dead, but if you need a battery shell, to
put a new "insert" in to, it would be ideal. $8 each

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HTs. $18

Hustler SF-2 antenna for 2 meters
This is a 5/8 wave antenna with about 3 db gain over a
quarter wave antenna. It is about 4 feet long, and is made
to screw into a standard 3/8 inch 24 thread mount.
It works fine and looks fine. $15

Hustler RSS-2 stainless steel resonator spring
Recommended by Hustler to go at the top of the masts
used with HF resonators, and below the resonator, to
prevent breakage, in case the resonator hits a tree limb.
This one looks very close to new. $10

Larsen VHF and UHF Mobile Antennas:

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on the
70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $7

Larsen Q
Fits a 5/16 inch stud, such as the Larsen LM mount, and others.
It can be cut for 2 meters, 220 MHz, or 450 MHz bands. $6

Larsen NMO-Q
Precut for 450 MHz. New, still in bag. $8

Larsen OM-450 coil, mount, and whip for 440 MHz
Made to mount on a flat surface
Includes "stacked" whip for 5 db gain on 450 MHz. $18

Avanti / Antenna Specialists "On Glass" antennas:

These antennas were made by Avanti, and then later by
Antenna Specialists, to mount on a windshield, or other
glass. They do not require a ground plane, as they are
1/2 wave antennas, rated to have 3 db gain. They are
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Antenna for 2 meters
This one is in extremely nice condition, with a new packet
of the special mounting glue that is furnished by Antenna
Specialists. $28

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Rubber Duck and telescoping antennas for your HT.
All are for 2 meters, are in good condition, and are $10
each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others - $10 each
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long - $10

PL-259 connector - 6.5 inches long - $10
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long - $10
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Aftermarket stubby, 3.5 inches long - $10
Kenwood RA-6 regular, 6.6 inches long - $12

Telescoping quarter wave antenna
This antenna extends to a full 19 inches, but telescopes down
to about 4 inches. It has about 6 db gain over the typical rubber
duck antenna, and has a PL-259 connector. $12

Quarter wave telescoping antenna
As above, but with a right angle bend in it, and PL-259
connector. $15

Belt Clips for various HTs
$8 each
Motorola, with hardware
Kenwood TR-2400, with hardware
Yaesu FT-209, with hardware

Wrist Straps for various HTs
$4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

Santec HT Accessories For Sale:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Kantronics Cable
This cable is made to plug in to the 9 pin DB-9 connector
that is on the back of many of Kantronics TNCs and other digital
units (KAM, KPC-3, and others), and is made to interface it to
the radio.
It has a DB-9 connector on one end, and is in extremely good condition.
The connectors are labeled "1" and "2", with "1" having a red 3.5

mm plug, a white 3.5 mm plug, and a black 2.5 mm plug. The "2" is the same as "1" except it does not have the white 3.5 mm plug. It is $20

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually, one must have the battery inside the HT, but this lets you charge a second battery outside of the HT. The original charger is used. It is in good shape, and works fine. $3

BNC to PL-259 antenna adapter
For use with any HT that has a BNC connector (such as the DJ-191 above, but many others). It will convert the BNC connector on the HT, so that you can use a normal antenna with a PL-259 connector. Like new. $5

Antenna adapter for Kenwood TH-21 / 31 / 41 HTs
This adapts the antenna connector found on these HTs to a standard BNC connector. $4

Coax connectors and adapters:
Prices are per connector. Several of each are available. These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male (PL-259) connection - $5

Original Kenwood Operating Manuals For Sale:

All are original operating manuals in very nice, close to new condition, for Kenwood radios, unless stated otherwise.

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E
HTs for 440 MHz, 220 MHz and 2 meters $10

Operating manual for TH-225, 2 meter HT - Good condition $12

Operating manual for TM-221/421 2 m mobile $15

Operating manual for TR-2200, 2 meter "portable"
This is very similar to the Drake TR-22. $15

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $14

Operating manual for TR-2600, 2 meter HT $12

Service manual for Kenwood TR-2600 HT - $10

Operating manual for TW-4000 dual bander $15

Heavy duty power supply
Pyramid PS-35
This supply is good for 32 Amps Constant or 35 Amps Surge.
The output voltage is adjustable over a 12 to 15 volt range
with a multi turn pot. It has crowbar over voltage protection,
short circuit & thermal protection and features a pair of nice
large edgewise meters to measure output voltage and output
current. There is an internal fan. This is a very healthy, heavy
duty supply!
This particular unit works 100% and looks very close to new.
$135

Prices do not include shipping from Florida.

Thanks.

4866. FS: ARRL sweepstakes pins and clean sweep mug

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-07-27 19:32:43 UTC
From: John Geiger
Topic: 4866 Message: 4866

I have for sale several NIB (new in the box) ARRL November Sweepstakes pins - wear it on your lapel or hat to amateur radio meetings, conventions, dinners, fleamarkets and other events. These are highly collectible as they have not been offered in recent years. I am asking $7 each, shipped. Here are the ones I have available:

1991 CW SS
1993 CW SS, SSB SS
1994 CW SS, SSB SS
2000 SSB SS
2002 SSB SS

These were originally available for purchase if you made 100 QSOs or more in the Sweepstakes.

I also have for sale a clean sweep coffee mug from the 2000 SSB sweepstakes. If you made a clean sweep and forgot to buy a mug and still want to commerate your sweep, here is your chance! It is $15 shipped.

I can take paypal, check, or MO.

4868. FS: Drake MN2000 antenna tuners

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-07-28 18:59:41 UTC
From: John Geiger
Topic: 4868 Message: 4868

We have sold almost all of the gear from the AB5J estate, but still have 3 Drake MN2000 antenna tuners in good condition for sale. These are the bigger ones that will handle legal limit, and have power/swr meters on them. They are in good condition but a little dusty and could use a good cleaning.

I am asking $175 for each. You can pick them up in Lawton, OK, pay for shipping, or I will be in OKC in a couple of weeks and can deliver them at that time.

4870. Want to trade Alinco DJ-496 UHF HT and accessories for QRP Rig

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-07-29 06:06:45 UTC
From: John Casteel, KE5JRM
Topic: 4870 Message: 4870

I have an Alinco DJ-496 with a new EBP-51N 1500mAh 9.6V Ni-MH Battery, an aftermarket speaker mic, an Pryme RD-2 antenna (also have the OE antenna), Wall charger and a Nifty Ham Desktop holder for an HT. I will also throw in a Magnet Mount Dual Band mobile antenna. This is a good rig, I just want to start using that code I've been studying now for months.
I would like to get a 40 meter rig, something like a MFJ-9340 Cub or an MFJ-9040 or even a Rock-Mite with a small key I am not tied down to any one kind of rig. Let me know what you have and we can swap photos and perhaps make a deal.

4875. FS: 70cm yagi/coax/rotor

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-08-01 15:24:14 UTC
From: John AA5JG
Topic: 4875 Message: 4875

I have a homebrew 16 element 70cm yagi for sale. It is on an 8 foot boom. I didn't build it but it works just fine (probably because I didn't build it) on both FM and SSB. I also have about 42 feet of 9913 flex coax I will thrown in with it. The coax is used but still in good condition. The beam uses a SO239 connector but you could replace it with an N connector if you like.

I am asking $40 for both. I can't ship it at this time, but you can pick it up in Lawton, OK, or I could deliver it to the Oklahoma City area next week.

For a little extra I can throw in a used Radio Shack rotor and some cable with it. The rotor was working when I took it down, but it probably needs a good lube job.

I would entertain offers to sell the coax and rotor separately, and they can be shipped.

73s John AA5JG
Lawton, OK

4876. Antenna tuner and other HF related items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-08-02 11:55:39 UTC
From: Ken Simpson, W8EK
Topic: 4876 Message: 4876

Antenna tuner and other HF related items For Sale:

I know this is a long list; I have tried to group similar items
together.

Antenna tuner For Sale:

MFJ 941 E antenna tuner for 160 thru 10 meters

This is the latest "E" version of this popular tuner.

This tuner has a "cross needle" SWR bridge built into it,
so you can read both forward power and SWR at the
same time. The meter has a back light, assuming 12
Volts is applied to the tuner. The wattmeter portion will
read either 30 W or 300 W full scale.

An antenna switch will switch between either balanced line,
two coax antennas, or a dummy load. Antennas can be
operated thru the tuner, or the tuner can be bypassed.

This tuner will operate on 160 thru 10 meters, including the
WARC bands.

This particular unit works 100%. It looks very close to new.
Almost like it just came out of its box; maybe that is because
it is still in its original box.

Manual is included for $100

Band Modules for TenTec 555 Scout HF transceiver
These also work in the 556 Argo QRP rig.
I have a band module for 10 meters - 28 to 29 MHz.
It works fine. With paper work for $65.

TenTec 296 mobile mount for 555 Scout HF transceiver
Nice clam shell type of mount in very good condition.
With paper work for $30.

TenTec 306 power adapter
The 555 Scout and several other TenTec rigs take a 2
pin power connector. Most of the TenTec power supplies
have a 4 pin plug with larger conductors. This adapter
adapts the 4 pin power connector, so it can be used on
a radio with the 2 pin power plug. Like new, with paper
work (all half page of it!). $10

HF wattmeter / SWR Bridge:

Micronta 21-520 A, HF wattmeter with two large meters
This is an HF wattmeter that covers from 3 to 30 MHz, with
full scale power readings of 10, 100, and 1000 watts.
Two LARGE meters -- one reads forward power and one
reads reflected power -- both at the same time. This gives
the same info as some of the cross needle meters, but many
people find it is easier to read.
It has a remote sensor, with about 3 feet of cable to connect
to the meter itself.
This particular meter works fine, and looks like new. It is
still in its original box. $55

Headphones:

Generic headphones
Similar to the Kenwood HS-5 headphones, but with plastic
ear pads. "Made in USA" stamped on them.
With 1/4 inch mono plug, and about 5 foot cord.
Nice shape. $25.

Single headphone
Keep one ear clear, so you can hear what is going on
in the room! With 1/8 inch mono plug; 32 ohm impedance.
Good condition. $20

Generic headset
Smaller ear pieces than those above. These are just over
an inch in diameter, so they do not completely cover your ear.
With 1/4 inch mono plug; 16 ohm impedance.
Good condition. $18

Vibroplex "Brass Racer Iambic" CW Paddle
The Brass Racer Iambic is unique in that there are no
springs in the design. Tension on the paddle is infinitely
adjustable through the use of magnets. The Brass Racer
Iambic is a convenient, keyer paddle unit crafted from
solid brass with a lacquer coated brushed finish
mounted on a hardwood base.
This one works great, is in very nice condition, and
includes cord and paper work for $110.

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8

As above, but 1/8 inch plug. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5

As above, but 1/8 inch plug. $5

Microphones:

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic
mic is needed. Stripped and tinned leads.
It works fine, and looks good also. $25

Touch tone (DTMF) microphones:

Kenwood MC-45 DM, DTMF mic plus other functions
In addition to the touch tone pad and PTT switch, this mic
has up-down switches, plus a row of four switches above
the touch tone pad. They are used for "Call Button", VFO
key, Memory recall key, and the fourth one is programmable.
The back has a lock switch. It has an RJ-45 connector (like
a computer LAN).
This particular mic works fine, and looks fine also. It is still
in its original box, with paper work for only $60.

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, along with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
Paper work included for $40.

Drake 1525 EM Touchtone Microphone
This is the mic that was used to add a touchtone pad to
a lot of rigs in the 70s and 80s. Normal hand mic from
the front, but has a touchtone pad on the back. Four
pin mic plug. This particular unit has been used, but is
in good shape and includes paper work. $ 38

KDK Model TM-2
With touch tone pad and up-down switches. It presently
has a 6 pin connector for the KDK 2030, but that can
be changed. Nice condition. $40

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Icom HM-8 hand mic with Touch Tone (DTMF) Pad
This mic is being sold for parts only. The dynamic element in it is open. A part of the plastic holding the PTT button does not seem quite right, but the actual touch tone pad and electronics is OK. So if you have an HM-8 with bad electronics or actual touch tone pad, this unit will get you up and going again. Actually, the unit probably can be repaired and used. $10

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can be plugged into a Kenwood rig with the round 8 pin connector. Like new. $20

Hamstick HF mobile antenna for 20 meters

This is the original honest to goodness Hamstick, made by Lakeview, and are not one of the clones.

This antenna, when fully assembled and tuned, is about 7 feet long, in a slim design that does not catch much wind. Each has a 3/8 inch, 24 thread stud on the base, so it fits a standard ball mount.

This antennas is new, still in their original package, unused.
$27

Hustler RSS-2, Stainless steel resonator spring $10

Phone patches or digital interfaces:

Although designed to be used as a phone patch, to connect your rig on both transmit and receive to a telephone line, these can also be used to interface your rig to a sound card. There is an internal audio transformer inside, just like on some of the "interface boxes" being sold today.

Kenwood PC-1 phone patch/digital interface
This is the model with the 4 pin connectors, although they can be changed, if needed. It includes a nice meter for adjusting the null so VOX will work OK.
This particular unit works fine, and looks very, very good. No scratches. With paperwork for $ 40

LARGE Analog meters

Weston Model 741 DC ammeter
50 ua movement with scales of 2.5, 5, and 10
This is a large, approx 4 inch meter. $15

General Electric Edgewise DC ammeter
0-100 ma scale - Edgewise meter with scale 5+ inches long and 1.7 inches high. White scale, w/ silver/gray mounting

This is a very nice meter that can be read across the room. $30

LabVolt AC ammeter
0-1 amp scale, 4 inch square meter, New, unused $18

LabVolt DC ammeter
0-1 amp scale, 4 inch square meter, New, unused $18

DC voltmeter has 3 scales on it - 5, 10, and 25 volts.
It says it is a Niehoff Voltmeter, Chicago, Model T-2.
It looks like 1930s vintage, and is in very nice shape. $28

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Prices do not include shipping from Florida.

Thanks.

4877. Yaesu FT127R (222mhz) for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-08-02 14:36:54 UTC
From: John Geiger
Topic: 4877 Message: 4877

It is too late for the UHF contest, but here is a rig to get you ready for the September VHF contest-if you want to add another band, or just for everyday 222mhz use. I have for sale a Yaesu FT127R 10 watt 222mhz rig in excellent condition. This is a really clean rig for its age, and comes with the mic, power cord, manual (original)
and original box. It is a 12 channel rig, and it comes with 223.46mhz simplex installed for those contest QSOs. It also has the 223.500 mhz transmit crystal installed, but is missing the 223.500 receive. If you have a scanner
or wideband receive rig, you can use this for transmitting on 222fm and use the other rig for receive.

I have a couple of other crystal pairs I will throw in with the rig. I am asking $50 plus shipping for this rig. Get it now and start making some simplex 222 QSOs, and you can order crystals for the specific repeater pairs you need. You will not find a cleaner, better looking rig of this age.

From: John Geiger
Topic: 4878 Message: 4878

I have some extra crystals for the Midland 13-509 and Clegg 76 222mhz rigs.
Here is what I have available:

Repeater splits
222.36/223.96
222.40/224.00
222.70/224.30
222.90/224.50
223.02/224.62
223.06/224.66
223.16/224.76

Simplex
223.42
223.70 223.50-transmit only

Transmit crystals (no matching receive)
223.14
223.34

Receive crystals (no matching transmit)
223.94
224.18
224.70

Let me know if you can use any of them, and we can figure out a price.

4889. FS: Kenwood TS690SAT HF/6m XCVR

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-08-19 15:26:36 UTC
From: John AA5JG
Topic: 4889 Message: 4889

I have for sale a Kenwood TS690SAT HF/6m rig with the autotuner installed. It is a very late serial number-in the 8 million range, meaning it was built in 1996. The TS570 came out in 1996 so this must have been one of the last 690s to be built. It is exceptionally clean also, with just one little ding below the handle but other than that, it looks like it just came out of the box. It also works fine, putting out the full 100 watts on HF and 50 watts on 6m. It comes with the mic, power cord, original manual, and the original box including all of the original packing. You would not be disappointed in the condition of this rig. The autotuner works great and loads up anything you throw at it.

I am asking $555 plus shipping. I can take paypal, check or MO. Or you can pick it up in the Southwest OK/Northern TX area.

4890. FS: Icom T2H 2 meter HT

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-08-20 03:47:28 UTC
From: John AA5JG
Topic: 4890 Message: 4890

I have for sale an Icom T2H sport 2 meter HT. It does 6 watts on high power and 1 watt on low power. It comes with a shorter 2m antenna than the original but it still works fine. It also has the BP194 battery tray that holds 8 AA batteries. It does not come with the charger (the sport model didn't) or the manual. You can find the manual on the Icom website. I can include a copy of it on CD if needed.

The case on the HT is kind of rough-with some scratches and marks. Also, the battery clip holder on the BP194 is missing and there is no battery clip. Still, the HT works fine and doesn't look too bad physically. I am asking $55 for it and can take paypal, check, or MO.

4892. FS: Trac Memory Keyer

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-08-21 04:10:09 UTC
From: John AA5JG
Topic: 4892 Message: 4892

I have for sale a Trac TE284 memory keyer that would be perfect for a Kenwood TS450/TS690 or other rig without an internal keyer. It does 4 25 character memories, or 2 50 character memories. It will do both positive keying (for solid state rigs) and negative keying (for tube rigs), and runs off of a 9 volt battery. It has had 2 modifications done to it: the tune switch for sending a steady carrier for tuning your manual tuner has been moved to the front panel, and a pot to control the pitch of the sidetone has been added to the back (it was an internal control). I dont have a manual for it but it is pretty intuitive on how to operate it.

I am asking $35 plus shipping, and can take paypal/check/MO.

From: John AA5JG
Topic: 4893 Message: 4893

I have 4 222mhz crystals available for Wilson 222mhz radios. They are for: 222.400mhz(12.633 fundamental), 223.020mhz(12.390 fundamental), 223.160mhz(12.39775 fundamental), and 224.620mhz(12.0733 fundamental). They may work in other radios as well, I don't know. The fundamental frequencies for them are in the 12mhz range. i also have some crystals for Yaesu/Midland/Clegg radios. I have 9 223.02 transmit crystals (18.585mhz fundamental), 15 222.900 transmit (18.575 fundamental) and 12 224.62 receive (53.48mhz fundamental).

This is a total of 40 crystals, and I will sell the whole set for $15 shipped (or best offer). I can take paypal/check/MO.

4898. Kenwood TS-440 HF xcvr, and other Kenwood items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-08-23 13:23:58 UTC
From: Ken Simpson, W8EK
Topic: 4898 Message: 4898

Kenwood Items For Sale:

Kenwood TS-440 S / AT, 100 Watt HF transceiver

The Kenwood TS-440S/AT was designed for superior
performance in the SSB, CW, AM, FM and AFSK modes.
An automatic antenna tuner is built in. Coverage is 160
through 10 meters including the WARC bands with 100
watts (40W AM). It includes such things as notch filter,
individual selection of optional crystal filters, digital readout,
memories, scan capabilities, IF shift, direct frequency entry
from a keyboard, and many other features. It requires 13
VDC at about 20 amps.

This particular TS-440 is about as perfect as you can find.
Electrically, it functions 100%. There are no problems with
the VCO and PLL like plagues some of these units. Likewise
the frequency entry from the keyboard is clean and definite.
Cosmetically, it looks like it just came from the factory. Not a
scratch on it. It is in its original double box with foam inserts,
with original manual that looks like it has not been used. You
simply will not find a more perfect TS-440! All of this for only $525.

Kenwood PS-50 heavy duty power supply

This power supply was designed for use with the TS-440
transceiver, but it can be used with any rig. It is capable of
supplying 13 V DC at up to 20 amps, continuously for an hour.
It has the standard 6 pin molex output connector, as used by
Kenwood, Icom, Yaesu, and others for their HF rigs. It also has
screw terminals on the back for use with a second rig, such as
a 2 meter rig.

This particular unit is immaculate. It functions 100%, and looks
like new. Not a scratch on it. It is in its original boxes, with the
foam inserts, and original manual that looks like it was never used.

The power supply by itself is $125, and will sell after the TS-440
above. If sold with the TS-440, the combination is only $625.

Other Kenwood items for sale:

Kenwood TH-41 AT HT for 440 MHz.
This compact HT has thumbwheel switches to select the operating
frequency. The HT has about 1.5 watts output, and a decent receiver.
It has a touchtone pad on it, and is very simple to operate. You likely
will not need to read to manual to use this one!

This one has a battery case where one may insert six AAA batteries.
This is very advantageous, as one may choose to use alkaline
batteries, or some of the newer NiMH batteries that have much
higher capacity. It includes the battery case, stubby rubber duck,
belt clip, and paper work for $60.

Kenwood MC-45 DM, DTMF mic plus other functions
In addition to the touch tone pad and PTT switch, this mic
has up-down switches, plus a row of four switches above
the touch tone pad. They are used for "Call Button", VFO
key, Memory recall key, and the fourth one is programmable.
The back has a lock switch. It has an RJ-45 connector (like
a computer LAN).
This particular mic works fine, and looks fine also. It is still
in its original box, with paper work for only $60.

Kenwood MJ-48 microphone connector adapter
Converts a round 4 pin Kenwood mic connector, so it can
be plugged into a Kenwood rig with the round 8 pin
connector. $20

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can
be plugged into a Kenwood rig with the round 8 pin
connector. Like new. $20

Kenwood PC-1 phone patch
This is the model with the 4 pin connectors, although
they can be changed, if needed. It includes a nice meter
for adjusting the null so VOX will work OK.
This particular unit works fine, and looks very, very good.
No scratches. With paperwork for $ 40

Belt clip for TR-2400 HT, complete with hardware - $8

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Wrist strap - I think it fits most Kenwood (and maybe other) HTs - $4

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached. $5

Antenna adapter for Kenwood TH-21 / 31 / 41 HTs
This adapts the antenna connector found on these HTs to a

standard BNC connector. $5

Special rubber duck antenna for Kenwood TH-21 HT with
threaded connector
Aftermarket stubby, 3.5 inches long - $10
Kenwood RA-6 regular, 6.6 inches long - $12

Original Kenwood Manuals:

All manuals are in very nice, close to new
condition, for Kenwood radios, unless stated otherwise.

Operating manual for TW-4000 dual bander $15

Service manual for TW-4000 dual bander $20

Operating manual for TH-21 A / AT HT for 2 meters $ 8

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E
HTs for 440 MHz, 220 MHz and 2 meters $10

Operating manual for TH-225, 2 meter HT - Good condition $12

Operating manual for TM-221/421 mobile $15

Operating manual for TH-241 / 441 / 541 mobile FM transceivers
For 2 meters, 440 MHz, and 1200 MHz. $ 12

Operating manual for TR-2200, 2 meter "portable"
This is very similar to the Drake TR-22. $15

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $14

Operating manual for TR-2600, 2 meter HT $12

Prices do not include shipping from Florida.

Thanks.

4899. Many Misc Ham Items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-08-24 17:37:50 UTC
From: Ken Simpson, W8EK
Topic: 4899 Message: 4899

Many miscellaneous ham items for sale:

Kenwood TH-41 AT HT for 440 MHz.

This compact HT has thumbwheel switches to select the operating
frequency. The HT has about 1.5 watts output, and a decent receiver.
It has a touchtone pad on it, and is very simple to operate. You likely
will not need to read to manual to use this one!

This one has a battery case where one may insert six AAA batteries.
This is very advantageous, as one may choose to use alkaline
batteries, or some of the newer NiMH batteries that have much
higher capacity.

It includes the battery case, stubby rubber duck, belt clip, and paper
work for $60.

Alinco DJ-191, 2 meter HT

This unit has about everything except the kitchen sink in it. It
has a very large, readable LCD display that I can read without
my glasses! It has about 7 watts max output, and the receiver
is great. It covers from 136 to 174 MHz, so that means it covers
all of the weather and VHF public service frequencies, in
addition to the ham band.
Of course it has memories and all sorts of scan features.
Touchtones (DTMF) and PL (subaudible) tones are included.

This unit works 100% and looks extremely nice. It includes
a good battery pack, belt clip, rubber duck, and paper work
for $99.

"CW using your HT"

This unit was made by a now silent key, following an article
in July 1997 QST and May 1997 World Radio. The idea is
to be able to send CW using your HT, so that code practice
over a repeater is possible, assuming you can hit the repeater
with your HT.

Powered by a 9 volt battery, it has a tone generator that can
be keyed, with the proper interface to go to the mic input on
your HT. All sorts of interfacing is provided, including deviation
and volume controls, transmitter keying, etc.

This unit is in a nice minibox, approximately 4.5 x 3.5 x 1.5 inches.
Most importantly, COMPLETE documentation is included,
showing his own layout, as well as both original articles. $15

120 Volt AC Line "Polarity checker" For Sale:

This device is designed so that one can check the 3 prong 120
V AC outlets, to see that they are wired correctly. It has bulbs
that light and indicate all is OK, or if there is a fault. If a fault
exists, the exact fault can be determined from the lights.

This unit was built by a silent key in a 4 x 2 x 2 inch minibox, with
a heavy 15 amp plug to plug into the 120 V AC outlet. Instructions
and light codes are on the outside of the box, with schematic and
the article it was built from on the inside. $10

Gonset ORIGINAL manual
Gonset Noise Clipper Model C
Actually, this is only two sheets of paper, but it is the manual
for the noise clipper.
This one has a couple marks in one corner, plus the paper has
yellowed somewhat. $4

W7FG Manual reprint

These are W7FG reprints of the original manuals. As you likely
know, W7FG reprints are extremely good quality.

Hallicrafters S-20 R Receiver
Included is the W7FG reprint, in a binder, along with two
modifications that this silent key performed on his S-20 R.
One mod is for a BFO, and the second is for an S meter.
Other notes are included in the binder. $14

Ironworks "Connect Quick" CQ-1 Antenna Mount

Connect Quick Antenna Mount is a mounting plate system
that provides a rapid and secure means of attaching items
such as antenna booms to masts, solar panels to posts,
sound and lighting installations, and other similarly mounted
devices. Installation and removal are accomplished in a snap!

It is designed primarily for use in emergency communications /
portable antenna systems. More details can be found at
http://www.connectquick.net/
The unit appears to be heavy aluminum and stainless steel.

This one is new, still sealed in the original packing. They are
$35 from the web site. This one is only $25.

Centronics Switch

This switch, made by Centronics, is made to switch up
to four separate devices to a single common line. The
front panel has a single rotary switch labeled "A B C D".
The rear panel has five Centronics connectors like are
on parallel port printers.

This particular unit works fine and looks very, very nice.
It is in a very heavy duty metal enclosure, with no scratches
or defects. $10

LARGE Analog Meters

Weston Model 741 DC ammeter
50 ua movement with scales of 2.5, 5, and 10
This is a large, square, approx 4 inch meter. $15

General Electric Edgewise DC ammeter
0-100 ma scale - Edgewise meter with scale 5+ inches
long and 1.7 inches high. White scale, w/ silver/gray mounting
This is a very nice meter that can be read across the room. $30

LabVolt AC ammeter
0-1 amp scale, 4 inch square meter, New, unused $18

LabVolt DC ammeter
0-1 amp scale, 4 inch square meter, New, unused $18

DC voltmeter has 3 scales on it - 5, 10, and 25 volts.
It says it is a Niehoff Voltmeter, Chicago, Model T-2.
It looks like 1930s vintage, and is in very nice shape. $28

General Electric Elapsed Time Meter

This elapsed time meter will measure the total time that
a piece of equipment has been turned on. It is designed
for 115 V AC, 60 hertz. It is ideal for equipment such as
a linear amplifier, or any other equipment where the time
that it has been used is important.

This particular meter reads in minutes (instead of hours).
It reads 000000.0 minutes, and has provisions for resetting
the time. It is a square meter, about 2 3/4 inches on a side.
Of course it works fine. $20

Meter movement from Heath RF Power Meter

This is a 200 ua meter movement, with a white scale from 0 to
10 on it. It is about 2 5/8 inches wide and 2 1/2 inches high. It
says "Ideal Precision Meter Co, Made in USA" on the back. My
memory says it is from an Heath SWR Bridge.

This one works fine and looks great also. $14

Battery charge adapter for Azden PCS-300 HT For Sale:
This is an adapter that permits one to charge the battery of the
Azden PCS-300, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
If you have a PCS-300 HT, you need this adapter.
It works fine, and looks like new. $3

Santec items

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Belt Clips for various HTs
$8 each
Motorola, with hardware
Kenwood TR-2400, with hardware
Yaesu FT-209, with hardware

Wrist Straps for various HTs
$4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

HT audio connector cable

Do you need a cable to connect audio from a sound card
to your HT? Or maybe connect some other digital "gadget"
to your HT? Or maybe just a switch box.

I have a cable that will connect to many HTs. It has a 3.5 mm
and a 2.5 mm connector, molded so that the two are separated
about 1/2 inch apart.

The cable is about 3 feet long, and is in good shape. $12

Kantronics Cable

This cable is made to plug in to the 9 pin DB-9 connector that
is on the back of many of Kantronics TNCs and other digital
units (KAM, KPC-3, and others), and is made to interface it to
the radio. It is often used for APRS, and other interfacing.

The cable has a DB-9 connector on one end. The other end has
the connectors for two radios, and is labeled "1" and "2", with "1"
having a red 3.5 mm plug, a white 3.5 mm plug, and a black 2.5
mm plug. The "2" is as the same as "1" except it does not have
the white 3.5 mm plug. It is $18.

Accessory items for Kenwood TR-2400 HTs

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and maybe others. This one
looks fine and works fine. $16

Belt clip for TR-2400 HT
In great condition, complete with hardware $8

Original Operators manual for Kenwood TR-2400 $15

Battery charge cable for Kenwood TR-2400 HT
To charge battery outside of HT; uses original
charger. It is in good shape, and works fine. $3

Wrist strap - I think it fits most Kenwood (and likely
other) HTs - $4

Antenna adapter to fit the BNC connector on the HT and
provide an SO-239 connector that will permit a PL-259 to
be attached. This can be used with any HT that has a BNC
connector. $5

"Dead" Icom Battery Pack

Icom BP-3 battery pack

I found a BP-3 battery pack that is dead.
This pack is used on the IC-2 AT, 3 AT, 4 AT,
02 AT, 03 AT, 04 AT, and some others. It will also
fit some of the Radio Shack / Realistic HTs such as
the HTX-202 and HTX-404.

This one is dead, but if you need a battery shell, to
put a new "insert" in to, or for some project, it would
be ideal. Adding one of the newer high capacity inserts
will give you a very inexpensive new battery, or build a
regulator in for use from 12 V DC. $8

Nye Viking "Master Key" Model 330-001 CW Straight Key

From their web page:
The perfect straight key. Complete with cord and plug --
ready to use! Isolated contact assembly separates keying
circuit from hardware. Includes gold-plated copper contacts,
adjustable key arm, Navy knob and heavy die-cast base.

This is a top of the line straight key. These are about $85 new.
This one works like new, and looks like new.
It is only $55.

Headphones

These are all communications headphones with appropriate
frequency response. They are not stereo "Hi Fi" headphones.

Generic headphones
Similar to the Kenwood HS-5, but with plastic ear pads.
"Made in USA" stamped on them. With 1/4 inch mono plug,
and about 5 foot cord. Nice shape. $25.

Single headphone
Keep one ear clear, so you can hear what is going on
in the room! With 1/8 inch mono plug; 32 ohm impedance.
Good condition. $20

Generic headset
Smaller ear pieces than those above. These are just over
an inch in diameter, so they do not completely cover your ear.
With 1/4 inch mono plug; 16 ohm impedance.
Good condition. $18

Kenwood PC-1 phone patch / interface

Although this is a Kenwood phone patch, it can be used
with most any rig. It has separate receive and transmit
gain controls for setting the level to the phone line.
This is the model with the 4 pin microphone connectors,
but they can be changed, if needed. It includes a nice
meter for adjusting the null so VOX will work OK.

Although this was designed as a phone patch, it can also
be used as a digital interface to a sound card.

This particular unit works fine, and looks very, very good.
No scratches. With paperwork for $40.

TenTec 306 power adapter For Sale:

The 555 Scout, 535 Argonaut, 536 Delta, 550 Pegasus,
556 Argo, and several other TenTec rigs take a 2 pin
power connector. Most of the TenTec power supplies
have a 4 pin plug with larger conductors. This adapter
adapts the 4 pin power connector on the power supply,
so it can be used on a radio requiring the 2 pin power
plug.
Like new, with paper work (all half page of it!). $12

Kantronics "Interface II" Terminal Unit For Sale:

This unit is made to copy RTTY signals, and feed the output
to a computer. To quote the brochure that is included with it,
it is "designed by the Kantronics team to give the discerning
operator excellent performance."

It features 170, 425, and 850 shift on both transmit and receive.
An AFSK generator is built in, or FSK can be used. It has two
separate channels for use with 2 rigs. For optimum reception,
a six pole filter is changed as the shift is changed. It requires
12 V DC at about 200 ma to operate.

-
These were originally about $270. You can get this one with
the paper work for only $30

Kenwood Microphone and Antenna Adapters

Kenwood MJ-48 microphone connector adapter
Converts a round 4 pin Kenwood connector on the microphone,
so it can be plugged into a Kenwood rig with the round 8 pin
connector. $20

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood connector on the microphone,
so it can be plugged into a Kenwood rig with the round 8 pin
connector. $20

Antenna adapter to fit the BNC connector on an HT and
provide an SO-239 connector that will permit a regular
PL-259 to be attached. This can be used on any HT (not
just Kenwood) that has a BNC connector on it. $5

Antenna adapter to fit the antenna connector on the Kenwood
TH-21/31/41 series of HTs and provide an SO-239 connector
that will permit a regular PL-259 to be attached. $5
-

Coax Connectors and Adapters
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF Right angle connector - male to female
Takes PL-259 on one side and an SO-239 on the other $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Very heavy duty chokes, as used to filter ripple in high current
power supplies.
These chokes (inductors) weigh about 8 pounds each, and
are designed to be used in low voltage applications. They were both
removed from power supplies, and are in close to new condition.

One is from a 20 amp power supply. $13.

Another is from a 30 amp power supply. $15.

Prices do not include shipping from Florida.

Thanks.

4900. RE: For Sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-08-24 22:34:15 UTC
From: Chris Boone
Topic: 764 Message: 4900

Still have LOTS of below for sale....One person said they take all not spoken for but shipping via freight was going to be over $700! So I guess they decided not to get them. All remaining NEEDS to go or else they go to the junk yard (and for those who I have chatted with about shipping or delivering 5-10 in the Houston area, don't worry, you guys are on the list..just haven't scheduled a trip that way but likely be there NEXT week or the weekend of Labor Day...so if you contacted me before, I haven't forgotten about you...and you know who you are :)

Yes, they can be moded for narrowband under Part 90 afaik...so time to get 'em while you can!

Chris
(WB5ITT)
LMR@yahoogroups list owner

-----Original Message-----

Just received a BIG box full of 100w and 50watt MICORs (50+ radios)...high band 151-153MHz...can go down to 2m or UP to 220MHz with mods....Also have 20 100w MITREKs; same freqs; not sure if they can go to 220) Complete with cables and heads and elements! $10 + shipping/handling to you.....Direct email me if interested...these need to move or they go to the scrap yard..YES, they were working when pulled 2-3 yrs ago and changed out to a UHF P25 system...

4901. Extensive list of ham publications FS

Ham Publications For Sale (Both Vintage and Modern):

I realize this is a long list; I have tried to group the books
as much as possible. All are in good condition or better.
Most are extremely nice, close to new condition.

ARRL Handbooks:

These are in the smaller format (6 1/2 by 9 1/2 inch size).
They include tube charts and ads for vintage equipment,
which are not in the newer handbooks.
1977 - 54th edition - Good condition $10
1978 - 55th edition - Extremely nice condition $12

More modern, larger 8 1/2 by 11 inch format:
1981 - 58th edition - Nice shape $13
1982 - 59th edition - Good condition $11
1985 - 62nd edition - Like new $17
2006 - 83rd edition - with CD, like new $35

Books about Operating an Amateur Radio Station:

RSGB "Amateur Radio Operating Manual"
1982 - 2nd edition $8
1991 - 3rd edition - like new $10

ARRL "Radio Amateurs Operating Manual"
1985 - 2nd edition $8
2000 - 7th edition - Inch thick with "Ham Desktop
.....Reference" included - Like New - $18

ARRL "Operating an Amateur Radio Station"
1976 - 57th edition $3
1983 - 61st edition $3
1984 - 62nd edition $3

ARRL "Public Service Communications Manual"
1985 - 9th edition - $3
No date listed, but appears to be about 1990-1992 $3

ARRL "Specialized Communications Techniques
for the Radio Amateur" - 1975 - First Edition $7

ARRL "FM and Repeaters for the Radio Amateur"
By W1XZ - Second edition - $5

FCC Interference Handbook
Published by the FCC - 1986 edition - $3

ARRL Amateur Radio Field Resources Directory
1986-87 - First Edition - About an inch thick - $5

Ham Price Guide - 2nd Edition
Lists prices of used ham gear - $5

Radio Amateur's World Atlas
Published in Germany - $8

ARRL US Call Area Map
Large, colorful map, Like new. $5

National Geographic World Map
As seen from the satellites - $1

ARRL DXCC Countries List
Sept 1997 - marks in it - $2

FCC Interference Handbook
Published by the FCC - 1986 edition - $3

ARRL "FCC Rulebook"
Eighth Edition - 1989 - $4
As above, but "Newly Revised to include Codeless
.....Technician" - 1989, updated to 1991 - Like New - $6

W5YI "Rules and Regulations - Part 97 Amateur Radio Service"
1993 - Fourth Edition - $3
2002 - 17th Revised Edition - $4

Tab Books: "Oscar: The Ham Radio Satellites"
by Dave Ingram, K4TWJ - 1979 - First Edition
Hardback - Like new - $15

ARRL "Weather Satellite Handbook"
1990 - 4th edition - like new - $10

The following books are often used as text books at the two
year community college level.

Electric Circuits Fundamentals and Electronics Fundamentals
Floyd - 3rd edition - Over 1000 pages, plus another 200 +
pages of answers to problems. This is often used as a text
book at Community and Technical Colleges.
Like new. $25

Digital Electronics by Uffenbeck
Large book with just under 700 pages. It includes answers
to the problems. Like new. $25

Computers by Long and Long
Large book with about 750 pages. Answers to problems
included. Like new. $25

Assembling and Repairing Personal Computers by Beeson
About 400 pages of extensive, thorough information. Like
new. $20

A Guide to Managing and Maintaining Your PC by Andrews
Sometimes used for A+ computer certification. About 750
pages, plus CD. Like new. $20

Computer Repair Toolkit by Bigelow
Over 400 pages of information and diagnostic programs.
Like new, with CD. $20

ARRL Ham Radio License Manual - Technician Level
This is the book you need to get your first license, or to
get someone started in ham radio. It is used by most
of the Tech licensing classes.
To the best of my knowledge, this is current material.
Like new for $18

General Class License Manual by Gordon West, WB6NOA
Second Edition - Like New - $3
Fifth Edition - Like new - $5

Upgrade to General Class by Don Stoner, W6TNS
1992 - $4

Advanced Class License Manual by Gordon West, WB6NOA
"New Edition" - Second Edition - 1995 - $4

Extra Class Test Guide - The Final Exam, by Disk Bash, KL7IHP
This is the book that started it all, with the first publication
of the actual exam questions.
Second Edition - 1990 - well used - $6

Ameco "Mastering the Morse Code" by Martin Schwartz
First Edition - 1957 - $8

Ameco "Novice License Radio Amateur FCC Test Manual"
By Martin Schwartz - 1984 - like new - $4

Ameco "Amateur Radio Novice Class Theory Course"
By Martin Schwartz. Far more in depth than the test manual.
First Edition - 1978 - $5

Ameco "Complete Technician Radio Amateur FCC Test Manual"
By Martin Schwartz - 1992 - $3

Ameco "General Class Radio Amateur FCC Test Manual"
By Martin Schwartz - 1984 - Like new - $4
As above, but includes 1988 questions and answers - $4

Ameco "Advanced Class Radio Amateur License Guide"
By Martin Schwartz - First Edition - 1981 - like new - $5

Ameco "Advanced Class Radio Amateur FCC Test Manual"
By Martin Schwartz - Copyright 1987, with added 1991 material
First Edition - Like New - $6

Vintage ARRL Licensing material:

ARRL License Manuals - $3 each
1977 - 76th edition - All classes
1979 - 77th edition - All classes
1984 - 79th edition - All classes
1984 - 80th edition - All classes
Technician Class - 1989 - First edition
General Class - 1989 - First edition
.....1997 - Second Edition
Advanced Class - 1985 - First edition
.....1990 - Third Edition
Extra Class - 1988 - Third edition

Tune in the World with Amateur Radio
1976 - First Edition - $3

Now You're Talking
1993 - 2nd edition - $10

Radio Shack from 5 watts to 1000 watts
1974 - Spiral bound - $4

Sam, Tab Publishing, and Hayden Vintage Licensing material:

General Class Amateur License Study Guide
By Phil Anderson, W0XI; published by Sams
First Edition - 1979 - $3

Amateur Radio General Class License Study Guide
By Jim Kyle and Ken Sessions; Tab Publishing
1975 - 2nd edition - $3

Amateur Radio Advanced Class License Study Guide
By Jim Kyle and Ken Sessions; Tab Publishing
1975 - 2nd edition - $3

Hayden "Radio Operator's License Q & A Manual" by Kaufman
For commercial tests - Eighth Edition - 1976
About 1 1/2 inches thick - $5

Sams Photofact "Master Index"
Lists what is in the various Sam's Photofacts as of
Aug 1960 - Good condition - $8

By Radio Shack - 3rd edition - 1989 - $3

Repeater Directories - $3 each
1982-83
1983-84
1987-88
1989-90
2000-01

US Repeater MapBook
Includes Repeater Directory, with maps showing their location
For US, Canada, and Mexico - Sixth Edition - $5

Hallicrafters manual for sale:
Hallicrafters S-20 R Receiver Manual
Included is the W7FG reprint, in a binder, along with two
modifications that this silent key performed on his S-20 R.
One mod is for a BFO, and the second is for an S meter.
Other notes are included in the binder.
This is a W7FG reprint of the original manual. As you likely
know, W7FG reprints are extremely good quality. $14

Gonset ORIGINAL manuals

Gonset Noise Clipper Model C
Actually, this is only two sheets of paper, but it is the manual
for the noise clipper.
This one has a couple marks in one corner, plus the paper has
yellowed somewhat. $4

ORIGINAL Operating Manuals for Kenwood Rigs:

All manuals are original, in very nice condition, for
Kenwood radios. They are originals and not copies.
All are operating manuals, and not service manuals.

Operating manual for TH-21 A / AT HT for 2 meters $8

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E
HTs for 440 MHz, 220 MHz and 2 meters $10

Operating manual for TM-221/421 2 m mobile $15

Operating manual for TM-231 / 331 / 431 / 531 mobile FM
transceivers for 2 meters, 220 MHz, 440 MHz, and 1200 MHz. $12

Operating manual for TR-2200, 2 meter "portable"
This is very similar to the Drake TR-22. $15

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $14

Operating manual for TR-2600, 2 meter HT $12

Operating manual for TW-4000 dual bander $15

ORIGINAL Heath manuals. These are the manuals
only. They are all originals, and not copies, and all
are close to new condition.

Heath CO-1 Code Practice Oscillator
1959, Extremely nice, with NO check marks
Pictorials included $6

GD-600 Photoelectric Light Switch
Schematic is part of book $5

HD-1234 Coax Switch
1973, Four Position Coax Switch
Like new, no check marks $7

HD-1426 Relative Field Strength Meter
1977, Excellent $6

HN-31A "Cantenna" Dummy Load
1982 for the "A" model, no check marks $7

HW-2021 Assembly manual - 1975
2 meter hand held transceiver
No check marks $9

IM-5284 Multimeter
Large schematic only $3

Heath "Kit Builders Guide"
included with many Heath kits. $3

These are original manuals only.

The following Texas Instrument Data Books are available.
All are in very nice, close to new, condition, with very little use.

Analog Applications Journal - $2 each
August 1999
Nov 1999
Feb 2000
May 2000
August 2000
Nov 2000

AHC/AHCT Designer's Guide - June 1999 $2

Mixed-Signal and Analog Products Designer's Guide
And Reference w/CD - January 1999 $4

Analog and Mixed Signal Products Designer's Guide
And Reference - August 1999 $3

Analog/Mixed-Signal Products Designer's Guide
With CD - February 2000 $5

Logic Selection Guide - August 1998 $4

BiCMOS Bus Logic Interface - 1988 $2

Boundary-Scan Logic IEE Std 1149.1 (JTAG)
5V and 3.3 V Bus interface and scan support Products
1994 $2

LVDS Application and Data Handbook - 2003 $2

The Voltage Regulator Handbook - 1977 $5

Prices do not include shipping from Florida.
Shipping via "Media Mail" is relatively inexpensive.

Thanks.

2920VAC PLATE/Power TRANSFORMER -
Very rugged and unused, still brand new,
beautifully constructed...(Love the carrying handle)
Primaries 200/220/240V AC
Secondary: 1460-0-1460V = 2920V CT at 1/4 Amp continuous
or probably almost 1/2 amp intermittant service
Best reasonable offer within a couple of weeks gets it.
Shipping 23 pounds in flat rate box priority mail
anywhere in the USA for $10

See photo here: http://www.myheathkits.com/user/3kv-transformer.jpg

email: vlincoln@...

4903. Wanted: Kenwood TS-440 440S 440SAT X44-1680-00 RF Board Any Condition

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-08-31 13:27:09 UTC
From: Robert Tuck
Topic: 4903 Message: 4903

I need a working / repairable X44-1680-00 board for the TS-440s. The radio that I have belonged to my late brother and is missing that board. It had the classic "dots display" problem and he let someone work on it. Thanks.

4904. HAM radio tower and broadcast antenna for SALE

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-09-02 23:15:07 UTC
From: dan_chian
Topic: 4904 Message: 4904

36 feet tall Tower. Breaks down into 6 foot sections. Triangular base/structure with hinge for tilting. there's a ladder on one side for access all the way to the top. there's a HAM Radio Broadcast Antenna on the top of the tower, probably about 20 feet wide.

Willing to let it go for $400, you have to disassemble it yourself and haul away.

Prefer someone takes both the Broadcast Antenna and Tower. I have a bunch of Coax cable as well i'll just toss in.

in Los Altos, CA

I need to clean out the shack. The tuner is almost new and I will provide the interface cable for the ICOM 706 that was sold as an optional extra. Unit has high marks on eham. My price $140 plus flat rate shipping to conus. If you are in NYC, no shipping and I will meet you with it for delivery. adastra_2001@...
Act fast and I will throw in the RBA-4:1, 4:1 balun free.
AB2ZJ Thanks!

4907. Kenwood 2-meter TM-201B FM transciever

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-09-04 03:22:25 UTC
From: Dennis
Topic: 4907 Message: 4907

It is in good shape and built like a brick. Audio is outstanding. I have use this rig for simplex and repeaters that do not take tone. This rig does not contain the tone option. This would make a great packet or APRS rig. This rig has no internal speaker but comes with an external speaker. This is really a nice rig and also comes with the original manual. I am asking $68.00 + $12:00 shipping and insurance. Thanks
Dennis - K5QFI
PS - Will e-mail a picture if requested.

4908. Kenwood TR-9000 2M All Mode Transciever

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-09-05 16:02:21 UTC
From: Dennis
Topic: 4908 Message: 4908

I am selling my Kenwood TR-9000 all mode 2M transciever (manual available on the internet or will send a CD). Rig works on FM, CW and SSB. I have used the rig on SSB and on FM and have good audio reports. The rig does not have a tone board. I had to take the mike apart once to adjust the switch position. Everything is working on this rig as far as I know. Rig is sold as is, but will not arrive DOA. I hate to get rid of this little rig, but my shack is getting cluttered. E-mail or call me if you have questions. Asking $110.00 + $15.00 shipping and insurance.
Thanks
Dennis - K5QFI

4909. Two Meter transceivers, plus many VHF accessories FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-09-06 14:04:40 UTC
From: Ken Simpson, W8EK
Topic: 4909 Message: 4909

Several 2 meter transceivers, plus many VHF accessories For Sale:

Kenwood TS-711, multimode 2 meter transceiver

This unit is an FM, SSB, and CW transceiver for 2 meters.
It has 40 memory channels, and up to 25 Watts of output power,
which is continuously variable (no Hi or Low switch, but a front
panel control to continuously vary power). Of course it will scan,
and do the things one expects in a 2 meter rig. It has a GASFET
in the front end for one of the best receivers I have ever used.
The 120 V AC power supply as well as 13 V DC, is built in. The
case looks very similar to a TS-440 or TS-450 HF rig.

This particular unit is very nice. There are a few very light
scratches,
but none on the front panel. It does have one very, very minor
problem. The MHz down button does not work. This is not a real
problem, as one can use the MHz up button a couple times, and get
to the same place. It is so minor, that I didn't feel that it was worth
bothering about. With paper work, including original multicolor
sales brochure, for $425.

Two meter FM Transceiver:

KDK FM-2033 mobile FM transceiver for 2 meters

This rig produces just over 25 Watts in high power and
about 7 watts in low power. The rig is fully synthesized,
has memories, scan, subaudible PL tone, and all the
things that one expects in a 2 meter rig. It has a touchtone
microphone with it. It sounds great, and hears well.
It needs 13 V DC at about 7 amps.

This particular rig is in very nice condition. There is one
paint spot missing, about the size of a pin head. It includes
the touchtone microphone, mobile mounting bracket, power
cord, and paper work. The original box is also included,
although the box looks much worse than the radio. Even
the mic clip, and a bag of screws are included, as is the
original multicolored sales brochure. $90

Other accessory items for sale:

Heavy duty power supply
Pyramid PS-35
This supply is good for 32 Amps Constant or 35 Amps Surge.
The output voltage is adjustable over a 12 to 15 volt range

with a multi turn pot. It has crowbar over voltage protection, short circuit & thermal protection and features a pair of nice large edgewise meters to measure output voltage and output current. There is an internal fan. This is a very healthy, heavy duty supply!
This particular unit works 100% and looks very close to new.
$125

Larsen VHF and UHF Mobile Antennas:

These antennas are used, but are in very good condition.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on the 70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $7

Larsen Q
Fits a 5/16 inch stud, such as the Larsen LM mount, and others.
It can be cut for 2 meters, 220 MHz, or 450 MHz bands. $6

Larsen NMO-Q
Precut for 450 MHz. New, still in bag. $8

Larsen OM-450 coil, mount, and whip for 440 MHz
Made to mount on a flat surface
Includes "stacked" whip for 5 db gain on 450 MHz. $18

Avanti / Antenna Specialists "On Glass" antennas:

These antennas were made by Avanti, and then later by Antenna Specialists, to mount on a windshield, or other glass. They do not require a ground plane, as they are 1/2 wave antennas, rated to have 3 db gain. They are ideal for places where a ground plane is not available, such as a boat or motor home, in addition to cars. A special tuning box is included to match to your particular situation.

Antenna for 2 meters
This one is in extremely nice condition, with a new packet of the special mounting glue that is furnished by Antenna Specialists. $28

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Rubber Duck and telescoping antennas for your HT.
All are for 2 meters, have been used, but are in good condition,
and are $10 each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others - $10 each
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long - $10

PL-259 connector - 6.5 inches long - $10
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long - $10
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Aftermarket stubby, 3.5 inches long - $10
Kenwood RA-6 regular, 6.6 inches long - $12

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HTs and maybe others. $18

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Belt Clips for various HTs
$8 each
Motorola, with hardware
Kenwood TR-2400, with hardware
Yaesu FT-209, with hardware

Wrist Straps for various HTs
$4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Kantronics Cable
This cable is made to plug in to the 9 pin DB-9 connector
that is on the back of many of Kantronics TNCs and other digital
units (KAM, KPC-3, and others), and is made to interface it to
the radio.
It has a DB-9 connector on one end, and is in extremely good condition.
The connectors are labeled "1" and "2", with "1" having a red 3.5
mm plug, a white 3.5 mm plug, and a black 2.5 mm plug. The "2"
is the same as "1" except it does not have the white 3.5 mm plug.
It is $20

"Dead" Icom Battery Pack:
Icom BP-3 battery pack
I found a BP-3 battery pack that is dead. This pack is used on
the IC-2 AT, 3 AT, 4 AT, 02 AT, 03 AT, 04 AT, and some others.
It will also fit some of the Radio Shack / Realistic HTs such as
the HTX-202 and HTX-404.
This one is dead, but if you need a battery shell, to put a new
"insert" in to, or for some project, it would be ideal. Adding one
of the newer high capacity inserts will give you a very inexpensive
new battery, or build a regulator in for use from 12 V DC. $8

BNC to PL-259 antenna adapter
For use with any HT that has a BNC connector. It will
convert the BNC connector on the HT, so that you can use
a normal antenna with a PL-259 connector. Like new. $5

Antenna adapter for Kenwood TH-21 / 31 / 41 HTs
This adapts the antenna connector found on these HTs to a
standard BNC connector. $4

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Original Kenwood Operating Manuals For Sale:

All are original operating manuals in very nice, close to new condition, for Kenwood radios, unless stated otherwise.

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E HTs for 440 MHz, 220 MHz and 2 meters $10

Operating manual for TH-225, 2 meter HT - Good condition $12

Operating manual for TM-221/421 2 m mobile $15

Operating manual for TR-2200, 2 meter "portable" This is very similar to the Drake TR-22. $15

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $14

Operating manual for TR-2600, 2 meter HT $12

Service manual for Kenwood TR-2600 HT - $10

Operating manual for TW-4000 dual bander $15

Service manual for TW-4000 dual bander $20

Prices do not include shipping from Florida.

Thanks.

4913. Icom IC-746 Pro For Sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-09-12 23:38:32 UTC
From: kc8ddq@aol.com
Topic: 4913 Message: 4913

Hey everyone,

I've decided to keep my PS-125 power supply so I'm re-advertising my 746 Pro. Comes with hand microphone, downloaded copy of service and owners manual in PDF format, power cable, hard copy of owners manual and schematics, and original box. As stated before, this radio was sent to me by Burghardts as a replacement for one that was lost by UPS. Verified serial number through Icom and was told that this was indeed a factory replacement. They also told me that it has all the current factory modifications and updates. $1100 plus shipping and insurance if requested. Was originally going to use the cash from this sale to go towards a 756 Pro 3 but have some other obligations that have come up for now. Pics and my phone number can be sent on request.

Thanks
Paul

4915. Large variety of Kenwood accessories, plus TH-215 HT FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-09-13 13:37:02 UTC
From: Ken Simpson, W8EK
Topic: 4915 Message: 4915

Large variety of accessories for Kenwood Radios plus TH-215 HT For Sale:

Kenwood TH-215, 2 meter HT
Covers the 2 meter band with up to 7 W output power. Of course it has memories, scan features, and the things one expects in an HT. Subaudible
(PL, CTCSS) tones are built in and can be adjusted from the keypad. A 16
digit touchtone (DTMF) pad is built in. It can be powered by the PG-3 E

cord from 13 V DC to provide full 7 watt output.
This one is in very nice condition. It includes a good PB-2 standard battery,
rubber duck antenna, and paper work for $75.

SMC-30 Speaker Microphone
Fits TH-21, TH-41, TH-215, TH-225, TH-415, TR-2600, and many other Kenwood HTs. It has 3.5 mm and 2.5 mm plugs molded together.
It works fine, and is in good condition. $25

BC-7 Desk Charger
This unit will fast charge PB-1, PB-2, PB-3, PB-4, and maybe other Kenwood battery packs. It works fine and is in good shape. $50

PB-1 Battery Pack
12 V at 800 mahr. Fits TH-215, TH-225, TH-415, and others.
This is an optional high power, high capacity battery pack. It looks great, and holds a charge fine. With paper work for $25

PB-2 Battery Pack
8.4 V, 500 mahr. Fits the TH-215, TH-225, TH-415, and others.
This is the standard pack like comes with the HT. This one looks fine and holds a charge well. It is in its original box, with paper work for $20

PG-3 E Cord
This cord plugs into the cigarette lighter to provide 12 V DC to the TH-215, TH-225, TH-415, and other Kenwood HTs. It has a filter built in,

and permits high power operation of the HTs. $20

SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and PB-4 battery packs. It can also be used with the smaller PB-2 and PB-3 battery
packs, by putting a filler in the case. Black color. In very nice condition. $15

Bianchi Real Leather Case for TH-215, TH-225, etc.
For use with the larger PB-1 and PB-4 batteries, but can be used with
the
smaller PB-2 and PB-3 batteries. This is real leather, tan in color, and
is
in very nice condition. $25

Belt Clips for various HTs -- All include the hardware with the belt
clip
$8 each
Kenwood BH-2 for TH-215, TH-225, TR-2500, TR-2600, and others
Kenwood TR-2400
Motorola
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can
be plugged into a Kenwood rig with the round 8 pin
connector. Like new. $20

Kenwood PC-1 phone patch
This is the model with the 4 pin connectors, although
they can be changed, if needed. It includes a nice meter
for adjusting the null so VOX will work OK.
This particular unit works fine, and looks very, very good.
No scratches. With paperwork for $ 40

Accessories specific to the Kenwood TR-2400 HT:

Belt clip for TR-2400 HT, complete with hardware - $8

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Wrist strap - I think it fits most Kenwood (and maybe other) HTs - $4

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Accessories for Kenwood TH-21 / TH-31 / TH-41 HTs:

Antenna adapter for Kenwood TH-21 / 31 / 41 HTs
This adapts the antenna connector found on these HTs to a
standard BNC connector. $5

Special rubber duck antenna for Kenwood TH-21 HT with
threaded connector
Aftermarket stubby, 3.5 inches long - $10
Kenwood RA-6 regular, 6.6 inches long - $12

Original Kenwood Manuals:

All manuals are in very nice, close to new
condition, for Kenwood radios, unless stated otherwise.

Operating manual for TW-4000 dual bander $15

Service manual for TW-4000 dual bander $20

Operating manual for TH-21 A / AT HT for 2 meters $ 8

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E
HTs for 440 MHz, 220 MHz and 2 meters $10

Operating manual for TH-225, 2 meter HT - Good condition $12

Operating manual for TM-221/421 mobile $15

Operating manual for TH-241 / 441 / 541 mobile FM transceivers
For 2 meters, 440 MHz, and 1200 MHz. $ 12

Operating manual for TR-2200, 2 meter "portable"
This is very similar to the Drake TR-22. $15

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $14

Operating manual for TR-2600, 2 meter HT $12

Service Manual for TR-2600, 2 meter HT $15

Prices do not include shipping from Florida.

Thanks.

4916. hello!

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-09-14 20:31:00 UTC
From: mark
Topic: 4916 Message: 4916

I am new here, and want to get in to ham radio. I have a functioning Hammarlund HQ-100 receiver, and want to pair it with the correct hammarlund reciever. I do not know where to find the transmitter, I believe to be either a tx-50 or hx-100. Can anyone assist?
thank you.
mark

4917. FT-990 DC

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-09-15 23:13:40 UTC
From: Larry Godek
Topic: 4917 Message: 4917

I have an excellent Yaesu FT-990 to part with. I am the original owner having bought it from HRO back in 1988. I do not have the original purchase receipt. I have sent it back to Yaesu for updates at least 3 times since i bought it and have the paperwork to go with those activities. The original manual is included as well as the Mic and unused connectors that came with the radio and will be shipped in it's original box. It's clean as a brand new unit meaning it's not been abused, no scratches nor other marks that i know of. It's always been in a non-smoking environment as well. I use it daily on 20 and 30 meters CW because that's where i hang out.. It does have the built in antenna tuner. $850 insured and shipped with no return in the USA. Foreign shipping will probably cost more so the $850 figure won't necessarily apply there. I want to unpgrade to something with 6 meter capability so this must go first.

Date: 2008-09-18 18:37:14 UTC
From: John Miller
Topic: 4923 Message: 4923

I have an MFJ 941C antenna tuner. Has built in antenna switch, 2 coax positions, ladderline or random long wire hookup, and another position if you have an antenna you don't want to go through the tuner. Tuner works great, looks about a 9+. I just don't need it right now so hopefully it will go to someone who does. asking $60 plus shipping, reasonable offers considered, might consider trades.
Paypal and money order or the like only, I won't take personal checks.

4924. Trade?

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-09-22 13:05:45 UTC
From: geo
Topic: 4924 Message: 4924

Hi

I recently came into possession of a 3RP1 CRT and I'd like to trade it for parts?

Here's a bit about the 3RP1:

http://www.oddmix.com/tubes/3rp1.html

I'm building my own HF transmitter (under 100 watts) so things of interest to me would be the kind of capacitors, chokes & inductors one would find in the power amplifiers of 1950s/60s transmitters.

Thanks,
geo

4925. HAM Radio antenna and Tower for sale. 36' tall -- Los Altos, CA 94024

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-09-23 17:18:05 UTC
From: dan_chian
Topic: 4925 Message: 4925

36 feet tall Tower. Breaks down into 6 foot sections. Triangular base/structure with hinge for tilting. there's a ladder on one side for access all the way to the top. there's a HAM Radio Broadcast Antenna on the top of the tower, probably about 20 feet wide.

Just the Tower by itself is probably close to $1000 brand new. Willing to let it go for $400, you have to disassemble it yourself and haul away.

Prefer someone takes both the Broadcast Antenna and Tower. I have a bunch of Coax cable as well i'll just toss in.

650-386-8168 - Dan
email me for pictures.

4926. For sale MFJ 941C antenna tuner

Cleaning up the shack and digging through the piles I found some stuff
I can live without:

Astatic Silver Eagle like new cond. Comes with a 1/4" stereo plug
attached. asking $100 shipped.

Antenna Specialists heavy duty spring 3/8" threaded at each end. Well
used but in good physical condition. Came off a fire truck many years
ago and I never used it. This was the cadmium plated spring and weighs
about 2 pounds. Asking $12.00 shipped.

Radio Shack DSP 40 Noise Reduction System model 21-543 works great
with older transceivers or receivers with wide bandwidth or no
filtering to cut back on noise. Comes with the DC power wort. In
excellent condition.
Asking $30.00 shipped.

R.L Drake TV-1000-LP 1000 watt max power below 30 Mcs low pass filter.
A little ratty looking but works fine. 52 ohms in and out with so239
connectors. This is the early unit with the label stamped on the
copper chassis. Will cover up to 52 Mcs at reduced power. No manual.
Asking $15.00 shipped.

I can provide pics if desired.

4932. VHF Wattmeters and antenna tuner FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-09-28 12:38:35 UTC
From: Ken Simpson, W8EK
Topic: 4932 Message: 4932

VHF Wattmeters, and Antenna Tuner For Sale:

MFJ 921 antenna tuner for 2 meters and 220 MHz,
combined with a wattmeter and SWR bridge

This unit will match your 2 meter antenna so that most any
2 meter antenna will show a 1:1 SWR to the rig. Ditto for the
220 MHz band.

It is also a wattmeter with 30 Watt and 300 Watt scales,
although the tuner is only rated for 200 Watts. An SWR bridge
is also included. SO-239 connectors in and out.

This particular unit is in excellent condition. I can not find a
scratch on it, and of course it works fine.

With paper work for $50.

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.

Similar to the HM-102, but for VHF frequencies, with
250 and 25 watt scales. It can also be used to check
SWR, and has a remote sensor that can either be left
inside the meter, or separated from the actual meter
by about 3 feet. SO-239 connectors in and out. This
particular meter works great, looks fine and includes
paper work for $ 40.

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

4933. Elmira Hamfest Nearly Washed Out

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-09-28 13:26:06 UTC
From: k4bov
Topic: 4933 Message: 4933

Folks,

It absolutely poured during the Elmira, NY Hamfest this past Saturday. My truck was loaded to the gunnels with tubes and tube type transceivers and receivers (one solid state unit, a Swan MHF 650 hybrid Marine radio), I never even got the tailgate down.

I do not want to ship anything; so, if there are any of you in the vicinity or within driving range of Elmira that may be interested in any of this equipment: Swan, Drake, Hallicrafters, Galaxy, WRL stuff, National, Hammarlund, Hy-Gain antenna components, etc, drop me a line off list - let me know what you are looking for or whether a rough list of items would help.

Regards,

Stu/K4BOV

4938. FOR SALE YASEU FT-817ND with CW FILTER....LDG ZX-11 AUTOMATIC ANTENNA TUNER

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-10-02 22:54:44 UTC
From: lloydr1
Topic: 4938 Message: 4938

I have realized I have too much radio gear! I have for sale a Yaseu FT-817ND transceiver. I am the original owner of this radio. It has been 'lightly' used and has never been used outside of the shack. It comes with the original box, manual, microphone and accessories. The accessories have never been out of the box. The radio has a 500 Hz CW filter installed which really improves the CW operation of the rig. It also has the internal rechargable battery. This radio works GREAT and has correct power out and all functions work as advertised. If anything is wrong with this radio it is that the yellow letter 'F' on the Function pushbutton is slightly warn. (this button is used a lot on the Ft-817) I can send pictures if you want. $575.00 shipped to the lower 48 states. I usually ship via UPS and let the shipping store 'second box' the item. Not only does this insure the radio is packaged well but if something should happen during shippment there is no question it was packaged correctly.

I have a LDG Z-11 Automatic Antenna tuner which matches the '817.This is a low power tuner and operates from 1.8 to 30 Mhz. It will work with any radio putting out between 0.1 and 30 watts continuous (60 watts CW and SSB). It is in excellant condition and works well. $135 plus $12.50 shipping. (shipping via Priority mail on this item)

Also, I have the W4RT One Touch Tune tuning accessory that intefaces the Z-11 tuner to the FT-817 and allows the tuning process to be activated by pressing the 'Tune' button on the Z-11. This keys the '817 and tunes the antenna. It works really slick and tunes the antenna in just a couple of seconds. $30 plus $5.00 shipping (Priority mail)

I can send pictures of any of the above items. Drop me an Email.

Thanks for looking,

Regards,

Rick AA4W

Topic: 4939 Message: 4939

Fluke 92B - 60MHz, 2 Channel, 5GSa/s Scopemeter.

Handheld approximately 5" x 10" x 2" ☐ black / white display, (not
the black on yellow) w/ the rubberized holster. Screen is apx 4" x 4".

Battery pack is ok, runs about 1.5 hours or can use 4 standard C cells
(alkaline or ni-cad). Easy to charge the ni-cads in the case once you
see the charging set-up. Just need one small shim from the ni-cad to
the charging power tab.

Manuals and other info from Fluke's web site can be found here:
http://us.fluke.com/usen/support/manuals/default.htm?prodcategory=OBS
Or just Google it. ☐ FYI ☐ someone wants $40 for the manual (free from
the Fluke site) on e-bay???

50 + shipping (should be ~$10) via USPS

Mike ☐ N8OEP -

N8OEP@sbcglobal.net

4946. A3S Cushcraft Beam

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-10-08 00:43:55 UTC
From: kb9vtm
Topic: 4946 Message: 4946

Dear Group,

I have a A3S Cushcraft Beam that I'm wanting to get rid of. A few years ago, it stopped working on 15 and 10 meters. I've just taken it down off of the tower and I'm thinking that some of the traps are not working. I contacted Cushcraft to buy new traps, and this would cost me over $300 bucks. I would rather put this on a new beam.

I'm in the process of putting my house up for sale and moving to Atlanta. So I'm not wanting to mess with this. I'm trying to down size my situation.

The beam is in good shape. I've got more equipment than I really need for moving. I THINK the beam is around 5 to 7 years old. I don't remember when I bought it. There are no broken parts on the beam except a few rusted bolts on the u-bolts, which I have replaced. Everything is there. If anyone would like to have this beam, I'll give it to you. Except,you will have to pay the shipping on it. I will box it up, with the directions, and its all yours, that is, if you'll pay the shipping. If not, its going into the trash. I don't have the time to mess with it. You must understand that this beam can not be raised into the air without some kind of work being done to it. I live off of I-57, around the Salem, Illinois area. 250 miles South of Chicago. If someone wants to come a get this beam, it's yours. That will save me from having to box it up. I have not broken the beam down yet. I have it attached to the bottom of the tower.

Heath HG-10 VFO 80-2M

"Heathkit HG-10 VFO covers from 80 through 2 meters with each
band separately calibrated on a rotating drum-type slide-rule
dial. The circuit uses the popular series-tuned Clapp oscillator
with a cathode-follower output for isloation and regulated
plate voltage for maximum stability. Its vernier tuning has a
20 to 1 gear drive ... and there's a "spot" switch for off-the-air-tuning."

Matches DX-40 & DX-60 but with an outboard power supply will
work well with many other rigs.

Incl. short section of hard to find RG-62.
Pictures on request.

$65. Including shipping to standard USA addresses

Topic: 4950 Message: 4950

Erbtec 1KW Commercial Surplus Amp Board

Solid-state high power amplifier board, contains eight (8) Motorola MRF-150 high power MOSFET's all checked good by Rob, N8RT. Also includes many combiners. Back of pc board is an aluminum heat sink. 18lbs, 12"x13"x3".

MRF-150's sell for $79.95 each new http://www.rfparts.com/transistors_MRF-TP.html (that means this includes $639.60 worth of transistors alone).

Motorola MRF-150 Data Sheet http://www.ab4oj.com/dl/mrf150.pdf

May be used as a foundation for a solid-state amp like the Yaesu VL-1000 Quadra 160-10M (1KW) + 6M (500w) http://www.ab4oj.com/quadra/main.html

Check prices for smaller Erbtec amp boards on ebay - often posted by CTR Surplus. I have no other information about this board.
You might inquire of Erbtec Engineering http://www.erbtec.com
Or Carolina Medical Parts http://cmparts.com/rf_amplifiers.htm

Asking $300.00 Plus actual shipping to you.

Date: 2008-10-11 02:11:45 UTC
From: kd4e
Topic: 4951 Message: 4951

FS: DC-1GHZ Heat Sink

Tested by Michaela Mardit, WA2VQW, from whom I bought it. He tested from DC to 1 GHz (his test gear did not handle more than 1GHz). I have only used it from 1.8-440MHz.

Power Rating: 200w for 6 minutes, 100w for 12 minutes. (The testing protocol was how long it took for the case to reach a temperature of 130 degrees F, with key down, stated power applied.) Of course the power rating is higher with shorter operating periods and could be expanded by immersing the load in mineral oil and/or by attaching additional cooling sinks via the pre-tapped holes and adding a fan.

"N" Female connector. A grommet seals the access hole designed to host a sampling port for a 'scope, etc. 9.75 x 3.25 x 2.5"

Asking $45. including standard USA shipping.

FS: MFJ-902 Travel Tuner - Small & Versatile

This is one amazing little antenna tuner:
http://www.mfjenterprises.com/Product.php?productid=MFJ-902

Although it is rated 150W from 80-10M I have
successfully used it on 160M and 6M. Has a bypass
switch and two SO-239's for Ant & Xcvr connections.

Other than a few very minor dings it looks good
and works fine.

Asking $75. or reasonable offer including standard
USA shipping.

From: geo
Topic: 4956 Message: 4956

I'm looking to build myself a working 1920s/30s style transmitter and receiver for shortwave 'phone use. So for this purpose I'd like to find either bakelite or ceramic coil forms (something which can hold the wire in place in a groove as opposed to trying to hotglue wire onto some smooth PVC pipe).

I live in Ontario, Canada, so ideally I'd like to keep the shipping price tag as low as possible?

Also I wouldn't mind finding a few variometers as well (I'd prefer to use a variometer in the transmitter final tank as well as in the receiver).

Thanks.
geo

I have two Motorola Radius GM300 VHF mobiles (M33GMC29C2AA). My radios as used, but their condition is "as new". I will provide photos upon request.

These are 16-channel radios. No separation kits. Would like to trade even-up for two M43GMC radios.

In order to save bandwidth, please reply off-list to n9wys <(at)> ameritech <(dot)> net.

Thanks,

Mark - N9WYS / WQIV271

4961. backpack for IC-703 for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-10-16 15:07:25 UTC
From: John Miller
Topic: 4961 Message: 4961

Hi all, I have the backpack for the Icom IC-703 for sale, I was going to use it with the IC-706 but outgrew it before I even got to use it. It's been sitting in my closet since and now I'm cleaning it out. Asking $40 plus shipping or best offer for it. The IC-706 or IC-703 will fit in it just fine if you want to go backpacking, my go kit just grew way too fast and I never even used it. I'll take money order or paypal, please take it off my hands.

4963. Icom HT and other Icom items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-10-18 12:33:11 UTC
From: Ken Simpson, W8EK
Topic: 4963 Message: 4963

Icom items For Sale:

Icom IC-04 HT for 440 MHz
This is the 440 MHz version of the popular IC-02 AT. It has
about 7 watts out if used with the larger battery pack, or
powered from 12 V DC. About 5 Watts with the standard
battery pack, or about 1 watt in low power.

Of course it has memories, scan features, and the things
one normally expects in an HT. The keyboard functions as
a DTMF pad, and it has adjustable PL (subaudible) tones
in it as well.

This particular unit works 100% and looks very good.
There is some slight wear, but it is minor.

Rubber duck antenna, belt clip, and paper work are
included for $75.

Icom BC-35 desk charger
The BC-35 will fast charge the BP-2, BP-5, BP-7, and
BP-8 battery packs. It will also charge the BP-3 and BP-4,
but these take 12 to 15 hours. It works 100% and looks
fine as well. $35

Icom BP-7 battery pack
This pack can be used on the Icom IC-02 AT, IC-03 AT,
IC-04 AT, and other Icom HTs.
It can also be used on the Radio Shack HTX-202 and
HTX-404, and maybe others.
This is a 13 V DC at 450 mahr battery pack.
It holds a charge and looks fine. With paper work for $25.

"Dead" Icom Battery Pack:
Icom BP-3 battery pack
I found a BP-3 battery pack that is dead. This pack is used on
the IC-2 AT, 3 AT, 4 AT, 02 AT, 03 AT, 04 AT, and some others.
It will also fit some of the Radio Shack / Realistic HTs such as
the HTX-202 and HTX-404.
This one is dead, but if you need a battery shell, to put a new
"insert" in to, or for some project, it would be ideal. Adding one
of the newer high capacity inserts will give you a very inexpensive
new battery, or build a regulator in for use from 12 V DC. $8

Icom HM-8 touch tone DTMF Microphone
This mic has a touch tone pad on it, with a switch to turn the
pad on or off. There is also a preamp built in to the mic, so

that it can be used with the Icom 25A , 245, 290, 402, 202S,
451, 471A and maybe others. It has a round 8 pin connector
on it. Paper work is included for $45.

Icom HM-12 hand mic with up/down switches
This electret mic is used with most of the modern Icom rigs
that use a round 8 pin mic plug, including the Icom 25A, 28H,
38, 45A, 48, 77, 78, 120, 229H, 271, 275, 290, 375, 451,
471/A, 475, 505, 575, 707, 718, 725, 728, 729, 735, 736,
737/A, 745, 746, 751/A, 756/PRO, 761, 765, 775, 781, 820H,
821H, 900, 901, 970, 1201, 1271, 1275, 2400, 3200, 3210
and maybe others. It has an up and a down switch for changing
frequencies, changing memories, etc.
This one works 100% and looks like new. It has lived most of
its life in a drawer!
With paper work for $40.

Icom HM-56 A, DTMF touchtone microphone w/up-down switch
This electret mic has a 16 digit DTMF touchtone pad on it
along with other special buttons. It also has 14 memories
included in it for remembering phone numbers to dial. It works
with the Icom 28, 38, 228, 229, 449, 901, 1201, 2330, 2400,
2410, 2500 and others. This mic also has an up and a down
switch on it. Basically, it is like an HM-12, but with DTMF pad
and memories added. These are about $170 new, so that
gives some idea of its sophistication!
This one is still in its box, with paper work. I do not think it
has ever been used. $95

Prices do not include shipping from Florida.

Thanks.

4967. Many HF Accessory items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-10-25 12:19:42 UTC
From: Ken Simpson, W8EK
Topic: 4967 Message: 4967

Extensive list of HF and related accessories For Sale:

B & W Model 595 "Protax" Coax Switch
This is the switch that is in a rectangular box about 9
inches long, with seven SO-239 connectors coming out
of the back. It is B & W's top of the line "Protax" series,
which means that it grounds all unused antennas. It will
switch up to 6 antennas.
This one works 100% and looks really great -- close to
new condition.
With the paper work for $45.

Micronta 21-525B Field Strength and SWR Meter
Covers 3 to 30 MHz, to check your SWR or to use to
check your field strength.
This meter works fine and looks close to new, with no scratches.
It is in its original box, with the paper work for $25.

Ameco Model BIU, SWR Bridge
This is apparently an older unit that matches much of the boat
anchor gear, except this one looks very close to new. Of
course it works fine also.
The meter unit is in a very nice light gray / dark gray enclosure,
with a remote sense unit which has copper plating (still shiny).
There are provisions for using a second remote sensor and
switching between the two. This sensor is model SWB, and
says it is good to 225 Mc. Of course it is for 50 ohm systems,
and has an SO-239 on each end of the sensor. $50

Unadilla W2AU "ANsulator" For Sale:
The Unadilla W2AU ANsulator Antenna Center Insulator is
handy for building all sorts of dipoles, quads and yagi antennas.
It includes a built in lightning arrestor. Also included is a top
eye-bolt to support the antenna. There are strong eye bolts
and spade lugs on either side for the antenna wire. It has an
SO-239 connector, designed to accept a standard PL-259
for easy feedline connection.
This particular unit appears to have never been used, but since
it came from a silent key estate, I can not verify. It is in its
original
box, with paper work. Not a scratch on it. $12

Heavy duty power supply
Pyramid PS-35
This supply is good for 32 Amps Constant or 35 Amps Surge.
The output voltage is adjustable over a 12 to 15 volt range

with a multi turn pot. It has crowbar over voltage protection,
short circuit & thermal protection and features a pair of nice
large edgewise meters to measure output voltage and output
current. There is an internal fan. This is a very healthy, heavy
duty supply!
This particular unit works 100% and looks very close to new.
$125

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic
mic is needed. Stripped and tinned leads.
It works fine, and looks good also. $25

Heil "Traveler" Headset / Boom Microphone For Sale:
To quote the Heil Sound Web Site,
"The Heil Traveler is a unique, high-performance single-
sided headset that's ideal for portable and emergency
operation. Compatible with over 100 different radios,
the Traveler provides unmatched versatility for a wide
variety of Amateur Radio applications."
This is a combination of a headphone and a boom
microphone. Of course it is engineered to obtain
exceptional specs, as only Heil can do.
This particular unit has the Heil HC-5 mic element,
which is considered the "rag chew" high fidelity element.
The unit works fine and looks very close to new.
$65

Headphones:

These are all communications headphones with appropriate
frequency response. They are not stereo "Hi Fi" headphones.

Generic headphones
Similar to the Kenwood HS-5, with plastic ear pads.
"Made in USA" stamped on them. With 1/4 inch mono plug,
and about 5 foot cord. Nice shape. $23

Generic headset
Smaller ear pieces than those above. These are just over
an inch in diameter, so they do not completely cover your ear.
With 1/4 inch mono plug; 16 ohm impedance.
Good condition. $16

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood connector on the microphone,
so it can be plugged into a Kenwood rig with the round 8 pin

connector. $20

CW items:

Bencher BY-2 Paddle
This is the "All Chrome" Bencher, including the chrome
base. It is in nice shape, and of course has the nice
Bencher touch. $80

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8

Generic Code Key
This is a very generic code key. It is not fancy, but is adequate
to get the job done. It is mounted on a nice wood base that is
finished and looks very nice. $18

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5
As above, but 1/8 inch plug. $5

MFJ 422 B electronic keyer
This keyer includes sidetone, and has adjustments for
volume, tone frequency, and weighting, as well as speed.
It will key either positive or negative voltages, and is
powered by an internal 9 V battery, or external 5 to 9
volt supply.
It is made to go on the back of a Bencher Paddle.
It works 100%, and looks great also. With paper
work for $45.

TenTec Accessories

TenTec 285, 500 Hz filter
500 hz for CW
Fits Corsairs, Paragons, Omni V and VI, and others.
This one has its paperwork and looks like new. $70

TenTec 288, 1.8 KHz filter
1800 hz for narrow SSB or wide CW
Fits Corsairs, Paragons, Omni V and VI, and others.
This one has its paperwork and looks like new. $70

Scout 555 / Argo 556 Band Modules
Band modules for 40, 30, 20, 17, 15, and 10 meters.
Non-WARC band modules are $65 each.
WARC band modules (30 and 17 meters) are $70 each.

TenTec 296 mobile mount for 555 Scout
Nice clam shell type of mount in extremely good condition.

$50

Low Pass TVI Filters:

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation
in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work with it. $ 35

Nye Viking Low Pass Filter Model 020-001
This filter is rated at 2000 watts, with over 65 db of
attenuation above 57 MHz. These are about $60 new;
this one is close to new for only $35.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut
off frequency of 45 MHz and 75 db of attenuation.
It is rated to take 1000 Watts of AM, or 5000 Watts
PEP SSB. It has SO-239 connectors on each end.
$35.

B & W model 426 low pass filter
B & W TVI filter, cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each end.
This is an older model that seems much heavier duty. It weighs
almost twice as much as the newer model, and looks like it
would take more power. It likely was made in the days that
plate modulated AM was the rule. $30

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. $ 40.

Prices do not include shipping from Florida.

Thanks.

4968. FS- Leader LCD-100 DMM/Scope 200kHz $50+$10 shipping

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-10-29 23:43:26 UTC
From: Mike
Topic: 4968 Message: 4968

Leader LCD-100 DMM/Scope 200kHz

I've used this single channel scope mostly as a "bit" scope on
hardware interfaces.

It's about 5" x 9" x 1.5" - With a case (more of a lightly padded
carry bag and to keep the dust off), with a zippered compartment to hold:
1- direct BNC scope probe
1- set of DVM leads
1- 3.5MM external trigger input lead set.
All included

[ebay link removed by moderator. I know it was a reference only but I don't want to give
any business to ebay. Sorry]

No cardboard box or styrofoam insert or AC Adapter. A standard 6 VDC
wall wart adapter worked fine. If you need one let me know.

It will need some repair. The battery pack (4 standard AA NiCads in a
flat pack configuration) is bad (cell shorted?). I pulse charged the
pack just to verify that the scope DMM is operational. The input fuse
(500 mA - 20mm - soldered in) is open on charger board. There is
another small NiCad battery apx 1/2" diam and 1/2" long (memory?) on
the charger board that I'd also recommend replacing.

$50 and add $10 for standard domestic USPS shipping.

Mike - N8OEP@...

4969. FS - Two 5 Watt / 2 channel Motorola HT-90's (440Mhz) HTs

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-10-30 00:28:41 UTC
From: Mike
Topic: 4969 Message: 4969

Two 5 Watt / 2 channel Motorola HT-90's (440Mhz) HTs for sale....

These have been "modified" for a "packet development" system...

The picture shows all of the gear;
a pair of Motorola HT 90's
a pair antenna
two pair of dead batteries
120 V dropin charger
operator manual and service manual.

The 8 conductor header-ribbon cable, (in the photo threaded through the speaker jack) taps into; PTT, RX audio, TX enable, Squelch open, Discr out... etc. (all identified in the service manual) is easily removed if desired.

These radios were used for a "packet communication development application" in the 450 business band. The FCC license there was much less restrictive than the ham bands at the time. The radios are easly adapted to amateur frequencies.

Photo here:
http://img.villagephotos.com/p/2008-10/1326550/2007_11160017.JPG
http://www.villagephotos.com/pubbrowse.asp?folder_id=2045449

Yes, they work as simple HT's...but their best usage would further develop different ham radio aspects. Please put them to use...

$20 + shipping

Mike - N8OEP

Slightly used Yaesu/Vertex VX-170 2m HT. Has had almost No transmit time as was being used as a receiver. Good Condition w/only issue being the Speaker Mic cap is missing. Has box, paperwork, etc.

Asking $100

Thanks,
John Marcel/K1FDD

VHF & UHF HTs and mobile rig, plus many accessories For Sale:

Kenwood TH-215, 2 meter HT
Covers the 2 meter band with up to 7 W output power. Of course it has memories, scan features, and the things one expects in an HT. Subaudible (PL, CTCSS) tones are built in and can be adjusted from the keypad. A 16 digit touchtone (DTMF) pad is built in. The HT can be powered by the PG-3 E cord from 13 V DC to provide full 7 watt output. This one is in very nice condition. It includes a good PB-2 standard battery, rubber duck antenna, and paper work for $75.

Kenwood SMC-30 Speaker Microphone
Fits TH-21, TH-41, TH-215, TH-225, TH-415, TR-2600, and many other Kenwood HTs. It has 3.5 mm and 2.5 mm plugs molded together. It works fine, and is in good condition. $23

Kenwood PB-1 Battery Pack
12 V at 800 mahr. Fits TH-215, TH-225, TH-415, and others.
This is an optional high power, high capacity battery pack. It looks great, and holds a charge fine. With paper work for $25

Kenwood PB-2 Battery Pack
8.4 V, 500 mahr. Fits the TH-215, TH-225, TH-415, and others.
This is the standard pack like comes with the HT. This one looks fine and holds a charge well. It is in its original box, with paper work for $20

Kenwood PG-3 E Cord
This cord plugs into the cigarette lighter to provide 12 V DC to the TH-215, TH-225, TH-415, and other Kenwood HTs. It has a filter built in, and permits high power operation of the HTs. $20

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and PB-4 battery packs. It can also be used with the smaller PB-2 and PB-3 battery packs, by putting a filler in the case. Black color. In very nice condition. $15

Bianchi Real Leather Case for TH-215, TH-225, etc.
For use with the larger PB-1 and PB-4 batteries, but can be used with the smaller PB-2 and PB-3 batteries. This is real leather, tan in color, and is in very nice condition. $25

Kenwood BH-2 Belt Clip - $8

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine

and works fine. $20

Icom IC-04 HT for 440 MHz
This is the 440 MHz version of the popular IC-02 AT. It has
about 7 watts out if used with the larger battery pack, or
powered from 12 V DC. About 5 Watts with the standard
battery pack, or about 1 watt in low power.
Of course it has memories, scan features, and the things
one normally expects in an HT. The keyboard functions as
a DTMF pad, and it has PL (subaudible) tones adjustable
from the front keypad in it as well.
This particular unit works 100% and looks very good.
There is some slight wear, but it is quite minor.
Rubber duck antenna, belt clip, and paper work are
included for $75.

Icom BC-35 desk charger
The BC-35 will fast charge the BP-2, BP-5, BP-7, and
BP-8 battery packs. It will also charge the BP-3 and BP-4,
but these take 12 to 15 hours. It works 100% and looks
fine as well. $35

Icom BP-7 battery pack
This pack can be used on the Icom IC-02 AT, IC-03 AT,
IC-04 AT, and other Icom HTs.
It can also be used on the Radio Shack HTX-202 and
HTX-404, and maybe others.
This is a 13 V DC at 450 mahr battery pack.
It holds a charge and looks fine. With paper work for $25.

"Dead" Icom Battery Pack:
Icom BP-3 battery pack
I found a BP-3 battery pack that is dead. This pack is used on
the IC-2 AT, 3 AT, 4 AT, 02 AT, 03 AT, 04 AT, and some others.
It will also fit some of the Radio Shack / Realistic HTs such as
the HTX-202 and HTX-404.
This one is dead, but if you need a battery shell, to put a new
"insert" in to, or for some project, it would be ideal. Adding one
of the newer high capacity inserts will give you a very inexpensive
new battery, or build a regulator in for use from 12 V DC. $8

Icom HM-8 touch tone DTMF Microphone
This mic has a touch tone pad on it, with a switch to turn the
pad on or off. There is also a preamp built in to the mic, so
that it can be used with the Icom 25A , 245, 290, 402, 202S,
451, 471A and maybe others. It has a round 8 pin connector
on it. Paper work is included for $45.

Icom HM-56 A, DTMF touchtone microphone w/up-down switch
This electret mic has a 16 digit DTMF touchtone pad on it
along with other special buttons. It also has 14 memories
included in it for remembering phone numbers to dial. It works

with the Icom 28, 38, 228, 229, 449, 901, 1201, 2330, 2400, 2410, 2500 and others. This mic also has an up and a down switch on it. Basically, it is like an HM-12, but with DTMF pad and memories added. These are about $170 new, so that gives some idea of its sophistication!
This one is still in its box, with paper work. I do not think it has ever been used. $95

KDK FM-2033 mobile FM transceiver for 2 meters

This rig produces just over 25 Watts in high power and about 7 watts in low power. The rig is fully synthesized, has memories, scan, subaudible PL tone, and all the things that one expects in a 2 meter rig. It has a touchtone microphone with it. It sounds great, and hears well.
It needs 13 V DC at about 7 amps.

This particular rig is in very nice condition. There is one paint spot missing, about the size of a pin head. It includes the touchtone microphone, mobile mounting bracket, power cord, and paper work. The original box is also included, although the box looks much worse than the radio. Even the mic clip, and a bag of screws are included, as is the original multicolored sales brochure. $90

MFJ 810 VHF Wattmeter / SWR Bridge
Similar to the MFJ 816 listed above, but for the 2 meter and 220 MHz VHF bands. A web site says it is the same as the MFJ 812.
This particular unit works fine, and looks fine also.
With paper work for $25.

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually, one must have the battery inside the HT, but this lets you charge a second battery outside of the HT. The original charger is used. It is in good shape, and works fine. $3

Belt Clips for various HTs
$8 each
Motorola, with hardware
Kenwood TR-2400, with hardware
Yaesu FT-209, with hardware

Wrist Straps for various HTs
$4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

Rubber Duck and telescoping antennas for your HT.
All are for 2 meters, have been used, but are in good condition,
and are $10 each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others - $10 each
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long - $10

PL-259 connector - 6.5 inches long - $10
HyGain 275, still in original package from when I bought it
20 or 25 years ago

PL-259 connector - Stubby - 4.6 inches long - $10
Centurion, still in original package from when I bought it
20 or 25 years ago

Special for Kenwood TH-21 HT threaded connector
Aftermarket stubby, 3.5 inches long - $10
Kenwood RA-6 regular, 6.6 inches long - $10

BNC to PL-259 antenna adapter
For use with any HT that has a BNC connector. It will
convert the BNC connector on the HT, so that you can use
a normal antenna with a PL-259 connector. Like new. $5

Antenna adapter for Kenwood TH-21 / 31 / 41 HTs
This adapts the antenna connector found on these HTs to a
standard BNC connector. $4

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Prices do not include shipping from Florida.

Thanks.

4987. Kenwood SP-430 speaker and other Kenwood items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-11-22 18:43:27 UTC
From: Ken Simpson, W8EK
Topic: 4987 Message: 4987

Large variety of accessories for Kenwood Radios For Sale:

Kenwood SP-430 External Speaker
The Kenwood SP-430 external speaker provides low-distortion,
clear sound and high intelligibility in any mode. It is made
in an all metal cabinet that is tuned for best speech
intelligence. This is an 8 ohm speaker which has two screw
terminals on the back for input, although the original cord
with an 1/8 inch plug is also included. There is a snap-out
bail that will slightly slant the speaker upwards, if
desired. The SP-430 is physically 5 x 4 x 9.5 inches in size.
It is made to match the TS-430, TS-440, TS-711, TS-811, and
many other Kenwood rigs.
This on is in extremely nice condition. There is one very, very
slight scratch that can be seen if it is held just right.
Of course it works 100%.
Paper work is included for $75.

Kenwood TH-215, 2 meter HT
Covers the 2 meter band with up to 7 W output power. Of course it has
memories, scan features, and the things one expects in an HT. Subaudible
(PL, CTCSS) tones are built in and can be adjusted from the keypad. A 16
digit touchtone (DTMF) pad is built in. It can be powered by the PG-3 E
cord from 13 V DC to provide full 7 watt output.
This one is in very nice condition. It includes a good PB-2 standard
battery,
rubber duck antenna, and paper work for $75.

SMC-30 Speaker Microphone
Fits TH-21, TH-41, TH-215, TH-225, TH-415, TR-2600, and many other
Kenwood HTs. It has 3.5 mm and 2.5 mm plugs molded together.
Two are available. Both look very nice and work 100%.
One has a cord that is slightly stretched. It is $18.
The other has a perfect cord, and is close to new condition.
It is $25.

PB-1 Battery Pack
12 V at 800 mahr. Fits TH-215, TH-225, TH-415, and others.
This is an optional high power, high capacity battery pack. It looks
great, and holds a charge fine. With paper work for $25

PB-2 Battery Pack
8.4 V, 500 mahr. Fits the TH-215, TH-225, TH-415, and others.
This is the standard pack like comes with the HT. This one looks fine
and holds a charge well. It is in its original box, with paper work for $20

PG-3 E Cord
This cord plugs into the cigarette lighter to provide 12 V DC to the TH-215, TH-225, TH-415, and other Kenwood HTs. It has a filter built in, and permits high power operation of the HTs. $20

SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and PB-4 battery packs. It can also be used with the smaller PB-2 and PB-3 battery packs, by putting a filler in the case. Black color. In very nice condition. $15

Bianchi Real Leather Case for TH-215, TH-225, etc.
For use with the larger PB-1 and PB-4 batteries, but can be used with the smaller PB-2 and PB-3 batteries. This is real leather, tan in color, and is in very nice condition. $25

Belt Clips for various HTs -- All include the hardware with the belt clip
$8 each
Kenwood BH-2 for TH-215, TH-225, TR-2500, TR-2600, and others
Kenwood TR-2400
Motorola
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

Accessories specific to the Kenwood TR-2400 HT:

Belt clip for TR-2400 HT, complete with hardware - $8

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually, one must have the battery inside the HT, but this lets you charge a second battery outside of the HT. The original charger is used. It is in good shape, and works fine. $3

Wrist strap - I think it fits most Kenwood (and maybe other) HTs - $4

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. This adapter can be used on any HT with a BNC connector. $5

Accessories for Kenwood TH-21 / TH-31 / TH-41 HTs:

Antenna adapter for Kenwood TH-21 / 31 / 41 HTs
This adapts the antenna connector found on these HTs to a standard BNC connector. $5

Special rubber duck antenna for Kenwood TH-21 HT with
threaded connector
Aftermarket stubby, 3.5 inches long - $10
Kenwood RA-6 regular, 6.6 inches long - $10

Original Operating Manuals for Kenwood rigs For Sale:

All manuals are in very nice condition, for Kenwood
radios and accessories, unless stated otherwise.
All are original and are not copies.

Operating manual for BC-5 DC charger/adapter $4

Operating manual for MC-30 and MC-35 hand microphone $5

Operating manual for MC-80 desk microphone $5

Operating manual for MC-85 desk microphone $4

Operating manual for PS-30 power supply $5

Operating manual for SMC-24 speaker mic $4

Operating manual for SMC-25 speaker mic $4

Operating manual for TH-21 A / AT HT for 2 meters $8

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E
HTs for 440 MHz, 220 MHz and 2 meters $10

Service manual for TH-21 series HTs $20

Operating manual for TH-215 / 315 / 415 HTs $12

Operating manual for TH-225, 2 meter HT $12

Operating manual for TM-221 / 421 mobile $15

Operating manual for TM-231 / 331 / 431 / 531 mobile
FM transceivers for 2 meters, 220 MHz, 440 MHz, and
1200 MHz. $12

Operating manual for TR-2200, 2 meter "portable"
This is very similar to the Drake TR-22. $12

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $12

Operating manual for TR-2600, 2 meter HT $12

Service manual for TR-2600, 2 meter HT $12

Operating manual for TS-120, HF transceiver $18

Operating manual for TW-4000 dual bander $15

Service Manual for TW-4000 dual bander $20

These are Kenwood Original Manuals only.

Prices do not include shipping from Florida.

Thanks.

Listing the following for sale:

Hallicrafters Receiver SW-500 in very nice condition. .54 thru 30 Mhz. Has BFO and Bandspread Complete with telescoping antenna and manual for the s-120 (same radio). Has low audio thru speaker but fine with phones. Asking price $35.00

Hallicrafters Receiver S-200 in good condition. This is a AM and shortwave band only radio. Does not cover Ham bands.
No BFO or bandspread. Has simulated wood case. Works well good audio. Asking Price $15.00

Hammarlund HQ 100 Receiver. AM broadcast thru 30 Mhz. Very good condition, face is as near perfect as you will find. All original knobs and panel lettering are excellent. Case has a very few wear marks and small scratches. Main tuning and bandspread 100Khz calibrator. Bfo and q-multiplier. Receives well but could possibly be improved with a front end alignment. This model did not have the clock installed but can be installed if you want it. Asking $125.00

Photos are available just e-mail me

All prices are plus shipping. I will quote shipping charges to serious interested parties.

I will accept USPS money order or PayPal for checks, credit cards or transfers.

John K3JK here. from Kulpmont, Pa. 17834 Info good on qrz.com I have a 4 yr old 8ll with taylor 8lls in it. I get 525 to 580 out depending on band and antenna. It has an issue, sometimes the high voltage switch sticks and i have to tap on it to get it back to zero when I switch back to plate current. It's the switch that toggles back and forth from plate voltage and plate current. I have a new switch but did not put it in. I run it with the switch as it is. I have pics of it also. I run it about every two weeks to keep the tubes in shape. I own it since January of 08. I also kept a detailed record of every time I used it showing power out, plate and grid current. Pictures are available. Email me if your interested. I will ship it for 500 CONUSA only. My email address is klokis@... You can also call me and talk to me about it, if I am not home, leave your contact info. I also have sellar feedback. my phone: 570-373-3819

From: w5jmc
Topic: 4997 Message: 4997

I am in need of an SMA Rubber Duck(y) antenna for an FT-50r. Would like to pick up a shorter and longer one, and would also like one that is good for VHF Commercial frequencies. If you have anything to offer or have any suggestions on your experiences with different SMA/HT antennas, I am all ears.

I would also be interested if you have other FT-50r accessories lying around that you want to part with, i.e. spare battery pack(s), TNC or data cable, DC adapters, speaker mic, etc. If you have anything, email me at w5jmc.john(at)gmail.com. Thanks for reading and Happy Holidays!

Topic: 4998 Message: 4998

Hello all,

I am in the process of consolidating my radio collection and as a result I am selling a few of my Uniden digital scanners. All three scanners are in excellent to mint condition and include the original boxes, manuals etc.

For Sale - Scanner 1 (Uniden BCD396T Handheld)

Uniden BCD396T handheld scanner, comes complete with all original boxes, manuals, power adapter, antenna, antenna adapter, programming cable, unused and unopened factory NiMh batteries, a spare set of 2500mAh NiMh batteries, and two additional 800MHz. antenna's (one 1/4 wave stubby & one 1/2 wave dipole). Also included is the latest version, 3.0 Build 6 licensed copy of the Butel ARC396PRO programming software on cd-rom. The scanner is running the latest firmware version 03.01.00.

I am asking $425 O.B.O. PayPal add 3%

For Sale - Scanner 2 (Uniden BCD996T Mobile/Base)

Uniden BCD996T mobile/base scanner, comes complete with all original boxes, manuals, mounting hardware, antenna, ac & dc power adapters, DIN mounting bracket, etc. Also included is the latest version, 2.20 licensed copy of the Butel ARC996PRO programming software on cd-rom. The scanner is running the latest firmware version 03.01.00.

I am asking $450 O.B.O. PayPal add 3%

For Sale - Scanner 3 (Uniden BCD996T Mobile/Base)

Uniden BCD996T mobile/base scanner with discriminator tap installed on the rear. The scanner comes complete with original boxes, manuals, mounting hardware, ac & dc power adapters, antenna, etc. Also included is the latest version, 2.20 licensed copy of the Butel ARC996PRO programming software on cd-rom. The scanner is running the latest firmware version 03.01.00.

I am asking $425 O.B.O. PayPal add 3%

Interested parties, please e-mail me directly at: W2GLD@...

These are available immediately as well and I can meet pretty much anywhere in the tri-state area or ship them if needed. Prices include USPS shipping anywhere in the U.S.

Thanks,

Jerry - W2GLD

4999. For Sale: Icom 2820h 875.00 grand rapids, mi

5000. Icom 12at for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-12-15 18:13:08 UTC
From: K & R Yoksh
Topic: 5000 Message: 5000

Hi,

I'm selling my like-new Icom 12at, 1.2 GHz handie-talkie. It covers
1260-1300 MHz FM and is outputs up to 1w. It does PL, RIT, etc and
features 10 memory channels. It comes with the original Icom battery pack.

I'm not sure what these are selling for, so please email me with
an offer. Paypal only.

I will ship next business day. I have 124 positive feedbacks on Ebay,
and am a ham operator since 1998. I will package well and ship insured
to your location in the continental USA.

Please contact me off list at k0kn at amsat dot org.

Thanks. 73,

Kyle
K0KN

5003. Extensive list of Kenwood items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-12-08 00:12:17 UTC
From: Ken Simpson, W8EK
Topic: 5003 Message: 5003

Extensive list of Kenwood items For Sale:

Speaker:

Kenwood SP-430 External Speaker
The Kenwood SP-430 external speaker provides low-distortion,
clear sound and high intelligibility in any mode. It is made
in an all metal cabinet that is tuned for best speech
intelligence. This is an 8 ohm speaker which has two screw
terminals on the back for input, although the original cord
with an 1/8 inch plug is also included. There is a snap-out
bail that will slightly slant the speaker upwards, if
desired. The SP-430 is physically 5 x 4 x 9.5 inches in size.
It is made to match the TS-430, TS-440, TS-711, TS-811, and
many other Kenwood rigs.
This on is in extremely nice condition. There is one very, very
slight scratch that can be seen if it is held just right.
Of course it works 100%.
Paper work is included for $75.

Two meter HTs:

Kenwood TH-215, 2 meter HT
Covers the 2 meter band with up to 7 W output power. Of course it
has memories, scan features, and the things one expects in an HT.
Subaudible (PL, CTCSS) tones are built in and can be adjusted from
the keypad. A 16 digit touchtone (DTMF) pad is built in. It can be
powered by the PG-3 E cord from 13 V DC to provide full 7 watt output.
This one is in very nice condition. It includes a good PB-2 standard
battery, rubber duck antenna, and paper work for $75.

Kenwood TH-225, 2 meter HT
Similar to the TH-215 above, but slightly newer design.
Same basic features.
This one works 100% and looks really great.
With PB-2 standard battery pack, rubber duck antenna, and paper
work for $75.

Speaker Microphones:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

SMC-30 Speaker Microphone
Fits TH-21, TH-41, TH-215, TH-225, TH-415, TR-2600, and many other
Kenwood HTs. It has 3.5 mm and 2.5 mm plugs molded together.

Two are available. Both look very nice and work 100%.
One has a cord that is slightly stretched. It is $18.
The other has a perfect cord, and is close to new condition.
It is $25.

SMC-32 Speaker Microphone
Similar to the SMC-30 above, except this speaker mic has a
right angle, "L" shaped connector on it, and is physically
a bit smaller.
This one works fine and looks really great. $25

Accessories specific to the TH-215 and TH-225 HTs:

PB-1 Battery Pack
12 V at 800 mahr. Fits TH-215, TH-225, TH-415, and others.
This is an optional high power, high capacity battery pack. It
looks great, and holds a charge fine. With paper work for $25.

PB-2 Battery Pack
8.4 V, 500 mahr. Fits the TH-215, TH-225, TH-415, and others.
This is the standard pack like comes with the HT. This one looks
fine and holds a charge well. It is in its original box, with paper
work for $20.

PG-3 E DC Cord
This cord plugs into the cigarette lighter to provide 12 V DC to the
TH-215, TH-225, TH-415, and other Kenwood HTs. It has a filter built
in, and permits high power operation of the HTs. $20

Kenwood BH-2 Belt Clip for TH-215, TH-225, TR-2500, TR-2600, and
others $8

SC-12 Vinyl Case
For TH-215, TH-225 and others, with room for the standard PB-2 and
PB-3 battery packs. Black color. In very nice condition. $15

SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and
PB-4 battery packs. It can also be used with the smaller PB-2 and
PB-3 battery packs, by putting a filler in the case. Black color.
In very nice condition. $15

Bianchi Real Leather Case for TH-215, TH-225, etc.
For use with the larger PB-1 and PB-4 batteries, but can be used
with the smaller PB-2 and PB-3 batteries. This is real leather,
tan in color, and is in very nice condition. $25

Accessories specific to the Kenwood TH-21 / 31 / 41 series HTs:

Kenwood TU-6 PL encoder
Produces subaudible tones for the TH-21/31/41.
With paper work. $35

Kenwood SC-8 T, soft case for TH-21/31/41 series HTs
Protects the radio, and has a clear window in the front,
so one can see the touch tone pad.
This one looks close to new, with the Kenwood lettering
still perfect with no wear. $12

SMC-30 Speaker Microphone
Fits TH-21, TH-41, TH-215, TH-225, TH-415, TR-2600, and
many other Kenwood HTs. It has 3.5 mm and 2.5 mm plugs
molded together.
Two are available. Both look very nice and work 100%.
One has a cord that is slightly stretched. It is $18.
The other has a perfect cord, and is close to new condition.
It is $25.

Kenwood PB-21 battery pack for TH-21/31/41 series HTs
This battery pack does not hold a charge well. Physically it
is fine, but it needs a new "insert". With paper work for $10

Kenwood PB-21 H battery pack
As above, but heavy duty pack; needs insert.
Includes paper work for $14.

Antenna adapter for Kenwood TH-21 / 31 / 41 HTs
This adapts the antenna connector found on these HTs to a standard
BNC connector. $5

Special rubber duck antenna for Kenwood TH-21 HT with threaded connector
Aftermarket stubby, 3.5 inches long - $10
Kenwood RA-6 regular, 6.6 inches long - $10
As above but for TH-41 HT, 440 MHz - Stubby - $15

Accessories specific to the Kenwood TR-2400 HT:

Belt clip for TR-2400 HT, complete with hardware - $8

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Wrist strap - I think it fits most Kenwood (and maybe other) HTs $4

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Various Miscellaneous items:

Kenwood MC-46 DTMF Microphone
Touch tone DTMF microphone with 6 pin connector, as used on
TR-7730, TR-7800, TR-7850, TR-7930, TR-7950, TR-8400, TR-9000,
TR-9130, and others. Up-down switch on top. Of course the
connector could be changed to an 8 pin connector to use on other
rigs. This one works 100%, and includes paper work in the original
box for $45.

TU-5 Subaudible tone encoder
Provides PL subaudible tones for the Kenwood TS-7711, TS-811, and
maybe other rigs. Tones are selected by the rig.
With hardware and paper work for $65.

Kenwood PC-1 A phone patch.
This is the phone patch with the 8 pin connectors, although they
can be changed, if needed. It includes a nice meter for adjusting
the null so VOX will work OK. With paperwork for $50.

Belt Clips for various HTs -- All include the hardware with the belt clip
$8 each
Kenwood BH-2 for TH-215, TH-225, TR-2500, TR-2600, and others
Kenwood TR-2400
Motorola
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

Original Operating Manuals for Kenwood rigs:

All manuals are in very nice condition, for Kenwood
radios and accessories, unless stated otherwise.
All are original and are not copies.

Operating manual for BC-5 DC charger/adapter $4

Operating manual for MC-30 and MC-35 hand microphone $5

Operating manual for MC-80 desk microphone $5

Operating manual for MC-85 desk microphone $4

Operating manual for PS-30 power supply $5

Operating manual for SMC-24 speaker mic $4

Operating manual for SMC-25 speaker mic $4

Operating manual for TH-21 A / AT HT for 2 meters $8

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E
HTs for 440 MHz, 220 MHz and 2 meters $10

Service manual for TH-21 AT, plus most of the
TH-21/31/41 accessories such as DC-21, EP-2,
TU-6, etc. $20

Operating manual for TH-215 / 315 / 415 HTs $12

Operating manual for TH-225, 2 meter HT $12

Operating manual for TM-221 / 421 mobile $15

Operating manual for TM-231 / 331 / 431 / 531 mobile
FM transceivers for 2 meters, 220 MHz, 440 MHz, and
1200 MHz. $12

Operating manual for TR-2200, 2 meter "portable"
This is very similar to the Drake TR-22. $12

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $12

Operating manual for TR-2600, 2 meter HT $12

Service manual for TR-2600, 2 meter HT $12

Operating manual for TS-120, HF transceiver $18

Operating manual for TW-4000 dual bander $15

Service Manual for TW-4000 dual bander $20

These are Kenwood Original Manuals only.

Prices do not include shipping from Florida.

Thanks.

5006. Need a vertical to get a neighbor into Ham.

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-12-26 15:53:19 UTC
From: selltoyou2@sbcglobal.net
Topic: 5006 Message: 5006

Hi Hams,

A neighbor is looking to get into ham but is on a tight budget as am I.
Does anyone have an old vertical gathering dust that might go for a
reasonable price? I don't care about the condition. I can clean it up
or straighten it up. Thanks for your consideration.

CW and related items For Sale:

Special Deluxe CW Key
This first key is extremely nice, and is special in its mounting. The key itself is a Nye Viking Speedex oval base 310-001 key, which sells new for $58 by itself, and has very nice action. What separates this key from any others is the base it is mounted on. It is solid metal about 6 inches long and 5 inches wide and 3/4 inch thick. It weighs about 6 pounds, so it will not move across the desk when you use it. There is a nice beveling around the top. To put it another way, this is a specially machined base, made for the key. The metal appears to be copper, although it is not shiny copper, but instead has a "patina" to it like antique items. A layer of cork covers the bottom to protect your operating table. There is a cable with a metallic shielded 1/4 inch plug on it. This is certainly a one of a kind key. $100

TenTec KR-2 A Keyer Paddle For Sale:
The KR-2 A is the same paddle assembly used in the KR-5 and KR-20 A keyers, but does not have any electronics inside. It also has a small button on the top of the case that can be used as a straight key, but can also be used as an aid to tune up your rig.
It is designed to be used with your own keyer, but many people have put an electronic keyer inside the shielded aluminum case which is about 4 x 4 x 2 inches in size, plus the paddle itself.
The KR-2 A is the woodgrain top / egg shell white color that matches the early Triton series of rigs, plus the Argonaut 509, and others.
This particular unit is in good condition.
The paper work is included (a single sheet). $25

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch phone plug on it, as is used with a straight key. $5
As above, but 1/8 inch plug. $5

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo connector on the end, like used by most rigs. It looks great. $8
As above, but 1/8 inch plug. $8

Code Practice Key / Buzzer:

Herald Electronics Co. Model SW-12 A
"Telegraph Key with Buzzer"

This is a very vintage unit. It is in its original
box, with the paper work, with an address of simply
"Chicago, Ill", with no zip code, and not even a zone.
I would guess 1950's vintage, but of course that is a guess.

The unit consists of a code key built into a base that
appears to be bakelite. The key is somewhat similar to
a J-38 (without a shorting bar), with shiny nickel plated
knurled nuts. The key has a regular knob, and not a navy
knob. Behind the key is a round cover over the buzzer,
and behind that is a place for a single D cell battery.

The unit is complete with the original instruction sheet,
in the original box. $40

Code Tapes For Sale:

The following code tapes are from a silent key estate. They
are not original tapes. I have no idea where he got them from
-- if they came from the internet, off the air, or what. I do
know that they are code tapes that have good code practice on
them, as I have listened to portions of each tape. They all
appear to be 90 minute tapes. The names I am listing is what
is written on the tape.
I am selling them for basically the cost of the tape - $4 each.

Novice Class Prep - Random Runs

Novice Class Prep - Simulated Tests

10 WPM Plateau Buster

General Class 3 to 13 Speed Builder

General Class Speed Builder Tape - 13 WPM

Gordon West - 13 WPM

General Test

CW Related books:

Ameco "Mastering the Morse Code"
First Edition, 1957 $8

Ameco Code Course
This book looks like it might be made to go with the Ameco
code records. There is general information about the code,
but portions of the book list what is being sent by the code
records. There is also a diagram about how to make a code

practice oscillator from a 50C5 and 35W4. There is no date
or edition on it, but the tube type CPO somewhat dates it! $5

ARRL Code Kit - 1976
This is the booklet only, that originally went with a kit of
cassette tapes. This has the info that is contained on the
tapes listed in it. If you have the tapes, and need the booklet
to go with it, this is for you. If you just want to read about
it, this is great also. $2

The ARRL Training Program - Official Novice Student Workbook
No date or edition, but it is designed for a 10 week course,
leading to a novice license. $3

Two & Three Position Coaxial Antenna Switches:

B & W Model CS-3 G (formerly 593)
This switch is in a rectangular box, with four SO-239
connectors coming out of the back. It will switch 3
antennas, grounding the antennas that are not in use.
It works great, and looks very close to new.
With paper work for $40.

Model CX-3 Coax Switch
This switch will switch 3 antennas, with unused positions
NOT grounded. Rectangular with three connectors out the back,
and the common out the front.
It works fine and looks great. $15

SWR Bridges:

Micronta 21-525B Field Strength and SWR Meter
Covers 3 to 30 MHz, to check your SWR or to use to
check your field strength.
This meter works fine and looks close to new, with no scratches.
It is in its original box, with the paper work for $25.

Ameco Model BIU, SWR Bridge
This is apparently an older unit that matches much of the boat
anchor gear, except this one looks very close to new. Of
course it works fine also.
The meter unit is in a very nice light gray / black enclosure,
with a remote sense unit which has copper plating (still shiny).
There are provisions for using a second remote sensor and
switching between the two. This sensor is model SWB, and
says it is good to 225 Mc. Of course it is for 50 ohm systems,
and has an SO-239 on each end of the sensor. $50

TenTec Scout 555 and Argo 556 accessories:

TenTec Scout 555 / Argo 556 Band Modules
These are the modules that plug in to either the TenTec
Scout or Argo, to give additional band coverage.

Band modules are available for 40, 30, and 20 meters.
Non-WARC band modules are $65 each.
WARC band module (30 meters) is $70.

MFJ 260 dry dummy load
Rated at 300 watts by MFJ, but it has the derating curve on
the enclosure which shows that it is only good for 300 watts
for about 30 seconds. It is good for 100 Watts for about
1 and a half minutes, which is likely the way most of us
would use it. It is good for 25 watts for about 6 minutes.
Although most of us would likely use it for HF rigs, it can be
used on VHF rigs as well. It is rated for under 1.1 to 1 SWR
to 30 MHz and usable up to 650 MHz with under 1.3 to 1 SWR.
PL-259 connector.
I measured the actual value, and it shows 50.6 ohms. It is
hard to get much closer to 50 ohms that that!
With paper work for $30.

Heavy duty power supply:
Pyramid PS-35
This supply is good for 32 Amps Constant or 35 Amps Surge.
The output voltage is adjustable over a 12 to 15 volt
range with a multi turn pot. It has crowbar over voltage
protection, short circuit & thermal protection and
features a pair of nice large edgewise meters to measure
output voltage and output current. There is an internal
fan. This is a very healthy, heavy duty, deluxe supply!
$135

Headphones:
Generic headset
Smaller ear pieces just over an inch in diameter, so they
do not completely cover your ear.
With 1/4 inch mono plug; 16 ohm impedance.
Good condition. $18

Phone patches or digital interfaces:

Although designed to be used as a phone patch, to
connect your rig on both transmit and receive to a
telephone line, these can also be used to interface your
rig to a sound card. There is an internal audio
transformer inside, just like on some of the "interface
boxes" being sold today.

Kenwood PC-1 A phone patch/digital interface
This is the model with the 8 pin connectors, although
they can be changed, if needed. It includes a nice meter
for adjusting the null so VOX will work OK.
This particular unit works fine, and looks very, very good.
With paperwork for $40

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

Nye Viking Low Pass Filter Model 020-001
This filter is rated at 2000 watts, with over 65 db of
attenuation above 57 MHz. These are about $60 new;
this one is close to new for only $35.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut
off frequency of 45 MHz and 75 db of attenuation.
It is rated to take 1000 Watts of AM, or 5000 Watts
PEP SSB. It has SO-239 connectors on each end. $30

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation
in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work. $30

Drake TV-1000 Low Pass TVI filter
This is the low pass TVI filter that is in the copper case,
and may also be used on the low end of six meters, as well
as HF.
It is a 50 ohm filter and is good for 1000 W below 30 MHz,
and about 200 W up to 52 MHz.
This one works fine and looks good also.
With paper work for $30.

B & W model 426 low pass filter
B & W TVI filter, cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each end.
This is an older model that seems much heavier duty. It weighs
almost twice as much as the newer model, and looks like it
would take more power. It likely was made in the days that
plate modulated AM was the rule. $28

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. With paper work $40.

Prices do not include shipping from Florida.

Thanks.

5008. FS/FT: Kenwood tk-860H 32ch UHF mobile

Yahoo group: ham4sale (2007 — 2015)
Date: 2008-12-28 03:26:09 UTC
From: kd0ezq
Topic: 5008 Message: 5008

I have a like new Kenwood UHF TK-860H 32ch mobile. The radio has its original box and owners manual, and comes with the Kenwood DTMF mic. This is a NOS radio that has been programmed and used as a monitor in the shack only... The only issue with the radio is that the power cord had been robbed from the box, I replaced it with a used one that had been cut and lengthened.

This is a nice radio, that programs down to 70cm with no modifications, it has been checked and transmits at 35 watts at 443.600. It is currently prorammed with commericial frequencies.

I can program it, but will throw in the software for it...I dont have a cable...

Im asking $200 shipped for it, or would trade for a motorola radio in 800 or 900 mhz, prefer spectras or mcs2000, or for a Motorola Jedi portable...

Pictures are available...

Please email me at kd0ezq@...

Thanks
Tim

Looking to buy the WWII British Marconi T1154 & R1155 radio equipment as used by RAF and Coastal Command, I realixe this is a long shot in the US but thought I would try.
Used to own a T1154 when I was a kid until I put it on the air (age ten) and had it confiscated by the local post office engineer.

Thanks for reading my post.

Extensive list of HF and related accessories For Sale:

Micronta 21-525B Field Strength and SWR Meter
Covers 3 to 30 MHz, to check your SWR or to use to check your
field strength.
This meter works fine and looks close to new, with no scratches.
It is in its original box, with the paper work for $25.

Ameco Model BIU, SWR Bridge
This is apparently an older unit that matches much of the boat
anchor gear, except this one looks very close to new. Of course
it works fine also.
The meter unit is in a very nice light gray / dark gray enclosure,
with a remote sense unit which has copper plating (still shiny).
There are provisions for using a second remote sensor and switching
between the two. This sensor is model SWB, and says it is good to
225 Mc. Of course it is for 50 ohm systems, and has an SO-239 on
each end of the sensor. $50

Model CX-3 Coax Switch
This switch will switch 3 antennas, with unused positions
NOT grounded. Rectangular with three connectors out the back,
and the common out the front.
It works fine and looks great. $15

Heavy duty power supply Pyramid PS-35
This supply is good for 32 Amps Constant or 35 Amps Surge.
The output voltage is adjustable over a 12 to 15 volt range with
a multi turn pot. It has crowbar over voltage protection, short
circuit & thermal protection and features a pair of nice large
edgewise meters to measure output voltage and output current.
There is an internal fan. This is a very healthy, heavy duty
supply!
This particular unit works 100% and looks very close to new.
$125

MFJ 260 dry dummy load
Rated at 300 watts by MFJ, but it has the derating curve on
the enclosure which shows that it is only good for 300 watts
for about 30 seconds. It is good for 100 Watts for about
1 and a half minutes, which is likely the way most of us
would use it. It is good for 25 watts for about 6 minutes.
Although most of us would likely use it for HF rigs, it can be
used on VHF rigs as well. It is rated for under 1.1 to 1 SWR
to 30 MHz and usable up to 650 MHz with under 1.3 to 1 SWR.
PL-259 connector.

I measured the actual value, and it shows 50.6 ohms. It is
hard to get much closer to 50 ohms that that!
With paper work for $30.

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed.
Stripped and tinned leads.
It works fine, and looks good also. $25

Touch tone (DTMF) microphones:

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, along with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
Paper work included for $40.

Drake 1525 EM Touchtone (DTMF) Microphone
This is the mic that was used to add a touchtone pad to
a lot of rigs in the 70s and 80s. Normal hand mic from
the front, but has a touchtone pad on the back. Four
pin mic plug. This particular unit has been used, but is
in good shape and includes paper work. $38

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently
has a 6 pin connector for the KDK 2030, but that can
be changed. Nice condition. $40

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

CW items:

Special Deluxe CW Key
This first key is extremely nice, and is special in its
mounting. The key itself is a Nye Viking Speedex oval base
310-001 key, which sells new for $58 by itself, and has
very nice action. What separates this key from any others
is the base it is mounted on. It is solid metal about 6
inches long and 5 inches wide and 3/4 inch thick. It

weighs about 6 pounds, so it will not move across the
desk when you use it. There is a nice beveling around
the top. To put it another way, this is a specially
machined base, made for the key. The metal appears
to be copper, although it is not shiny copper, but
instead has a "patina" to it like antique items. A
layer of cork covers the bottom to protect your operating
table. There is a cable with a metallic shielded 1/4 inch
plug on it. This is certainly a one of a kind key. $100

TenTec KR-2 A Keyer Paddle For Sale:
The KR-2 A is the same paddle assembly used in the KR-5
and KR-20 A keyers, but does not have any electronics inside.
It also has a small button on the top of the case that
can be used as a straight key, but can also be used as an
aid to tune up your rig.
It is designed to be used with your own keyer, but many
people have put an electronic keyer inside the shielded
aluminum case which is about 4 x 4 x 2 inches in size,
plus the paddle itself.
The KR-2 A is the woodgrain top / egg shell white color
that matches the early Triton series of rigs, plus the
Argonaut 509, and others.
This particular unit is in good condition.
The paper work is included (a single sheet). $25

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8
As above, but 1/8 inch plug. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5
As above, but 1/8 inch plug. $5

Code Practice Key / Buzzer:

Herald Electronics Co. Model SW-12 A
"Telegraph Key with Buzzer"

This is a very vintage unit. It is in its original
box, with the paper work, with an address of simply
"Chicago, Ill", with no zip code, and not even a zone.
I would guess 1950's vintage, but of course that is a guess.

The unit consists of a code key built into a base that
appears to be bakelite. The key is somewhat similar to
a J-38 (without a shorting bar), with shiny nickel plated
knurled nuts. The key has a regular knob, and not a navy
knob. Behind the key is a round cover over the buzzer,

and behind that is a place for a single D cell battery.

The unit is complete with the original instruction sheet,
in the original box. $40

TenTec Accessories:

TenTec 285, 500 Hz filter
500 hz for CW
Fits Corsairs, Paragons, Omni V and VI, and others.
This one has its paperwork and looks like new. $70

Scout 555 / Argo 556 Band Modules
Band modules for 40, 30, and 20 meters.
Non-WARC band modules are $65 each.
WARC band module (30 meters) is $70 each.

Low Pass TVI Filters:

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation in
the 40 MHz region, where many TVs have their IF. It is good for
1000 Watts "average" according to the manual, and has over 80
db attenuation at 41 MHz. This one looks great, and includes
the paper work with it. $ 35

Drake TV-1000 Low Pass TVI filter
This is the low pass TVI filter that is in the copper case,
and may also be used on the low end of six meters, as well
as HF.
It is a 50 ohm filter and is good for 1000 W below 30 MHz,
and about 200 W up to 52 MHz.
This one works fine and looks good also.
With paper work for $30.

Nye Viking Low Pass Filter Model 020-001
This filter is rated at 2000 watts, with over 65 db of attenuation
above 57 MHz. These are about $60 new; this one is close to new
for only $35.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut off frequency
of 45 MHz and 75 db of attenuation. It is rated to take 1000 Watts of
AM, or 5000 Watts PEP SSB. It has SO-239 connectors on each end.
$35.

B & W model 426 low pass filter
B & W TVI filter, cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each end. This is an
older model that seems much heavier duty. It weighs almost twice as
much as the newer model, and looks like it would take more power.
It likely was made in the days that plate modulated AM was the rule.

$30

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters, and will handle 1500 Watts. SO-239 connector on each end. This is the latest model B & W filter. It is in very nice condition; it looks very close to new. $ 40.

Prices do not include shipping from Florida.

Thanks.

5013. Yaesu FT-847 Earth Station For Sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-01-06 16:10:45 UTC
From: Sebastian
Topic: 5013 Message: 5013

I've decided to go up a bit on frequency and bought an Icom IC-910H.
I have my Yaesu FT-847 up for sale. The serial number is 2K640043.
This one doesn't have the CAT problem which the early ones did with
rig control.

I have used it exclusively on the ham radio satellites (ask anyone who
is active on satellites about how it sounds). The rig is in very good
condition, there are no visible scratches or dings on it anywhere. I
have the original box, the manual, the very large technical supplement
manual, power cord and original invoice dated 12/09/02 from AES. I
don't have the original box, however it will be packaged securely and
will be double-boxed. I use FedEx for shipping. Price with Yaesu
MD-100 base microphone is $1,000. Without microphone - $900. Note
that I don't have the original stock hand mike.

Pictures available upon request. If you'd like to speak to me, send
me your phone number and I'll call you on my dime. USPS money orders
ONLY - no PayPal.

5017. WTB: HP 1853-0218 (NS65098) Transistors

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-01-09 12:56:54 UTC
From: fun2fix
Topic: 5017 Message: 5017

Hi,

I am currently repairing an HP 8111A 20MHz Function/Pulse generator.
Specifically I've been trying to fix the 08111-66508 (A8)output
board(power amp).
After an exhaustive search, I've found most of the parts from
existing HP stock and various other places. The last component(s) I
need is (2)HP 1853-0218 (NS65098) transistors. If you know where I can
find two new or used (preferably with the same date code), or
a power amp board, please let me know. These transistors are also
used on the HP 8116A Main Board.
The component clearing houses that list the part usually have a
large minimum order cost or just don't have it. Ebay is just too
expensive - used units typically go for $200.00+.

Obsolescence is a terrible thing! *8^(

Thanks for your help.

John

5018. A very good vertical antenna -- CHAMELEON V1 HF Multiband Antenna☐

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-01-10 03:53:47 UTC
From: chameleon_antenna
Topic: 5018 Message: 5018

If you're looking for a nice, efficient and small (8.5 feet) HF antenna,
you have to read the following:

The CHAMELEON V1 HF Multiband Antenna☐ is a revolutionary 8.5 feet tall mobile antenna that can also be used as portable. Some people even use it as a base station when restricted space is a concern. This antenna is a lightweight antenna system with 10 BANDS capability: 6m, 10m, 12m, 15m, 17m, 20m, 30m, 40m, 60m & 80m. If nothing else is available the CHAMELEON V1 HF Multiband Antenna☐ can also operate on the 70cm, 1.25m & 2m BANDS (144Mhz to 500Mhz) but it's primarily a HF antenna - (Test has been done with about 100 feet of coax cable at an elevation of 70 feet high).

Unlike other multiband antennas, the CHAMELEON V1 HF Multiband Antenna☐ has no moving of switches, jumpers, coils, etc. The two parts that the antenna is made of make the CHAMELEON V1 HF Multiband Antenna☐ easy to manage and store.
This antenna is a resonant antenna that contains a special trap coils design in it.

To function properly this antenna NEED A TUNER OR A 9:1 BALUN.
The price is 155$ + Shipping

5019. for sale or trade - Motorola MCX100 - VHF system

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-01-15 18:03:49 UTC
From: evocinstructor
Topic: 5019 Message: 5019

Hello, I have a Motorola MCX100 - 40 watt -VHF system to sell or trade. It's the split mount and I believe 16 or 32 channels. Bought a few years back for project but it was replaced with another. My understanding is they work well for 2 meter. Brinkley Electronics can program and do a mod for easier future programming. I would trade for any commercial VHF mobile that does 12.5 spacing and that you can program. Want this out of my garage so contact me if interested. Thanks. KCORPL.

5020. for sale Kenwood TS-570DG

5021. Many Ham Publications FS - Vintage and Modern

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-01-29 14:56:30 UTC
From: Ken Simpson, W8EK
Topic: 5021 Message: 5021

Ham Publications For Sale:

Some are vintage, and some more modern.
All are in excellent condition, published by ARRL,
unless listed otherwise.

Hints and Kinks for the Radio Amateur
1974, smaller size, $8
1989, 12th edition, $8
1997, 14th edition, like new, $14

Understanding Amateur Radio
1977, no edition number listed, $8

How to Become a Radio Amateur, 1970, 26th edition,
Extremely nice, close to new condition,
with many vintage ads in the back, $15

The Mobile Manual, 1955, First Edition,
part of spine binding missing, but otherwise is in good
condition, with all pages intact, and in binding properly,
contains a large number of very vintage equipment ads, $15

Antenna Related Books:

Antenna Anthology, 1978, First Edition, $8

Antenna Compendium, 1992, First Edition, like new, $15

ARRL Handbooks:

These are in the smaller format (6 1/2 by 9 1/2 inch size).
They include tube charts and ads for vintage equipment,
which are not in the newer handbooks.
1977 - 54th edition - Good condition $10

More modern, larger 8 1/2 by 11 inch format:
1981 - 58th edition - Nice shape $13
1982 - 59th edition - Good condition $11
1985 - 62nd edition - Like new $17
2006 - 83rd edition - with CD, like new $35

Satellite Anthology, 1999, 5th edition, like new, $10

Weather Satellite Handbook, 1990, 4th edition, like new, $10

Operating an Amateur Radio Station, 1983, 61st edition, $3

FCC "Interference Handbook", 1986 edition, $4

Radio Amateurs Operating Manual, 1985, 2nd edition, $8

Ham Price Guide - 2nd Edition
Lists prices of used ham gear - $5

Radio Amateur's World Atlas
Published in Germany - $8

ARRL DXCC Countries List
Sept 1997 - marks in it - $2

ARRL FCC Rule book
1988 - seventh edition - $3
1989 - eighth edition - $3
2004 - 13th edition - $10

RSGB "Amateur Radio Operating Manual"
1982 - 2nd edition - $8

ARRL Public Service Communications 1985 - Ninth edition - $3
1990 - no edition number listed - $3

ARRL Amateur Radio Field Resources Directory
1986-87 - First edition - $ 7

General Class License Manual by Gordon West, WB6NOA
Second Edition - Like New - $3
Fifth Edition - Like new - $5

Upgrade to General Class by Don Stoner, W6TNS
1992 - $4

Advanced Class License Manual by Gordon West, WB6NOA
"New Edition" - Second Edition - 1995 - $4

Ameco "Mastering the Morse Code" by Martin Schwartz
First Edition - 1957 - $8

Ameco "Novice License Radio Amateur FCC Test Manual"
By Martin Schwartz - 1984 - like new - $4

Ameco "Amateur Radio Novice Class Theory Course"
By Martin Schwartz. Far more in depth than the test manual.
First Edition - 1978 - $5

Ameco "Complete Technician Radio Amateur FCC Test Manual"
By Martin Schwartz - 1992 - $3

Ameco "General Class Radio Amateur FCC Test Manual"
By Martin Schwartz - 1984 - Like new - $4
As above, but includes 1988 questions and answers - $4

Ameco "Advanced Class Radio Amateur License Guide"
By Martin Schwartz - First Edition - 1981 - like new - $5

Ameco "Advanced Class Radio Amateur FCC Test Manual"
By Martin Schwartz - Copyright 1987, with added 1991 material
First Edition - Like New - $6

Ameco Code Course
This book might be made to go with the Ameco Code records.
There is general information about the code, but portions
of the book list what is being sent by the code records.
There is also a diagram about how to make a code practice
oscillator from a 50C5 and 35W4. $5

ARRL Code Kit Book, 1976
This is the booklet only, that originally went with a kit
of cassette tapes. This has the info contained on the
tapes listed in it. $2

Code Tapes:

All are original tapes in great condition, in their
original containers.

ARRL "Increasing Your Code Speed" 15 to 20 WPM
Two tape set to take one from 15 WPM up thru 20 WPM;
Paper work is included. $12

Gordon West "Radio School" code tape
"10 WPM Plateau Breaker" $8

Vintage ARRL Licensing material:

ARRL License Manuals - $3 each
1977 - 76th edition - All classes
1979 - 77th edition - All classes
1984 - 79th edition - All classes
1984 - 80th edition - All classes
Technician Class - 1989 - First edition
General Class - 1989 - First edition
.........1997 - Second Edition
Advanced Class - 1985 - First edition
.........1990 - Third Edition
Extra Class - 1988 - Third edition

Tune in the World with Amateur Radio
1976 - First Edition - $3

Now You're Talking
1993 - 2nd edition - $10

Sam, Tab Publishing, and Hayden Vintage Licensing material:

General Class Amateur License Study Guide
By Phil Anderson, W0XI; published by Sams
First Edition - 1979 - $3

Amateur Radio General Class License Study Guide
By Jim Kyle and Ken Sessions; Tab Publishing
1975 - 2nd edition - $3

Amateur Radio Advanced Class License Study Guide
By Jim Kyle and Ken Sessions; Tab Publishing
1975 - 2nd edition - $3

Hayden "Radio Operator's License Q & A Manual" by Kaufman
For commercial tests - Eighth Edition - 1976
About 1 1/2 inches thick - $5

Sams Photofact "Master Index"
Lists what is in the various Sam's Photofacts as of
Aug 1960 - Good condition - $8

"Installing your Own Telephones"
By Radio Shack - 3rd edition - 1989 - $3

Repeater Directories - $3 each
1982-83
1983-84
1987-88
1989-90
1999-2000
2000-01

US Repeater MapBook
Includes Repeater Directory, with maps showing their location
For US, Canada, and Mexico - Sixth Edition - $5

Prices do not include shipping from Florida.
Media Mail shipping is relatively inexpensive.

Thanks.

5023. for sale: kenwood th-k2at

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-01-31 02:54:31 UTC
From: n0vpd
Topic: 5023 Message: 5023

with the ht you get a home charger, a car charger, antenna cable to convert to a s0-239 to use on a base or mobile antenna with a pl-259 connector, and a speaker mic, and manual. transmits on 146-148 mhz. receive on 136-174 mhz. original box. all in excellent condition. $125.00 plus shipping and insurance.

5024. 2 meter rigs and accessories FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-01-31 15:01:26 UTC
From: Ken Simpson, W8EK
Topic: 5024 Message: 5024

Two meter rigs and accessories For Sale:

Two meter FM Transceiver:

KDK FM-2033 mobile FM transceiver for 2 meters

This rig produces just over 25 Watts in high power and
about 7 watts in low power. The rig is fully synthesized,
has memories, scan, subaudible PL tone, and all the things
that one expects in a 2 meter rig. It has a touchtone
microphone with it. It sounds great, and hears well.
It needs 13 V DC at about 7 amps.

This particular rig is in very nice condition. There is
one paint spot missing, about the size of a pin head. It
includes the touchtone microphone, mobile mounting bracket,
power cord, and paper work. The original box is also included,
although the box looks much worse than the radio. Even the
mic clip, and a bag of screws are included, as is the
original multicolored sales brochure. $89

MFJ 810 VHF Wattmeter / SWR Bridge
Similar to the MFJ 816 listed above, but for the 2 meter
and 220 MHz VHF bands. A web site says it is the same as
the MFJ 812.
This particular unit works fine, and looks fine also.
With paper work for $25.

Ameco Model BIU, SWR Bridge
This is apparently an older unit that matches much of the boat
anchor gear, except this one looks very close to new. Of course
it works fine also.
The meter unit is in a very nice light gray / dark gray enclosure,
with a remote sense unit which has copper plating (still shiny).
There are provisions for using a second remote sensor and switching
between the two. This sensor is model SWB, and says it is good to
225 Mc. Of course it is for 50 ohm systems, and has an SO-239 on
each end of the sensor. $50

MFJ 260 dry dummy load
Rated at 300 watts by MFJ, but it has the derating curve on
the enclosure which shows that it is only good for 300 watts
for about 30 seconds. It is good for 100 Watts for about
1 and a half minutes, which is likely the way most of us
would use it. It is good for 25 watts for about 6 minutes.
Although most of us would likely use it for HF rigs, it can
be used on VHF rigs as well. It is rated for under 1.1 to 1

SWR to 30 MHz and usable up to 650 MHz with under 1.3 to 1
SWR. PL-259 connector.
I measured the actual value, and it shows 50.6 ohms. It is
hard to get much closer to 50 ohms that that!
With paper work for $30.

DTMF Touch Tone Microphones:

Kenwood MC-46 DTMF Microphone
Touch tone DTMF microphone with 6 pin connector, as used
on TR-7730, TR-7800, TR-7850, TR-7930, TR-7950, TR-8400,
TR-9000, TR-9130, and others. Up-down switch on top. Of
course the connector could be changed to an 8 pin connector
to use on other rigs. This one works 100%, and includes
paper work in the original box for $45.

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently
has a 6 pin connector for the KDK 2030, but that can
be changed. Nice condition. $40

Drake 1525 EM Touchtone Microphone
Normal hand mic from the front, but has a touchtone pad
on the back. Four pin mic plug. Used, but in good shape.
Includes paper work. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
With paper work for $40.

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Regular (non DTMF) Microphones:

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires
polarizing voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic
mic is needed. Stripped and tinned leads.

It works fine, and looks good also. $25

Icom charger and battery:

Icom BC-35 desk charger
The BC-35 will fast charge the BP-2, BP-5, BP-7, and BP-8
battery packs. It will also charge the BP-3 and BP-4, but
these take 12 to 15 hours. It works 100% and looks fine
as well. $35

Rebuilt Battery for Icom IC-2AT, IC-02 AT, etc.
Equivalent to a BP-5 plus.
This battery will work on an Icom IC-2AT, 3AT, 4AT, 02AT,
03AT, 04AT, and probably other Icom HTs. It will also
work on many Radio Shack HTs (the ones that use the Icom
battery packs).
This pack was rebuilt about 6 weeks ago, and is a 7.2 Volt
pack with 1600 Mahr capacity NiMH batteries. That means
it will produce "normal" power with your HT, but lasts about
5 times as long as the original BP-3 battery pack. $30

Speaker Microphones:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Kenwood SMC-32 Speaker Microphone
Fits TH-215, 225, 235, 425, and many others. It has a
right angle, "L" shaped connector on it.
This one works fine and looks really great. $25

Accessories for several Kenwood HTs:

Kenwood PG-3 E DC Cord
This cord plugs into the cigarette lighter to provide 12 V DC
to the TH-215, TH-225, TH-415, and other Kenwood HTs. It has
a filter built in, and permits high power operation of the HTs.
$20

Kenwood BH-2 Belt Clip for TH-215, TH-225, TR-2500, TR-2600,
and others $8

Kenwood SC-12 Vinyl Case
For TH-215, TH-225 and others, with room for the standard PB-2
and PB-3 battery packs. Black color. In very nice condition. $15

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and
PB-4 battery packs. It can also be used with the smaller PB-2 and
PB-3 battery packs, by putting a filler in the case. Black color.
In very nice condition. $15

Bianchi Real Leather Case for TH-215, TH-225, etc.
For use with the larger PB-1 and PB-4 batteries, but can be used with the smaller PB-2 and PB-3 batteries. This is real leather, tan in color, and is in very nice condition. $25

Accessories specific to the Kenwood TH-21 / 31 / 41 series HTs:

Kenwood PB-21 battery pack for TH-21/31/41 series HTs
This battery pack does not hold a charge well. Physically it is fine, but it needs a new "insert". With paper work for $10

Special rubber duck antenna for Kenwood TH-21 HT with threaded connector
Kenwood RA-6 regular, 6.6 inches long - $10
As above but for TH-41 HT, 440 MHz - Stubby - $15

Accessories specific to the Kenwood TR-2400 HT:

Belt clip for TR-2400 HT, complete with hardware - $8

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually, one must have the battery inside the HT, but this lets you charge a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. This adapter can be used on any HT with a BNC connector. $5

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case. It fits most of the Santec HTs, such as the HT-1200, ST-142, ST-144, ST-440, etc. The real leather case includes a built in belt clip, plus a removable leather shoulder strap.
The case itself is in very nice shape. The leather shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a service pack. It has schematics, circuit explanations, voltages, etc. $18

Belt Clips for various HTs -- All include the hardware with the belt clip

$8 each
Kenwood BH-2 for TH-215, TH-225, TR-2500, TR-2600, and others
Kenwood TR-2400
Motorola
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

Antennas and antenna related items for sale:

Two meter mobile antenna:

Cushcraft Magnetic Mount 5/8 wave, 3 db gain antenna for 2 meters
Consists of a heavy duty mag mount, with coax, and the antenna
and spring.
It works fine and looks fine also. $50

Gain antenna coil, spring and whip
The antenna is a 5/8 wave antenna for 2 meters, which
has a gain of about 3 db. The coil can be used with any
of the NMO mounts (made by Motorola, Larsen, Cushcraft
and many others). The antenna is approximately four feet
long, and is in good condition. $30

As above, but without the whip.
The whips are hard to ship, so you might want only the coil
and spring, and obtain a whip locally. $25

Larsen NMO-MM Mag Mount
This rectangular mag mount features an extremely strong magnet.
Any of the NMO antennas made by Larsen, Motorola, Cushcraft, and
many others will fit on it. It includes coax, with an N connector
on it. It is in great condition for $22.

Cushcraft CSMG NMO Magnetic Mount
This is a strong, round, magnetic mount which can be used with
any NMO antenna. Coax is included, with a PL-259 on the end.
Nice condition for $20.

Larsen VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.
All fit the Larsen NLA mount, which is a mount that
is proprietary to Larsen.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on the
70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $7

Larsen Q
Fits a 5/16 inch stud, such as the Larsen LM mount, and others.
It can be cut for 2 meters, 220 MHz, or 450 MHz bands. $7

Larsen NMO-Q
Precut for 450 MHz. New, still in bag. $8

Avanti / Antenna Specialists "On Glass" antennas:

These antennas were made by Avanti, and then later by
Antenna Specialists, to mount on a windshield, or other
glass. They do not require a ground plane, as they are
1/2 wave antennas, rated to have 3 db gain. They are
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Rubber Duck Antennas for your HT:

All are for 2 meters, are in very nice condition, and
are $10 each, unless stated otherwise.

BNC Connector, 4.6 inches long

5/16 inch threaded, as used by Motorola and others
Regular, 5.7 inches long
Stubby, 4 inches long

Type F connector, 6.5 inches long

PL-259 connector, 6.5 inches long
HyGain 275, still sealed in original packaging
from when I bought it 20 or 25 years ago

PL-259 connector - Stubby, 4.6 inches long
Centurion, still sealed in original package
from when I bought it 20 or 25 years ago

Special Rubber Duck antennas for Kenwood TH-21 series
2 meter HTs with the threaded connector
Kenwood RA-6 regular, 6.6 inches long
As above but for TH-41 HT, 440 MHz, Stubby, $15

Alinco EA-0085 for 220 MHz
BNC connector, 5.6 inches long

Prices do not include shipping from Florida.

Thanks.

Hello all this is KD8DVY and I was wondering if anyone has a CT-39 Packet Cable and a CT-62 CAT Interface Cable that they are willing to part with? If not then can anyone help me build a homebrew version of these cables?

I am trying to program my 817 and use it with my computer as my base unit. I know some of you are asking why but this is all I have and all I can work at this time.

I know that the cables are around $24.99 each but I just don't have it at this time and I am not sure when I will have the funds.

Thank you all for all the ideas, inputs, and advice this is what ham is really all about.

Not a legal FCC certified rig. In fact that radio is illegal to use, illegal to sell, illegal to import and manufacture in the USA.. That is,it is not a CB rig, not type accepted nor a ham rig as it is not FCC certified. Many commercial places busted by the FCC recently for selling this stuff.

Just a thought and a note for any new ham wanting to buy this and letting them know to stick with good quality ham radios, Ten Tec, Icom etc.

FS: HENRY-TEMPO VHF/One+ 2M FM-SSB
The main rig is a synthesized 2M FM 25W mobile rig with microphone,
power cable, and manual.
The somewhat scarce accessory is a SSB adapter with cables and mounting
bracket to connect to the main rig.
Tested working but as-is. Asking $125. or reasonable offer plus the
actual cost to ship to you.

5037. Wanted: 6-Pin Power Connector

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-02-18 15:27:25 UTC
From: kd4e
Topic: 5037 Message: 5037

I need a couple of standard 6-pin Molex-type power connectors.
This is the connector used on modern Kenwood, Icom, & Yaesu rigs.

A clean used connector, new old stock, or one with a short cable
would be fine.

Best price I have found for the correct connector is $5. each (plus
shipping) at http://www.pl259.com - Tower Electronics.

If you are coming to the Brooksville Fest this Saturday we can meet.

5042. Antennas and many antenna related items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-02-21 12:26:52 UTC
From: Ken Simpson, W8EK
Topic: 5042 Message: 5042

Antennas and antenna related items for sale:

HyGain BN-86 Antenna Balun
The HyGain BN-86 Balun is a 1:1 balun that may be used on beam antennas or on dipoles. HyGain used it with the TH-6 Tribanders (plus many others), but it has many more uses on most any type of antenna between 3 and 30 MHz.
The spec sheet says it is good for 1500 W PEP, or 800 W average with less than 2:1 SWR. Power rating goes down with an increase in SWR.
It can be mounted directly to the boom of a beam with a U bolt, or it can be hung as an inverted V, or used as a straight dipole. To put it another way, it is very versatile.
This one works fine, and looks good also.
These are about $80 new. This one includes the paper work, for $40.

Wattmeters and SWR Bridges:

Heath HM-15 SWR Bridge For Sale:
It is an HF SWR Bridge, with SO-239 connectors on the back. The front has the meter on the left, and two knobs to the right. It is the same size as the HD-15 phone patch,and is made to compliment the Heath SB line.
This one works fine and is in extremely nice cosmetic shape.
Paper work included for $20.

MFJ 860 HF Wattmeter / SWR Bridge
This meter has the modern cross needle meter that will read both forward and reverse power at the same time, and hence SWR also. It is for 1.8 thru 60 MHz, and has scales for 300 Watts and 30 Watts full scale. If 12 V is applied, the meter is back lighted.
This particular unit works fine, and looks fine also.
With paper work for $45.

MFJ 812 B VHF Wattmeter / SWR Bridge
This meter covers 144 and 220 MHz. You can read forward and reflected power in 2 ranges - 30 or 300 Watts. It also reads SWR from 144 thru 220Mhz.
The MFJ-812B also reads relative field strength from 1 to 220 MHz. It has a binding post for the field strength antenna.
It is in a nice eggshell white and black case.
This one works fine and looks great also.
With paper work for $30.

MFJ 817 Cross Needle VHF Wattmeter / SWR Bridge
The MFJ-817 covers 2 meters VHF and 440 MHz UHF. The extra large 3 inch Cross Needle Meter reads SWR and peak/average for forward and reflected power. Power ranges: 200/2 Watts forward and 50/5 Watts reflected. Reads SWR from 1:1 and 8:1. SO-239 connectors. There is a switch for dial illumination (requires 12 V DC).
This one works fine and looks nice with its black face.
These are over $100 new, but you can have this one for $60.

Antenna Switch:

B & W Model 550 A coax switch
This model will switch up to 5 antennas, and does NOT ground unused antennas. It has SO-239 connectors on the sides, with the coax coming out like spokes of a wheel.
This particular switch has the optional B & W plate installed that has the antennas labeled with 28, 21, 14, 7, and 3.5 on the dial.
Of course it works fine, and look OK also.
$40

Two meter mobile antenna:

Cushcraft Magnetic Mount 5/8 wave, 3 db gain antenna for 2 meters
Consists of a heavy duty mag mount, with coax, and the antenna and spring.
It works fine and looks fine also. $50

Gain antenna coil, spring and whip
The antenna is a 5/8 wave antenna for 2 meters, which has a gain of about 3 db. The coil can be used with any of the NMO mounts (made by Motorola, Larsen, Cushcraft and many others). The antenna is approximately four feet long, and is in good condition. $30

As above, but without the whip.
The whips are hard to ship, so you might want only the coil and spring, and obtain a whip locally. $25

Larsen NMO-MM Mag Mount
This rectangular mag mount features an extremely strong magnet. Any of the NMO antennas made by Larsen, Motorola, Cushcraft, and many others will fit on it. It includes coax, with an N connector on it. It is in great condition for $22.

Cushcraft CSMG NMO Magnetic Mount
This is a strong, round, magnetic mount which can be used with any NMO antenna. Coax is included, with a PL-259 on the end.
Nice condition for $20.

Larsen VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.
All fit the Larsen NLA mount, which is a mount that
is proprietary to Larsen.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on the
70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $7

Larsen Q
Fits a 5/16 inch stud, such as the Larsen LM mount, and others.
It can be cut for 2 meters, 220 MHz, or 450 MHz bands. $7

Larsen NMO-Q
Precut for 450 MHz. New, still in bag. $8

Avanti / Antenna Specialists "On Glass" antennas:

These antennas were made by Avanti, and then later by
Antenna Specialists, to mount on a windshield, or other
glass. They do not require a ground plane, as they are
1/2 wave antennas, rated to have 3 db gain. They are
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

ARRL Antenna Book
1974, 13th edition, smaller size
pages show yellowing $8

W2AB's "Second Op"
This is the large (about a foot in diameter) "wheel"
that has a lot of DX information on it.
By turning the wheel to the call sign prefix, the continent,
zone, and country is shown, along with great circle beam
headings from different parts of the country. In another
area, postage rates are shown, but I am certain that info
is outdated.
This is the "New 7th Edition - Fully Computer Revised".
It is in good condition. $10

Rubber Duck Antennas for your HT:

All are for 2 meters, are in very nice condition, and
are $10 each, unless stated otherwise.

BNC Connector, 4.6 inches long

5/16 inch threaded, as used by Motorola and others
Regular, 5.7 inches long
Stubby, 4 inches long

Type F connector, 6.5 inches long

PL-259 connector, 6.5 inches long
HyGain 275, still sealed in original packaging
from when I bought it 20 or 25 years ago

PL-259 connector - Stubby, 4.6 inches long
Centurion, still sealed in original package
from when I bought it 20 or 25 years ago

Special Rubber Duck antennas for Kenwood TH-21 series
2 meter HTs with the threaded connector
Kenwood RA-6 regular, 6.6 inches long
As above but for TH-41 HT, 440 MHz, Stubby, $15

Alinco EA-0085 for 220 MHz
BNC connector, 5.6 inches long

Hustler HF mobile antenna resonators:

Standard 400 Watt Hustler resonators
15 meter resonator RM-15 $14
10 meter resonator RM-10 Still sealed in original package $15

"Super" high power resonators (good for 2 KW PEP)
80 meter RM-80 S
.....can be cut for CW or phone, and also used on 4BTV
.....Vertical to give 80/75 meter coverage $38
15 meter RM-15 S $18
10 meter RM-10 S $16

All work fine and are in great cosmetic condition.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation in
the 40 MHz region, where many TVs have their IF. It is good for
1000 Watts "average" according to the manual, and has over 80
db attenuation at 41 MHz. This one looks great, and includes
the paper work with it. $ 35

Nye Viking Low Pass Filter Model 020-001
This filter is rated at 2000 watts, with over 65 db of attenuation above 57 MHz. These are about $60 new; this one is close to new for only $35.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut off frequency of 45 MHz and 75 db of attenuation. It is rated to take 1000 Watts of AM, or 5000 Watts PEP SSB. It has SO-239 connectors on each end. $35.

B & W model 426 low pass filter
B & W TVI filter, cuts off just above 10 meters, and will handle 1500 Watts. SO-239 connector on each end. This is an older model that seems much heavier duty. It weighs almost twice as much as the newer model, and looks like it would take more power. It likely was made in the days that plate modulated AM was the rule. $30

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters, and will handle 1500 Watts. SO-239 connector on each end. This is the latest model B & W filter. It is in very nice condition; it looks very close to new. $ 40.

Coax connectors and adapters:
Prices are per connector.
Several of each are available.

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male (PL-259) connection - $5

Prices do not include shipping from Florida.

Thanks.

I am planning on selling my absolutely mint 7700. If it has an hour air time (listening and maybe several minutes transmitting to ensure it works) that would surprising. Everything that came with the radio is included and the manual is still in it's original wrapping, original boxes, etc. I am not looking to trade and I would prefer someone local in the Chicagoland area who can come and look at it and purchase it. I am not adverse to selling it to someone outside the Chicagoland area, but, the shipping costs will have to be added. The unit was purchased the end of May or the beginning of June. Serious interested parties only, please contact me off line.

5053. Wanted: Amateur Radio Car Tags / Licence Plates

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-03-06 21:48:40 UTC
From: vk5pkm@y7mail.com
Topic: 5053 Message: 5053

Hi Everyone,

Looking for ideas.

Australian Ham in the USA, just moved here from Australia and I want to start collecting Amateur Radio Car Tags / Licence Plates for my Ham Shack.

We dont have them in Australia so its quite a novelty to see them.

Have posted a few ads on QTH but no response, but have had some negative comments. Is there something I'm doing wrong?

Looking for ALL USA States in any condition.

Any Hams that might have one to spare, please contact me with details.

Interested in collecting general USA Car tags (Expired of Course) as well.

Thanks for Looking.

73's.

Paul - N1AUS / VK5PKM

a very nice original drake L 4 AMPLIFIER AND POWER SUPPLY, the owner passed away in 1976 and it was put in a steel cabinet untill i purchased it a couple of months ago. collector quality
i am a cb person and was going to use it for that but this belongs to ham radio and a collector of drake equipment, the rental home i am in does not have 220 electric and a already over taxed 110 circuit, as stated this amp has not been powered up since its original owner passed in 1976. it is clean
am taking offers or trades? contact jim at jacobs132@... or cell #908-278-2350

5055. 2 meter mobile, HT, and accessories FS

Yahoo group: ham4sale (2007 — 2015)

Two meter rigs and accessories For Sale:

Two meter FM Transceiver:

KDK FM-2033 mobile FM transceiver for 2 meters
This rig is fully synthesized, has memories, scan, subaudible
PL tone, and all the things that one expects in a 2 meter rig.
It has a touchtone microphone with it. This rig produces just
over 25 Watts in high power and about 7 watts in low power.
It sounds great, and hears well.
It needs 13 V DC at about 7 amps.

This particular rig is in very nice condition. There is
one paint spot missing, about the size of a pin head. It
includes the touchtone microphone, mobile mounting bracket,
power cord, and paper work. The original box is also included,
although the box looks much worse than the radio. Even the
mic clip, and a bag of screws are included, as is the
original multicolored sales brochure. $89

Kenwood TH-215, 2 meter HT
Covers the 2 meter band with up to 7 W output power. Of course it
has memories, scan features, and the things one expects in an HT.
Subaudible (PL, CTCSS) tones are built in and can be adjusted from
the keypad. A 16 digit touchtone (DTMF) pad is built in. The HT can
be powered by the PG-3 E cord from 13 V DC to provide full 7 watt
output. This one is in very nice condition. It includes a battery
tray in which you can add six AA cells. This permits use of alkaline,
NiMH, or NiCad cells. Also included is a rubber duck antenna, and
paper work for $75.

MFJ 817 Cross Needle VHF Wattmeter / SWR Bridge
The MFJ-817 covers 2 meters VHF and 440 MHz UHF. The extra large
3 inch Cross Needle Meter reads SWR and peak/average for forward
and reflected power. Power ranges: 200/2 Watts forward and 50/5
Watts reflected. Reads SWR from 1:1 and 8:1. SO-239 connectors.
There is a switch for dial illumination (requires 12 V DC).
This one works fine and looks nice with its black face.
These are over $100 new, but you can have this one for $60.

Antenna Switch:

B & W Model 550 A coax switch
This model will switch up to 5 antennas, and does NOT
ground unused antennas. It has SO-239 connectors
on the sides, with the coax coming out like spokes
of a wheel.

This particular switch has the optional B & W plate
installed that has the antennas labeled with 28, 21,
14, 7, and 3.5 on the dial.
Of course it works fine, and looks OK also.
$40

MFJ 1272 BZ switch to transfer between microphone and TNC

MFJ made these so it would be easy to use a TNC such as the
AEA PK-88. The small box has a socket to plug your microphone
into on the front, along with a switch to switch between mic
or TNC. There are two cables coming out of the back, with one
going to the mic jack on your rig, and other going to your TNC.
There is also provision for receive audio in, and an external
speaker. No power is required. Inside the box is a series of
jumpers, so that it can be configured for any rig.

This model is made to switch between an AEA PK-88, and any rig
with the round 8 pin mic connector.

Paper work is included that shows how to set the jumpers for
most of the common rigs (Kenwood, Yaesu, Icom, Alinco, etc.).

It is in A-1 shape, and works 100%. $30

DTMF Touch Tone Microphones:

Drake 1525 EM Touchtone Microphone
Normal hand mic from the front, but has a touchtone pad
on the back. Four pin mic plug. Used, but in good shape.
Includes paper work. $35

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently
has a 6 pin connector for the KDK 2030, but that can
be changed. Nice condition. $40

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
With paper work for $40.

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Regular (non DTMF) Microphones:

Drake hand microphone
This is like the hand mic that came with the Drake TR-72,
TR-22 C, TR-33 C, and others. It has the standard 4 pin plug
wired for Drake/Kenwood, and is a 500 ohm mic. Of course it
could be used on an HF rig as well as a 2 m rig. It looks
great and works fine. $30

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires
polarizing voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic
mic is needed. Stripped and tinned leads.
It works fine, and looks good also. $25

Icom charger:

Icom BC-35 desk charger
The BC-35 will fast charge the BP-2, BP-5, BP-7, and BP-8
battery packs. It will also charge the BP-3 and BP-4, but
these take 12 to 15 hours. It works 100% and looks fine
as well. $35

Speaker Microphones:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Yaesu YM-24 A speaker mic.
Fits FT-207, 208, plus many others. It has the odd
little round connector on it like Yaesu, Wilson, Santec,
and others used in the 1970s and 80s.
This particular unit works fine, and looks great also. $20

Accessories for several Kenwood HTs:

Kenwood PG-3 E DC Cord
This cord plugs into the cigarette lighter to provide 12 V DC
to the TH-215, TH-225, TH-415, and other Kenwood HTs. It has
a filter built in, and permits high power operation of the HTs.
$20

Kenwood BH-2 Belt Clip for TH-215, TH-225, TR-2500, TR-2600,
and others $8

Kenwood SC-12 Vinyl Case
For TH-215, TH-225 and others, with room for the standard PB-2
and PB-3 battery packs. Black color. In very nice condition. $15

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and PB-4 battery packs. It can also be used with the smaller PB-2 and PB-3 battery packs, by putting a filler in the case. Black color. In very nice condition. $15

Bianchi Real Leather Case for TH-215, TH-225, etc.
For use with the larger PB-1 and PB-4 batteries, but can be used with the smaller PB-2 and PB-3 batteries. This is real leather, tan in color, and is in very nice condition. $25

Accessories specific to the Kenwood TH-21 / 31 / 41 series HTs:

Antenna adapter for Kenwood TH-21 / 31 / 41 HTs
This adapts the antenna connector found on these HTs to a standard BNC connector. $5

Special rubber duck antenna for Kenwood TH-21 HT with threaded connector
Kenwood RA-6 regular, 6.6 inches long - $10
As above but for TH-41 HT, 440 MHz - Stubby - $15

Accessories specific to the Kenwood TR-2400 HT:

Belt clip for TR-2400 HT, complete with hardware - $8

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually, one must have the battery inside the HT, but this lets you charge a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. This adapter can be used on any HT with a BNC connector. $5

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case. It fits most of the Santec HTs, such as the HT-1200, ST-142, ST-144, ST-440, etc. The real leather case includes a built in belt clip, plus a removable leather shoulder strap.
The case itself is in very nice shape. The leather shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Belt Clips for various HTs -- All include the hardware with
the belt clip
$8 each
Kenwood BH-2 for TH-215, TH-225, TR-2500, TR-2600, and others
Kenwood TR-2400
Motorola
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

Antennas and antenna related items for sale:

Two meter mobile antenna:

Cushcraft Magnetic Mount 5/8 wave, 3 db gain antenna for 2 meters
Consists of a heavy duty mag mount, with coax, and the antenna
and spring.
It works fine and looks fine also. $50

Gain antenna coil, spring and whip
The antenna is a 5/8 wave antenna for 2 meters, which
has a gain of about 3 db. The coil can be used with any
of the NMO mounts (made by Motorola, Larsen, Cushcraft
and many others). The antenna is approximately four feet
long, and is in good condition. $30

As above, but without the whip.
The whips are hard to ship, so you might want only the coil
and spring, and obtain a whip locally. $25

Larsen NMO-MM Mag Mount
This rectangular mag mount features an extremely strong magnet.
Any of the NMO antennas made by Larsen, Motorola, Cushcraft, and
many others will fit on it. It includes coax, with an N connector
on it. It is in great condition for $22.

Cushcraft CSMG NMO Magnetic Mount
This is a strong, round, magnetic mount which can be used with
any NMO antenna. Coax is included, with a PL-259 on the end.
Nice condition for $20.

Larsen PO-MM Mobile Antenna Mag Mount
This rectangular mag mount features an extremely strong magnet.
The center of the mag mount has an SO-239 connector, which
means any antenna with a PL-259 can be used with it.
It includes coax, with a PL-259 connector on it.

It is in good condition for $17.

Larsen VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on the
70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $7

Larsen Q
Fits a 5/16 inch stud, such as the Larsen LM mount, and others.
It can be cut for 2 meters, 220 MHz, or 450 MHz bands. $7

Larsen NMO-Q
Precut for 450 MHz. New, still in bag. $8

Avanti / Antenna Specialists "On Glass" antennas:

These antennas were made by Avanti, and then later by
Antenna Specialists, to mount on a windshield, or other
glass. They do not require a ground plane, as they are
1/2 wave antennas, rated to have 3 db gain. They are
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Rubber Duck Antennas for your HT:

All are for 2 meters, are in very nice condition, and
are $10 each, unless stated otherwise.

5/16 inch threaded, as used by Motorola and others
Regular, 5.7 inches long
Stubby, 4 inches long

Type F connector, 6.5 inches long

PL-259 connector, 6.5 inches long
HyGain 275, still sealed in original packaging
from when I bought it 20 or 25 years ago

PL-259 connector - Stubby, 4.6 inches long
Centurion, still sealed in original package
from when I bought it 20 or 25 years ago

Special Rubber Duck antennas for Kenwood TH-21 series
2 meter HTs with the threaded connector
Kenwood RA-6 regular, 6.6 inches long
As above but for TH-41 HT, 440 MHz, Stubby, $15

Alinco EA-0085 for 220 MHz
BNC connector, 5.6 inches long

Coax connectors and adapters:
Prices are per connector.

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Kantronics "Interface II" Terminal Unit
This unit is made to copy RTTY signals, and feed the output
to a computer. To quote the brochure that is included with it,
it is "designed by the Kantronics team to give the discerning
operator excellent performance."
It features 170, 425, and 850 shift on both transmit and receive.
An AFSK generator is built in, or FSK can be used. It has two
separate channels for use with 2 rigs. For optimum reception,
a six pole filter is changed as the shift is changed. It requires
12 V DC at about 200 ma to operate.
These were originally about $270. You can get this one with
the paper work for only $30.

Prices do not include shipping from Florida.

Thanks.

5057. Wanted: Kenwood hand mic

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-03-09 01:56:35 UTC
From: Pete Theer
Topic: 5057 Message: 5057

I am posting for a friend who has no internet or computer. He has a Kenwood TM-201B 2 meter mobile and the microphone is falling apart. It has touch tone pad on the back and up-down buttons on top.

It has an 8 pin round screw-on connector.

He says he'd gladly buy a non-working radio just to get the mic.

The part # of the mic according to the User Manual is: T91-0359-15, but I feel sure others with 8 pin connector will work, maybe even without tone pad.

Thanks,
Pete

5058. Wanted: Vibroplex Collector's Guide

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-03-09 15:08:29 UTC
From: Pete Theer
Topic: 5058 Message: 5058

Hi gang,

I am looking for a copy of the "Vibroplex Collector's Guide" by Tom French. He's SOLD OUT on the website. I just picked up (sight unseen)a 1944 Original (S# 135,623) ($25!!) and things don't add up. Someone has changed the finger pieces (clear oval), but it has a black crackle base, red circuit closer knob and copper braid between the lever and frame (squared off frame, too, not rounded). At first I thought it was a WWII Deluxe Original, but they are said to have a "Battleship Gray" base. The name plate is standard Vibroplex style of the times (with patent #s) but does NOT appear to be brass (gray metal).

If anyone has a copy of the Vibroplex Collector's Guide they can do without, please contact me off-list at k5prt(at)arrl(dot)net.

Thanks,
Pete

5059. Seeking some odds & ends

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-03-09 18:02:02 UTC
From: wc6w
Topic: 5059 Message: 5059

Odd parts I'm seeking to complete a couple of radio projects:

16 MB, 30 Pin, SIMM, DRAM Modules (2 pieces)

The Top & Bottom front frame rails including their mounting ears, from a 17" wide Hewlett Packard Series 1 (1970's) instrument case with a flat, rather than formed, front panel. The 140 & 141 display frames are part of this group.

Comet CV01C-250G-10KV, 250pF 10KV vacuum variable capacitor or a Jennings of similar size & specs if they ever made one.

Jennings -- Y1 (or CY-1), 1pF fixed, vacuum cap; prefer glass over ceramic, they're cuter!

Jennings -- JCSF-150-15 vacuum capacitor.

A Motorola MRF511 or perhaps a MRF587, 2N5947, 2N6135, ECG 76 or NTE 76

& one page of the schematic of either a Collins 671U, 718U or a 651S Receiver showing the mechanical filters and their matching networks.

73 & Good morning,
Marv WC6W

Topic: 5060 Message: 5060

Does anyone have the instructions for a Vanco SWR-3 meter/tuner ?

Les, K2TGW

5061. FS/FT: 900 MHz Duplexer

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-03-10 14:56:33 UTC
From: Mark
Topic: 5061 Message: 5061

I have a friend who has one of these, and is looking to either exchange it for a VHF duplexer (160 MHz, capable of a split of approx. 800 kHz at 50W) or funds in order so he can buy a VHF duplexer.

TX-RX
<http://birdtechnologies.thomasnet.com/item/cavity-filters/vari-notch-174-cavity-filters/15-88-12?&plpver=10&origin=keyword&by=prod&filter=0> 15-88-12
To save time, this is a two-cavity duplexer for approx. 896 - 930 MHz.

If you have an interest in it, I can put the two of you in touch with each other. (He is not a subscriber to the list.)

Thanks,

Mark - N9WYS

Topic: 5064 Message: 5064

HF and related accessories For Sale:

Antenna Switch:

B & W Model 550 A coax switch
This model will switch up to 5 antennas, and does NOT
ground unused antennas. It has SO-239 connectors
on the sides, with the coax coming out like spokes
of a wheel.
This particular switch has the optional B & W plate
installed that has the antennas labeled with 28, 21,
14, 7, and 3.5 on the dial.
Of course it works fine, and look OK also.
$40

HyGain BN-86 Antenna Balun
The HyGain BN-86 Balun is a 1:1 balun that may be used on
beam antennas or on dipoles. HyGain used it with the TH-6
Tribanders (plus many others), but it has many more uses on
most any type of antenna between 3 and 30 MHz.
The spec sheet says it is good for 1500 W PEP, or 800 W
average with less than 2:1 SWR. Power rating goes down with
an increase in SWR.
It can be mounted directly to the boom of a beam with a U
bolt, or it can be hung as an inverted V, or used as a straight
dipole. To put it another way, it is very versatile.
This one works fine, and looks good also.
These are about $80 new. This one includes the paper
work, for $40.

Hallicrafters S-120 Shortwave receiver

Hallicrafters S-120 vintage shortwave radio receiver
from the 1960's. Four Bands covering 550 KHz to 30 MHz.
It has a built in speaker and antenna for the broadcast
band. An external wire antenna is needed for the short
wave bands.
The receiver is working fine.
Signals are picked up on all four bands.
Cosmetically, it looks very, very, very nice. I can not
find a scratch on it, and all of the chrome looks great.
Even the telescoping antenna that was included with it
originally is still with it, as well as the paper stickers
glued inside and on the bottom of the cabinet. Of course
the fiber board rear cover is also on it.
Paper work is included for $95

MFJ 722 audio filter

This is an audio filter made to go between your rig
and speaker. It includes a bypass switch.

You can put it into a high pass mode, use it as a notch
filter, or as a narrow CW filter. It is great for both
SSB and CW, and appears to be similar to the Autek QF-1
audio filter, but is in a much nicer egg shell and
woodgrain enclosure.
It requires 12 V DC for operation.

For more info, please see
http://www.mfjenterprises.com/Produc...ductid=MFJ-722

This particular filter works fine, and looks OK also.
Paper work included for $45.

Microphones:

Drake hand microphone
This is like the hand mic that came with the Drake TR-72,
TR-22 C, TR-33 C, and others. It has the standard 4 pin plug
wired for Drake/Kenwood, and is a 500 ohm mic. Of course it
could be used on an HF rig as well as a 2 m rig. It looks
great and works fine. $30

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed.
Stripped and tinned leads.
It works fine, and looks good also. $25

Touch tone (DTMF) microphones:

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently
has a 6 pin connector for the KDK 2030, but that can
be changed. Nice condition. $40

Drake 1525 EM Touchtone Microphone
Normal hand mic from the front, but has a touchtone pad
on the back. Four pin mic plug. Used, but in good shape.
Includes paper work. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.

With paper work for $40.

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

CW items:

Special Deluxe CW Key
This first key is extremely nice, and is special in its
mounting. The key itself is a Nye Viking Speedex oval base
310-001 key, which sells new for $58 by itself, and has
very nice action. What separates this key from any others
is the base it is mounted on. It is solid metal about 6
inches long and 5 inches wide and 3/4 inch thick. It
weighs about 6 pounds, so it will not move across the
desk when you use it. There is a nice beveling around
the top. To put it another way, this is a specially
machined base, made for the key. The metal appears
to be copper, although it is not shiny copper, but
instead has a "patina" to it like antique items. A
layer of cork covers the bottom to protect your operating
table. There is a cable with a metallic shielded 1/4 inch
plug on it. This is certainly a one of a kind key. $95

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8
As above, but 1/8 inch (3.5 mm) plug. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Code Practice Key / Buzzer:

Herald Electronics Co. Model SW-12 A
"Telegraph Key with Buzzer"

This is a very vintage unit. It is in its original
box, with the paper work, with an address of simply
"Chicago, Ill", with no zip code, and not even a zone.
I would guess 1950's vintage, but of course that is a guess.

The unit consists of a code key built into a base that
appears to be bakelite. The key is somewhat similar to
a J-38 (without a shorting bar), with shiny nickel plated
knurled nuts. The key has a regular knob, and not a navy
knob. Behind the key is a round cover over the buzzer,
and behind that is a place for a single D cell battery.

The unit is complete with the original instruction sheet,
in the original box. $40

CW Related books and tapes:

Ameco Code Course
This book looks like it might be made to go with the Ameco
code records. There is general information about the code,
but portions of the book list what is being sent by the code
records. There is also a diagram about how to make a code
practice oscillator from a 50C5 and 35W4. There is no date
or edition on it, but the tube type CPO somewhat dates it! $5

ARRL Code Kit - 1976
This is the booklet only, that originally went with a kit of
cassette tapes. This has the info that is contained on the
tapes listed in it. If you have the tapes, and need the booklet
to go with it, this is for you. If you just want to read about
it, this is great also. $2

The ARRL Training Program - Official Novice Student Workbook
No date or edition, but it is designed for a 10 week course,
leading to a novice license. $3

These are original tapes, in their original container.

ARRL "Increasing Your Code Speed" 15 to 20 WPM
Two tape set with paper work included. $10

Gordon West "Radio School" code tape
"10 WPM Plateau Breaker" $6

TenTec Accessories:

Scout 555 / Argo 556 Band Module
Band module to add 40 meters (7 MHz) to the Scout or Argo.
Extremely nice condition for $65.

Power cable for Hercules 444 linear amplifier
This is the heavy cable that goes from the power supply
to the amp. It has a heavy duty 9 pin molex type
connector on both ends, and multiple runs of either
#12 or #14 wire, and is about 6 feet long.
It is in good shape. $18

Yaesu Hat
This "Ball Cap" has Yaesu on the front of it in big letters.

Actually, I have two. One is white and says only "Yaesu".
The other is dark red and says "Yaesu Communications".
Both have never been used. Your choice for $6.

Yaesu Log Book
Dark Red color, with picture of FT-1000 on inside.
International prefixes, and DXCC Country list also included,
along with about 50 double sided pages for logging.
Never used. $8

MFJ 1272 BZ switch to transfer between microphone and TNC

MFJ made these so it would be easy to use a TNC such as the
AEA PK-88. The small box has a socket to plug your microphone
into on the front, along with a switch to switch between mic
or TNC. There are two cables coming out of the back, with one
going to the mic jack on your rig, and other going to your TNC.
There is also provision for receive audio in, and an external
speaker. No power is required. Inside the box is a series of
jumpers, so that it can be configured for any rig.

This model is made to switch between an AEA PK-88, and any rig
with the round 8 pin mic connector.

Paper work is included that shows how to set the jumpers for
most of the common rigs (Kenwood, Yaesu, Icom, Alinco, etc.).

It is in A-1 shape, and works 100%. $30

Kantronics "Interface II" Terminal Unit For Sale:

This unit is made to copy RTTY signals, and feed the output
to a computer. To quote the brochure that is included with it,
it is "designed by the Kantronics team to give the discerning
operator excellent performance."

It features 170, 425, and 850 shift on both transmit and receive.
An AFSK generator is built in, or FSK can be used. It has two
separate channels for use with 2 rigs. For optimum reception,
a six pole filter is changed as the shift is changed. It requires
12 V DC at about 200 ma to operate.

These were originally about $270. You can get this one with
the paper work for only $30.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver and
before the antenna) to reduce harmonic interference.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut off

frequency of 45 MHz and 75 db of attenuation. It is rated to
take 1000 Watts of AM, or 5000 Watts PEP SSB. It has SO-239
connectors on each end. $35.

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each end.
This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. $40

Hustler HF mobile antenna resonators:

Standard 400 Watt Hustler resonators
15 meter resonator RM-15 $14
10 meter resonator RM-10 Still sealed in original package $15

"Super" high power resonators (good for 2 KW PEP)
80 meter RM-80 S
.....can be cut for CW or phone, and also used on 4BTV
.....Vertical to give 80/75 meter coverage $38
15 meter RM-15 S $18
10 meter RM-10 S $16

All work fine and are in great cosmetic condition.

ARRL Antenna Book
1974, 13th edition, smaller size
pages show yellowing $8

Call Area Map of the World
33 x 24 inches in size $5

W2AB's "Second Op"
This is the large (about a foot in diameter) "wheel"
that has a lot of DX information on it.
By turning the wheel to the call sign prefix, the continent,
zone, and country is shown, along with great circle beam
headings from different parts of the country. In another
area, postage rates are shown, but I am certain that info
is outdated.
This is the "New 7th Edition - Fully Computer Revised".
It is in good condition. $10

ARRL DXCC Countries List
Sept 1997 - marks in it $2

Ham Price Guide - 2nd Edition
Lists prices of used ham gear $5

AEA Items:

AEA AC-1 Power Supply
"Wall wort" 12 V DC power supply at 1 amp.

Can be used with PK-232 or PK-88.
It plugs directly into these units, or any with
a 2.1 mm coaxial connector, center positive.
It works 100% and looks great. $15

AEA Software
The followings is legitimate AEA software, with the
original disks with serial numbers, and original documentation.
It is not copied or "bootleg" software.
Log Windows, Version 2.0 - $15

Coax connectors and adapters:
Prices are per connector. These are connectors I have
accumulated over 40+ years, and not used.

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Prices do not include shipping from Florida.

Thanks.

Yaesu FTC-1540A 2M Mobile 40W FM Transceivers

Two rigs, one with the original Yaesu mic, one with a
Johnson-branded Shure hand mic. These were built for
commercial/public service use and may be operated
134-174MHz.

Both tested working and include a power cable dongle.
Each have two crystals, 147.840 & 152.975 MHz, five
more may be added. Also have one original manual
and one manual copy. Vol. & squelch, no tones.

Handy for car-to-car simplex on 2M or other mobile/base
communications.

Asking $45. each or will swap the pair for an older working
2/440 HT.

HF and related accessories For Sale:

MFJ 722 audio filter

This is an audio filter made to go between your rig
and speaker. It includes a bypass switch.

You can put it into a high pass mode, use it as a notch
filter, or as a narrow CW filter. It is great for both
SSB and CW, and appears to be similar to the Autek
audio filter, but is in a much nicer egg shell and
woodgrain enclosure.
It requires 12 V DC for operation.

For more info, please see
http://www.mfjenterprises.com/Produc...ductid=MFJ-722

This particular filter works fine, and looks OK also.
Paper work included for $45.

MFJ 812 B VHF Wattmeter / SWR Bridge

This meter covers 144 and 220 MHz. You can read forward and
reflected power in 2 ranges - 30 or 300 Watts. It also reads
SWR from 144 thru 220Mhz.

The MFJ-812B also reads relative field strength from 1 to 220
MHz. It has a binding post for the field strength antenna.

It is in a nice eggshell white and black case.
This one works fine and looks great also.

With paper work for $30.

Microphones:

Drake hand microphone
This is like the hand mic that came with the Drake TR-72,
TR-22 C, TR-33 C, and others. It has the standard 4 pin plug
wired for Drake/Kenwood, and is a 500 ohm mic. Of course it
could be used on an HF rig as well as a 2 m rig. It looks
great and works fine. $30

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed.
Stripped and tinned leads.
It works fine, and looks good also. $25

Touch tone (DTMF) microphones:

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently
has a 6 pin connector for the KDK 2030, but that can
be changed. Nice condition. $40

Drake 1525 EM Touchtone Microphone
Normal hand mic from the front, but has a touchtone pad
on the back. Four pin mic plug. Used, but in good shape.
Includes paper work. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
With paper work for $40.

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

CW items:

Special Deluxe CW Key
This first key is extremely nice, and is special in its
mounting. The key itself is a Nye Viking Speedex oval base
310-001 key, which sells new for $58 by itself, and has
very nice action. What separates this key from any others
is the base it is mounted on. It is solid metal about 6
inches long and 5 inches wide and 3/4 inch thick. It
weighs about 6 pounds, so it will not move across the
desk when you use it. There is a nice beveling around
the top. To put it another way, this is a specially
machined base, made for the key. The metal appears
to be copper, although it is not shiny copper, but
instead has a "patina" to it like antique items. A
layer of cork covers the bottom to protect your operating
table. There is a cable with a metallic shielded 1/4 inch
plug on it. This is certainly a one of a kind key. $95

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8
As above, but 1/8 inch (3.5 mm) plug. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Code Practice Key / Buzzer:

Herald Electronics Co. Model SW-12 A
"Telegraph Key with Buzzer"

This is a very vintage unit. It is in its original
box, with the paper work, with an address of simply
"Chicago, Ill", with no zip code, and not even a zone.
I would guess 1950's vintage, but of course that is a guess.

The unit consists of a code key built into a base that
appears to be bakelite. The key is somewhat similar to
a J-38 (without a shorting bar), with shiny nickel plated
knurled nuts. The key has a regular knob, and not a navy
knob. Behind the key is a round cover over the buzzer,
and behind that is a place for a single D cell battery.

The unit is complete with the original instruction sheet,
in the original box. $40

CW Related books and tapes:

Ameco Code Course
This book looks like it might be made to go with the Ameco
code records. There is general information about the code,
but portions of the book list what is being sent by the code
records. There is also a diagram about how to make a code
practice oscillator from a 50C5 and 35W4. There is no date
or edition on it, but the tube type CPO somewhat dates it! $5

ARRL Code Kit - 1976
This is the booklet only, that originally went with a kit of
cassette tapes. This has the info that is contained on the
tapes listed in it. If you have the tapes, and need the booklet
to go with it, this is for you. If you just want to read about
it, this is great also. $2

The ARRL Training Program - Official Novice Student Workbook
No date or edition, but it is designed for a 10 week course,
leading to a novice license. $3

These are original code tapes, in their original container.

ARRL "Increasing Your Code Speed" 15 to 20 WPM
Two tape set with paper work included. $10

Gordon West "Radio School" code tape
"10 WPM Plateau Breaker" $6

TenTec Accessories:

Scout 555 / Argo 556 Band Module
Band module to add 40 meters (7 MHz) to the Scout or Argo.
Extremely nice condition for $65.

Power cable for Hercules 444 linear amplifier
This is the heavy cable that goes from the power supply
to the amp. It has a heavy duty 9 pin molex type
connector on both ends, and multiple runs of either
#12 or #14 wire, and is about 6 feet long.
It is in good shape. $18

Yaesu Hat
This "Ball Cap" has Yaesu on the front of it in big letters.
Actually, I have two. One is white and says only "Yaesu".
The other is dark red and says "Yaesu Communications".
Both have never been used. Your choice for $6.

MFJ 1272 BZ switch to transfer between microphone and TNC

MFJ made these so it would be easy to use a TNC such as the
AEA PK-88. The small box has a socket to plug your microphone
into on the front, along with a switch to switch between mic
or TNC. There are two cables coming out of the back, with one
going to the mic jack on your rig, and other going to your TNC.
There is also provision for receive audio in, and an external
speaker. No power is required. Inside the box is a series of
jumpers, so that it can be configured for any rig.

This model is made to switch between an AEA PK-88, and any rig
with the round 8 pin mic connector.

Paper work is included that shows how to set the jumpers for
most of the common rigs (Kenwood, Yaesu, Icom, Alinco, etc.).

It is in A-1 shape, and works 100%. $30

AEA Items:

AEA AC-1 Power Supply
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with PK-232 or PK-88.
It plugs directly into these units, or any with
a 2.1 mm coaxial connector, center positive.
It works 100% and looks great. $15

AEA Software
The followings is legitimate AEA software, with the
original disks with serial numbers, and original documentation.
It is not copied or "bootleg" software.
Log Windows, Version 2.0 - $15

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver and
before the antenna) to reduce harmonic interference.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut off
frequency of 45 MHz and 75 db of attenuation. It is rated to
take 1000 Watts of AM, or 5000 Watts PEP SSB. It has SO-239
connectors on each end. $35.

B & W model 426 low pass filter
B & W TVI filter, cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each end.
This is an older model that seems much heavier duty. It weighs
almost twice as much as the newer models, and looks like it
would take more power. It likely was made in the days that
plate modulated AM was the rule. $30

HF mobile antennas:

Hustler "Super" high power resonators (good for 2 KW PEP)
80 meter RM-80 S
.....can be cut for CW or phone, and also used on 4BTV
.....Vertical to give 80/75 meter coverage $38
15 meter RM-15 S $18
10 meter RM-10 S $16

All work fine and are in great cosmetic condition.

ARRL Antenna Book
1974, 13th edition, smaller size
pages show yellowing $8

ARRL Call area map of the US
Approx 37 x 24 inches in size $8

Call Area Map of the World
33 x 24 inches in size $5

W2AB's "Second Op"
This is the large (about a foot in diameter) "wheel"
that has a lot of DX information on it.
By turning the wheel to the call sign prefix, the continent,
zone, and country is shown, along with great circle beam
headings from different parts of the country. In another
area, postage rates are shown, but I am certain that info

is outdated.
This is the "New 7th Edition - Fully Computer Revised".
It is in good condition. $10

ARRL DXCC Countries List
Sept 1997 - marks in it $2

Ham Price Guide - 2nd Edition
Lists prices of used ham gear $5

Coax connectors and adapters:
Prices are per connector. These are connectors I have
accumulated over 40+ years, and not used.

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Prices do not include shipping from Florida.

Thanks.

SWAP

I have a Communications Specialists TE-12P Tone & DTMF Box
Info: http://www.com-spec.com/insheet/te-12p.pdf

I need a tiny tone encoder board to install in an older 2M rig.
SS-64 or similar.

I'd like to make a straight-up swap.

Anyone interested?

Hi Folks!

I'm looking for several TH-F6A HTs for my Scouts who are newly licensed and need rigs.

This one matches many of our Boy Scout Troop's and Venture Crew's activity needs very well.

BTW: If anyone is interested in an IC-2AT, 3AT or 4AT (some with tone decks), please let me know. All have brand new extended life aftermarket batteries.

Thanks & 73,

Gordon Beattie, W2TTT

Hello All,

I have just participated in the GQP- Georgia QSO Party with The ARC-Atlanta Radio Club W4DOC and had a lot of fun with the GOTA station and the other stations that was the I even tried to work QRP phone but no success.

Well the problem was that I did not have a tuner, which is the reason for this post.

I am looking for a tuner for my 817 or any tuner. I am willing to pay $120 max. I prefer that it be from an estate sale of a silent key ham or any silent key, however if it is not I am ok with it.

Thanks for all your responses to this post.

5108. GAP Titan 4 Sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-04-17 18:13:59 UTC
From: jmb731
Topic: 5108 Message: 5108

Gap Titan--new in box---$325 plus shipping or pick up at my QTH in the Tampa St Pete area. Cell number is 727-643-1355.

5109. FS: Two Towers

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-04-18 03:56:14 UTC
From: Michael L. Scott
Topic: 5109 Message: 5109

This is a forward from a non-ham. Please send inquiries to pughiber@yahoo.com
---
The towers are 12" galvanized steel. One is 60ft. high with an antenna on top. The other is 120ft. with an antenna, an "outrigger" (I think) and a dish. One offer for $500 has been rejected.

The previous owner of this home was very well versed in Ham Radios and computers. He had an electric business and computer store on this lot. We were told by neighbors that when his wife died suddenly, he just packed what he could and left the house and bills behind. He couldn't take the two towers. We don't need them. I hope you are interested in them or know someone who is.

Thanks so much!

Mary Brem

5110. 2 meter & 440 MHz ham rigs and many accessories FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-04-18 14:47:54 UTC
From: Ken Simpson, W8EK
Topic: 5110 Message: 5110

For Sale:

VHF and UHF (2 meter and 440 MHz) transceivers and accessories

Dual Band HT:

Radio Shack HTX-420, 2 meter / 70 cm Dual Band FM Transceiver

Transmits on the 2 m and 440 MHz band, and receives on 137 to 174 and 420 to 512 MHz on FM, plus 108 to 137 MHz AM for the aircraft band. It also has SAME alert for the weather radio portion. A compass is built in. Power output is adjustable with 3 levels of about 4 W, 1 W, and .2 W. Cross band operation is also possible. Of course it has the normal memories, scan, PL subaudible tones, and all the other things one expects in a modern HT.

A 7.2 V, 1200 mahr Lithium Ion Battery is included, as is a rubber duck, wall charger, and operating manual. In addition, it has a nice desk stand to make it easier to use at home. The HT works great, and looks very close to new. $200

Spare Battery for Radio Shack HTX-420 dual band HT:

W & W LC-343 L, Lithium Ion Battery for Radio Shack HTX-420 HT

This Lithium Battery is 7.2 volts at 1300 mahr, and is made to fit the HTX-420 dual bander. It can be charged with either a wall charger or desk charger.

This particular battery works great. My guess is that the now silent key used it only a couple times. It holds a charge well, and functions 100%. It looks very close to new. $32

Two meter FM Transceiver:

KDK FM-2033 mobile FM transceiver for 2 meters

This rig is fully synthesized, has memories, scan, subaudible PL tone, and all the things that one expects in a 2 meter rig. It has a touch tone microphone with it. This rig produces just over 25 Watts in high power and about 7 watts in low power. It sounds great, and hears well.
It needs 13 V DC at about 7 amps.

This particular rig is in very nice condition. It includes the touch tone microphone, mobile mounting bracket, power cord, and paper work. The original box is also included.

Even the mic clip, and a bag of screws are included, as is
the original multicolored sales brochure. $89

MFJ 812 B VHF Wattmeter / SWR Bridge
This meter covers 144 and 220 MHz. You can read forward and
reflected power in 2 ranges - 30 or 300 Watts. It also reads
SWR from 144 thru 220Mhz.
The MFJ-812B also reads relative field strength from 1 to 220
MHz.
This one works fine and looks great also.
With paper work for $30.

Touch tone (DTMF) microphones:

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently
has a 6 pin connector for the KDK 2030, but that can
be changed. Nice condition. $40

Drake 1525 EM Touchtone Microphone
Normal hand mic from the front, but has a touchtone pad
on the back. Four pin mic plug. Used, but in good shape.
Includes paper work. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
With paper work for $40.

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed.
Stripped and tinned leads.
It works fine, and looks good also. $25

Icom BC-35 desk charger
The BC-35 will fast charge the BP-2, BP-5, BP-7, and BP-8 battery

packs. It will also charge the BP-3 and BP-4, but these take 12 to 15 hours. It works 100% and looks fine as well. $35

Accessories for Kenwood TH-215, 225, 235, etc. HTs:

PG-3 E DC Cord
This cord plugs into the cigarette lighter to provide 12 V DC to the TH-215, TH-225, TH-415, and others. It has a filter built in, and permits high power operation of the HTs. $20

SC-12 Vinyl Case
For TH-215, TH-225 and others, with room for the standard PB-2 and PB-3 battery packs. Black color. Very nice condition. $15

SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and PB-4 battery packs. It can also be used with the smaller PB-2 and PB-3 packs. Black color. Great condition. $15

Bianchi Real Leather Case for TH-215, TH-225, etc.
For use with the larger PB-1 and PB-4 batteries, but can be used with the smaller PB-2 and PB-3 batteries. This is real leather, tan in color, and is in very nice condition. $25

Accessory items for Kenwood TR-2400 and other HTs:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and maybe others. This one looks fine and works fine. $16

Belt clip for TR-2400 HT
In great condition, complete with hardware - $8

Original Operators manual for Kenwood TR-2400 - $15

Wrist strap - I think it fits most Kenwood (and likely other) HTs - $4

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. This can be used with any HT that has a BNC connector. $5

Santec HT items:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case. It fits most of the Santec HTs, such as the HT-1200, ST-142, ST-144, ST-440, etc. The real leather case includes a built in belt clip, plus a removable leather shoulder strap.
The case itself is in very nice shape. The leather

shoulder strap has not been used. $22

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Belt Clips and Wrist Straps for various HTs:

Belt Clips for various HTs - All include hardware.
$8 each
Kenwood BH-2 for TR-2500, TR-2600, TH-215, TH-225 and others
Kenwood TR-2400
Motorola

Wrist Straps for various HTs
$4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

I have a Spanish version of the Operating Manual
for the Kenwood G-707 dual band transceiver available.
This is the original operating manual only, in Spanish.
It looks like it is quite extensive and detailed.
It is basically new, only being opened to observe that
it is in Spanish only. It is original from Kenwood. $10

Yaesu Items:

Yaesu MH-12 A2B Speaker Microphone
This speaker microphone has a 3.5 mm and a 2.5 mm plug
on it, molded together, as is used on many, many HTs.
It will fit many Yaesu, Icom, Alinco, Radio Shack and
other HTs.
This one works fine, and looks very close to new.
I can not find any defects on it. $20

Yaesu YM-24 A speaker mic.
Fits FT-207, 208, plus many others. It has the odd
little round connector on it like Yaesu, Wilson, Santec,
and others used in the 1970s and 80s.
This particular unit works fine, and looks great also. $20

Wrist Strap for Yaesu FT-209 - $4

Yaesu Hat
This "Ball Cap" has Yaesu on the front of it in big letters.
Actually, I have two. One is white and says only "Yaesu".
The other is dark red and says "Yaesu Communications".
Both have never been used. Your choice for $6 each.

Antennas for 2 meters, 220 Mhz, or 440 MHz:

Larsen VHF and UHF Mobile Antennas

Antennas are used, but in very good condition.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on the
70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $7

Larsen PO-MM Mobile Antenna Mag Mount
This rectangular mag mount features an extremely strong magnet.
The center of the mag mount has an SO-239 connector, which
means any antenna with a PL-259 can be used with it.
It includes coax, with a PL-259 connector on it.
It is in good condition. $17

Cushcraft Magnetic Mount 5/8 wave, 3 db gain antenna for 2 meters
Consists of a heavy duty mag mount, with coax, and the antenna
and spring.
It works fine and looks fine also. $50

Gain antenna coil, spring and whip
The antenna is a 5/8 wave antenna for 2 meters, which
has a gain of about 3 db. The coil can be used with any
of the NMO mounts (made by Motorola, Larsen, Cushcraft
and many others). The antenna is approximately four feet
long, and is in good condition. $30

As above, but without the whip.
The whips are hard to ship, so you might want only the coil
and spring, and obtain a whip locally. $25

Cushcraft CSMG NMO Magnetic Mount
This is a strong, round, magnetic mount which can be used with
any NMO antenna. Coax is included, with a PL-259 on the end.
Nice condition for $22.

Avanti / Antenna Specialists "On Glass" mobile antennas

These antennas were made by Avanti, and then later by
Antenna Specialists, to mount on a windshield, or other
glass. They do not require a ground plane, as they are
1/2 wave antennas, rated to have 3 db gain. They are
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Rubber Duck Antennas for your HT:

All are for 2 meters, are in very nice condition, and
are $10 each, unless stated otherwise.

BNC Connector, 7 inches long

5/16 inch threaded, as used by Motorola and others
Regular, 5.7 inches long
Stubby, 4 inches long

Type F connector, 6.5 inches long

PL-259 connector, 6.5 inches long
HyGain 275, still sealed in original packaging
from when I bought it 20 or 25 years ago

PL-259 connector - Stubby, 4.6 inches long
Centurion, still sealed in original package
from when I bought it 20 or 25 years ago

Special Rubber Duck antennas for Kenwood TH-21 series
2 meter HTs with the threaded connector
Kenwood RA-6 regular, 6.6 inches long
As above but for TH-41 HT, 440 MHz, Stubby, $15

Alinco EA-0085 for 220 MHz
BNC connector, 5.6 inches long

Does anyone have an older two meter ham rig and need crystals?

Maybe I can help. I have some of both transmit and receive
2 meter crystals. Most are in the 146 and 147 MHz band segments,
with very, very few in the 145 MHz segment, and none in the
144 MHz segment. These are for ham rigs only, and not
commercial rigs.

These are all the small HC-25 crystals, like are used in most
of the solid state 2 meter mobiles and HTs. Please e-mail
the operating frequency you need. I have them listed by
operating frequency and rig, and not by actual xtal frequency.
Send the frequencies you need (transmit or receive), and
the rig that you have, and I will see if I can help. I have cross
references for the various rigs, so I will know what you need
if you give the rig. Crystals are $6 each.

Prices do not include shipping from Florida.

Thanks.

Tom,

Yes it does...there is a band switch to change bands!

When I posted this amp, I was tired and had a typo.

It is a Johnson Thunderbolt 6N2 Amplifier...there is no such thing as a
Johnson Viking 6N2 Amplifier.

Silly me! :-)

5126. FS: YAESU FL-2100B HF Amp - LOWERED

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-04-27 22:23:08 UTC
From: kd4e
Topic: 5124 Message: 5126

FS: YAESU FL-2100B HF Amplifier

1.2KW SSB Input, 800w CW Input, 600W AM Input

Tested on 40M at 700W CW Output by rf engineer friend, good
pair of 572B's,
amp looks good and works fine. Great little compact HF amp.
Includes nice copy
of the manual. Cabinet has been painted black to match
modern gear but could
be painted gray again - as original. Faceplate is clean.
Free Manual Download here: http://www.ham.dmz.ro

*I really really do not want to deal with ebay so have
lowered my asking price.*

ASKING $375. (LOCAL PICKUP or meet-up up in Tampa area).
Or, plus actual cost to ship.

FS: MFJ-224 2 Meter FM Signal Analyzer

Asking $125. shipped conus,

Manual & Details:
http://www.mfjenterprises.com/Product.php?productid=MFJ-224

As-new condition - installed a battery and ran some tests -
works nicely. Need funds for other projects.

Plot field strength patterns, Position antennas, Measure
preamp gain, Detect feedline faults, Track down hidden
transmitters, tune transmitters and filters, Check and set
deviation anywhere in the band plus much more! Other bands
may be covered by tapping the 10.7MHz device IF and feeding
it from another source.

5135. FS: Motorola S-1318A Signal Generator

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-05-01 04:37:17 UTC
From: kd4e
Topic: 5135 Message: 5135

Motorola S-1318A Signal Generator
Tested working.
$35. plus actual shipping.

Frequency Accuracy: Each range is individually calibrated to an accuracy of +/- 0.5%. Electronic fine tuning with or without modulation; +/- 20 KHz frequency shift at 470 MHz. Incremental tuning range +/- 16 KHz.

Tuning Ranges: 25-32 MHz, 32-41 MHZ, 41-54 MHz, 130-175 MHz, 400-470 MHz, 890-960 MHz, plus ...

Crystal Switch Positions: 1,2,3,4 (250KHz-1MHz)

And ...

IF Frequency Outputs
Band 1: 2.4-3.9MHz
Band 2: 3.9-6.0MHz
Band 3: 6.8-9.4MHz
Band 4: 9.4-76.0MHz

Output Voltage, RF Oscillator: Continuously variable from 0.1 microvolt to 100,000 microvolts (also calibrated from -8 dbm to 128 dbm) across 50 ohm termination. On 890-960 Mhz band, output is approximately 2000 microvolts per individually calibrated chart.

Automatic Reference Level: No manual adjustment necessary. Accurate to +/- 10% from 25 MHz to 470 MHZ.

Frequency Stability: Less than 0.001% frequency shift (short term, 5 minute stability) after 1 hour warm-up.

Modulation Frequencies: Internal- 1 KHz sinewave, 20 Hz sawtooth sweep, dc incremental.

Output Voltage, IF Oscillator: Maximum output better than 0.5 volt into a 50 ohm resistive load (crystal position 0.3 volt). A front panel potentiometer gain control provides at least 50 to 1 attenuation.

Modulation Fidelity: Within 1 db to 15 KHz.

Modulation Distortion: Less than 3% at 16 KHz deviation.

Deviation: +/- 16 KHz peak. Direct reading on panel meter for all ranges.

Accuracy +/- 10%.

Shielding: Double shielding for oscillator unit and
multisection, individually shielded RF filters reduce stray
leakage to extremely low value. Carrier leakage is negligible.

Residual Modulation: Les than 100 Hz at 460 MHz.

Power Supply: 115/230 VAC, 50-60 Hz, 21 watts power
consumption.

Weight: 25lbs w/optional canvas cover w/Motorola logo.

Dimensions: 11-1/2 inches high x 15-1/8 inches wide x
10-3/4 inches deep.

5144. FS: Components for 4CX1500B Amplifier

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-05-12 23:32:03 UTC
From: kd4e
Topic: 5144 Message: 5144

I have the following components for sale. They are from a project
that I need to abandon due to unforeseen circumstances. Reasonable
offers welcomed. (Will consider a partial swap + cash including a
Yaesu FT-857D and/or a Yaesu VX-7R.)

JAN 8660/4CX1500B in original box (opened, tested, boxed) $175.

GM3SEK Tetrode Board-Set w/screen, grid, & relay transformer from
W4LNI already mounted and wired on an aluminum mounting
plate $295. (with all documentation)
[The transformer is $75. alone, the board set $250. alone]

2 Vacuum Variables $215. for the pair.

ITT Jennings ULK/UCSL-1500-5S 15-1500pf 5KV w/heavy duty 1/4"
nicely milled aluminum mounting bracket ($125. alone)
ITT Jennings CSVI-1000-0105 10-1000pf 5KV Ceramic w/1/8"
aluminum mounting bracket ($125. alone)

W4LNI 6V 10A Center Tapped Filament transformer $75.

Ausgang 415v @ 25A SS Relay (two of them, good used) $35.
for both

Eimac SK-800A socket and SK-806 chimney - used but good for $95.

18.5uH heavy duty roller inductor w/10M Silver-plated tubing coil
(all-together excellent for a 160-10M amp) $165.

Everything for $1100. (or reasonable offer) including shipping conus
(and I will include a Millen HV connector set)

Asking prices for individual items are plus the actual cost to ship
to you, unless otherwise agreed.

Pictures on request.

5145. FS: Radio Shack HTX-202

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-05-13 03:35:48 UTC
From: kd4e
Topic: 5145 Message: 5145

I have a nice RS HTX-202 2M HT ... with "issues".

It looks nice and receives well but the final TX is
gone and I lack the time to get in there to deal with it.
No antenna, no battery, just the main unit. I have been
running it off a 12v battery with an outside antenna
using it to monitor repeater activity.

It is $17. including shipping conus.

5146. WANTED Ten Tec Century 21 transceiver for parts

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-05-13 19:23:49 UTC
From: lloydr1
Topic: 5146 Message: 5146

I'm looking for a Ten Tec Century 21 teansceiver for parts. Actually I only need the dial but I will take a whole unit. I bought a nice Century 21 at a hamfest and repaired it. I then noticed that someone had attempted to clean the dial with some type of solvent and removed nearly ALL the markings.

Thanmks for looking.

5147. FS: Components for 4CX1500B Amplifier

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-05-15 14:44:57 UTC
From: kd4e
Topic: 5144 Message: 5147

Components are again available as the two buyers have both
failed to
follow through. I've lowered a couple of the asking prices
as I would
like to get this sold.

JAN 8660/4CX1500B in original box (opened, tested, boxed) $165.

GM3SEK Tetrode Board-Set w/screen, grid, & relay transformer
from W4LNI already mounted and wired on an aluminum mounting
plate $295. (with all documentation) [The transformer is
$75. alone,
the board set $250. alone]

2 Vacuum Variables $205. for the pair. (very good condition)

ITT Jennings ULK/UCSL-1500-5S 15-1500pf 5KV w/heavy
duty 1/4" nicely milled aluminum mounting bracket ($125. alone)
ITT Jennings CSVI-1000-0105 10-1000pf 5KV Ceramic w/1/8"
aluminum mounting bracket ($125. alone)

W4LNI 6V 10A Center Tapped Filament transformer $75.

Ausgang 415v @ 25A SS Relay (two of them, good used) $35.
for both

Eimac SK-800A socket and SK-806 chimney - used but good for $85.

18.5uH heavy duty roller inductor w/10M Silver-plated tubing
coil (all-together excellent for a 160-10M amp) $165.
[This may be sold but let me know if interested.]

Asking prices are plus the actual cost to ship to you.

Pictures on request.

Reasonable offers considered.

May consider partial swap for Yaesu VX-7R or maybe a FT-857D.

5148. FS: Ten-Tec Jupiter

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-05-17 22:29:19 UTC
From: Woody
Topic: 5148 Message: 5148

Hi all, I have a Ten-Tec Jupiter w/AT for sale.

Includes Radio, Manuals, software, Heil Studio One microphone with cord and tripod stand.

ALL CURRENT UPDATES!

Automatic antenna tuner.
Blue Screen Display.
CW Chip update, simply plug a ps/2 keyboard in back of radio and type to send, decodes RX signal right on the display.
Latest firmware revision.
Mic jack, RF choke/caps update.

This one is loaded up and looks great. Maybe a small scratch or two, otherwise fantastic condition.

Priced firm at $1100 plus shipping.

5150. For Sale: Icom R7000

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-05-21 14:05:46 UTC
From: Keith Bucher
Topic: 5150 Message: 5150

Hello,

I have an Icom R7000 for sale in good condition for $520.00 which
includes shipping in the continental United States. It works, but
has a few miner problems. It includes the owners manual,
speech synthesizer and remote control. Cashiers check or money order.

Keith WB8WTT

5151. HF Antenna, KT34M2 tribander, Brand New Still in the Unopened Box

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-05-22 14:11:04 UTC
From: Phil
Topic: 5151 Message: 5151

I am selling a brand new, still in an unopened box model KT34M2 triband antenna for $975 plus shipping. This antenna normally retails for $1,300 plus tax, so this is a great savings if you are in the market for a new HF antenna.

Here is some descriptive information on this antenna:

http://www.m2inc.com/products/kt/kt34/kt34m2.html

Please feel free to contact me on my cell phone at 408 410 0969 if you have any questions, or drop me an email.

Thanks for looking.

Phil

From: Ken Simpson, W8EK
Topic: 5153 Message: 5153

Ham Publications For Sale:

Some are vintage, and some more modern.
All are in excellent condition, unless listed otherwise.

ARRL Hints and Kinks for the Radio Amateur
1974, smaller size, $8
1989, 12th edition, $8
1997, 14th edition, like new, $14

ARRL How to Become a Radio Amateur, 1970, 26th edition,
Extremely nice, close to new condition,
with many vintage ads in the back, $15

ARRL Understanding Amateur Radio
1977, no edition number listed, $8

Bash Book
This is the book that started it all, back in the 1970's.
"General Class Test Guide, The Final Exam" listing all of
the General Class questions and answers. Nice condition. $8

ARRL Handbooks:

These are in the smaller format (6 1/2 by 9 1/2 inch size).
They include tube charts and ads for vintage equipment,
which are not in the newer handbooks.
1977 - 54th edition - Good condition $10

More modern, larger 8 1/2 by 11 inch format:
1981 - 58th edition - Nice shape $13
1982 - 59th edition - Good condition $11

W2AB's "Second Op"
This is the large (about a foot in diameter) "wheel"
that has a lot of DX information on it.
By turning the wheel to the call sign prefix, the continent,
zone, and country is shown, along with great circle beam
headings from different parts of the country. In another
area, postage rates are shown, but I am certain that info
is outdated.
This is the "New 7th Edition - Fully Computer Revised".
It is in good condition. $10

ARRL Operating an Amateur Radio Station
1976 - 57th edition $3
1978 - 58th edition $3

1983 - 61st edition $3
1984 - 62nd edition $3
1989 - 63rd edition $4

ARRL Radio Amateurs Operating Manual, 1985, 2nd edition, $8

Ham Price Guide - 2nd Edition
Lists prices of used ham gear - $5

Call Area Map of the World
33 x 24 inches in size $5

ARRL Call area map of the US
Approx 37 x 24 inches in size $8

ARRL DXCC Countries List
Sept 1997 - marks in it - $2

ARRL FCC Rule book
1988 - seventh edition - $3
1989 - eighth edition - $3
2004 - 13th edition - $10

RSGB "Amateur Radio Operating Manual"
1982 - 2nd edition - $8

ARRL Public Service Communications 1985 - Ninth edition - $3
1990 - no edition number listed - $3

ARRL Amateur Radio Field Resources Directory
1986-87 - First edition - $ 7

General Class License Manual by Gordon West, WB6NOA
Second Edition - Like New - $3
Fifth Edition - Like new - $5

Upgrade to General Class by Don Stoner, W6TNS
1992 - $4

Advanced Class License Manual by Gordon West, WB6NOA
"New Edition" - Second Edition - 1995 - $4

Ameco "Novice License Radio Amateur FCC Test Manual"
By Martin Schwartz - 1984 - like new - $4

Ameco "Amateur Radio Novice Class Theory Course"
By Martin Schwartz. Far more in depth than the test manual.
First Edition - 1978 - $5

Ameco "Complete Technician Radio Amateur FCC Test Manual"
By Martin Schwartz - 1992 - $3

Ameco "General Class Radio Amateur FCC Test Manual"
By Martin Schwartz - 1984 - Like new - $4

As above, but includes 1988 questions and answers - $4

Ameco "Advanced Class Radio Amateur License Guide"
By Martin Schwartz - First Edition - 1981 - like new - $5

Ameco "Advanced Class Radio Amateur FCC Test Manual"
By Martin Schwartz - Copyright 1987, with added 1991 material
First Edition - Like New - $6

Vintage ARRL Licensing material:

ARRL License Manuals - $3 each
1977 - 76th edition - All classes
1979 - 77th edition - All classes
1984 - 79th edition - All classes
1984 - 80th edition - All classes
Technician Class - 1989 - First edition
General Class - 1989 - First edition
.....1997 - Second Edition
Advanced Class - 1985 - First edition
.....1990 - Third Edition
Extra Class - 1988 - Third edition

Tune in the World with Amateur Radio
1976 - First Edition - $3

Now You're Talking
1993 - 2nd edition - $10

Sams, Tab Publishing, and Hayden Vintage Licensing material:

General Class Amateur License Study Guide
By Phil Anderson, W0XI; published by Sams
First Edition - 1979 - $3

Amateur Radio General Class License Study Guide
By Jim Kyle and Ken Sessions; Tab Publishing
1975 - 2nd edition - $3

Amateur Radio Advanced Class License Study Guide
By Jim Kyle and Ken Sessions; Tab Publishing
1975 - 2nd edition - $3

Hayden "Radio Operator's License Q & A Manual" by Kaufman
For commercial tests - Eighth Edition - 1976
About 1 1/2 inches thick - $5

Sams Photofact "Master Index"
Lists what is in the various Sam's Photofacts as of
Aug 1960 - Good condition - $8

"Installing your Own Telephones"
By Radio Shack - 3rd edition - 1989 - $3

Gonset ORIGINAL manual:
Gonset Noise Clipper Model C $4

ORIGINAL Operating Manuals for Kenwood Rigs:

All manuals are original, in very nice condition, for
Kenwood radios. They are originals and not copies.
All are original Kenwood manuals in very nice condition.

Operating manual for TH-21 A / AT HT for 2 meters $8

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E
HTs for 440 MHz, 220 MHz and 2 meters $10

Operating manual for TH-215 / 315 / 415 HTs $12

Operating manual for TH-225, 2 meter HT $12

Operating manual for TM-221/421 2 m mobile $15

Operating manual for TR-2200, 2 meter "portable"
This is very similar to the Drake TR-22. $15

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $14

Operating manual for TR-2600, 2 meter HT $12
Service manual for TR-2600 $12

Operating manual for TS-120, HF transceiver $18

Operating manual for TW-4000 dual bander $15
Service Manual for TW-4000 $20

Original Manuals for Kenwood Accessories:

Operating manual for BC-5 DC charger/adapter $4

Operating manual for MC-30 and MC-35 hand microphone $5

Operating manual for MC-85 desk microphone $4

Operating manual for PS-30 power supply $5

Operating manual for SMC-24 speaker mic $4

Operating manual for SMC-25 speaker mic $4

These are Kenwood Original Manuals only.

ORIGINAL Icom operating manuals:
Please note that all of these are original Icom manuals
and are not copies.
All are in very good condition.
These are original manuals only.

BC-30 Desk Charger $7
BC-35 Desk Charger $7
BP-2, BP-3, BP-4, and BP-5 Batteries $3
BP-21, BP-22, BP-23, and BP-24 Batteries $3
IC-229, 2 meter mobile transceiver $15
IC-230, 2 meter mobile transceiver $15
IC-3 PA Power supply $10
UT-16 Voice Synthesizer $5

These are original manuals only.

ORIGINAL Heath manuals. These are the manuals
only. They are all originals, and not copies, and
all are close to new condition.

GD-600 Photoelectric Light Switch
Schematic is part of book $5

HD-15 Hybrid Phone patch
1965, Schematic is part of book. $8

HD-1234 Coax Switch
1973, Four Position Coax Switch
Like new, no check marks $7

HM-2102 VHF Wattmeter 1972
Very nice condition. No check marks.
Schematic is part of book. $15

HN-31A "Cantenna" Dummy Load
1982 for the "A" model, no check marks $7

HW-2021 Assembly manual - 1975
2 meter hand held transceiver
No check marks $9

IM-5284 Multimeter
Large schematic only $3

These are original manuals only.

The following Texas Instrument Data Books are available.
All are in very nice, close to new, condition, with
very little use.

Analog Applications Journal - $2 each
August 1999
Nov 1999
Feb 2000
May 2000
August 2000
Nov 2000

AHC/AHCT Designer's Guide - June 1999 $2

Mixed-Signal and Analog Products Designer's Guide
And Reference w/CD - January 1999 $4

Analog and Mixed Signal Products Designer's Guide
And Reference - August 1999 $3

Logic Selection Guide - August 1998 $4

BiCMOS Bus Logic Interface - 1988 $2

Prices do not include shipping from Florida.
Shipping via "Media Mail" is relatively inexpensive.

Thanks.

5154. RE: [6 Meter Sked] FS: Johnson Viking 6n2 Thunderbolt Amplifier

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-05-23 21:36:06 UTC
From: J. Gordon Beattie, Jr., W2TTT
Topic: 5154 Message: 5154

Hi Folks!

Just an update on the amplifier based on suggestions made by several owners and admirers of this amplifier:

It only takes a few watts (5-7W) of drive to get the full 1200W output on either Six Meters or Two Meters.

If drive it with less, it will put out less, but for a longer, more reliable time.

There were only about 250 units produced by the factory, so it is a bit of a collector's item for those who cherish tube amplifiers.

Finally, while this is a dual band amplifier for 50 & 144 MHz that puts out about 1200W,

I am not greedy and the "buck a watt" rule of thumb will not be in effect here but a respectable offer will be accepted, if offered.

Thanks & 73,

Gordon Beattie, W2TTT

5155. FS: Components for 4CX1500B Amplifier - UPDATED

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-05-25 03:22:25 UTC
From: kd4e
Topic: 5155 Message: 5155

Here is what is left of the components - and the new prices:

JAN 8660/4CX1500B in original box (opened, tested, boxed) $145.

GM3SEK Tetrode Board-Set with screen, grid, & relay transformer
(rated for dual 4CX1500b amp) from W4LNI already mounted and
wired on an aluminum mounting plate $275. (incl. lots of docs)
[The transformer is $70. alone, the board set $225. alone]

W4LNI 6V 10A Center Tapped Filament transformer $70.

Ausgang 415v @ 25A SS Relay (two of them, good used) $30.
for both

Eimac SK-800A socket and SK-806 chimney - used but good for $80.

Will accept $550. for everything.

Asking prices include shipping conus.

Pictures here: http://kd4e.com/swapn.html

I will consider a partial swap for a Yaesu VX-7R.

5156. For Sale remote tuner and bias-t set

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-05-27 02:33:20 UTC
From: james
Topic: 5156 Message: 5156

I have a CG-3000 remote tuner and the bias-t power injection boxes to go with it. The tuner operates from 1.8 to 30 Mhz and is rated at 200 Watts.
The bias-t set enables you to feed the power to the tuner by placing it on the coax. The specs can be found on array solutions web site. They are only a few months old and work fine but i plan to add an amplifier to the shack, so i have to use a different tuner. I would like to get $325 for the tuner and $100 for the bias-t system and I will pay shipping.
I prefer Postal money order, personal check will do but I will have to wait for the check to clear before shipping.

Topic: 5163 Message: 5163

1N2804A 6.8V 50 Watt Zener Diodes, TO-3 NOS -- $10 each

Stancor Transformer P-6461 117 VAC Primary / 10VCT @ 10 A Secondary, used -- $25

Triad Transformers -- 115V 60CPS Primary

F21A 6.3VCT @ 10A Secondary, Used -- $20

F28U 6.3/7.5 VCT @ 25A Secondary, NOS -- $40

Cardwell -- XR-1000PS 1000pF Air Variable Capacitors. About 4.5" x 4" x 3.5" overall including plate travel. .030 air gap. Used, Good condition. $20 ea.

Sprague 3600pF @ 30KV Doorknob capacitor. Red epoxy encased style -- $25

28uH Roller Coil, 42 Turns #12, a skosh over 2" in diameter, 8 TPI, 3" x3" x 7" overall plus 3" shaft. Fiberglass coil supports. I think that this is the coil employed in the MFJ-989 antenna tuner. Excellent condition. $50

Toroidal Tank coil -- The core is fiberglass & resin encased. It is currently wound with 20 turns of #12 wire. There are notches in the form for up to 40 turns. It is a bit over 4 inches in diameter and about 1-3/4" thick. This was made by Bob, W6YUY. See his article in August 1985 Ham Radio magazine "Design a Toroidal Tank Circuit for you Vacuum Tube Amplifier". $50

Eimac -- Databook set circa 1985 in two large yellow Eimac 3 ring binders. Includes data sheets from 1976 edition and earlier. Very good condition. $200

Eimac HR-8 plate dissipator used, a mite tarnished $10

Eimac HR-6 plate dissipators, NOS pair $20.

Eimac HR-6 plate dissipators used, tarnished, pair $10

Eimac SK-620 sockets, "unused" pair. One is a SK-620; the other a SK-620A. Probably 40 years old, a bit tarnished from storage, and unused except the heater pins on one were once soldered... probably to check some tubes. $60 for the pair.

Johnson 122-237 ceramic 7 pin giant socket for 813, etc. NOS, $15

Johnson 122-248 ceramic 7 pin septar socket (accepts 7094, 8877, 832A), with base ring & ceramic spring retained (parallel) plate bar for 832A. Used, good condition. $10

Johnson 124-115-2 UHF socket similar to Eimac SK-620. NOS, but, a mite tarnished from age. $40

Pair of ceramic 7 pin giant sockets for 813, etc. Used, $15 pair

Amphenol MHV connectors: Two 28100 right angle cable males & two 27025 panel mount females. NOS -- $40 all.

UG-932 A/U MHV Male Cable connectors, NOS -- $10 ea

UG-961 A/U MHV Female Panel connector, NOS -- $12

Water cooled heatsinks -- 12" x 8" used, drilled for TO-3's plus a few diodes. Back is flat. 3/8" water lines. $50 pair

ILG Electric Ventilation -- 17-18-022A squirrel cage type fan. Encased motor with 181-009-EA fan 115/230 VAC 1.6A/.8A 50/60Hz 3000 RPM 4+" round intake, 3+" x 4-3/4" rectangular output flange, weighs 25 lbs. used -- $25

Kooltronic -- Model DF1F016N Dual fan style 230 VAC -- 1.2A -- 60Hz -- 3000 RPM -- 3+" round intakes, 2.5" x 5" rectangular output flanges, 16" long by about 7" diameter overall, weigh 15 lbs. These look like NOS but, they are a mite dusty from storage. 3 available -- $20 ea.

and of course some panel meters, see:

http://wc6w.50webs.com/wc6wfsw/index.html?fr32.html

73 & Good morning,
Marv WC6W

FS: RF Power Components MaxiTuner

1.7 to 30 MHz continuous at 3000 watts.
EF Johnson 229-203 28uH rotary inductor
Two 6kV Peak-to-Peak 500pF variable capacitors
Heavy-duty balun. Turns counter for rotary inductor.
Rear panel has input via SO-239, ceramic terminals for
balanced or wire with SO-239 output.

Works fine, minor cosmetics to case.

Asking $225. plus actual cost to ship (or picked up in
Tampa Bay area)

5168. FS: Yaesu VX7R quadband HT

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-06-05 00:46:19 UTC
From: John Geiger
Topic: 5168 Message: 5168

I have for sale a Yaesu VX7R 6m/2m/222mhz/70cm HT in excellent condition. It does 5 watts on 6m/2m/70cm and 350mw on 222mhz. It is also waterproof and has wideband receive for broadcast band AM/FM and public service receive. This is the silver version and comes with a good LiON battery, wall charger, original manual, and original box. It is a 7M serial number so it is a little less than 2 years old. It works fine and you will certainly like this one.

I am asking $200 plus $8 for priority mail shipping in the US. I can take paypal/check/mo for it. International shipping can also be worked out.

73s John AA5JG

From: John Geiger
Topic: 5177 Message: 5177

I have for sale a Micronta VHF/UHF wattmeter/SWR meter. Covers 2m and 70cm with 2 power ranges-15 watts and 60 watts. Also measures SWR. This is the palm sized meter with SO239 connectors on each end. I am asking $27 shipped in the US and can take paypal/check/MO.

73s John AA5JG

5178. FS: RIGrunner 4010S 8-Outlet 13.8VDC Powerpole Panel

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-06-07 01:43:53 UTC
From: kd4e
Topic: 5178 Message: 5178

FS: RIGrunner 4010S 8-Outlet 13.8VDC Powerpole Panel

Automatic switching to turn off accessories when the rig is
off to protect your battery (there is a manual override via an
off, all on, or auto switch).

From the RigRunning description:
"The ?master? power jack will automatically control eight
Powerpole switched outlets each rated up to 40 amps with a
maximum of 40 amps for the entire RIGrunner. The current
sensing for this circuit does not use a separate sensing
resistor. It actually senses the voltage drop across the
fuse that protects the master outlet! Using the fuse has two
advantages, no additional voltage drop and increased
sensitivity with low current devices. Even a QRP rig should
control the automatic switching. A toggle switch is provided
to select between ?off?, ?auto? and ?all on? so that you can
use your other equipment independently from whatever is
plugged in to the ?master? outlet. A RIGrunner is the most
convenient and safest way to connect all your 12 VDC
equipment to a power source."

Asking $85. including shipping conus.

Hi All,

I have a brand new M-Square KT34M2 antenna that is brand new, still in an unopened box. This antenna retails for $1,350 plus tax but I am selling it for $950. Reason? I won this antenna in a raffle but already have a Force-12 tribander on the roof. This is a killer deal for any ham looking for a really top notch tribander that is factory fresh and ready for assembly.

Please call me on my cell at 408 410 0969 or email me if you have any questions.

I have two radios I am wanting to trade for one Dual Band mobile I am looking for something I can remote mount Like kenwood tm-v71a or Ic-2720.

I have for trade:
Kenwood tk-860g Uhf
Vertex vx-420X vhf
both have hand Mic,
Kenwood has factory box and mounting bracket
the vertex has a homemade bracket
I also will include the programming cables

Both are in good condition No Issues I just need to take up less space in my Truck.

Let me know what you have to trade might be intrested in other models of radio VHF/UHF

5189. Re: [ham4sale] WANTED!! SOLID STATE 6-METER AMP

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-06-15 20:33:24 UTC
From: Dr. Esteban Andrés Wilson, XE1UFO
Topic: 3170 Message: 5189

Dear Friends:

I am looking for a 6-meter solid state amp to use with my FT-817 for SSB and CW mostly. If it has AM/FM, that would be a plus, but SSB/CW is my main interest.
Power level around 80-120 watts would be great.

I can ONLY do PayPal. Shipping would be U.S. Mail to Mexico or UPS.

Thanks in advance!

Steve, XE1UFO

5191. FOR SALE: Heathkit SB-301 Receiver

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-06-15 22:59:59 UTC
From: Paul
Topic: 5191 Message: 5191

I recently acquired the above unit as part of a lot of items and as I'm not a ham I thought I'd offer it up here. I have a little portable Heathkit speaker so I figured I'd include it as well. I've powered up the unit and everything lights up fine. I can hear some noise from the speaker but I don't have a proper antenna system here to receive anything. It has all 3 filters installed and appears to be in pretty decent condition. Local pick-up only on this as it's rather heavy and I would imagine fragile. I'm located in Barrie, Ontario but work in the Newmarket/Aurora area where I could drop it off during the day M-F or meet somewhere. Asking $100. I have photos I could send to anyone interested.

Paul

5195. For Trade: Kenwood V71a and Yaesu FT-2800M

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-06-17 14:11:52 UTC
From: kb7qqq
Topic: 5195 Message: 5195

Hi All,

I have a Kenwood V71a with programing cable and a Yaesu FT-2800m with programing cable and software I would like to trade for a mobile HF/VHF rig. The V71a was bought new about 1 year ago and has been in use in my Jeep Liberty. It is in excellent condition except for a light stain were I used some silacone spray to fix a sticky mic. The Yaseu FT-2800 was bought new about one month ago and has less than an hour of use.
I would like an HF/VHF moblie as there is not a lot of room in the Jeep Liberty for radio's. Would like a 706MKiiG, Yaseu 897 or 857 but will consider anything .

You can contact me at kb7qqq@...
I live in the Oklahoma City, Ok area..

73's
Sam Roe (KB7QQQ)

Johnson Thunderbolt 6N2 KW Amplifier

Works on both 50 and 144 MHz!

It has two 4CX250B tubes and I have spares.

Beautiful Integrated Desktop Amplifier!

I can send you a photo on request.

The amp will be yours for $800!

I will drive up to 225 miles from 07621 or will consider shipping if necessary

Postal Money Order, personal check once cleared or PayPal w2ttt@... all accepted.

Thanks & 73, Gordon Beattie, W2TTT 201.314.6964 W2TTT@...

5200. Radio Shack/Realistic HTX-202 parts and accessories

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-06-20 15:43:53 UTC
From: ralphgrogers@yahoo.com
Topic: 5200 Message: 5200

To: The Ham for Sale Yahoo Group
Subject: Radio Shack/Realistic HTX-202 parts and accessories
From: Ralph G. Rogers, K5RGR

1.) I have two HTX-202s which I am attempting to repair and restore.
These HTX-202 use parts and accessories that are interchangeable with the older ICOM equivalents of the same era.

I need headsets, mikes, speakers, BNC rubber ducky, hi-gain and extendable antennas for them, Wall chargers, battery packs rechargeable and AA and especially belt clips which also functions as an adjunct to the heat sink for the final output transistor and various other items, etc.

2.) I also have a discontinued but working Yaesu 170 HT which I am attempting to find parts and accessories for as well.

I need headsets, mikes, speakers, SMA rubber ducky, hi-gain and extendable antennas for them, Wall chargers, battery packs rechargeable and AA and various other items, etc.

3.) I also have a working Yaesu FT2800M mobile 2-meter which I am attempting to find parts and accessories for as well.

I need headsets, mikes, speakers, NMO Magnetic Mount, trunk/hatcback mount, quarter wave 2-meter and wide band MaxRad antennas and various other items, etc.

73s,
Ralph G. Rogers, K5RGR

Two items on the block.

Alinco DR-1200 Known as the data radio it works well with 1200 or 9600 Packet and voice. Includes the not always bought factory Alinco mic. No brackets. The power cord has been changed to PowerPoles. The LCD backlight does not work but the rest of the radio works fine

MFJ-1278 HF/VHF TNC With serial cable and power cable. I do not have the interconnect cable from radio to TNC but if you buy both I'll send the cable ends for both. I bought it used and never went further than putting in my callsign.

Package deal $100 for both shipped USPS CONUS. I'll split them up for $55 each shipped USPS CONUS Prefer Paypal. Email before sending paypal please to make sure they are still available.

For Sale OR ...
Trade for HF-6M Screwdriver Antenna
Trade for Yaesu VX-7R accessories

Slim-Line Heavy-Duty Crank-Up Tower
20' Galvanized Base Section with three 6" Sides
20' Thick-Wall Galvanized Crank-Up Tubular Mast
3/8" Set Screw at Top to add Mast Out the Top
Prior owner cleaned it well and started to repaint it
Black at base is primer to prevent any future rust.
Nice tower and the crank mechanism works smoothly.
Too heavy for my trailer-mount, I need an aluminum tower.

5227. All inclusive postings

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-07-20 13:48:30 UTC
From: Ray_Vaughan_99
Topic: 5227 Message: 5227

Moderator here. Lately I've been getting a lot of spammers trying to post links to their spam. I can usually tell the difference between spammers and real postings. But they're getting sneaky and mixing in actual on-topic information. As you know, this mailing list is fully moderated so I have to check every posting.

Please get into the habit of posting an all-inclusive ad here. Cut and paste the info into the posting so a potential buyer won't have to go to a web site to understand what you're selling. At the bottom of the posting feel free to include links for pictures, parts lists or more details.

And again, no ebay ads. Sell it here or ebay, your choice. But not both.

Thanks for your cooperation.

Ray, KD4BBM

FS: Gap Eagle DX HF Vertical

I have a Gap Eagle DX Vertical for sale. It runs 40-10 meters, is 21 feet tall and weighs only 11 lbs. Its perfect for that limited space setup. The antenna is in great condition, with all parts and mounting hardware...was just recently taken down from a fellow operator's house. Asking $150 and would much prefer to do a pickup near Washington DC or will consider delivery within 150-200 miles or so. w5jmc.john(at)gmail.com

More stuff that needs to find a new home ...

Essentially complete chassis from a Zenith Transoceanic
3000. I am told that what looks like many Nuvistors are
actually Germanium transistors with the 4th pin grounded
to the shell and the whole thing socketed.

It is untested. Asking $35. plus the actual cost to ship.

5233. FS: Azden, Johnson, Zenith, & 40' Crank-up Tower

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-07-26 03:45:31 UTC
From: kd4e
Topic: 5233 Message: 5233

Here's what is left:

Azden 2M Rigs (three parts rigs w/two mics) All for $45
(I am willing to sell the hard-to-find 12-pin mics
separately. One is complete, one OK except PTT.)

EF Johnson Avenger SE 2M/VHF HT w/Acc $35
(Incl. charger, prog. cable, prog. adapter, two belt
holders, two antennas)

Yaesu MH-31 Hand Mic for FT-817, 857, 897, etc. $35.

Mostly complete chassis from a Zenith Transoceanic $35.
3000. I am told that what looks like many Nuvistors are
actually Germanium transistors with the 4th pin grounded
to the shell and the whole thing socketed. It is untested.

Slim-Line Crank-Up Tube-In-Tower
$135.
20' Galvanized Base Section with three 6" Sides
20' Thick-Wall Galvanized Crank-Up Tubular Mast
(Looks like a smaller version of Rohn 25 but real sturdy.)
3/8" Set Screw at Top to add Mast Out the Top
Base section is fixed so it is 20' (plus whatever you add
as a mast out the top) when fully nested.
Prior owner cleaned it well and started to repaint it.
Nice tower and the crank mechanism works smoothly.
Too heavy for my trailer-mount app.

5234. WTB : CT-39A packet radio cable's

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-07-27 19:42:06 UTC
From: John E
Topic: 5234 Message: 5234

I need to make some packet radio cable's like this :
http://www.on7be.net/Ham%20Radio/Yaesu_CT-39_Packet_Cable.pdf

Is there any other source of cables with the min-din with a cable coming out of the min-din ? I can see the regular 5 pin din connector to solder but can not see the min-din type.

Yaesu makes the CT-30A cable but was wondering if a cheaper cable could be found?

Thanks de John K0CQW

5239. Radios For Sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-07-31 20:23:05 UTC
From: Thomas Forrest
Topic: 2461 Message: 5239

FOR SALE -----

These are in great working shape...prices per lot or I can price individually. Mkae me a reasonable offer. You pay shipping - PayPal accepted, Money Order or Cashier's Checque.

KENWOOD TR-7950 - 2 mtr. rig. with original fix station speaker model SOP-100 and original Kenwood power supply KPS-12. Came from an estate and were hardly used although it's older equipment. It was bench tested and puts out the full rating of 50 Watts+. With original manual, microphone, and power cable. No mounting bracket. This radio does not have a tone board installed, but I believe you can get a third-part retro fit board. Make me an offer(reasonable) + shipping
---

YAESU FT-470 Handi-talkie, dual band, with accessories, case and very good battery. Hardly used and also from an estate. When I got it, the covering was still over the keypad. With speaker mic, case and manual. Assoted cables. Make me an offer(reasonable) + shipping
---

MOTOROLA - M1225 VHF commercial radio - bottom end is 150. This is a programmable radio, and I doesn't have the software. It was purchased from a business that went "belly-up" at an auction. Very clean and small. It does work as it was bench tested. Just radio and mic. Make me an offer(reasonable) + shipping
---

If you require photos, let me know. At this point I have not shot any. I will probably post this on E-bay if there are no takers in the mail groups. As with any electronics equipment, I can offer no warranty on any of this. My e-bay rating is 100% with 242 transactions.

I answer all e-mail promptly.

Thanks for reading,
73's
Tom, N4GVK

5267. Heatkit HW-101

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-08-23 02:57:41 UTC
From: macleodboba
Topic: 5267 Message: 5267

I have a very good example of Heathkits most popular rig. It was built by a technician who repaired televisions, when they were repairable. I have had 12 or so various Heathkit units, this is the best constructed one that I have seen.

I purchased this rig from the builders son, after he passed away. It comes with the original manual, and the sales slip from Heathkit. Ship date was 2/5/80.

It has the CW filter installed, filter switch is intact. The power supply is included. There is one small scratch on the top, it occurred when the seller was taking the radio out of his trunk.

I use this rig occasionally, I can demonstrate it on the air.

I have an Astatic D-104 available also.

I would like to get $300 for the rig, plus shipping.
The D-104 with the Heath connector $40 plus ship.

I can provide pictures upon request.

73, Bob WA1RM

5268. Kenwood SP-940 F/S

Topic: 5268 Message: 5268

This is the matching speaker for the TS-940. Very good condition, small scratch on top. I have replaced the speaker, the original did not sound good at all. The original speaker will be included. $75.00 plus shipping.

Thanks for looking, Bob WA1RM

5269. FS: Motorola X9000 VHF/UHF Dual Radio AND X9000 Lowband $500.00 Shipped

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-08-27 04:00:17 UTC
From: kd0ezq
Topic: 5269 Message: 5269

I have a complete Motorola X9000 setup for any HAM! I have the rare X9000 Dual radio/Single control head setup in vhf/uhf. This consists of a 100 watt VHF 136-174mhz drawer, 100 watt 440-470mhz drawer, control head, control cable, radio to radio cable, two speaker, and a dtmf microphone. Each radio is independent of the other, and capable of 64 channels each. The setup is awesome, allowing scanning of all 64channels in each radio! The 11 character display shows the selected modes of each radio, and allows the changing and/or muting of the radios independtenly. The radios have been tuned for peak performance in the 2m and 70cm band, but will also work in commercial bands too. I will program the complete setup to your specifications.

I am also selling a X9000 Lowband radio. This is the sought after radio with the 28-54mhz split. It is also a 64 channel radio. It is complete with the control head, control cable, drawer, speaker and mic. This will tx and rx in both 10m and 6m, and everything in between!

Again, I will program everything for you so it will be ready for installation upon arrival. I will also include a cd with some interesting programs for your delight.

I have pictures of everything, and everything is in great shape. Im only looking to move these due to size constraints with my new vehicle.

I am asking $500.oo shipped. Payment via Paypal or USPS Money order.

If you have any questions, Please email me at kd0ezq@....

Thanks
Tim Batt

5273. Coaxial Antenna Switches and connectors FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-08-28 16:59:55 UTC
From: Ken Simpson, W8EK
Topic: 5273 Message: 5273

Coaxial Antenna Switches and Connectors For Sale:

All antenna switches have SO-239 connectors.

B & W Model 593 Coax Switch
This is the switch that is in a rectangular box about 6
inches long, with four SO-239 connectors coming out
of the back. It will switch 3 antennas, grounding the
antennas that are not in use. It works great.
In its original box, with paper work for $35.

B & W Model 550 A coax switch
This model will switch up to 5 antennas, and does NOT
ground unused antennas. It has the coax coming out the
sides like spokes of a wheel. $35

Five position Coax Switch
This switch looks to be the same as the B & W 550 A,
but it is not. Same styling, but the unused connectors
ARE grounded. Coax out the sides like spokes of a
wheel. $35

Unknown brand of four position antenna switch
This is in a large round copper container painted black,
about 5 inches in diameter, with a large (about 3 inch)
black knob. A heavy duty grounding bolt is included.
Unused positions are NOT grounded. Coax out the sides
like spokes of a wheel. $25

Heath HD-1234 Antenna Switch
This switch will transfer four antennas. The coax
comes out of the sides like spokes of a wheel. Unused
connectors ARE grounded. Mounting bracket and paper
work included for $25.

Dow Key antenna relay
This is similar to the antenna relay like we used
in the 1960's to switch between transmit and receive.
It has a 120 V coil, but no auxiliary contacts. $30

Coax connectors and adapters For Sale:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

Chassis Mount SO-239 connectors (square) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

UHF female (SO-239) to type "F" Male (as used on cable TV) $5

Type "F" (cable TV) female to BNC male - $5

Prices do not include shipping from Florida.

Thanks.

5276. VERTEX (YAESU) VX-150 2-Meter Handheld Transceiver w/charger

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-09-03 03:12:45 UTC
From: buffalogoat
Topic: 5276 Message: 5276

I have a VERTEX (YAESU) VX-150 compact hand held VHF FM transceiver. It transmits 144.000-148.000MHz & receives 140.000-174.000MHz. It has all the bells & whistles with 200+ channel memory & is fully programmable. It has a heavy duty but lightweight aluminum case (NOT plastic!) & except for some paint chipping & minor scuffs on the corners, it is in very good shape & works as it should. Comes with AC wall charger, original rubber flex antenna & copy of operators manual. I'll take $90.00 PayPal shipped to anywhere in the continental U.S.

5279. WTT for: Late model HT.

From: Jon Deaux
Topic: 5279 Message: 5279

Looking for a late model HT, small, VHF or V/U dual for trade? Must do DPL.

Have the following:

Motorola SP50 UHF handheld, 10ch, programmed. Includes slo-chrgr. $60

Motorola Alert Monitor. VHF, Black/Chrome, Excellent condition, all lights/buttons working.

tuned up on Motorola Svc Monitor, with a new Jan-Crystal 4 yrs ago on 146.970MHz, paging tones 584.8 and 617.4 and works great with OTR tones or controller generated tones. $55

Compaq iPAQ 3955 PDA with charging/sync cradle, battery charges to 50%. No extra programs, reset to factory defaults. Includes 64mb SD card. Might be able to include some medical programs, drug guide, med dictionary, etc if they transfer. $45

Radio Shack 20ch scanner. PRO-508, works great BUT... missing antenna and power cube and needs a memory battery. Loses memory when unplugged. $20

2 Linksys/Cisco wireless routers, one is 2 yrs old, wireless G, the other is older, wireless B, working fine. $50 both.

RCA Small Wonder digital video camera. $35

Motorola Spectra Siren Cable, like new. $35

And maybe some other motorola parts/pieces if I go looking.

Prefer trades, but will sell plus paypal fees and shipping.

thanks!

5284. Microphones FS - Desk, Hand, DTMF, and Speaker Mics

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-09-06 23:23:15 UTC
From: Ken Simpson, W8EK
Topic: 5284 Message: 5284

Microphones For Sale - Desk, Hand, DTMF Touch tone, and Speaker-Mics:

Yaesu YD-844 Desk Microphone

This is a 50 K impedance desk microphone that really looks
sharp. It has a standard PTT switch on it, and also a
locking PTT switch. The YD-844 dynamic base station microphone
is an optional accessory made by Yaesu. Made of a heavy cast
metal it uses a dynamic 50K ohm element.

A picture can be seen at
http://www.eham.net/data/classifieds/images/289870.jpg
or
http://www.foxtango.org/ft-library/FT-Library/Eighties/yd-844.jpg

This particular mic works fine and looks very close to new.
No scratches or imperfections. $100

Turner Hand Microphone
J 450 C, Ceramic Hand Microphone
Black/Dark Gray front, with brownish/light gray back.
Dark PTT button.
This is high impedance mic, presently with stripped and
tinned ends.
This particular mic works fine and looks like new. $30

Radio Shack Hand Mic with DTMF Tones, plus many extra buttons
This mic has the modular 8 conductor plug like a computer
LAN on it. The mic has a 16 digit touch tone pad on it,
along with buttons for up, down, VFO, MR, MHz, Call, and
of course PTT. It also has a lock switch. Lettering is
very clear, and coiled cord is in great shape. $45

Generic Hand Microphone
This is a low impedance hand microphone, black in color.
It is presently has an 8 pin round connector, wired for
Kenwood. $25
As above, with no connector. $22

Azden PCM-463 hand microphone
This is a standard hand microphone with up and down
switches on it. It also has a "Memory 1 Call" button
on the top of the PTT switch. I think this was used
with the Azden PCS-5000. I know I used the PCS-5000
on packet, and have now found the mic that was once
with the rig. I also used packet on a PCS-4000 and
PCS-6000 at various times, so it is possible that

this mic might be used with either of those. $30

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed.
Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones For Sale:

Drake 1525 EM Touchtone Microphone
Normal hand mic from the front, but has a touchtone pad
on the back. Four pin mic plug. Used, but in good shape.
Includes paper work. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
With paper work for $40.

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Speaker Microphones For Sale:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks
fine and works fine. $18

Yaesu YM-24 A speaker mic.
Fits FT-207, 208, plus many others. It has the
odd little round connector on it like Yaesu, Wilson,
Santec, and others used in the 1970s and 80s.
This particular unit works fine, and looks great
also. $20

Speaker Mics for standard 2.5 mm and 3.5 mm connectors
This connection was used on the vast majority of HTs
until recently. If your HT has a 2.3 mm and 3.5 mm
connector, these will likely work for you.

Two are available.
One is a Prime, and the other is a Densei. Both work
fine and look very close to new. Your choice for $20.

Prices do not include shipping from Florida.

Thanks.

Uniden PC122XL 40 channels with SSB works - $35.00

Astatic D104 desk mic w/ lower key bar, all chrome looks better than average, wired for Galaxy Saturn. - $60,00

Realistic TRC-474, works - $30.00

FT-767GX, HF transceiver, optional modules for VHF/UHF (not included), Panel looks good (top and bottom not so good) works perfect on all bands and all modes - $495.00

Cobra 19LTD Classic w mic, works - $35.00

Heathkit SB-220 amp installed on Rack Mount chassis. Full legal power on 80m and 40m. 20m = 1100w 15m = 900w, 10m = 800w. My neighbors don't care much for it! It has larger meters and a standby switch installed on a green panel. Has AG6K parasitic suppressors, improved filter capacitors and bleeders, upgraded input tuning circuits for better input SWR (for solid state rigs), control grids directly grounded. Otherwise original - $675.00

SBA-1200 1500w marine ssb base amp with power supply in Cabinet Mount. No tubes (3-500z x 2) no interconnecting cable from lower (power supply) to upper drawer (amp). It has a very big transformer and several huge tuning caps, a stepper motor actuated tapped coil. It was pulled from a working environment several years ago. - $150.00

Siltronix 1011C with VFO Looks good and works good. - $125.00

Turner +2 amplified desk Mic looks rough but works great - $40.00

Yeasu FT-101E looks good and works good - $300.00

Ranger Mobile 6300f chrome covers with bracket - $125

Galaxy 55 Mobile (American Flag Faceplate) - $125

Palomar 500 SWR/wattmeter, AM phone jack, large scale, 1.6-32mhz, 1000w - $50

Konnex antenna matcher/ swr meter New - $30

Lafayette swr/Field strength meter (no FS ant) - $20

Superstar Super Shooter pistol grip mic New - $25

Uniden Washington 40 ch Base AM/SSB with printed owners manual - $140.00

If you are local, you can see it. I will not ship the larger items but will ship the smaller ones for actual cost + $1

5287. WTS: Icom ID800H 390.00

I have an Icom2200H that has been used very little.

120.00 shipped anywhere in the US.

Paypal or USPS money order only.

5289. WTB: Medium duty rotor

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-09-09 18:49:00 UTC
From: John Geiger
Topic: 5289 Message: 5289

I am looking for a medium duty rotor like a Yaesu 450/Ham M/CD45 something like that. Needs the controller with it. Cable and mast mounting bracket would be a bonus but not absolutely necessary. Anyone have an extra one for sale? I can pay with paypal/MO or pick it up in the Oklahoma or North Texas area.

73s John AA5JG

5290. FS: Yaesu FT50 dualband (2m/70cm) HT

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-09-10 01:16:19 UTC
From: John Geiger
Topic: 5290 Message: 5290

I have for sale a Yaesu FT50 dualband HT in very good condition that works fine also. This is the model with the extended keypad that has the voice recorder with it-when is the last time you saw a HT with a voice keyer! It comes with a MAHA FNB-41 NIMH battery that does 9.6 v with 1050mah. At this voltage the FT50 puts out 5 watts on both bands. It also has the wall charger, a DC cable so you can hook it to a PS or cigarette lighter plug, the manual, and a 1 inch stubby antenna. The antenna does ok if you are at a hamfest or by the repeater-don't expect miracles out of it.

The FT50 also will do dual receive and has a wideband receiver in it-including broadcast band FM. It has all of the usual stuff like CTCSS encode and decode, DCS, and very loud audio.

I am asking $105 shipped in the US for the HT and can take paypal/check/MO.

73s John AA5JG

5291. Hal P-38 HF Radio DSP Modem

Topic: 5295 Message: 5295

Two meter FM Transceiver, plus many ham station accessory
items For Sale:

Two meter FM Transceiver:

KDK FM-2033 mobile FM transceiver for 2 meters

This rig produces just over 25 Watts in high power and
about 7 watts in low power. The rig is fully synthesized,
has memories, scan, subaudible PL tone, and all the things
that one expects in a 2 meter rig. It has a touchtone
microphone with it. It sounds great, and hears well.
It needs 13 V DC at about 7 amps.

This particular rig is in very nice condition. There is
one paint spot missing, about the size of a pin head. It
includes the touchtone microphone, mobile mounting bracket,
power cord, and paper work. The original box is also included,
although the box looks much worse than the radio. Even the
mic clip, and a bag of screws are included, as is the
original multicolored sales brochure. $89

TenTec items:

TenTec 285, 500 Hz filter
500 hz for CW or digital use
Fits Corsairs, Paragons, Omni V and VI, and others.
This one has its paperwork and looks like new. $75

TenTec 288, 1800 Hz filter
1800 hz for wide CW, narrow SSB or digital use
Fits Corsairs, Paragons, Omni V and VI, and others.
It looks like new, with paperwork. $75

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is very quiet, and well
shielded, and does not produce any electrical noise that
I could find. $150

Heath VHF Wattmeter

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.
Similar to the HM-102, but for VHF frequencies, with
250 and 25 watt scales. It can also be used to check SWR,
and has a remote sensor that can either be left inside
the meter, or separated from the actual meter by about
3 feet. SO-239 connectors in and out.
This particular meter works great, looks fine and includes
paper work for $ 40.

Midland 23-126 SWR Bridge
This is an HF SWR Bridge, but it can be used up thru 2 meters,
with slightly reduced accuracy. It is also a field strength
meter. SO-239 connectors.
This one works fine, and looks extremely nice. I do not see
any scratches on it. $30

Yaesu YD-844 Desk Microphone

This is a 50 K impedance desk microphone that really looks
sharp. It has a standard PTT switch on it, and also a
locking PTT switch. The YD-844 dynamic base station microphone
is an optional accessory made by Yaesu. Made of a heavy cast
metal it uses a dynamic 50K ohm element.

A picture can be seen at
http://www.eham.net/data/classifieds/images/289870.jpg
or
http://www.foxtango.org/ft-library/F...ies/yd-844.jpg

This particular mic works fine and looks very close to new.
No scratches or imperfections. $100

Johnson SWR sensor 250-24

This unit is in its original box that says "S W R Bridge,
Standing Wave Ratio Bridge, 52 ohms, Cat No 250-24".

However, this is only the sensor unit. There is no actual
meter. It is the round, cylindrical sensor that can go with
many of the Johnson Matchbox units. SO-239 connectors on
each end, plus terminals to connect the wires to the meter.

This unit is in the original box, with the original paper
work, and original packing material. It appears to be new,
and certainly is quite collectible. $60

CMOS Iambic Keyer

This keyer features a build in set of HamKey Paddles.
The front has speed control, plus a volume control for
the sidetone volume. Of course that means that it can
also be used for code practice. Also on the front panel
is a 3 position switch that turns off the output to the
transmitter (for code practice), puts it in to "Keyer

mode", or locks it on for transmitter tune up.

The rear panel has provisions for an external speaker
(one is built in), external key, external paddles, plus
jacks for keying the transmitter. There is also a connector
for external 9 to 12 V DC power, although it can be powered
by a regular 9 V battery if desired.

It works fine and is in extremely nice condition. $50

Cables for CW Straight Key and for CW Paddles:

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it,
as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector
on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

Vectronics VEC-212 Code Practice Oscillator:

This appears to be the same as the MFJ 557 code practice
oscillator, but with the VEC label on it.

A picture can be seen at http://www.n4mw.com/cp100tn.jpg

It is a traditional code practice oscillator, with adjustable
volume and tone. It includes a straight key on a nice base.
It operates from a 9 volt battery, or from a wall wort power
supply.

With paper work for $22.

Waters "Universal Hybrid Coupler II" Model 3002

Most of us would likely call this a phone patch, but it
is really much more than that. It does that, but also
will interface with a tape recorder, and permit recording
and play back of on-the-air QSOs. Nothing says that the
tape recorder input must be used that way. Connect the
sound card in your computer in this position, and you
have a very effective interface.

Model 3002 includes a speech compressor powered by a 9
volt battery. The front panel is finished on both
sides, with one side having it set in a horizontal
position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only
found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Heath Phone Patch and SWR Bridge:

Both of these units match the Heath SB series.

Heath HD-15 Phone Patch
This is the unit with the VU meter on the left and 3 knobs
that match the SB series to the middle and right. Low or
high Z output to the transmitter. It can also be used as
an interface to the computer for PSK31, etc. It is in
good shape. Paper work included for $25.

Heath HM-15 SWR Bridge
It is an HF SWR Bridge, with SO-239 connectors on the back.
The front has the meter on the left, and two knobs to the
right. It is the same size as the HD-15 phone patch. This
one works fine and is in nice cosmetic shape. Paper work
included for $20.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation
in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work. $30

B & W model 426 low pass filter
B & W TVI filter, cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each end.
This is an older model that seems much heavier duty. It weighs
almost twice as much as the newer models, and looks like it
would take more power. It likely was made in the days that
plate modulated AM was the rule. $30

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. With paper work $40.

Bud LF-601 low pass filter
This filter is adjustable for best attenuation in your particular
situation, and also to more closely match your specific impedance.
It cuts off just above 10 meters (if adjusted as such), and will

handle 1500 watts.
In extremely nice condition for $35.

MFJ 722 audio filter

This is an audio filter made to go between your rig
and speaker. It includes a bypass switch.

You can put it into a high pass mode, use it as a notch
filter, or as a narrow CW filter. It is great for both
SSB and CW, and appears to be similar to the Autek
audio filter, but is in a much nicer egg shell and
woodgrain enclosure.
It requires 12 V DC for operation.

For more info, please see
http://www.mfjenterprises.com/Produc...ductid=MFJ-722

This particular filter works fine, and looks OK also.
Paper work included for $45.

Alliance U-100 and U-110 antenna rotor control boxes

This is the control box only, and not the actual
rotor. This control box takes 4 conductor cable.
It was designed for large TV antennas, but is often
used as an elevation rotor for satellite arrays,
or for VHF beams.

Two are available. One is for a U-100 and one is for
a U-110.
Electrically they are interchangeable, but are styled
slightly different.

Both control boxes works fine, and look fine also.

Paper work included for $25 each.

AEA Items:

AEA AC-1
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with PK-232, PK-88 or others. $15

AEA Software
The followings is legitimate AEA software, with the
original disks with serial numbers, and original documentation.
It is not copied or "bootleg" software.
Log Windows, Version 2.0 - $15

MFJ 1272 BZ switch to transfer between microphone and TNC

MFJ made these so it would be easy to use a TNC such as the
AEA PK-88. The small box has a socket to plug your microphone

into on the front, along with a switch to switch between mic or TNC. There are two cables coming out of the back, with one going to the mic jack on your rig, and other going to your TNC. There is also provision for receive audio in, and an external speaker. No power is required. Inside the box is a series of jumpers, so that it can be configured for any rig.

This model is made to switch between an AEA PK-88, and any rig with the round 8 pin mic connector.

Paper work is included that shows how to set the jumpers for most of the common rigs (Kenwood, Yaesu, Icom, Alinco, etc.).

It is in A-1 shape, and works 100%. $30

Icom Hand Microphones:

Icom HM-3
This low impedance hand microphone fits the Icom 22S, 224, 205S, 451A, 551D and likely others. It works fine, looks fine, and has a standard 4 pin connector on it. $20

Icom HM-4
This low impedance hand microphone fits the Icom 20, 21, 22, 30, 31, 60, 201, 202, 211, 215, 230, 245, 280, 402 and likely others. This one has a nice pattern on the scope, but presently does not have a connector on it, but of course one could be added. It looks fine. $20

Generic Hand Microphone
This is a low impedance hand microphone, black in color. It is presently has an 8 pin round connector, wired for Kenwood. $25
As above, with no connector. $22

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed.
Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

Drake 1525 EM Touchtone Microphone
Normal hand mic from the front, but has a touchtone pad on the back. Four pin mic plug. Used, but in good shape. Includes paper work. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
With paper work for $40.

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Speaker Microphones:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks
fine and works fine. $18

Yaesu YM-24 A speaker mic.
Fits FT-207, 208, plus many others. It has the
odd little round connector on it like Yaesu, Wilson,
Santec, and others used in the 1970s and 80s.
This particular unit works fine, and looks great
also. $20

Speaker Mics for standard 2.5 mm and 3.5 mm connectors
This connection was used on the vast majority of HTs
until recently. If your HT has a 2.3 mm and 3.5 mm
connector, these will likely work for you.
Two are available.
One is a Prime, and the other is a Densei. Both work
fine and look very close to new. Your choice for $20.

Yaesu Items:

Yaesu YM-24 A speaker mic.
Fits FT-207, 208, plus many others. It has the
odd little round connector on it like Yaesu, Wilson,
Santec, and others used in the 1970s and 80s.
This particular unit works fine, and looks great
also. $20

Yaesu Hat
This "Ball Cap" has Yaesu on the front of it in big letters.
Actually, I have two. One is white and says only "Yaesu".
The other is dark red and says "Yaesu Communications".
Both have never been used. Your choice for $6 each.

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Yaesu FT-207
Yaesu FT-209

Wrist Strap for Yaesu FT-209 - $4

LARGE Analog Meters:

General Electric Edgewise DC ammeter
0-100 ma scale - Edgewise meter with scale 5+ inches
long and 1.7 inches high. White scale, w/ silver/gray mounting
This is a very nice meter that can be read across the room. $30

LabVolt AC ammeter
0-1 amp scale, 4 inch square meter, $20

LabVolt DC ammeter
0-1 amp scale, 4 inch square meter, $20

DC voltmeter has 3 scales on it - 5, 10, and 25 volts.
It says it is a Niehoff Voltmeter, Chicago, Model T-2.
It looks like 1930s vintage, and is in very nice shape. $28

Very heavy duty chokes, as used to filter ripple in high current
power supplies.
These chokes (inductors) weigh about 8 pounds each, and
are designed to be used in low voltage applications. They were both
removed from power supplies, and are in close to new condition.

One is from a 20 amp power supply. $13.

Another is from a 30 amp power supply. $15.

Prices do not include shipping from Florida.

Thanks.

5297. FS: ICOM 220 Repeater and Waycom Duplexers - Taking to Findlay]

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-09-12 23:27:46 UTC
From: Shanon KA8SPW
Topic: 5297 Message: 5297

Hello,

Taking this to Findlay tomorrow, I will be in the flea market area.
Driving a Ford panel van, dark burgundy.

This repeater will be on the air if I can get a power hookup and it
don't interfere with another one.

224.800 Out 223.200 In with a PL of 107.2

ICOM RP-2210 Repeater
N connectors, 15 pin D connector for controller.
Full ORIGINAL service manual.
DOES NOT INCLUDE A CONTROLLER - (Will be using my NHRC-2 for demo)

Wacom Duplexers BpBr - Model 652
Ordered on frequency from Waycom
Original Calibration sheet and Tuning Instructions

Package includes: Repeater and Duplexers with RG-142 interconnect cables
and Polyphaser arrestor.

Both are like new. Over $2000 new, Asking $1000

Free with Repeater: 6' Motorola rack with 1/4" brass plate on top for 4
Polyphasers, two locking doors and key.
TE Systems Repeater Amplifier - NOT WORKING M#2210R
222-225 MHz NOT WORKING (I got it that way)

For purchase separately if wanted: Hustler G7-220 antenna NEW out of
box. NEVER assembled. $100 (Will not sell unless repeater is sold.)

If this don't sell right away I may relocate it, but there is no 220
activity in the area anymore. It going back to my basement is not going
to happen, the wife wants a freezer, no room for both! Next up are my
TM742's with 220 modules, only going if the repeater sells.

Kenwood TH-215 HT, plus many accessory items for many HTs For Sale:

Kenwood TH-215, 2 meter HT (plus public service band on receive)
Covers the 2 meter band with up to 7 W output power. Of course
it has memories, scan features, and the things one expects in
an HT. Subaudible (PL, CTCSS) tones are built in and can be
adjusted from the keypad. A 16 digit touchtone (DTMF) pad is
built in. It can be powered by the PG-3 E cord from 13 V DC
to provide full 7 watt output. It also has about 1 W output
in low power.
This one is in very nice condition. It includes a PB-2 battery,
rubber duck antenna, and paper work for $70.

BC-7 Desk Charger
This unit will fast charge PB-1, PB-2, PB-3, PB-4, and maybe
other Kenwood battery packs. It works fine and is in good
shape. $50

PG-3 E Cord
This cord plugs into the cigarette lighter to provide 12 V
DC to the TH-215, TH-225, TH-415, and other Kenwood HTs.
It has a filter built in, and permits high power operation
of the HTs. $20

SC-12 Vinyl Case
For TH-215, TH-225 and others, with room for the standard
PB-2 and PB-3 battery packs. Black color. Very nice
condition. $15

SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1
and PB-4 battery packs. It can also be used with the smaller
PB-2 and PB-3 battery packs, by putting a filler in the case.
Black color. In very nice condition. $15

Bianchi Real Leather Case for TH-215, TH-225, etc.
For use with the larger PB-1 and PB-4 batteries, but can be
used with the smaller PB-2 and PB-3 batteries. This is real
leather, tan in color, and is in very nice condition. $25

Case for Drake TR-33C
This is the black case that fits the Drake TR-33C, and has
cutouts in the back for antenna, power, etc. It includes
the shoulder strap, and is in good shape. $12

Case for Drake TR-22
As above, but for the TR-22. No shoulder strap. $10

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood BH-2 for TH-215, TH-225, TR-2500, TR-2600, and others
Kenwood TR-2400
Motorola
Yaesu FT-207
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

Speaker Microphones:

Speaker Mics for standard 2.5 mm and 3.5 mm connectors
This connection was used on the vast majority of HTs
until recently. If your HT has a 2.3 mm and 3.5 mm
connector, these will likely work for you.
Two are available.
One is a Prime, and the other is a Densei. Both work
fine and look very close to new. Your choice for $20.

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks
fine and works fine. $18

Accessories specific to the Kenwood TR-2400 HT:

Belt clip for TR-2400 HT, complete with hardware - $8

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery
of the Kenwood TR-2400, 2 meter HT, outside of the HT itself.
Usually, one must have the battery inside the HT, but this
lets you charge a second battery outside of the HT. The
original charger is used. It is in good shape, and works
fine. $3

Wrist strap
I think it fits most Kenwood (and maybe other) HTs - $4

Antenna adapter to fit the BNC connector on the HT and
provide an SO-239 connector that will permit a PL-259 to
be attached. This adapter can be used on any HT with a
BNC connector. $5

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15
Kenwood Stubby Duck for TH-21, 4 inches long - $15

Alinco Stubby w/BNC Connector, 4.6 inches long

Alinco 220 MHz, w/BNC, 6 inches long

BNC Stubby for 440 MHz, 3 inches long
BNC regular for 440 MHz, 6.5 inches long

Larsen Magnetic Antenna Mounts:

Larsen NLA-MM Mobile Antenna Mag Mount
This rectangular mag mount features an extremely strong
magnet. The center of the mag mount takes an NLA type
antenna. It includes coax, with a PL-259 connector on it.
It is in good condition. $20

Larsen PO-MM Mobile Antenna Mag Mount
Same as NLA-MM and NMO-MM above, except the center
of the mag mount has an SO-239 connector, which
means any antenna with a PL-259 can be used with it.
It is in good condition. $17

Larsen VHF and UHF Mobile Antennas:

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $7

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount,
and others. It can be cut for 2 meters, 220 MHz, or
450 MHz bands. $7

Larsen NMO-Q Quarter Wave Antenna
For two meters. $10
Precut for 450 MHz. New, still in bag. $8
For 450 MHz, used, but very good. $6

Avanti / Antenna Specialists "On Glass" antennas:

These antennas were made by Avanti, and then later by Antenna Specialists, to mount on a windshield, or other glass. They do not require a ground plane, as they are 1/2 wave antennas, rated to have 3 db gain. They are ideal for places where a ground plane is not available, such as a boat or motor home, in addition to cars. A special tuning box is included to match to your particular situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case. It fits most of the Santec HTs, such as the HT-1200, ST-142, ST-144, ST-440, etc. The real leather case includes a built in belt clip, plus a removable leather shoulder strap.
The case itself is in very nice shape. The leather shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a service pack. It has schematics, circuit explanations, voltages, etc. $18

"Dead" Icom Battery Pack:

Icom BP-3 battery pack
I have the equivalent of the BP-3 battery pack that is dead. This is actually a pack from a Radio Shack HT that uses the same batteries as the Icom. It looks like it will hold 6 AA battery cells. This pack is used on the IC-2 AT, 3 AT, 4 AT, 02 AT, 03 AT, 04 AT, and some others. It will also fit some of the Radio Shack / Realistic HTs such as the HTX-202 and HTX-404.
This one is dead, but if you need a battery shell, to put a new "insert" in to, or for some project, it would be ideal. Adding one of the newer high capacity inserts will give you a very inexpensive new battery, or build a regulator in for use from 12 V DC.
It looks very nice, and is not all scratched up. $10

Selectone ST-131 Subaudible PL tone encoder
If you need subaudible tones, this unit will add them
to the Icom IC-2AT, 3AT, 4AT, and others of that series
that lacked the tones originally. It is a postage stamp
size unit. This one has never been used, and is still
in its original plastic bag, with the instructions. $30

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the
battery of the Azden PCS-300, 2 meter HT, outside
of the HT itself. Usually, one must have the battery
inside the HT, but this lets you charge a second
battery outside of the HT. The original charger is
used. If you have a PCS-300 HT, you need this adapter.
It works fine, and looks like new. $3

Original Kenwood Manuals:

All manuals are in very nice, close to new
condition, for Kenwood radios, unless stated otherwise.

Operating manual for TW-4000 dual bander $15

Service manual for TW-4000 dual bander $20

Operating manual for TH-21 A / AT HT for 2 meters $8

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E
HTs for 440 MHz, 220 MHz and 2 meters $10

Service manual for TH-21 series HTs $20

Operating manual for TH-215, 2 meter HT
Good condition, but has some writing on the covers $10

Operating manual for TH-225, 2 meter HT - Good condition $12

Operating manual for TM-221/421 mobile $15

Operating manual for TH-241 / 441 / 541 mobile FM transceivers
For 2 meters, 440 MHz, and 1200 MHz. $ 12

Operating manual for TR-2200, 2 meter "portable"
This is very similar to the Drake TR-22. $15

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $14

Operating manual for TR-2600, 2 meter HT $12

Service Manual for TR-2600, 2 meter HT $15

Manuals for Kenwood Accessories:

Operating manual for BC-5 DC charger/adapter $4

Operating manual for MC-30 and MC-35 hand microphone $5

Operating manual for MC-80 desk microphone $5

Operating manual for MC-85 desk microphone $4

Operating manual for PS-30 power supply $5

Operating manual for SMC-24 speaker mic $4

Operating manual for SMC-25 speaker mic $4

All of the above are in English.

Spanish version of the Operating Manual
for the Kenwood TM G-707 dual band transceiver
This is the original operating manual only, in Spanish.
It looks like it is quite extensive and detailed.
It is basically new, only being opened to observe that
it is in Spanish only. It is original from Kenwood. $10

ORIGINAL Icom operating manuals:
Please note that all of these are original Icom manuals
and are not copies.
All are in very good condition.
These are original manuals only.

BC-30 Desk Charger $7
BC-35 Desk Charger $7
BP-2, BP-3, BP-4, and BP-5 Batteries $3
BP-21, BP-22, BP-23, and BP-24 Batteries $3
IC-229, 2 meter mobile transceiver $15
IC-230, 2 meter mobile transceiver $15
IC-3 PA Power supply $10
UT-16 Voice Synthesizer $5

These are original manuals only.

Does anyone have an older two meter ham rig and need crystals?

Maybe I can help. I have some of both transmit and receive
2 meter crystals. Most are in the 146 and 147 MHz band segments,
with very, very few in the 145 MHz segment, and none in the
144 MHz segment. These are for ham rigs only, and not
commercial rigs.

These are all the small HC-25 crystals, like are used in most
of the solid state 2 meter mobiles and HTs. Please e-mail
the operating frequency you need. I have them listed by
operating frequency and rig, and not by actual xtal frequency.
Send the frequencies you need (transmit or receive), and
the rig that you have, and I will see if I can help. I have
cross references for the various rigs, so I will know what
you need if you give the rig. Crystals are $6 each.

Prices do not include shipping from Florida.

Thanks.

5310. F.S. Icom IC-EX2 Marker/Extension Terminal

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-09-22 21:25:24 UTC
From: Darrell
Topic: 5310 Message: 5310

I have one Icom IC-EX2 Marker/Extension Terminal unit with box,with both cables, but no instruction manual. The Icom IC-EX2 is a computer interface for linking an ICOM IC-251 (and similar) radios to a computer. It plugs into the radios accessory socket and has some useful sockets on the unit itself that you can link to a pc or use for other interfaces etc. ALC, SEND/RX, 100 KHz marker, etc are some of the functions that this unit allows you to remotely control. It also works as an accessory socket doubler, so if you have the full line up of accessories for your radio you no longer have to keep switching the plugs in and out of the back of the radio.
Should work with IC-730, IC-701, IC-211, IC-251 and other older Icom products. Please email for details.
Price $20.00 plus shipping from 40207, Payment by Money Order or personal check. Thanks 73 de WA4USO D Darby

5314. Icom IC 24AT

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-09-23 10:40:51 UTC
From: Liwei
Topic: 5314 Message: 5314

Have a Icom IC-24AT with a brand new battery and charger the battery I just bought 3 weeks ago for $45 and the battery charger for $80 The battery is a 7.2 v @ 2300 mAh NiMH. The HT powers up but the volume is weak. I also have a speaker mic for this and a extra battery pack that you could have refurbished. I would like to sell these items as my XYL is upset that I bought the battery and charger. If you happen to need a spare battery and would like to get a possible easy fix for of a HT as my XYL will not hear of it, let me know. I would like to get $80 or best offer for all of the items in the photos I am putting on this. I have posted this early but I don't think I described this very well. I do have photos if you would like them.

You can email at n0mwu at me.com or n0mwu at arrl.net

From: John Geiger
Topic: 5322 Message: 5322

I have for sale a mint condition yaesu FT60 dualband (2m/70cm) HT with wideband receive. Comes with the battery, wall charger, antenna, manual, belt clip, and original box. Can't tell this one from new. I am asking $130 shipping in the US and can take paypal/check/MO.

73s John AA5JG

5323. FS: Icom T90A triband HT

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-09-24 21:43:07 UTC
From: John Geiger
Topic: 5323 Message: 5323

I have for sale an Icom T90A triband HT in very good condition, and it operates perfectly. It does 5 watts on 6m/2m/70cm and also does wideband receive. It comes with a good battery, the stock antenna (but without the 6 meter coil) and a cigarette lighter plug I have been using to charge the battery, and it will also allow you to run the HT mobile without draining the battery. It also comes with the manual.

I am asking $170 shipped in the US and can take paypal/check/MO.

73s John AA5JG

From: Ken Simpson, W8EK
Topic: 5328 Message: 5328

Wattmeter and SWR Bridges For Sale:

Heath VHF Wattmeter:

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.
Similar to the HM-102, but for VHF frequencies, with
250 and 25 watt scales. It can also be used to check SWR,
and has a remote sensor that can either be left inside
the meter, or separated from the actual meter by about
3 feet. SO-239 connectors in and out.
This particular meter works great, looks fine and includes
paper work for $ 40.

Heath HM-15 SWR Bridge
It is an HF SWR Bridge, with SO-239 connectors on the back.
The front has the meter on the left, and two knobs to the
right. It is the same size as the HD-15 phone patch. This
one works fine and is in nice cosmetic shape. Paper work
included for $20.

Midland 23-126 SWR Bridge
This is an HF SWR Bridge, but it can be used up thru 2 meters,
with slightly reduced accuracy. It is also a field strength
meter. SO-239 connectors.
This one works fine, and looks extremely nice. I do not see
any scratches on it. $30

Johnson SWR sensor 250-24

This unit is in its original box that says "S W R Bridge,
Standing Wave Ratio Bridge, 52 ohms, Cat No 250-24".

However, this is only the sensor unit. There is no actual
meter. It is the round, cylindrical sensor that can go with
many of the Johnson Matchbox units. SO-239 connectors on
each end, plus terminals to connect the wires to the meter.

This unit is in the original box, with the original paper
work, and original packing material. It appears to be new,
and certainly is quite collectible. $60

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. With paper work $40.

B & W model 426 low pass filter
B & W TVI filter, cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each end.
This is an older model that seems much heavier duty. It weighs
almost twice as much as the newer models, and looks like it
would take more power. It likely was made in the days that
plate modulated AM was the rule. $30

Bud LF-601 low pass filter
This filter is adjustable for best attenuation in your particular
situation, and also to more closely match your specific impedance.
It cuts off just above 10 meters (if adjusted as such), and will
handle 1500 watts.
In extremely nice condition for $35.

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation
in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work. $30

Alliance U-100 and U-110 antenna rotor control boxes
This is the control box only, and not the actual
rotor. This control box takes 4 conductor cable.
It was designed for large TV antennas, but is often
used as an elevation rotor for satellite arrays,
or for VHF beams.
Two are available. One is for a U-100 and one is for
a U-110.
Electrically they are interchangeable, but are styled
slightly different.
Both control boxes works fine, and look fine also.
Paper work included for $25 each.

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

Mirage B3016 2 meter amplifier. Works 100%. 30 watts in gets 160 watts out. 10 watts in gives 100 watts out. Even 5 watts will drive it to 75 watts out. Excellent preamp on the receive. It has one bent fin on the heat sink which has no effect on performance.

$150.00 plus $10.00 shipping and insurance to the lower 48 only.

Email stufftosell at twcny.rr.com with questions. Will accept PayPal or US Postal Money Order.

Thanks and 73.

5341. Many antennas and related items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-10-03 12:35:45 UTC
From: Ken Simpson, W8EK
Topic: 5341 Message: 5341

Antennas and antenna related accessories For Sale:

Multiband HF "doublet" antenna:

This antenna is basically an 80 meter dipole, fed with
"Window" twin lead. It is approximately 66 feet long on
each half, with a center insulator that it can be hung by,
and a length of window twin lead to go to your antenna
tuner. It does need to be used with an antenna tuner,
capable of feeding balanced line. With an antenna tuner,
it should be able to be used on most HF bands.

This antenna came from a silent key estate. I have no
paper work on it, and do not know the manufacturer.
It was in a drawer, and not in the air, so it is quite
possible that it has not been used. It is in good shape,
although the stranded copper antenna wire is no longer
shiny. $30

Antenna Baluns:

A balun is made to convert the unbalanced coaxial cable to a
balanced antenna, such as a beam or dipole.
These are 1:1 baluns, which means that they will preserve the
impedance, instead of acting like a transformer. They will
handle full legal power.

HF 1 to 1 Baluns:

The Big Signal W2DU Balun
Model HF. 1 to 1 ratio. Stainless steel hardware.
A lightning arrester is included in this balun.
It is a current type balun, covering from 1.8 to 30 MHz.
This one works fine and looks very close to new. $25

Hi-Q Balun by VanGorden
This balun has a 1 to 1 ratio, and also includes a
lightning arrester built in to it. It also is for HF,
and can function as an antenna center insulator as well.
This one is still in its original packaging. $20

Two Position Coax Switch w/Lightning Protection
Alpha Delta "Delta 2" two position switch
This is the switch that has a lot of lightning protection built
in, including a gas discharge tube. It also has a center
position of the switch that grounds both antennas.
You can read more about it at

http://www.universal-radio.com/CATALOG/switch/2415.html
This one is in nice condition.
Of course it works fine. $40

Antenna Traps for 17 meters (18.1 MHz)

Unadilla KW-17 Traps
17 Meter (18.118 MHz) Reyco Coils

W2VS traps are available for 80 meters and up. Rated for
2KW PEP. Built from stainless steel and aluminum hardware
to resist corrosion, these rugged traps have a pull strength
of over 600 lbs. Trap coils are waterproofed and condensers
are epoxy-sealed.

These are $46 from Unadilla. It appears that these have
never been used. Buy the pair for only $25.

Heath HM-15 SWR Bridge
It is an HF SWR Bridge, with SO-239 connectors on the back.
The front has the meter on the left, and two knobs to the
right. It is the same size as the HD-15 phone patch. This
one works fine and is in nice cosmetic shape. Paper work
included for $20.

Heath HM-2102 VHF Wattmeter
Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.
Similar to the HM-102, but for VHF frequencies, with
250 and 25 watt scales. It can also be used to check SWR,
and has a remote sensor that can either be left inside
the meter, or separated from the actual meter by about
3 feet. SO-239 connectors in and out.
This particular meter works great, looks fine and
includes paper work for $40.

Johnson SWR sensor 250-24

This unit is in its original box that says "S W R Bridge,
Standing Wave Ratio Bridge, 52 ohms, Cat No 250-24".

However, this is only the sensor unit. There is no actual
meter. It is the round, cylindrical sensor that can go with
many of the Johnson Matchbox units. SO-239 connectors on
each end, plus terminals to connect the wires to the meter.

This unit is in the original box, with the original paper
work, and original packing material. It appears to be new,
and certainly is quite collectible. $60

Hustler HF mobile high power resonators

All work fine and are in great cosmetic condition.

"Super" high power resonators (good for 2 KW PEP)
80 meter RM-80 S
.....can be cut for CW or phone, and also used on a 4BTV
.....Vertical to give 80/75 meter coverage $38
15 meter RM-15 S $18
10 meter RM-10 S $16

7 pin DIN Cable
This cable has a 7 pin DIN plug on each end, and is about
18 inches long. I think it is used for Icom HF transceivers
to connect the HF rig to one of the automatic antenna tuners,
such as the AT-150. It could have other uses. $20

Alliance U-100 and U-110 antenna rotor control boxes

This is the control box only, and not the actual
rotor. This control box takes 4 conductor cable.
It was designed for large TV antennas, but is often
used as an elevation rotor for satellite arrays,
or for VHF beams.

Two are available. One is for a U-100 and one is for
a U-110.
Electrically they are interchangeable, but are styled
slightly different.

Both control boxes works fine, and look fine also.

Paper work included for $25 each

Larsen VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $7

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount,
and others. It can be cut for 2 meters, 220 MHz, or
450 MHz bands. $7

Larsen NMO-Q Quarter Wave Antenna
For two meters. $10
Precut for 450 MHz. New, still in bag. $8

For 450 MHz, used, but very good. $6

Larsen Magnetic Antenna Mounts:

Larsen NLA-MM Mobile Antenna Mag Mount
This rectangular mag mount features an extremely strong magnet. The center of the mag mount takes an NLA type antenna. It includes coax, with a PL-259 connector on it. It is in good condition. $20

Larsen PO-MM Mobile Antenna Mag Mount
Same as NLA-MM and NMO-MM above, except the center of the mag mount has an SO-239 connector, which means any antenna with a PL-259 can be used with it. It is in good condition. $17

Avanti "On Glass" antenna for 440 MHz For Sale:

This antenna was made by Avanti to mount on a windshield, or other glass. It does not require a ground plane, as it is a 1/2 wave antenna, rated to have 3 db gain. It is ideal for places where a ground plane is not available, such as a boat or motor home, in addition to cars. A special tuning box is included to match to your particular situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition, and are $10 each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15
Kenwood Stubby Duck for TH-21, 4 inches long - $15

Alinco Stubby w/BNC Connector, 4.6 inches long

Alinco 220 MHz, w/BNC, 6 inches long

BNC Stubby for 440 MHz, 3 inches long
BNC regular for 440 MHz, 6.5 inches long

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. With paper work $40.

Bud LF-601 low pass filter
This filter is adjustable for best attenuation in your particular
situation, and also to more closely match your specific impedance.
It cuts off just above 10 meters (if adjusted as such), and will
handle 1500 watts. SO-239 connector on each end.
In extremely nice condition for $35.

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation
in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work. $30

B & W model 426 low pass filter
B & W TVI filter, cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each end.
This is an older model that seems much heavier duty. It weighs
almost twice as much as the newer models, and looks like it
would take more power. It likely was made in the days that
plate modulated AM was the rule. $30

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

Chassis Mount SO-239 connectors (square) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

UHF female (SO-239) to type "F" Male (as used on cable TV) $5

Type "F" (cable TV) female to BNC male - $5

Prices do not include shipping from Florida.

Thanks.

Thanks!

5343. 4 Ohm Speaker wanted

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-10-04 23:34:50 UTC
From: william_byrnes2000
Topic: 5343 Message: 5343

I am looking for a replacement for the speaker for my Swan 260. I accidently poked a hole in the cone some years ago, while trying to jury rig a connection for an MFJ SSB/CW filter, so I could get the advantage of the filtering and the use of a headset. The 260 wasn't set up to work with headphones originally.

I am hoping to restore the rig, and I have finally gotten the meter, resistor and project box to set up the milliammeter recommended in the manual, but I want to replace the speaker too.

The Part number was E1001, and that would be ideal, if anyone has a Cygnet parted out, but a 4 Ohm speaker on a square frame measuring 4 one half inches on a side, would do just as well.

Please let me know if you have one you can sell. I think I've about run out of hamfests in this part of the country until spring.

I have a Motorola XTN Series Model XV2100 hand held transceiver. It is considered to be one of the best radios made by Motorola. You can google Motorola xv2100 for the details but it a professional Mil Spec radio that can operate anywhere between 151.000-159.000MHz and currently sells for between $130.00 & $200.00 It is brand new in original box & comes with NiMH battery, charger & belt clip holder. I'll take 90.00 shipped to anywhere in the continental U.S.

5348. Pair of Motorola 440 MHz HT's

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-10-07 23:50:49 UTC
From: n8oep_mike
Topic: 5348 Message: 5348

I am tired of moving this box around the shack.

A pair of 2 channel Motorola HT 90's
A pair antenna
Two pair of (4) questionable batteries (8 NiCad's each) - radios work with 12VDC into the pack/radio fine
120 V drop-in charger
Operator manual and annotated service manual.

The 8-conductor header-ribbon cable, (in the photo threaded through the speaker jack) taps into; PTT, RX audio, TX enable, Squelch open, Discr out... etc. (all identified in the service manual) is easily removed if desired.

These radios were used for a "packet communication development application" in the 450 business band. The FCC license there was much less restrictive than the ham bands at the time. The radios are easily adapted to amateur frequencies by changing the crystals.

Photos here:

http://img.villagephotos.com/p/2008-10/1326550/2045449
http://img.villagephotos.com/p/2008-10/1326550/

Yes, they work as simple HT's...but their best usage would further develop different ham radio aspects. Please put them to use...

$20 + shipping

Mike - N8OEP

5351. ICOM W32A DUAL BAND HANDHELD WITH ACCESORIES AND EXTRA BATT

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-10-11 15:35:33 UTC
From: lloydr1
Topic: 5351 Message: 5351

I have an extreemly nice ICOM W32A DualBand handheld for sale.

A buddy got me interested in working the satellites but after a few contacts I decided that standing in the back yard waving some coat hangers around wasn't my cup-of-tea. To be honest, it worked VERY well for the 'birds' but my interests are embedded in HF CW. Also, there is no UHF activity in my area so the UHF side of this radio is a waste, for me.

The radio is LIKE NEW. It comes with the original packaging, BC-110A wall charger, antenna, stock BP-173 battery (650 MaH), and manual.

Also, it comes with a BP-173x battery (1450 MaH) and BC-601d Quick Charger (Batteries of America).

Also, there is an ICOM HM-75a Speaker/Microphone and ICOM CP-12L cigarette lighter charger.

The batteries hold a charge well.

If you are interested in working the satellites or in just having a nice handheld you will be happy with this radio.

I can Email pictures of this equipment.

$250 plus $15 shipping.

Rick

5355. Stuff for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-10-18 12:30:50 UTC
From: Ron Lawrence W4RON
Topic: 527 Message: 5355

I'm out of room in the work shop so I thought I best try
selling a few items to help make some room.
The larger items are going to have to be pickup only I'm afraid.
When I get to the smaller things I'll be better able to ship them.

The first items are a desk top rack, and a vintage 2 (I think) meter amp.

I've had the rack for probably 30 years, I bought it way back
when Surplus Electronics was still in business in Charlotte.
Here's a web page with some photos of it.
http://radioheaven.homestead.com/Desktoprack4sale.html
I'll take $35 for it, or best offer.

The vintage 2 meter amp, at least I was told it was 2 meter
when I bought it, would make an interesting project.
The chassis is dirty from having set for a long time. I did
a little cleaning on it this afternoon and with a little work
it would look OK. I have no idea what I would take to make
it work, it's missing both tubes and I don't know what they are.
I'd like to get $25 which is what I paid for it.
Here's a web page with photos of the amp.
http://radioheaven.homestead.com/Vintage2meteramp.html

Like I said, these are pick up only, no shipping.
I live near Charlotte NC and will happily give directions to
anyone wanting to come check them out.

I may be able to deliver them to the Fall Swap in Greensboro
if they're paid for in advance.

There are more items to come, this is just the tip of the Ice burg...

73, Ron w4ron

Date: 2009-10-20 03:14:59 UTC
From: kj4jtt
Topic: 5360 Message: 5360

Well, I told my wife she needed to get rid of some stuff so I could have more room for my radios. Here's the stuff she decided to get rid of:

Astatic D104, chrome, upper and lower keybar, looks better than most, works - $60.00

Icom IC-32At HT 2m and 440, main power battery is good but backup battery is dead. Therefore it is not working, has charger cord - $25.00

FT-767GX, HF transceiver, optional modules for 2m, 6m and 440, (not included), Front panel looks good (top and bottom not so good) works perfect on all bands and all modes - $495.00 (Local Pickup Only)

Heathkit SB-220 amp installed on Rack Mount chassis. Full legal power on 80m and 40m. 20m = 1100w 15m = 900w, 10m = 800w (ALL RMS). My neighbors don't care much for it! It has larger meters and a standby switch installed on a green panel. Has AG6K parasitic suppressors, improved filter capacitors and bleeders, upgraded input tuning circuits for better input SWR (for solid state rigs), control grids directly grounded. Otherwise original - $775.00 (Local Pickup Only)

SBA-1200 1500w marine ssb base amp with power supply in Cabinet Mount. No tubes (3-500z x 2) no interconnecting cable from lower (power supply) to upper drawer (amp). It has a very big transformer and several huge tuning caps, a stepper motor actuated tapped coil. It was pulled from a working environment several years ago. - $150.00 (Local Pickup Only)

Siltronix 1011C with Siltronix Model 90 VFO, Looks good and works good. - $80.00 (Local Pickup Only)

Turner +2 amplified desk Mic needs some paint but works great - $30.00

Yeasu FT-101E looks good and works good, with power cord, uses standard 4 pin mic (not included) - $250.00
(Local Pickup Only)

Uniden PC122XL 40 channels with SSB works good, looks fair - $30.00

Astatic D104, chrome, upper and lower keybar, looks better than most, works great - $60.00

Realistic TRC-474, with mic, looks good, works good - $25.00

Cobra 19LTD Classic w mic, works - $25.00

Uniden Washington 40 ch Base AM/SSB with printed owners manual, works! no mods have ever been done! - $130.00 (Local Pickup Only)

Realistic 6 channel walkie talkie. This is the one we all remember. very long telescoping antenna with load in center. It works! - $25.00

Gray 200 base amp, works -$160.00 (Local Pickup Only)

Palomar 500 (not an amp) watt meter, HF freqs with SWR 10/100/1000watt scale, with Headset jack, - $40.00
(I have 2 of these)

Ranger 2950, it's an old one, looks well used, but works perfect - $115.00

Astatic 636l hand mics (2) with new cords and new elements - $17.00 ea

Location: Tampa, Fl

And more to come... I have taken pictures of all these items. Can't post them here.

5365. Want to trade for a good dula bander HT

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-10-21 20:06:42 UTC
From: James H
Topic: 5365 Message: 5365

Hello All,

I am looking for a good dual band HT that can receive on one band while transmitting on the second band for use with the FM satellites.

I need to trade for it if possible. I have the following we can trade for:

Radio Shack HTX-10 10 meter transceiver
Radio Shack HTX-100 10 meter transceiver
The Tec 2510 Mode B Satellite Transverter
Hamtronics 435-437 mhz receive converter Koss PRO/4AA headphones
Kenwood MC-85 microphone (works well with HTS-100!)
AEA PK-88 TNC
Icom IC-255A 2 meter transceiver
Kantronics KPC-3

Shurely in this mix you csan find something you need, or will be willing to hold onto until the next hamfest

thanks for looking and 73,

James, AA5AO

From: Ken Simpson, W8EK
Topic: 5367 Message: 5367

Extensive List of Many Ham Items For Sale
Wattmeters, Speaker, Microphones, HT accessories,
Baluns, Filters, Phone Patches, Keyers, and much more

Wattmeter and SWR Bridges:

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.
Similar to the HM-102, but for VHF frequencies, with
250 and 25 watt scales. It can also be used to check SWR,
and has a remote sensor that can either be left inside
the meter, or separated from the actual meter by about
3 feet. SO-239 connectors in and out.
This particular meter works great, looks fine and includes
paper work for $ 40.

Heath HM-15 SWR Bridge
It is an HF SWR Bridge, with SO-239 connectors on the back.
The front has the meter on the left, and two knobs to the
right. It is the same size as the HD-15 phone patch. This
one works fine and is in nice cosmetic shape. Paper work
included for $20.

Communications Speaker:
This 4 inch square speaker is optimized for communications
frequencies (300 to 3000 Hz). It is a Realistic Radio Shack
speaker in a black enclosure, and is an 8 ohm speaker. It
has a cord with a 1/8 inch (3.5 mm) mono plug on the end.
This one works fine and looks OK also. $15

Microphones:

Yaesu YD-844 Desk Microphone

This is a 50 K impedance desk microphone that really looks
sharp. It has a standard PTT switch on it, and also a
locking PTT switch. The YD-844 dynamic base station microphone
is an optional accessory made by Yaesu. Made of a heavy cast
metal it uses a dynamic 50K ohm element.

A picture can be seen at
http://www.eham.net/data/classifieds/images/289870.jpg
or
http://www.foxtango.org/ft-library/F...ies/yd-844.jpg

This particular mic works fine and looks very close to new.
No scratches or imperfections. $100

Yaesu MH-31 B 8 dynamic hand microphone
This is the Yaesu hand microphone that has the round
8 pin connector on it. It will go with virtually any Yaesu
rig that uses the round 8 pin connector. It has up, down,
and fst switches, and well as a tone switch, in addition
to the PTT switch.
This particular unit works 100%, and is still unused in
its original box. It even includes the new shiny, chrome
mic holder for $40.

Icom HM-7 Hand Microphone
This low impedance dynamic hand microphone has an internal
preamp in it, and is used with Icom rigs such as the 245,
260, 290, 451, 490, 505, 560, 720, 730, 740, 22U, 25A, 251A,
and maybe others. It has a 4 pin plug on it.
This one works fine, and looks like it just came out of
the box. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color.
It is presently has an 8 pin round connector, wired for
Kenwood. $25
As above, with no connector. $22

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed.
Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

Yaesu MH-15a8
Has 16 digit DTMF pad on the back with an Up-Down
switch on the top in addition to the PTT button.
8 pin round connector. $40

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
With paper work for $40.

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Speaker Microphones:

Yaesu MH-34 b 4 b speaker microphone
This is the one that fits the Yaesu VX-8, VX-7, VX-6,
VX-5, VX-3, VX-2, VX-1, and that series of HTs. I think
it also fits the FT-50 and FT-60, and maybe others. It
has a single 4 conductor, 3.5 mm plug on it. This one
is just like new. $30

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks
fine and works fine. $18

Yaesu YM-24 A speaker mic.
Fits FT-207, 208, plus many others. It has the
odd little round connector on it like Yaesu, Wilson,
Santec, and others used in the 1970s and 80s.
This particular unit works fine, and looks great
also. $20

Other HT accessories:

Kenwood BT-13 Battery Case
This is a battery case for the Kenwood TH-F6A HT.
A person can add 4 AA cells to it, and power the HT.
Alkaline cells can be used, but so can NiMH cells,
which have a very high capacity.
This BT-13 is new, never used. They list for $32,
but you can have this one for $22.

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1
and PB-4 battery packs. It can also be used with the smaller
PB-2 and PB-3 battery packs, by putting a filler in the case.
Black color. In very nice condition. $15

Bianchi Real Leather Case for TH-215, TH-225, etc.
For use with the larger PB-1 and PB-4 batteries, but can be
used with the smaller PB-2 and PB-3 batteries. This is real
leather, tan in color, and is in very nice condition. $25

Case for Drake TR-33C
This is the black case that fits the Drake TR-33C, and has
cutouts in the back for antenna, power, etc. It includes
the shoulder strap, and is in good shape. $12

Case for Drake TR-22
As above, but for the TR-22. No shoulder strap. $10

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood TR-2400
Motorola
Yaesu FT-207

Wrist Straps for various HTs - $4 each
Kenwood TR-2400
Yaesu FT-209

Lithium battery for Yaesu VX-2 or VX-3 HTs
Spare Lithium Ion battery pack for Yaesu VX-2 or VX-3.
It fits the new VX-3, as well as the earlier VX-2.
1200 mahr capacity. It holds a charge fine, and is
basically new. $20

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15
Kenwood Stubby Duck for TH-21, 4 inches long - $15

Alinco Stubby w/BNC Connector, 4.6 inches long

BNC Stubby for 440 MHz, 3 inches long
BNC regular for 440 MHz, 6.5 inches long

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the battery
of the Azden PCS-300, 2 meter HT, outside of the HT itself.
Usually, one must have the battery inside the HT, but this
lets you charge a second battery outside of the HT. The
original charger is used. If you have a PCS-300 HT, you
need this adapter.
It works fine, and looks like new. $3

Two meter FM Transceiver:

KDK FM-2033 mobile FM transceiver for 2 meters

This rig produces just over 25 Watts in high power and
about 7 watts in low power. The rig is fully synthesized,
has memories, scan, subaudible PL tone, and all the things
that one expects in a 2 meter rig. It has a touchtone
microphone with it. It sounds great, and hears well.
It needs 13 V DC at about 7 amps.

This particular rig is in very nice condition. There is
one paint spot missing, about the size of a pin head. It
includes the touchtone microphone, mobile mounting bracket,
power cord, and paper work. The original box is also included,
although the box looks much worse than the radio. Even the
mic clip, and a bag of screws are included, as is the
original multicolored sales brochure. $89

TenTec items:

TenTec 285, 500 Hz filter
500 hz for CW or digital use
Fits Corsairs, Paragons, Omni V and VI, and others.
This one has its paperwork and looks like new. $75

TenTec KR-2 Paddles
The paddles are a single lever paddle, like is in the KR-5
keyer. They are housed in a nice eggshell white and wood
grain cabinet. There is also a separate button on top that
can be used as a straight key, or to tune up a rig or
antenna tuner. $40

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is very quiet, and well
shielded, and does not produce any electrical noise that
I could find. $150

HF 1 to 1 Antenna Baluns:

A balun is made to convert the unbalanced coaxial cable to a
balanced antenna, such as a beam or dipole.
These are all 1:1 baluns, which means that they will preserve
the impedance, instead of acting like a transformer. They will
handle full legal power, and take a PL-259 connector.

Bencher ZA-1 A Balun
This 1:1 balun will handle full legal power, and can be used
either with a dipole or a beam. It has strain relief for the
dipole wire, and can be hung from the provided mounting hole.
This one works fine and looks great. $40.

The Big Signal W2DU Balun
Model HF. 1 to 1 ratio. Stainless steel hardware.
A lightning arrester is included in this balun.
It is a current type balun, covering from 1.8 to 30 MHz.
This one works fine and looks very close to new. $25

Hi-Q Balun by VanGorden
This balun has a 1 to 1 ratio, and also includes a
lightning arrester built in to it. It also is for HF,
and can function as an antenna center insulator as well.
This one is still in its original packaging. $20

Alliance U-100 and U-110 antenna rotor control boxes

This is the control box only, and not the actual
rotor. This control box takes 4 conductor cable.
It was designed for large TV antennas, but is often
used as an elevation rotor for satellite arrays,
or for VHF beams.

Two are available. One is for a U-100 and one is for
a U-110.
Electrically they are interchangeable, but are styled
slightly different.

Both control boxes works fine, and look fine also.

Paper work included for $25 each.

Hustler HF mobile resonators:
All work fine and are in great cosmetic condition.
Regular (400 Watt PEP) Resonator:
40 meter, RM-40 $17
"Super" high power resonators (good for 2 KW PEP)
15 meter RM-15 S $18
10 meter RM-10 S $16

Coax Cable with Type "N" Connectors For Sale:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

AEA Items:

AEA AC-1
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with PK-232, PK-88 or others. $15

Phone Patches:

Waters "Universal Hybrid Coupler II" Model 3002

Most of us would likely call this a phone patch, but it
is really much more than that. It does that, but also
will interface with a tape recorder, and permit recording
and play back of on-the-air QSOs. Nothing says that the
tape recorder input must be used that way. Connect the
sound card in your computer in this position, and you
have a very effective interface.

Model 3002 includes a speech compressor powered by a 9 volt battery. The front panel is finished on both sides, with one side having it set in a horizontal position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Heath HD-19 Phone Patch
This phone patch is made to match the Apache, Marauder, etc. The large VU meter is in the middle. Below the meter is a single conductor mic jack, two small chrome knobs for xmtr and rcvr gain control, and a larger rotary on-off switch with chrome knob on the right. There is a terminal strip on the back for connections. Of course it can be used as an interface to sound cards for digital mode operation as well.
This unit looks extremely nice. Of course it works fine. With paper work for $25.

CW Items:

TenTec KR-2 Paddles
The paddles are a single lever paddle, like is in the KR-5 keyer. They are housed in a nice eggshell white and wood grain cabinet. There is also a separate button on top that can be used as a straight key, or to tune up a rig or antenna tuner. $40

Buy the paddles with one of the keyers below, and take $10 off of the pair.

MFJ 484 C "GrandMaster" Keyer with Memories
This keyer has a built in sidetone, with volume and tone adjustable on the front panel. Speed and weighting are also adjustable from the front panel.
It has 4 large memories. You may install a 9 volt battery to preserve memory contents during a power failure. It can be powered by either a 9 Volt battery, a 9 V DC wall wart, or your station 12 V DC power supply.
It is a nice eggshell white and wood grain enclosure that matches the TenTec KR-2 paddle. $55

Palomar Engineers IC Keyer
This keyer includes a sidetone with speaker built in. It also will operate in either full automatic mode (like most keyers), or in semiautomatic mode (like a bug). The 9 Volt battery is external, so it can be changed easily. This one works great. $45

Cables for CW Straight Key and for CW Paddles For Sale:

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it,
as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector
on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

Low Pass TVI Filters For Sale:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation
in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work. $30

B & W model 426 low pass filter
B & W TVI filter, cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each end.
This is an older model that seems much heavier duty. It weighs
almost twice as much as the newer models, and looks like it
would take more power. It likely was made in the days that
plate modulated AM was the rule. $30

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. With paper work $40.

Bud LF-601 low pass filter
This filter is adjustable for best attenuation in your particular
situation, and also to more closely match your specific impedance.
It cuts off at about 52 MHz (if adjusted as such) so it can be
used on 6 meters, and will handle 1500 watts.
In extremely nice condition for $35.

Coax connectors and adapters For Sale:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

Chassis Mount SO-239 connectors (square) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

UHF female (SO-239) to type "F" Male (as used on cable TV) $5

Type "F" (cable TV) female to BNC male - $5

LARGE Analog Meters For Sale:

General Electric Edgewise DC ammeter
0-100 ma scale - Edgewise meter with scale 5+ inches
long and 1.7 inches high. White scale, w/ silver/gray mounting
This is a very nice meter that can be read across the room. $30

LabVolt AC ammeter
0-1 amp scale, 4 inch square meter, $20

LabVolt DC ammeter
0-1 amp scale, 4 inch square meter, $20

DC voltmeter has 3 scales on it - 5, 10, and 25 volts.
It says it is a Niehoff Voltmeter, Chicago, Model T-2.
It looks like 1930s vintage, and is in very nice shape. $28

Very heavy duty chokes, as used to filter ripple in high current
power supplies.
These chokes (inductors) weigh about 8 pounds each, and
are designed to be used in low voltage applications. They were both
removed from power supplies, and are in close to new condition.

One is from a 20 amp power supply. $13.

Another is from a 30 amp power supply. $15.

Prices do not include shipping from Florida.

Thanks.

5368. WTB Globe King coils

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-10-25 21:06:44 UTC
From: mikebracey@att.net
Topic: 5368 Message: 5368

I'm looking for 160 meter and 15 meter coil sets for a Globe King 400 transmitter. Thanks, Mike KE5YTV

5369. Yaesu FT 736R VHF/UHF all mode transceiver for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-10-27 22:00:31 UTC
From: Darrell
Topic: 5369 Message: 5369

I have one Yaesu FT736R VHF/UHF all mode transceiver for satellite operation. This unit has the 144 Mhz and 430 Mhz modules. In good working condition,Excellent cosmetic condition, with hand mic, no accessories or manual. Can send pixs if needed. Price is $550.00 plus shipping from 40207. Specs on the unit can be found at:

http://www.qsl.net/sm7vhs/radio/yaesu/ft736r/specs.htm

Please email for details.
Thank you, de WA4USO Darrell Darby
wa4uso@...

5370. Wanted sound card interface

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-10-29 02:40:44 UTC
From: kj4jtt
Topic: 5370 Message: 5370

I am not so concerned about which one it is. this is actually for some experimentation. USB would be a plus. Ability to connect to 8 pin round yaesu would be a plus. ability to connect to rca audio in and out would be a plus. If it does all 3 - I am very interested!!!

5371. RS Wall-Wart Needed

Pictures and information available about each. These units have been used and well cared for by a fellow amateur radio operator and emergency services personnel.

1. Radio Shack HTX-10 10 Meter Mobile Transceiver & Palomar Classic, Class AB Bi-Linear Amplifier
EBAY Item number:220501593207
2. Regency Model H256B , 16 channel 25 watt FM transceiver
Frequency coverage ☐ 150-175 mhz, 25 watt output.
This radio has been modified to be field programmable with a switch installed at the back of the unit.** Good radio for emergency personnel ☐ fire, police, volunteer service.
EBAY Item number:220501584162
3. Bendix King Speaker Microphone as new. EBAY Item number:220501607858

Private sale : not on Ebay
Uniden President HR-2510 , 10 meter Amateur Mobile Transceiver
Unit is in very good condition, comes with box, instruction manual and paperwork.
Unit has had the 11 meter modification and frequency range of 26.000 mhz ☐ 29.999 mhz.
Transceiver output : 15 watts - AM, FM, CW 25 watts ☐ sideband

From: Ray
Topic: 5372 Message: 5375

Moderator here. It does appear that some of the items may have lost their FCC type acceptance. Hams are allowed to modify equipment, but for use in the ham bands ONLY. While the ranges imply out of ham band coverage, it's how you use it that would violate R&R.

Other items in his ad are fine. What I did miss is the ebay cross postings. That's not allowed here.

Warren, I have to wonder, if you didn't like the content, why did you repeat it all so the advertiser got two messages posted?

The original poster sent me a nice apology. Subject closed.

Ray, KD4BBM

5377. Antennas and antenna related items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-10-30 13:38:42 UTC
From: Ken Simpson, W8EK
Topic: 5377 Message: 5377

Antennas and antenna related accessories For Sale:

HF 1 to 1 Antenna Baluns:

A balun is made to convert the unbalanced coaxial cable to a
balanced antenna, such as a beam or dipole.
These are all 1:1 baluns, which means that they will preserve
the impedance, instead of acting like a transformer. They will
handle full legal power, and take a PL-259 connector.

Bencher ZA-1 A Balun
This 1:1 balun will handle full legal power, and can be used
either with a dipole or a beam. It has strain relief for the
dipole wire, and can be hung from the provided mounting hole.
This one works fine and looks great. $40.

The Big Signal W2DU Balun
Model HF. 1 to 1 ratio. Stainless steel hardware.
A lightning arrester is included in this balun.
It is a current type balun, covering from 1.8 to 30 MHz.
This one works fine and looks very close to new. $25

Hi-Q Balun by VanGorden
This balun has a 1 to 1 ratio, and also includes a
lightning arrester built in to it. It also is for HF,
and can function as an antenna center insulator as well.
This one is still in its original packaging. $20

Heath HM-15 SWR Bridge
It is an HF SWR Bridge, with SO-239 connectors on the back.
The front has the meter on the left, and two knobs to the
right. It is the same size as the HD-15 phone patch. This
one works fine and is in nice cosmetic shape. Paper work
included for $20.

Heath HM-2102 VHF Wattmeter
Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.
Similar to the HM-102, but for VHF frequencies, with
250 and 25 watt scales. It can also be used to check SWR,
and has a remote sensor that can either be left inside
the meter, or separated from the actual meter by about
3 feet. SO-239 connectors in and out.
This particular meter works great, looks fine and
includes paper work for $40.

Hustler HF mobile resonators:
All work fine and are in great cosmetic condition.

Regular (400 Watt PEP) Resonator:
40 meter, RM-40 $17
"Super" high power resonators (good for 2 KW PEP)
15 meter RM-15 S $18
10 meter RM-10 S $16

Alliance U-100 and U-110 antenna rotor control boxes
This is the control box only, and not the actual
rotor. This control box takes 4 conductor cable.
It was designed for large TV antennas, but is often
used as an elevation rotor for satellite arrays,
or for VHF beams.
Two are available. One is for a U-100 and one is for
a U-110.
Electrically they are interchangeable, but are styled
slightly different.
Both control boxes works fine, and look fine also.
Paper work included for $25 each

Larsen VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $7

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount,
and others. It can be cut for 2 meters, 220 MHz, or
450 MHz bands. $7

Larsen NMO-Q Quarter Wave Antenna
For two meters. $10
Precut for 450 MHz. New, still in bag. $8
For 450 MHz, used, but very good. $6

Larsen Magnetic Antenna Mounts:

Larsen NLA-MM Mobile Antenna Mag Mount
This rectangular mag mount features an extremely strong
magnet. The center of the mag mount takes an NLA type
antenna. It includes coax, with a PL-259 connector on it.
It is in good condition. $20

Larsen PO-MM Mobile Antenna Mag Mount
Same as NLA-MM and NMO-MM above, except the center
of the mag mount has an SO-239 connector, which
means any antenna with a PL-259 can be used with it.
It is in good condition. $17

Avanti "On Glass" antenna for 440 MHz:

This antenna was made by Avanti to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

The ARRL Antenna Book
1983, 14th Edition, Large 8 1/2 X 11 Book, $10

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15
Kenwood Stubby Duck for TH-21, 4 inches long - $15

Alinco Stubby w/BNC Connector, 4.6 inches long

Alinco 220 MHz, w/BNC, 6 inches long

BNC Stubby for 440 MHz, 3 inches long
BNC regular for 440 MHz, 6.5 inches long

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. With paper work $40.

Bud LF-601 low pass filter
This filter is adjustable for best attenuation in your particular
situation, and also to more closely match your specific impedance.
It cuts off just above 10 meters (if adjusted as such), and will
handle 1500 watts. SO-239 connector on each end.
In extremely nice condition for $35.

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation
in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work. $30

B & W model 426 low pass filter
B & W TVI filter, cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each end.
This is an older model that seems much heavier duty. It weighs
almost twice as much as the newer models, and looks like it
would take more power. It likely was made in the days that
plate modulated AM was the rule. $30

Coax Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

Chassis Mount SO-239 connectors (square) $1

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

UHF female (SO-239) to type "F" Male (as used on cable TV) $5

Type "F" (cable TV) female to BNC male - $5

Prices do not include shipping from Florida.

Thanks.

From: John W5JMC
Topic: 5378 Message: 5378

I am hooking the XYL's car up for radios and am looking for the following items in good, used condition for reasonable prices. Please email w5jmc.john(at)gmail.com with information, pictures (if possible) and prices. Thanks!

-- A Comet B-10 NMO (12" 144/440 mobile antenna) - or equivalent
-- An extra mount for a Kenwood TM-D700a control head
-- A an extra Kenwood TM-D700 control and/or microphone cable
-- A West Mountain Radio Rig Runner or other Anderson Powerpole distribution block (actually need two of these)
-- A 15' run of 4 or 6 gauge power/hook-up wire

5379. Drake TR4

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-10-30 19:01:24 UTC
From: Cameraman
Topic: 5379 Message: 5379

I have a nice Drake TR4 for sale. Includes radio, power supply/speaker, hand mic, original manual & abt 10 spare tubes. Radio is in nice shape, has excellant audio & I get gud reports w/ it. 150+ watts out. Speaker front has been modified w/ some extra holes & a jack. PS has a hum but works fine. I believe it has the noise blanker, at least the switch is there.

I'd be happy to work a sked so u could hear it on the air.

$250. I'm in S.E. Ky. would prefer not to ship but .....

Electronic Publications For Sale:

Some are vintage, and some more modern.
All are in excellent condition, unless listed otherwise.

ARRL Handbooks:

These are in the smaller format (6 1/2 by 9 1/2 inch size).
They include tube charts and ads for vintage equipment,
which are not in the newer handbooks.
1977 - 54th edition - Good condition $10

More modern, larger 8 1/2 by 11 inch format:
1981 - 58th edition - Nice shape $13

The ARRL RFI Book
Practical Cures for Radio Frequency Interference
1999, First Edition, Large 8 1/2 X 11 book, $12

The ARRL Antenna Book
1983, 14th Edition, Large 8 1/2 X 11 Book, $10

ARRL How to Become a Radio Amateur, 1970, 26th edition,
Extremely nice, close to new condition,
with many vintage ads in the back, $15

ARRL Understanding Amateur Radio
1977, no edition number listed, $8

ARRL Learning to work with Integrated Circuits
1977, First edition $12

ARRL Radio Frequency Interference
1978, First Edition, $10

ARRL The Satellite Experimenter's Handbook
1984, First Edition, $8
1990, Second Edition, $15

ARRL Radio Amateurs Operating Manual, 1985, 2nd edition, $8

RSGB "Amateur Radio Operating Manual"
1982 - 2nd edition - $8

CQ The Packet Radio Operators Manual
By Buck Rogers, K4ABT, 1995
Close to new condition, $14

The Radio Amateur's Digital Communications Handbook
By KR3T, J Mayo, Published by Tab
Hardback Book, Like New, 208 pages, 1992, $12

Allied Dictionary of Electronic Terms
Fifth Edition, 1960, like new condition, $10

ARRL Operating an Amateur Radio Station
1976 - 57th edition $3
1978 - 58th edition $3
1983 - 61st edition $3
1984 - 62nd edition $3
1989 - 63rd edition $4

Ham Price Guide - 2nd Edition
Lists prices of used ham gear - $5

Call Area Map of the World
33 x 24 inches in size $5

ARRL Call area map of the US
Approx 37 x 24 inches in size $8

Gonset ORIGINAL manual:
Gonset Noise Clipper Model C $4

ORIGINAL Operating Manuals for Kenwood Rigs and accessories:

All manuals are original, in very nice condition, for
Kenwood radios and accessories. They are originals and not
copies.
All are original Kenwood manuals in very nice condition.

Operating manual for TH-21 A / AT HT for 2 meters $8

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E
HTs for 440 MHz, 220 MHz and 2 meters $10

Operating manual for TH-215 / 315 / 415 HTs $12

Operating manual for TH-225, 2 meter HT $12

Operating manual for TM-221/421 2 m mobile $15

Operating manual for TR-2200, 2 meter "portable"
This is very similar to the Drake TR-22. $15

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $14

Operating manual for TR-2600, 2 meter HT $12
Service manual for TR-2600 $12

Operating manual for TS-120, HF transceiver $18

Operating manual for TW-4000 dual bander $15
Service Manual for TW-4000 $20

BC-5 DC charger/adapter $4
HS-5 Headphones $4
LF-30A Low Pass Filter $5
MC-30 and MC-35 hand microphones $5

MC-85 desk microphone $4
PB-1, PB-2, PB-3, and PB-4 battery packs $3
PS-6 power supply $6
PS-30 power supply $5
SMC-24 speaker mic $4
SMC-25 speaker mic $4
SP-230 speaker $4
SP-430 speaker $4
SP-520 speaker $4
SW-2000 SWR Bridge $5
YG-3395C CW Filter $3
YK-88SN Narrow SSB Filter $4

ORIGINAL Icom operating manuals:
Please note that all of these are original Icom manuals
and are not copies.
All are in very good condition, unless noted otherwise.
These are original manuals only.

BC-30 Desk Charger $7
BC-35 Desk Charger $7
BP-2, BP-3, BP-4, and BP-5 Batteries $3
BP-21, BP-22, BP-23, and BP-24 Batteries $3
IC-229, 2 meter mobile transceiver $15
IC-230, 2 meter mobile transceiver $15
IC-3 PA Power supply $10
UT-16 Voice Synthesizer $5

These are original manuals only.

ORIGINAL Heath manuals. These are the manuals
only. They are all originals, and not copies, and
all are close to new condition.

AM-2 Reflected Power Meter
(Also known as SWR Meter), 1960,
w/ schematic and pictorial, $8

GD-600 Photoelectric Light Switch
Schematic is part of book $5

HD-15 Hybrid Phone patch
1965, Schematic is part of book. $8

HD-1234 Coax Switch
1973, Four Position Coax Switch
Like new, no check marks $7

Heath HDP-21 Desk Microphone
1969, Great condition, $4

HM-15 Reflected Power Meter and SWR Bridge
1968, Schematic is in book, $8

HM-2102 VHF Wattmeter 1972
Very nice condition. No check marks.
Schematic is part of book. $15

HW-2021 Assembly manual - 1975
2 meter hand held transceiver
No check marks $9

IM-5284 Multimeter
Large schematic only $3

SB-102 HF Transceiver
Schematic Only, Large fold out page, $4

T-2 Signal Tracer
No date listed, but I would guess from the 1950's, $8

Brochure "Heathkit Specials" featuring the Twoer and Sixer,
SB series, HR-20, and others. $4

These are original manuals only.

Transistor Substitution Books For Sale:

All are in excellent condition.

Sams Transistor Substitution Handbook
Second Edition, 1961, 112 pages, $5

Sams Transistor Substitution Handbook No. 10
Tenth Edition, 1970, 160 pages, $6

Sams Transistor Substitution Handbook No. 14
14th Edition, 1974, Larger book, $8

Sylvania ECG Semiconductor replacement guide
1976, larger book, 276 pages, $8

Sylvania ECG Semiconductors Master Replacement Guide
1979, larger book, 360 pages, $10

Sylvania ECG Semiconductor Master Replacement Guide
1987, larger book, about 700 pages, $15

Archer Transistor Replacement Guide
62-1015, No date listed, 8000 substitutions, $5

Archer Transistor Substitution Guide
276-2000, 1972, 15,000 types, 96 pages, $5

The following Texas Instrument Data Books are available.
All are in very nice, close to new, condition, with
very little use.

Analog Applications Journal - $2 each
August 1999
Nov 1999
Feb 2000
May 2000
August 2000
Nov 2000

AHC/AHCT Designer's Guide - June 1999 $2

Mixed-Signal and Analog Products Designer's Guide
And Reference w/CD - January 1999 $4

Analog and Mixed Signal Products Designer's Guide
And Reference - August 1999 $3

Logic Selection Guide - August 1998 $4

BiCMOS Bus Logic Interface - 1988 $2

Prices do not include shipping from Florida.
Shipping via "Media Mail" is relatively inexpensive.

Thanks.

5386. MP-1 SuperAntenna for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-11-05 19:35:12 UTC
From: kb3hbd
Topic: 5386 Message: 5386

MP-1 SUPER ANTENNA - Portable HF Antenna (7 thru 50Mhz)- QRP to 300 watts

The MP-1 will fit into a briefcase with a K2, FT817 or any other small rig. It's universal mount allows it to be set up on most any object that is handy at any angle. Included is the antenna with mounting bracket, one 12" rod, one 24" rod, counterpoise , the MP-1 tripod mount, and the 80m coil. When new the 80m coil and tripod are sold separately for $30 each. This would be a total cost of $159. I will also include a telescopic 2m/70cm antenna with pl 259 connector that sells for $24.95. I am asking $125 plus $8.00 s/h.

If interested, please email me off list @ kb3hbd@...

Sandy

5387. WTB: Icom AT-500 ceramic bandswitch

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-11-06 10:54:03 UTC
From: vk6hz
Topic: 5387 Message: 5387

Hi all

I'm looking for a fully functional ceramic bandswitch for an Icom AT-500. I will pay all costs (shipping etc to Australia).

If not that band switch I would consider a complete non working unit as long as the band switch is OK.

Thanks,
John

5388. Wattmeter/SWR Bridge, Baluns, Speaker, Mics, HT accessories and much more FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-11-07 16:42:07 UTC
From: Ken Simpson, W8EK
Topic: 5388 Message: 5388

Extensive List of Many Ham Items For Sale
Wattmeter, Baluns, Speaker, Microphones, HT accessories,
Filters, Phone Patches, Keyer, and much more

Wattmeter and SWR Bridge:

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.
Similar to the HM-102, but for VHF frequencies, with
250 and 25 watt scales. It can also be used to check SWR,
and has a remote sensor that can either be left inside
the meter, or separated from the actual meter by about
3 feet. SO-239 connectors in and out.
This particular meter works great, looks fine and includes
paper work for $ 40.

Heath HM-15 SWR Bridge
It is an HF SWR Bridge, with SO-239 connectors on the back.
The front has the meter on the left, and two knobs to the
right. It is the same size as the HD-15 phone patch. This
one works fine and is in nice cosmetic shape. Paper work
included for $20.

HF 1 to 1 Antenna Baluns:

A balun is made to convert the unbalanced coaxial cable to a
balanced antenna, such as a beam or dipole.
These are all 1:1 baluns, which means that they will preserve
the impedance, instead of acting like a transformer. They will
handle full legal power, and take a PL-259 connector.

Bencher ZA-1 A Balun
This 1:1 balun will handle full legal power, and can be used
either with a dipole or a beam. It has strain relief for the
dipole wire, and can be hung from the provided mounting hole.
This one works fine and looks great. $40.

The Big Signal W2DU Balun
Model HF. 1 to 1 ratio. Stainless steel hardware.
A lightning arrester is included in this balun.
It is a current type balun, covering from 1.8 to 30 MHz.
This one works fine and looks very close to new. $25

Hi-Q Balun by VanGorden
This balun has a 1 to 1 ratio, and also includes a
lightning arrester built in to it. It also is for HF,

and can function as an antenna center insulator as well.
This one is still in its original packaging. $20

Coax Cable with Type "N" Connectors
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Kenwood Log Book
Completely unused, new condition. It has standard log
book pages, with a world map on the inside cover, and
a DXCC list (as of 1987) in the back. Cover is a
silver color with the Kenwood Logo. $8

World Map with Kenwood Logo
This map is laminated, and lists DXCC Countries, as
of 1985. Obviously, it is not completely up to date,
but still is a very nice map. Like new. $5

Kenwood MB-4000 Mobile Bracket
This mobile bracket is made to be used with the Kenwood
TW-4000 dual band transceiver, and possibly other rigs
as well.
This one is in good shape, with the paper work and hardware.
$15

Communications Speaker
This 4 inch square speaker is optimized for communications
frequencies (300 to 3000 Hz). It is a Realistic Radio Shack
speaker in a black enclosure, and is an 8 ohm speaker. It
has a cord with a 1/8 inch (3.5 mm) mono plug on the end.
This one works fine and looks OK also. $15

Microphones:

Yaesu MH-31 B 8 dynamic hand microphone
This is the Yaesu hand microphone that has the round
8 pin connector on it. It will go with virtually any Yaesu
rig that uses the round 8 pin connector. It has up, down,
and fst switches, and well as a tone switch, in addition
to the PTT switch. This is a modern MH-1 B 8 mic.
This particular unit works 100%, and is still unused in
its original box. It even includes the new shiny, chrome
mic holder for $40.

Icom HM-7 Hand Microphone
This low impedance dynamic hand microphone has an internal
preamp in it, and is used with Icom rigs such as the 245,
260, 290, 451, 490, 505, 560, 720, 730, 740, 22U, 25A, 251A,
and maybe others. It has a 4 pin plug on it.
This one works fine, and looks like it just came out of
the box. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color.
It is presently has an 8 pin round connector, wired for
Kenwood. $25
As above, with no connector. $22

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed.
Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
With paper work for $40.

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Two meter FM Transceiver:

KDK FM-2033 mobile FM transceiver for 2 meters

This rig produces just over 25 Watts in high power and
about 7 watts in low power. The rig is fully synthesized,
has memories, scan, subaudible PL tone, and all the things
that one expects in a 2 meter rig. It has a touchtone
microphone with it. It sounds great, and hears well.
It needs 13 V DC at about 7 amps.

This particular rig is in very nice condition. There is
one paint spot missing, about the size of a pin head. It
includes the touchtone microphone, mobile mounting bracket,
power cord, and paper work. The original box is also included,
although the box looks much worse than the radio. Even the
mic clip, and a bag of screws are included, as is the
original multicolored sales brochure. $89

Speaker Microphones:

Yaesu MH-34 b 4 b speaker microphone
This is the one that fits the Yaesu VX-8, VX-7, VX-6,
VX-5, VX-3, VX-2, VX-1, and that series of HTs. I think

it also fits the FT-50 and FT-60, and maybe others. It
has a single 4 conductor, 3.5 mm plug on it. This one
is just like new. $30

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks
fine and works fine. $18

Other HT accessories:

Lithium battery for Yaesu VX-2 or VX-3 HTs
Spare Lithium Ion battery pack for Yaesu VX-2 or VX-3.
It fits the new VX-3, as well as the earlier VX-2.
1200 mahr capacity. It holds a charge fine, and is
basically new. $20

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1
and PB-4 battery packs. It can also be used with the smaller
PB-2 and PB-3 battery packs, by putting a filler in the case.
Black color. In very nice condition. $15

Bianchi Real Leather Case for TH-215, TH-225, etc.
For use with the larger PB-1 and PB-4 batteries, but can be
used with the smaller PB-2 and PB-3 batteries. This is real
leather, tan in color, and is in very nice condition. $25

Case for Drake TR-33C
This is the black case that fits the Drake TR-33C, and has
cutouts in the back for antenna, power, etc. It includes
the shoulder strap, and is in good shape. $12

Case for Drake TR-22
As above, but for the TR-22. No shoulder strap. $10

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood TR-2400
Motorola
Yaesu FT-207
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TR-2400
Yaesu FT-209

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15
Kenwood Stubby Duck for TH-21, 4 inches long - $15

Alinco Stubby w/BNC Connector, 4.6 inches long

BNC Stubby for 440 MHz, 3 inches long

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the battery
of the Azden PCS-300, 2 meter HT, outside of the HT itself.
Usually, one must have the battery inside the HT, but this
lets you charge a second battery outside of the HT. The
original charger is used. If you have a PCS-300 HT, you
need this adapter.
It works fine, and looks like new. $3

TenTec items:

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is very quiet, and well
shielded, and does not produce any electrical noise that
I could find. $150

Hustler HF mobile resonators:
All work fine and are in great cosmetic condition.
Regular (400 Watt PEP) Resonator:
40 meter, RM-40 $17
"Super" high power resonators (good for 2 KW PEP)
15 meter RM-15 S $18
10 meter RM-10 S $16

Coax Cable with Type "N" Connectors For Sale:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

AEA Items:

AEA AC-1
"Wall wort" 12 V DC power supply at 1 amp.

Can be used with PK-232, PK-88 or others. $15

Phone Patches:

Waters "Universal Hybrid Coupler II" Model 3002

Most of us would likely call this a phone patch, but it is really much more than that. It does that, but also will interface with a tape recorder, and permit recording and play back of on-the-air QSOs. Nothing says that the tape recorder input must be used that way. Connect the sound card in your computer in this position, and you have a very effective interface.

Model 3002 includes a speech compressor powered by a 9 volt battery. The front panel is finished on both sides, with one side having it set in a horizontal position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Heath HD-19 Phone Patch
This phone patch is made to match the Apache, Marauder, etc. The large VU meter is in the middle. Below the meter is a single conductor mic jack, two small chrome knobs for xmtr and rcvr gain control, and a larger rotary on-off switch with chrome knob on the right. There is a terminal strip on the back for connections. Of course it can be used as an interface to sound cards for digital mode operation as well.
This unit looks extremely nice. Of course it works fine.
With paper work for $25.

CW Items:

Palomar Engineers IC Keyer
This keyer includes a sidetone with speaker built in. It also will operate in either full automatic mode (like most keyers), or in semiautomatic mode (like a bug). The 9 Volt battery is external, so it can be changed easily. This one works great. $45

Cables for CW Straight Key and for CW Paddles:

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it, as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector
on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation
in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work. $30

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. With paper work $40.

Bud LF-601 low pass filter
This filter is adjustable for best attenuation in your particular
situation, and also to more closely match your specific impedance.
It cuts off at about 52 MHz (if adjusted as such) so it can be
used on 6 meters, and will handle 1500 watts.
In extremely nice condition for $35.

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

Chassis Mount SO-239 connectors (square) $1

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

UHF female (SO-239) to type "F" Male (as used on cable TV) $5

Type "F" (cable TV) female to BNC male - $5

LARGE Analog Meters:

General Electric Edgewise DC ammeter
0-100 ma scale - Edgewise meter with scale 5+ inches
long and 1.7 inches high. White scale, w/ silver/gray mounting
This is a very nice meter that can be read across the room. $30

LabVolt AC ammeter
0-1 amp scale, 4 inch square meter, $20

LabVolt DC ammeter
0-1 amp scale, 4 inch square meter, $20

DC voltmeter has 3 scales on it - 5, 10, and 25 volts.
It says it is a Niehoff Voltmeter, Chicago, Model T-2.
It looks like 1930s vintage, and is in very nice shape. $28

Very heavy duty chokes, as used to filter ripple in high current
power supplies.
These chokes (inductors) weigh about 8 pounds each, and
are designed to be used in low voltage applications. They were both
removed from power supplies, and are in close to new condition.

One is from a 20 amp power supply. $13.

Another is from a 30 amp power supply. $15.

Prices do not include shipping from Florida.

Thanks.

5390. FS: Collins 312B-4 Station Console

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-11-08 13:34:34 UTC
From: W8KZW
Topic: 5390 Message: 5390

The 312B-4 matches your S-line or KWM-2 and includes:

- Dual range wattmeter - 200 / 2,000 watts
- SWR bridge
- 4 ohm speaker
- Phone patch
- Station control switching

All but the phone patch were tested, and everything works great.

Cosmetically, the front panel is very nice. The cabinet has some minor nicks and scratches. $185.00. Photos on my website: www.w8kzw.homestead.com

5393. For Sale Toughbook CF-29 Rugged Touch screen Laptop

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-11-10 01:59:12 UTC
From: J. Gordon Beattie, Jr., W2TTT
Topic: 5393 Message: 5393

For Sale

Panasonic Toughbook CF-29 Rugged Touch screen Laptop

Great for portable, mobile or shack use!

1.6 GHz Processor,

Touch Screen,

80 GB HDD, CD-R/W+DVD, 1GB RAM,

802.11a/b/g WiFi, Ethernet,

real DB-25 Parallel Printer Port,

real DB-9 RS-232C Serial Port,

3 USB Ports,

Agere97 Data/Fax Modem,

Click Water-resistant Keyboard,

External Video Port

Backup System Restoration CD Set

Window XP PRO SP3, Microsoft Office 2003, ESET Security Suite

Battery in excellent condition

I've used my other CF-29 for portable/mobile Ham Radio operations, Boy Scouting and for OEMCERT and really love it!

The touch screen makes accessing applications and functions so much nicer!

I really like logging and station control with applications such as Ham Radio Deluxe or DM780 with this mode of control.

Also, when you are in the field and your fingers are cold, it is great to use the touch screen instead of the mouse pad.

Photos on request

Price is $550 + shipping using check, Postal Money Order or PayPal.

Thanks & 73,

Gordon Beattie, W2TTT

5398. FS/FT: AOR AR-3000A and AOR AR-1500 receivers (no gaps!)

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-11-15 23:51:40 UTC
From: John - W5JMC
Topic: 5398 Message: 5398

I have for sale or trade two professional grade receivers in mint condition: an AOR AR-3000A (AR3000A) desktop model and an AOR AR-1500 (AR1500) handheld model. Both units are in like-new condition, come in the original packaging with all original accessories and manuals. They both provide all mode coverage (USB, LSB, CW, AM, NFM, WFM) - the AR-3000A from 100 Khz to 2036 Mhz (with NO gaps) and the AR-1500 from 500 Khz to 1300 Mhz (with NO gaps). The AR-1500 comes with a rechargeable battery back, leather case, rubber duck antenna, long wire antenna and power supply. The AR-3000A comes with a BNC telescoping antenna and power supply. Pictures can be provided on request and copy of the respective manuals can be found online (or emailed on request) that provide in depth specifications/feature information.

I will sell the AR-3000A for $500 and the AR-1500 for $150 (firm), shipped and insured respectively to the lower 48. If you are interested in both, please contact me to work out a deal. I am interested in trading for a High Sierra Sidekick screwdriver antenna + Yaesu or Icom controller (compensated by cash, depending). I would also consider trading for an HF transceiver. Please contact me if you are interested: w5jmc.john(at)gmail.com.

5399. Looking for either mobile or base 2 meter rig

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-11-17 00:38:04 UTC
From: John Murphy
Topic: 5399 Message: 5399

Hello all, I am looking for either a base or mobile 2 meter rig for the shack. I am currently moving my Yeasu FT2800 from the mobile to the base. The closest repeater is approximately 30 miles as the ions flow, and I cannot hit it with anything less than 50 watts. Not looking for anything too terribly fancy or expensive, but also willing to pay a fair price. Please let me know what you have, and I will consider all offers. Thanks for looking...

5405. Antennas and antenna related accessories FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-11-20 23:42:12 UTC
From: Ken Simpson, W8EK
Topic: 5405 Message: 5405

Antennas and antenna related accessories For Sale:

Larsen VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 meters, 220 MHz, or 440 MHz. $7

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount,
and others. For either 220 MHz or 450 MHz.
Please specify. $7

Larsen NMO-Q Quarter Wave Antenna
For two meters. $10
For 450 MHz. $6

Larsen Magnetic Antenna Mount:

Larsen NLA-MM Mobile Antenna Mag Mount
This rectangular mag mount features an extremely strong
magnet. The center of the mag mount takes an NLA type
antenna. It includes coax, with a PL-259 connector on it.
It is in good condition. $20

Avanti "On Glass" antenna for 440 MHz:

This antenna was made by Avanti to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Heath HM-2102 VHF Wattmeter
Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.
Similar to the HM-102, but for VHF frequencies, with
250 and 25 watt scales. It can also be used to check SWR,
and has a remote sensor that can either be left inside
the meter, or separated from the actual meter by about
3 feet. SO-239 connectors in and out.
This particular meter works great, looks very close to
new and includes paper work for $45.

Heath HM-15 SWR Bridge
It is an HF SWR Bridge, with SO-239 connectors on the back.
The front has the meter on the left, and two knobs to the
right. It is the same size as the HD-15 phone patch. This
one works fine and is in nice cosmetic shape. Paper work
included for $20.

The ARRL Antenna Book
1983, 14th Edition, Large 8 1/2 X 11 Book, $10

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

Alinco Stubby w/BNC Connector, 4.6 inches long

Alinco 220 MHz, w/BNC, 6 inches long

BNC Stubby for 440 MHz, 3 inches long

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice

condition; it looks very close to new. With paper work $40.

Bud LF-601 low pass filter
This filter is adjustable for best attenuation in your particular
situation, and also to more closely match your specific impedance.
It cuts off just above 6 meters (if adjusted as such), and will
handle 1500 watts. SO-239 connector on each end.
In extremely nice condition for $35.

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation
in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work. $30

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

Antenna adapter for Kenwood TH-21/31/41 HTs
Adapts the antenna connector found on these HTs to a
standard PL-259 connector. $6

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

Chassis Mount SO-239 connectors (square) $1

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

UHF female (SO-239) to type "F" Male (as used on cable TV) $5

Type "F" (cable TV) female to BNC male - $5

Coax Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Prices do not include shipping from Florida.

Thanks.

I have three TNCs for sale or trade. They all power on and light up, but I have not personally tested them or had them in service. I was told, however, that they do work 100%. Paypal or Money order OK. No international buyers (sorry!). Pics available on request. I will entertain trade offers - what do you have!?

1. AEA PK-232MBX PAKRATT: The first 232MBX is Serial 608XX - it is an 8/10 cosmetically. This unit seems a newer model as it has multi-colored LEDs. I do not know what firmware version it has. I do not have the manual or software but will try to supply a appropriate wall-wort power supply. Asking $70 shipped.

2. AEA PK-232MBX PAKRATT: I have a second 232MBX with Serial 398XX. It is a 7/10 cosmetically (has scratches on top of case). It has all red LEDs. I do not know what firmware version it has. I do not have the manual or software but will try to supply a appropriate wall-wort power supply. $65 shipped.

*** I have two pigtail/cords for the PK-232, one wired to an 8-pin mic connector, the other to a 5-pin accessory connector. First come, first serve.

3. MFJ-1276: This unit is in very nice condition, about an 8/10. It comes in the original packaging with the manual, but no software. The 1276 comes with a wall-wort power supply and a cable to connect it to an IC-706. I do not know what firmware version it has. Asking $70 shipped.

Hello,

I am looking for some Low Band Johnson 520 mobiles, have not had any luck so far so I thought I would give this a try hoping somebody would have some. May be off-topic for some so please respond directly back to me at wb5idm@... if you know of any.

I have a Ham project that these old radios would be perfect for, I can use both the low and high split of these radios, does not matter.

Thanks,
Paul

5415. Many Different Microphones FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-12-11 18:56:35 UTC
From: Ken Simpson, W8EK
Topic: 5415 Message: 5415

Many Different Microphones For Sale:

Heath hand microphone
This is the black colored hand mic that was used on
the HW and SB series transceivers from 25 or 30 years ago.
It is a Hi Z mic. This particular mic is in good condition.
It works great, and looks OK cosmetically. It even includes
the mounting clip (which looks like it was never used).
This mic presently has stripped and tinned ends.
I have paper work for a Heath GH-12 A hand microphone with
it. $30

Yaesu MH-1 B 8 dynamic hand microphone
This is the Yaesu hand microphone that has the round
8 pin connector on it. It will go with virtually any
Yaesu rig that uses the round 8 pin connector. It has
up, down, and fst switches, and well as a tone switch,
in addition to the PTT switch.
This particular unit works fie. The front of it looks
very good. The back has some minor defects, but nothing
that effects operation. $30

Icom HM-7 Hand Microphone
This low impedance dynamic hand microphone has an internal
preamp in it, and is used with Icom rigs such as the 245,
260, 290, 451, 490, 505, 560, 720, 730, 740, 22U, 25A, 251A,
and maybe others. It has a 4 pin plug on it.
This one works fine, and looks like it just came out of the
box. $30

Shure 104 C, Low Z hand Microphone
This is a very heavy duty Shure mic. It appears to be new,
with stripped and tinned ends that have never been on a
connector. It is in its original box, with the original
instruction manual. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color.
It is presently has an 8 pin round connector, wired for
Kenwood. $25
As above, with no connector. $22

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is
needed. Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

Icom HM-23 DTMF Touch Tone Hand Microphone
This mic has the 16 digit DTMF touchtone pad, but also has
the up and down switches. It was designed to be used with
the 27, 28, 37, and 47 that require a longer nut on the mic,
but can also be used with the 25A, 28H, 38, 45A, 48, 77, 78,
120, 229H, 271, 275, 290, 375, 451, 471/A, 475, 505, 575,
707, 718, 725, 728, 729, 735, 736, 737/A, 745, 746, 751/A,
756/PRO, 761, 765, 775, 781, 820H, 821H, 900, 901, 970,
1201, 1271, 1275, 2400, 3200, 3210 and maybe others.
It can also be used on an HF rig to give a mic with DTMF
Touch Tones.
Basically, it is the same as the HM-14, but with a larger nut
on the connector.
It has the round 8 pin connector, is in good shape, and
works fine. It looks close to new. $50

CES 655 L "Microdialer" DTMF Microphone
You can manual dial a number, or automatically have it
stored in the mic, and "speed dial" with this mic. 12
digit touch tone pad on the front, with the microphone
part above the pad. This one presently has a 4 pin plug
on it, but of course that can be changed. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
With paper work for $40.

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

VoMax Speech Processor:

This unit was considered the absolute best speech processor
available in the 80's. The VoMax splits the audio signal into
discrete bands, peak-limits each band, passes the separate
signals through bandpass filters to eliminate distortion,
and sums the signals in a phase-equalizing combiner. The
result is superb audio you can feed to your transmitter
that has low distortion and 10-12db power gain!

The VoMax added between your microphone and transmitter gives you extra punch that is equivalent to adding a linear amplifier.

This particular unit works fine, and is in its original box, complete with the wall wort power supply, although it can be powered by 12 V DC. It is quite possible that this unit was never used until I took it out of the box to test it. The instruction sheets look like they were never unfolded!

$95

Speaker Microphones:

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. $ 20

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

Communications Speaker
This 4 inch square speaker is optimized for communications frequencies (300 to 3000 Hz). It is a Realistic Radio Shack speaker in a black enclosure, and is an 8 ohm speaker. It has a cord with a 1/8 inch (3.5 mm) mono plug on the end. This one works fine and looks OK also. $15

3 pin mic plug for Drake TR-22
This is the small 3 pin mic plug that fits the Drake TR-22 mic jack. It is much smaller than most of the mic connectors. I thought these were completely gone, but one appeared from a silent key. This one has been used, but should still be usable some more. $12

Prices do not include shipping from Florida.

Thanks.

5416. Antennas and related items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2009-12-12 21:52:57 UTC
From: Ken Simpson, W8EK
Topic: 5416 Message: 5416

Antennas and antenna related items for sale:

B & W Coaxial Antenna Switches:

Both switches will handle full legal limit, and have
SO-239 connectors.

B & W 375 "Protax" coax switch
This switch will switch up to 6 antennas, and DOES
ground the unused antennas. It has the coax coming
out the back in one large bundle. This one works 100%
electrically, and looks very nice. $45

B & W Model 550 A coax switch
This model will switch up to 5 antennas, and does NOT
ground unused antennas. It has the coax coming out the
sides like spokes of a wheel. This one has the optional
face place also.
This one works fine and looks fine as well. $40

HF Antenna Baluns:

A balun is used to match a balanced antenna (such as a beam or
dipole) to an unbalanced feedline (such as coax).

HyGain BN-86 Balun
The case of the BN-86 is constructed so that one can use it to
hang a dipole or inverted V, or a U-bolt can be added to attach
it to the boom of an HF beam antenna.
This particular balun works fine, but does show slight physical use.
It includes the paper work for $40.

The Big Signal W2DU Balun
Model HF. 1 to 1 ratio. Stainless steel hardware.
A lightning arrester is included in this balun.
It is a current type balun, covering from 1.8 to 30 MHz.
This one works fine and looks fine. $25

Hustler HF mobile resonators and masts:
All work fine and are in great cosmetic condition.

Standard" Hustler resonators (good for 400 Watts PEP):
80 meter resonator RM-80 $22
75 meter resonator RM-75 $22
40 meter resonator RM-40 $20
20 meter resonator RM-20 $17
17 meter resonator RM-17 $15

15 meter resonator RM-15 $14
10 meter resonator RM-10 $12

"Super" high power resonators (good for 2 KW PEP):
80 meter RM-80 S
.....can be cut for CW or phone, and also used on a 4BTV
.....Vertical to give 80/75 meter coverage $40
75 meter RM-75 S $39

Hustler mobile masts:
MO-1 (folds about 14 inches above ball) $22
MO-2 (folds about 27 inches above ball) $22

VHF Cross Needle Wattmeter / SWR Meter:

The SX144-430 Cross-Needle SWR and RF Power meter is for use on 140-160 MHz and 400-480 MHz. In other words 2 meters and the ham 440 MHz bands are included. It is designed for 50 ohm systems, and has SO-239 connectors on the back. The cross needle meter measures 10 Watts, 100 Watts, or 1000 Watts full scale on forward and 2, 20 or 200 watts reverse power.

This particular meter works 100%, and looks like new. In fact it is still in its original box, with paper work, for $45.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted in the coax line after the transmitter or transceiver) to reduce harmonic interference.

Bencher YA-1, high power, low pass filter
If you need a more heavy duty filter for the output of your amplifier, this one is ideal. It will take 1.5 KW output with 5 KW peaks, and has at least 80 db signal attenuation at TV channel 2. It is also in a very sturdy metal case.
Bencher sells these for $90.
This one works great and looks close to new, for only $60.

Nye Viking Model 020-001
This filter is rated at 2000 watts, with over 65 db of attenuation above 57 MHz. These are about $60 new; this one is close to new for only $35.

Drake TV-5200-LP
This is the more modern version of the Drake TV-1000 Low Pass Filter. This is the filter that may also be used on the low end of six meters, as well as HF. It is good for 1000 Watts average below 30 MHz, and about 200 W up to 52 MHz. It works fine, and is in very nice shape. $35

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation
in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work. $30

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. With paper work $40.

Bud LF-601 low pass filter
This filter is adjustable for best attenuation in your particular
situation, and also to more closely match your specific impedance.
It cuts off at about 52 MHz (if adjusted as such) so it can be
used on 6 meters, and will handle 1500 watts.
In extremely nice condition for $35.

ParaDynamics PDC-5 Wattmeter
This unit has a wattmeter with scales of 100 W, 10 W, and
1 W. It has an SWR Bridge built in, with an antenna tuner.
It was obviously made for 11 meter use, but it works well
on other frequencies. The tuner portion works fine on 10 m,
12 m, and 15 m. The wattmeter seems accurate from 20 meters
thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal
for portable use.
The wattmeter and antenna tuner portion work fine, however,
the SWR portion of this unit is inoperative. It looks fine. $12

The ARRL Antenna Book
1983, 14th Edition, Large 8 1/2 X 11 Book, $10

Larsen VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.

Larsen NMO-MM Mag Mount
This rectangular mag mount features an extremely strong
magnet. Any of the NMO antennas made by Larsen, Motorola,
Cushcraft, and many others will fit on it. It includes coax,
with an PL-259 connector on it. It is in great condition
for $22.

Larsen NMO-2/70 antenna for 2 meters and 440 MHz combined
Single antenna screws in to any NMO mount, and covers the
2 meter band with about 2 db gain, and the 440 MHz band
with about 4 db gain. It is a very rugged antenna.
This one works fine, includes both the coil and the loaded
whip, and looks very close to new. $45

Larsen NMO-Q Quarter Wave Antenna
For two meters. $10
For 450 MHz. $6

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $7

Larsen NLA-MM Mobile Antenna Mag Mount
This rectangular mag mount features an extremely strong
magnet. The center of the mag mount takes an NLA type
antenna. It includes coax, with a PL-259 connector on it.
It is in good condition. $20

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount,
and others. It can be cut for 2 meters, 220 MHz, or
450 MHz bands. $7

Avanti "On Glass" antenna for 440 MHz:

This antenna was made by Avanti to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

BNC Regular length, 6 1/2 inches long
Alinco Stubby w/BNC Connector, 4.6 inches long

BNC Stubby for 440 MHz, 3 inches long

Coax Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female square mount (uses 4 screws) - $3
screw in type - $3

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

Chassis Mount SO-239 connectors (square) $1

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Prices do not include shipping from Florida.

Thanks.

Extensive List of Many Ham Items For Sale
Speech Processor, Baluns, Coax Switch, 2 meter FM Rig, TenTec Items, Hustler mobile resonators, Microphones, TVI filters, Wattmeter, HT accessories, Speaker, Phone Patches, and much more

VoMax Speech Processor:

This unit was considered the absolute best speech processor available in the 80's. The VoMax splits the audio signal into discrete bands, processes each band, passes the separate signals through bandpass filters to eliminate distortion, and sums the signals in a phase-equalizing combiner. The result is superb audio you can feed to your transmitter that has low distortion and 10-12db power gain!

The VoMax added between your microphone and transmitter gives you extra punch that is equivalent to adding a linear amplifier.

This particular unit works fine, and is in its original box, complete with the wall wort power supply, although it can be powered by 12 V DC. It is quite possible that this unit was never used until I took it out of the box to test it. The instruction sheets look like they were never unfolded!
$95

HF Antenna Baluns:

A balun is used to match a balanced antenna (such as a beam or dipole) to an unbalanced feedline (such as coax).

HyGain BN-86 Balun
The case of the BN-86 is constructed so that one can use it to hang a dipole or inverted V, or a U-bolt can be added to attach it to the boom of an HF beam antenna.
This particular balun works fine, but does show slight physical use.
It includes the paper work for $40.

The Big Signal W2DU Balun
Model HF. 1 to 1 ratio. Stainless steel hardware.
A lightning arrester is included in this balun.
It is a current type balun, covering from 1.8 to 30 MHz.
This one works fine and looks fine. $25

Coaxial Antenna Switch:
B & W Model 550 A coax switch

This model will switch up to 5 antennas, and does NOT ground unused antennas. It has the coax coming out the sides like spokes of a wheel. This one has the optional face place also. It will handle full legal limit.
This one works fine and looks fine as well. $40

VHF Cross Needle Wattmeter / SWR Meter:

The SX144-430 Cross-Needle SWR and RF Power meter is for use on 140-160 MHz and 400-480 MHz. In other words 2 meters and the ham 440 MHz bands are included. It is designed for 50 ohm systems, and has SO-239 connectors on the back. The cross needle meter measures 10 Watts, 100 Watts, or 1000 Watts full scale on forward and 2, 20 or 200 watts reverse power.

This particular meter works 100%, and looks like new. In fact it is still in its original box, with paper work, for $45.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted in the coax line after the transmitter or transceiver) to reduce harmonic interference.

Bencher YA-1, high power, low pass filter
If you need a more heavy duty filter for the output of your amplifier, this one is ideal. It will take 1.5 KW output with 5 KW peaks, and has at least 80 db signal attenuation at TV channel 2. It is also in a very sturdy metal case.
Bencher sells these for $90.
This one works great and looks close to new, for only $60.

Nye Viking Model 020-001
This filter is rated at 2000 watts, with over 65 db of attenuation above 57 MHz. These are about $60 new; this one is close to new for only $35.

Drake TV-5200-LP
This is the more modern version of the Drake TV-1000 Low Pass Filter. This is the filter that may also be used on the low end of six meters, as well as HF. It is good for 1000 Watts average below 30 MHz, and about 200 W up to 52 MHz. It works fine, and is in very nice shape. $35

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter and antenna, and has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. It is good for 1000 Watts "average" according to the manual, and has

over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work. $30

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. With paper work $40.

Bud LF-601 low pass filter
This filter is adjustable for best attenuation in your particular
situation, and also to more closely match your specific impedance.
It cuts off at about 52 MHz (if adjusted as such) so it can be
used on 6 meters, and will handle 1500 watts.
In extremely nice condition for $35.

Two meter FM Transceiver:

KDK FM-2033 mobile FM transceiver for 2 meters

This rig produces just over 25 Watts in high power and
about 7 watts in low power. The rig is fully synthesized,
has memories, scan, subaudible PL tone, and all the things
that one expects in a 2 meter rig. It has a touchtone
microphone with it. It sounds great, and hears well.
It needs 13 V DC at about 7 amps.

This particular rig is in very nice condition. There is
one paint spot missing, about the size of a pin head. It
includes the touchtone microphone, mobile mounting bracket,
power cord, and paper work. The original box is also included,
although the box looks much worse than the radio. Even the
mic clip, and a bag of screws are included, as is the
original multicolored sales brochure. $80

TenTec Items:

TenTec Model 280 power supply, 20 amps at 13 V DC.
This supply is quite heavy duty electrically.
It has 2 pass transistors, instead of the one that
some have. It also has an ammeter on it.
This one works fine, and looks OK as well.
A previous owner removed the molded in TenTec power
cable on the back and added very heavy binding posts,
so that it can be used with many different rigs and
not just TenTec. It also has a couple RCA jacks for
lower power use.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel

around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is very quiet, and well
shielded, and does not produce any electrical noise that
I could find. $150

Hustler HF mobile antennas:

All work fine and are in nice condition.

Standard" Hustler resonators (good for 400 Watts PEP):
80 meter resonator RM-80 $22
75 meter resonator RM-75 $22
40 meter resonator RM-40 $20
20 meter resonator RM-20 $17
15 meter resonator RM-15 $14
10 meter resonator RM-10 $12

"Super" high power resonators (good for 2 KW PEP):
80 meter RM-80 S
.....can be cut for CW or phone, and also used on a 4BTV
.....Vertical to give 80/75 meter coverage $40
75 meter RM-75 S $39

Hustler mobile masts:
MO-1 (folds about 14 inches above ball) $22

Microphones:

Icom HM-7 Hand Microphone
This low impedance dynamic hand microphone has an internal
preamp in it, and is used with Icom rigs such as the 245,
260, 290, 451, 490, 505, 560, 720, 730, 740, 22U, 25A, 251A,
and maybe others. It has a 4 pin plug on it.
This one works fine, and looks like it just came out of the
box. $30

Heath High Impedance Hand Microphone
This is the black colored hand mic that was used on
the HW and SB series transceivers from 25 or 30 years ago.
It is a Hi Z mic. This particular mic is in good condition.
It works great, and looks fine cosmetically. It even includes
the mounting clip (which looks like it was never used).
This mic presently has stripped and tinned ends, but of
course a connector can easily be added.
I have paper work for a Heath GH-12 A hand microphone with
it, but am not certain that is what it is. My memory says
the GH-12 A was dark green in color, and this one is a
black color. $30

Shure 104 C, Low Z hand Microphone
This is a very heavy duty Shure mic. It appears to be new, with stripped and tinned ends that have never been on a connector. It is in its original box, with the original instruction manual. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color. It is presently has an 8 pin round connector, wired for Kenwood. $25
As above, with no connector. $22

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed.
Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

CES 655 L "Microdialer" DTMF Microphone
You can manual dial a number, or automatically have it stored in the mic, and "speed dial" with this mic. 12 digit touch tone pad on the front, with the microphone part above the pad. This one presently has a 4 pin plug on it, but of course that can be changed. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with a low impedance microphone. This one has the 8 pin modular plug (like a computer LAN) on it. This mic has not been used, so it is in really great condition. With paper work for $40.

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a normal low impedance microphone. With 4 pin plug.
Like new. $38

Speaker Microphones:

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. $ 20

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

ParaDynamics PDC-5 Wattmeter/Antenna Tuner
This unit has a wattmeter with scales of 100 W, 10 W, and
1 W. It has an SWR Bridge built in, with an antenna tuner.
It was obviously made for 11 meter use, but it works well
on other frequencies. The tuner portion works fine on 10 m,
12 m, and 15 m. The wattmeter seems accurate from 20 meters
thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal
for portable use.
The wattmeter and antenna tuner portion work fine, however,
the SWR portion of this unit is inoperative. It looks fine. $12

HT accessories:

Lithium battery for Yaesu VX-2 or VX-3 HTs
Spare Lithium Ion battery pack for Yaesu VX-2 or VX-3.
It fits the new VX-3, as well as the earlier VX-2.
1200 mahr capacity. It holds a charge fine, and is
basically new. $20

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1
and PB-4 battery packs. It can also be used with the smaller
PB-2 and PB-3 battery packs, by putting a filler in the case.
Black color. In very nice condition. $15

Bianchi Real Leather Case for TH-215, TH-225, etc.
For use with the larger PB-1 and PB-4 batteries, but can be
used with the smaller PB-2 and PB-3 batteries. This is real
leather, tan in color, and is in very nice condition. $25

Case for Drake TR-33C
This is the black case that fits the Drake TR-33C, and has
cutouts in the back for antenna, power, etc. It includes
the shoulder strap, and is in good shape. $12

Case for Drake TR-22
As above, but for the TR-22. No shoulder strap. $10

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap. $25

Accessories for Kenwood TH-21/31/41 series HTs:

Kenwood PB-21 battery pack for TH-21/31/41 series HTs
This battery pack does not hold a charge. Physically it
is fine, but it needs a new "insert". Or use it to build
a DC pack, or other project. With paper work for $8

Kenwood PB-21 H battery pack
As above, but heavy duty pack; needs insert.
With paper work for $12.

Wall wort charger for use with the PB-21 H Battery pack
With the 2.1 mm coaxial connector to charge the larger
battery pack. $15

Antenna adapter for Kenwood TH-21/31/41 HTs
Adapts the antenna connector found on these HTs to a
standard PL-259 connector. $6

Kenwood RA-6 Special 2 meter rubber duck antenna for Kenwood
TH-21 HT with threaded connector, standard 6.6 inches long. $15

Service manual for TH-21 AT, plus most of the TH-21/31/41
accessories such as DC-21, EP-2, TU-6, etc. $20

Accessories for the Kenwood TR-2400 HT

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Belt clip for TR-2400 HT, complete with hardware - $8

Wrist strap for TR-2400, and most other HTs - $4

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Santec HT Accessories For Sale:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood BH-2 for Kenwood TH-21 / 31 / 41 series HTs
Kenwood TR-2400
Motorola
Yaesu FT-207
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TR-2400
Yaesu FT-209

Service Manuals:

These are original service manuals in extremely good condition.

Service manual for Kenwood TH-21 series HTs, plus most
accessories for this series HT $20

Service manual for Kenwood TW-4000 dual bander $20

Service Manual for Kenwood TR-2600, 2 meter HT $15

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a service
pack. It has schematics, circuit explanations, voltages, etc. $18

Communications Speaker
This 4 inch square speaker is optimized for communications
frequencies (300 to 3000 Hz). It is a Realistic Radio Shack
speaker in a black enclosure, and is an 8 ohm speaker. It
has a cord with a 1/8 inch (3.5 mm) mono plug on the end.
This one works fine and looks OK also. $15

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

Alinco Stubby w/BNC Connector, 4.6 inches long
Regular BNC, about 6.5 inches long

BNC Stubby for 440 MHz, 3 inches long

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the battery
of the Azden PCS-300, 2 meter HT, outside of the HT itself.
Usually, one must have the battery inside the HT, but this
lets you charge a second battery outside of the HT. The
original charger is used. If you have a PCS-300 HT, you
need this adapter.
It works fine, and looks like new. $3

3 pin mic plug
This is the small 3 pin mic plug that fits the Drake TR-22
mic jack. It is much smaller than most of the mic connectors.
I thought these were completely gone, but one appeared from
a silent key. This one has been used, but should still be
usable some more. $12

Coax Cable with Type "N" Connectors
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Kenwood Log Book
Completely unused, new condition. It has standard log
book pages, with a world map on the inside cover, and
a DXCC list (as of 1987) in the back. Cover is a
silver color with the Kenwood Logo. $8

World Map with Kenwood Logo
This map is laminated, and lists DXCC Countries, as
of 1985. Obviously, it is not completely up to date,
but still is a very nice map. Like new. $5

Kenwood MB-4000 Mobile Bracket
This mobile bracket is made to be used with the Kenwood
TW-4000 dual band transceiver, and possibly other rigs
as well.
This one is in good shape, with the paper work and hardware.
$15

CW Items:

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it,
as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector
on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

AEA Power Supply
AEA AC-1

"Wall wort" 12 V DC power supply at 1 amp.
Can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive,
so it can be used on many different things that require
12 V DC at up to an amp, such as keyers, antenna tuners, etc.
$15

Phone Patches / Digital Interfaces:

Waters "Universal Hybrid Coupler II" Model 3002

Most of us would likely call this a phone patch, but it
is really much more than that. It does that, but also
will interface with a tape recorder, and permit recording
and play back of on-the-air QSOs. Nothing says that the
tape recorder input must be used that way. Connect the
sound card in your computer in this position, and you
have a very effective interface.

Model 3002 includes a speech compressor powered by a 9
volt battery. The front panel is finished on both
sides, with one side having it set in a horizontal
position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only
found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Heath HD-15 Phone Patch
This is the unit with the VU meter on the left and 3 knobs
that match the SB series to the middle and right. Low or
high Z output to the transmitter. It can also be used as
an interface to the computer for PSK31, etc. It is in
extremely good condition. No scratches or imperfections.
Paper work included for $25.

Heath HD-19 Phone Patch
This phone patch is made to match the Apache, Marauder,
etc. The large VU meter is in the middle. Below the
meter is a single conductor mic jack, two small chrome
knobs for xmtr and rcvr gain control, and a larger rotary
on-off switch with chrome knob on the right. There is a
terminal strip on the back for connections. Of course
it can be used as an interface to sound cards for digital
mode operation as well.
This unit looks extremely nice. Of course it works fine.
With paper work for $25.

Weston Precision MilliVolt Meter Model 1
This is an extremely precision meter, with mirrored

scale about 6 inches long. It weighs about 5 1/2 pounds!
It has terminals for scales of 150, 1500, 15000, and
150000 millivolts.
Also included is the calibration information (from 1944)
indicating that it is "dot on" for calibration.
In addition, it is in an extremely nice protective case,
that appears to be real leather.
To put it another way, this is an extremely nice meter!
$80

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

Chassis Mount SO-239 connectors (square) $1

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

UHF female (SO-239) to type "F" Male (as used on cable TV) $5

Type "F" (cable TV) female to BNC male - $5

LARGE Analog Meters:

General Electric Edgewise DC ammeter
0-100 ma scale - Edgewise meter with scale 5+ inches
long and 1.7 inches high. White scale, w/ silver/gray mounting
This is a very nice meter that can be read across the room. $30

LabVolt AC ammeter
0-1 amp scale, 4 inch square meter, $20

LabVolt DC ammeter
0-1 amp scale, 4 inch square meter, $20

DC voltmeter has 3 scales on it - 5, 10, and 25 volts.
It says it is a Niehoff Voltmeter, Chicago, Model T-2.
It looks like 1930s vintage, and is in very nice shape. $28

Very heavy duty chokes, as used to filter ripple in high current
power supplies.
These chokes (inductors) weigh about 8 pounds each, and
are designed to be used in low voltage applications. They were both
removed from power supplies, and are in close to new condition.

One is from a 20 amp power supply. $13.

Another is from a 30 amp power supply. $15.

Prices do not include shipping from Florida.

Thanks.

From: Jeff's Lists
Topic: 5420 Message: 5423

Sorry for the re-post.

I bought 2 of these when they put them on sale about 3 months ago.
We decided that we don't really want them anymore.

400.00 each shipped in the US only from Grand Rapids, Mi

Email me direct j@...

Comes with GPS, Power Cable and Date Cable for your Kenwood Radio
along with the original box.

5424. Need TWO 3CX700A7 or 3CPX800A7 Tubes

From: TimB
Topic: 5426 Message: 5426

I am redoing my radio setup, and have the following equipment for sale:

Yaesu FT-2800M 2m Mars/Cap modified. This has been used as a base radio since new. Includes the manual, radio, mic, base feet, and bracket, all in the original box. I also have a cable to allow it to be hooked to a TNC for use as an APRS or Packet rig. $100.00

2) Motorola Maratrac 99ch UHF 100 watt radios. These are 440-470mhz, 99ch 100watt rigs. They are complete with control head, cable, speakers, and brackets. I have one DTMF mic, and one regular mic. I will include programming of all 99chs to your specs. These are very nice radios and are exceptionally clean. $150 each

Motorola Maxtrac 300 16ch 45watt VHF WITH Byonics TinyTracker 4 interfaced. This is my mobile APRS radio and will also tx and rx from 144 to 162mhz. I have installed a toggle switch to shut off internal speaker for APRS use. Radio and TT4 work Flawlessly. I will include the radio, TT4, Mic, and power cable. TT4 has the most current firmware. $250 for setup, programmed to your specs. I will also include the ARGENT technologies Garmin cable that allows you to hook up a Fleetmap GPS (I use a Nuvi 350) to the TT4 for a complete APRS setup for another $35

The prices above dont include shipping. Shipping will be via USPS flatrate box, or UPS depending on the size. I take paypal, but you have to include an extra 3%, and USPS money order.

Please email or PM with questions or for pictures.

Extensive List of Many Ham Items For Sale
2 meter FM Rig, TenTec Items, Microphones, TVI filters,
Wattmeter, HT accessories, Speaker, Phone Patches, and
much more

Two meter FM Transceiver:

Azden PCS-4000 FM transceiver for 2 meters

This is a nice small unit, which has 16 memories in 2 banks,
scan capabilities (memories or band scan), priority channel,
DTMF touchtone microphone with Up and Down switch and
Memory 1 call, plus all sorts of other bells and whistles. It has
25 Watts or 5 Watts output power and an extremely good
receiver.

This particular unit works fine, and looks very nice.

Microphone, mobile bracket, power cord, and manual are
included for $70.

VoMax Speech Processor:

This unit was considered the absolute best speech processor
available in the 80's. The VoMax splits the audio signal into
discrete bands, processes each band, passes the separate
signals through bandpass filters to eliminate distortion,
and sums the signals in a phase-equalizing combiner. The
result is superb audio you can feed to your transmitter
that has low distortion and 10-12db power gain!

The VoMax added between your microphone and transmitter
gives you extra punch that is equivalent to adding a linear
amplifier. It is power by 12 V DC at about 100 ma.

This particular unit works fine, and looks very nice.
Paper work is included for $75.

Communications Speaker
This 4 inch square speaker is optimized for communications
frequencies (300 to 3000 Hz). It is a Realistic Radio Shack
speaker in a black enclosure, and is an 8 ohm speaker. It
has a cord with a 1/8 inch (3.5 mm) mono plug on the end.
This one works fine and looks OK also. $15

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

Drake TV-5200-LP
This is the more modern version of the Drake TV-1000 Low Pass
Filter. This is the filter that may also be used on the low
end of six meters, as well as HF. It is good for 1000 Watts
average below 30 MHz, and about 200 W up to 52 MHz. It works
fine, and is in very nice shape. $35

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation
in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work. $30

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. With paper work $40.

TenTec Items:

TenTec Model 280 power supply, 20 amps at 13 V DC.
This supply is quite heavy duty electrically.
It has 2 pass transistors, instead of the one that
some have. It also has an ammeter on it.
This one works fine, and looks OK as well.
A previous owner removed the molded in TenTec power
cable on the back and added very heavy binding posts,
so that it can be used with many different rigs and
not just TenTec. It also has a couple RCA jacks for
lower power use.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is very quiet, and well
shielded, and does not produce any electrical noise that
I could find. $150

Microphones:

Heath High Impedance Hand Microphone
This is the black colored hand mic that was used on
the HW and SB series transceivers from 25 or 30 years ago.
It is a Hi Z mic. This particular mic is in good condition.
It works great, and looks fine cosmetically. It even includes
the mounting clip (which looks like it was never used).
This mic presently has stripped and tinned ends, but of
course a connector can easily be added.
I have paper work for a Heath GH-12 A hand microphone with
it, but am not certain that is what it is. My memory says
the GH-12 A was dark green in color, and this one is a
black color. $30

Shure 104 C, Low Z hand Microphone
This is a very heavy duty Shure mic. It appears to be new,
with stripped and tinned ends that have never been on a
connector. It is in its original box, with the original
instruction manual. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color.
It is presently has an 8 pin round connector, wired for
Kenwood. $25
As above, with no connector. $22

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed.
Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

Kenwood MC-48, DTMF Touch Tone Microphone
Round, 8 pin connector, will go with any Kenwood rig taking
this kind of connector (TM-201, TM-211, TM-221, TM-231,
TM-241, TM-2530, TS-50, TS-430, TS-440, TS-570, TS-850, TS-870,
TS-930, TS-940, TS-950, TW-4000, etc.). Has UP and DOWN
switches and PTT, along with 16 digit touch tone pad.
It works fine, and includes paper work for $50.

Kenwood MC-46 DTMF Touch Tone Microphone
Touch tone DTMF microphone with 6 pin connector, as used on
TR-7730, TR-7800, TR-7850, TR-7930, TR-7950, TR-8400, TR-9000,
TR-9130, and others. Up-down switch on top. 16 digit touch
tone pad. This one works fine, and includes paper work for $45.

CES 655 L "Microdialer" DTMF Microphone
You can manual dial a number, or automatically have it

stored in the mic, and "speed dial" with this mic. 12
digit touch tone pad on the front, with the microphone
part above the pad. This one presently has a 4 pin plug
on it, but of course that can be changed. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
With paper work for $40.

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Speaker Microphones:

Azden SDX-316
This is the rounder style speaker mic that fits nicely in
the palm of your hand. Has 3.5 mm and 2.5 mm plugs for
Azden, Icom, some Yaesu, and others. $ 20

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Kenwood MB-4000 Mobile Bracket
This mobile bracket is made to be used with the Kenwood
TW-4000 dual band transceiver, and possibly other rigs
as well.
This one is in good shape, with the paper work and hardware.
$15

ParaDynamics PDC-5 Wattmeter/Antenna Tuner
This unit has a wattmeter with scales of 100 W, 10 W, and
1 W. It has an SWR Bridge built in, with an antenna tuner.
It was obviously made for 11 meter use, but it works well
on other frequencies. The tuner portion works fine on 10 m,
12 m, and 15 m. The wattmeter seems accurate from 20 meters
thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal
for portable use.
The wattmeter and antenna tuner portion work fine, however,
the SWR portion of this unit is inoperative. It looks fine. $12

Hustler HF mobile antennas:

All work fine and are in good condition.

Standard" Hustler resonators (good for 400 Watts PEP):
75 meter resonator RM-75 $22

"Super" high power resonators (good for 2 KW PEP):
80 meter RM-80 S
can be cut for CW or phone, and also used on a 4BTV
Vertical to give 80/75 meter coverage $38

Heavy Duty Mobile/Portable Antenna Mount:

This is a very heavy duty antenna mount, designed to
take any standard 3/8-24 threaded antenna. which includes just
about any HF antenna and many other antennas as well.

The mount is made to be clamped around a vertical object, such
as a pipe, tubing, or even a square channel. It would be ideal
to attach to something like a chain link fence. It could also be
used as a mirror mount on trucks. It will take up to 1 1/2 inch
diameter objects. It has a very large screw type mechanism with
a large handle to tighten to the vertical object. It could be
placed in operation very quickly, so it is great for portable
and emergency operation, where one would want to set up a
mount quickly.

The bottom of it has an SO-239 connector, ready to take a
standard PL-259 connector.

This unit is in good condition. $20

HT accessories:

Icom BP-20 Battery Case For Sale:
The BP-20 is an "empty" battery pack designed to hold
regular AA cells. Of course a person can use regular
alkaline batteries, or NiCads, or NiMh batteries. This
pack will work with the Icom u2AT, u3AT, u4AT, and maybe
others. It is ideal if you have one of these HTs that
now has a dead battery.
This particular BP-20 is in its original box, and appears
to be new and never used. The box is labeled CM-20, which
is the same as the BP-20, except the commercial version.
$20

Lithium battery for Yaesu VX-2 or VX-3 HTs
Spare Lithium Ion battery pack for Yaesu VX-2 or VX-3.
It fits the new VX-3, as well as the earlier VX-2.
1200 mahr capacity. It holds a charge fine, and is
basically new. $20

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1
and PB-4 battery packs. It can also be used with the smaller
PB-2 and PB-3 battery packs, by putting a filler in the case.
Black color. In very nice condition. $15

Bianchi Real Leather Case for TH-215, TH-225, etc.
For use with the larger PB-1 and PB-4 batteries, but can be

used with the smaller PB-2 and PB-3 batteries. This is real
leather, tan in color, and is in very nice condition. $25

Case for Drake TR-33C
This is the black case that fits the Drake TR-33C, and has
cutouts in the back for antenna, power, etc. It includes
the shoulder strap, and is in good shape. $12

Case for Drake TR-22
As above, but for the TR-22. No shoulder strap. $10

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap. $25

Accessories for the Kenwood TR-2400 HT

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Belt clip for TR-2400 HT, complete with hardware - $8

Wrist strap for TR-2400, and most other HTs - $4

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Santec HT Accessories For Sale:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,

voltages, etc. $18

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood BH-2 for Kenwood TH-21 / 31 / 41 series HTs
Kenwood TR-2400
Motorola
Yaesu FT-207
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TR-2400
Yaesu FT-209

Service Manuals:

These are original service manuals in extremely good condition.

Service manual for Kenwood TH-21 series HTs, plus most
accessories for this series HT $20

Service manual for Kenwood TH-41 series HTs, plus most
accessories for this series HT $20

Service manual for Kenwood TW-4000 dual bander $20

Service Manual for Kenwood TR-2600, 2 meter HT $15

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a service
pack. It has schematics, circuit explanations, voltages, etc. $18

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

Alinco Stubby w/BNC Connector, 4.6 inches long
Regular BNC, about 6.5 inches long

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

BNC Stubby for 440 MHz, 3 inches long

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the battery
of the Azden PCS-300, 2 meter HT, outside of the HT itself.
Usually, one must have the battery inside the HT, but this
lets you charge a second battery outside of the HT. The
original charger is used. If you have a PCS-300 HT, you
need this adapter.
It works fine, and looks like new. $3

3 pin mic plug
This is the small 3 pin mic plug that fits the Drake TR-22
mic jack. It is much smaller than most of the mic connectors.
I thought these were completely gone, but one appeared from
a silent key. This one has been used, but should still be
usable some more. $12

Coax Cable with Type "N" Connectors
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

World Map with Kenwood Logo
This map is laminated, and lists DXCC Countries, as
of 1985. Obviously, it is not completely up to date,
but still is a very nice map. Like new. $5

CW Items:

"Code Crash" by Jerome Mintz
This is a VHS video tape that teaches a person the code.
It is a very basic tape, with the assumption that one does
not know any of the code. $12

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it,
as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector
on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

AEA Power Supply
AEA AC-1
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive,
so it can be used on many different things that require
12 V DC at up to an amp, such as keyers, antenna tuners, etc.
$15

Phone Patches / Digital Interfaces:

Waters "Universal Hybrid Coupler II" Model 3002

Most of us would likely call this a phone patch, but it is really much more than that. It does that, but also will interface with a tape recorder, and permit recording and play back of on-the-air QSOs. Nothing says that the tape recorder input must be used that way. Connect the sound card in your computer in this position, and you have a very effective interface.

Model 3002 includes a speech compressor powered by a 9 volt battery. The front panel is finished on both sides, with one side having it set in a horizontal position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Heath HD-15 Phone Patch
This is the unit with the VU meter on the left and 3 knobs that match the SB series to the middle and right. Low or high Z output to the transmitter. It can also be used as an interface to the computer for PSK31, etc. It is in extremely good condition. No scratches or imperfections. Paper work included for $25.

Weston Precision MilliVolt Meter Model 1
This is an extremely precision meter, with mirrored scale about 6 inches long. It weighs about 5 1/2 pounds! It has terminals for scales of 150, 1500, 15000, and 150000 millivolts.
Also included is the calibration information (from 1944) indicating that it is "dot on" for calibration.
In addition, it is in an extremely nice protective case, that appears to be real leather.
To put it another way, this is an extremely nice meter!
$80

Coax connectors and adapters:
Prices are per connector. Several of each are available. These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

Chassis Mount SO-239 connectors (square) $1

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

UHF female (SO-239) to type "F" Male (as used on cable TV) $5

Type "F" (cable TV) female to BNC male - $5

LARGE Analog Meters:

General Electric Edgewise DC ammeter
0-100 ma scale - Edgewise meter with scale 5+ inches
long and 1.7 inches high. White scale, w/ silver/gray mounting
This is a very nice meter that can be read across the room. $30

LabVolt AC ammeter
0-1 amp scale, 4 inch square meter, $20

LabVolt DC ammeter
0-1 amp scale, 4 inch square meter, $20

DC voltmeter has 3 scales on it - 5, 10, and 25 volts.
It says it is a Niehoff Voltmeter, Chicago, Model T-2.
It looks like 1930s vintage, and is in very nice shape. $28

Very heavy duty chokes, as used to filter ripple in high current
power supplies.
These chokes (inductors) weigh about 8 pounds each, and
are designed to be used in low voltage applications. They were both
removed from power supplies, and are in close to new condition.

One is from a 20 amp power supply. $13.

Another is from a 30 amp power supply. $15.

Prices do not include shipping from Florida.

Thanks.

I have three UHF Motorola Maratracs with the 99ch control heads for sale. All are complete, with DTMF microphones, speakers cables and brackets. They are good working pulls from a local utility company. I am asking $150 shipped each. I have one UHF Spectra hi power with the A7 control head, newer style remote cable with DTMF mic, complete with cables, asking $175 shipped. I have a VHF Maxtrac 300, 16ch that is in great condition, has been modified with a toggle switch to disable internal speaker and has a pigtail added to interface to a TNC. Was used as a mobile APRS rig. I am including a TinyTracker 4 and cable to interface to a Garmin GPS for use as a APRS setup, I am asking $175 for the setup. I also have many more VHF Maxtrac 300's 16ch, 5 pin radios for sale for $80 each, they include the microphone only. I will program all the radios to your specs. Please email for more information.

5438. 2 m rig, Coax Relay, Coax switch, CW Paddles, Microphones, and much more FS

Extensive List of Many Ham Items For Sale
2 meter FM Transceiver, Coax switch, SWR Bridge, Coax Relay,
Communications Speaker, TVI filters, Microphones, TenTec Items,
Hustler mobile resonator, Wattmeter, HT accessories, Phone
Patches, and much more

Two meter FM Transceiver:

Azden PCS-4000 FM transceiver for 2 meters

This is a nice small unit, which has 16 memories in 2 banks,
scan capabilities (memories or band scan), priority channel,
DTMF touchtone microphone with Up and Down switch and
Memory 1 call, plus all sorts of other bells and whistles. It has
25 Watts or 5 Watts output power and an extremely good
receiver.

This particular unit works fine, and looks very nice.

Microphone, mobile bracket, power cord, and manual are
included for $70.

Heath HD-1234 Coaxial antenna switch
This coax switch has SO-239 connectors arranged so the
coax comes out like the spokes of a wheel. It will switch
up to 4 antennas, and also ground all of the antennas.
This particular switch works fine and looks fine also.
With paper work for $35.

SWR Bridge

CalComm #9856 SWR Meter

The included paper work says this meter is good for 3 to 150
MHz, so one can use it on 2 meters, and on 6 meters as well
as on the HF bands. It can also be used as a field strength
meter.

It has an SO-239 connector on each end, and it made to be mounted
in a vertical position, with the meter at the top, and the
adjustment knob at the bottom.

This meter includes the paper work (and even the warranty info),
and the original box, although the box has seen better days. The
meter itself works fine, and is in extremely nice condition. The
back of it has holes for mounting it to a wall. A former owner

removed some of the paint from around these mounting holes, so that it would get a better electrical ground. $20

B & W 377 Coaxial Antenna Relay

I had never seen one of these before. Most of us are familiar with the Dow Key Antenna relays that many of us used 40 or 50 years ago. This unit serves the same function, but is somewhat unique.

The B & W 377 is housed in a hexagon box. It has three SO-239 connectors coming out three of the sides, a length of wire on one side that goes to the coil of the relay, and two sides that are blank.

The coil is rated to work on 48 to 130 volts AC. The original single page instruction sheet says that it is a unique relay design permitting this large variation in voltage. It is good to 150 MHz, and will handle 2000 Watts PEP, or 1000 watts continuous.

It appears that this unit has never been used. It has the original instruction sheet, and original box. The unit itself does not appear to have been used, and looks perfect. $75

MFJ CWF-2 CW filter
This audio filter can be powered by a 9 V battery or a 9 volt wall wart. It has a switch selectable bandwidth of 80, 110, or 180 hertz. Of course you can turn it off also!
It inserts in the audio line, and can really cut the QRM down. It is not a fancy DSP filter, but then, neither is the price. This one is in good shape but has wear around the switch that is used to select bandwidth. The top and sides are close to perfect. $15

Communications Speaker
This 4 inch square speaker is optimized for communications frequencies (300 to 3000 Hz). It is a Realistic Radio Shack speaker in a black enclosure, and is an 8 ohm speaker. It has a cord with a 1/8 inch (3.5 mm) mono plug on the end. This one works fine and looks OK also. $15

Microphones:

Shure 104 C, Low Z hand Microphone
This is a very heavy duty Shure mic. It appears to be new, with stripped and tinned ends that have never been on a connector. It is in its original box, with the original instruction manual. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color. Striped and tinned ends. $22

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed.
Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

Icom HM-8 DTMF touchtone microphone
The HM-8 has a 12 digit touch tone (DTMF) pad on the front
of it, along with an on-off switch for the tones. Of course
it also has the normal PTT switch.
The HM-8 is used on the 25A Red LED, 245, 290, 402, 202S, 451,
471A, plus other rigs.
This particular microphone has an 8 pin round connector, works
fine, is in its original box, and includes paper work for $50.

Kenwood MC-48, DTMF Touch Tone Microphone
Round, 8 pin connector, will go with any Kenwood rig taking
this kind of connector (TM-201, TM-211, TM-221, TM-231,
TM-241, TM-2530, TS-50, TS-430, TS-440, TS-570, TS-850, TS-870,
TS-930, TS-940, TS-950, TW-4000, etc.). Has UP and DOWN
switches and PTT, along with 16 digit touch tone pad.
It works fine, and includes paper work for $50.

Kenwood MC-46 DTMF Touch Tone Microphone
Touch tone DTMF microphone with 6 pin connector, as used on
TR-7730, TR-7800, TR-7850, TR-7930, TR-7950, TR-8400, TR-9000,
TR-9130, and others. Up-down switch on top. 16 digit touch
tone pad. This one works fine, and includes paper work for $45.

CES 655 L "Microdialer" DTMF Microphone
You can manual dial a number, or automatically have it
stored in the mic, and "speed dial" with this mic. 12
digit touch tone pad on the front, with the microphone
part above the pad. This one presently has a 4 pin plug
on it, but of course that can be changed. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
With paper work for $40.

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Speaker Microphones:

Azden SDX-316
This is the rounder style speaker mic that fits nicely in

the palm of your hand. Has 3.5 mm and 2.5 mm plugs for
Azden, Icom, some Yaesu, and others. $ 20

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

CW Items:

Vibroplex Brass Racer Triangular Iambic Paddle
The Brass Racer Paddles are unique in that there are no springs
in the design. Tension on the paddle is infinitely adjustable by
the use of magnets. It is a convenient, space saving portable
keyer paddle unit crafted from solid brass with a lacquer coated
brushed finish mounted on a hardwood base. Designed for use with
an external keyer or a keyer built into the radio. It has a long
shielded cord with a 1/4 inch stereo plug. It works fine and
looks good. $100

"Code Crash" by Jerome Mintz
This is a VHS video tape that teaches a person the code.
It is a very basic tape, with the assumption that one does
not know any of the code. $12

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it,
as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector
on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

TenTec Items:

TenTec Model 280 power supply, 20 amps at 13 V DC.
This supply is quite heavy duty electrically.
It has 2 pass transistors, instead of the one that
some have. It also has an ammeter on it.
This one works fine, and looks OK as well.
A previous owner removed the molded in TenTec power
cable on the back and added very heavy binding posts,
so that it can be used with many different rigs and
not just TenTec. It also has a couple RCA jacks for
lower power use.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243

remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is very quiet, and well
shielded, and does not produce any electrical noise that
I could find. $150

Hustler HF mobile antennas:

All work fine and are in nice condition.

"Super" high power resonators (good for 2 KW PEP):
80 meter RM-80 S
can be cut for CW or phone, and also used on a 4BTV
Vertical to give 80/75 meter coverage $38

ParaDynamics PDC-5 Wattmeter/Antenna Tuner
This unit has a wattmeter with scales of 100 W, 10 W, and
1 W. It has an SWR Bridge built in, with an antenna tuner.
It was obviously made for 11 meter use, but it works well
on other frequencies. The tuner portion works fine on 10 m,
12 m, and 15 m. The wattmeter seems accurate from 20 meters
thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal
for portable use.
The wattmeter and antenna tuner portion work fine, however,
the SWR portion of this unit is inoperative. It looks fine. $12

Kenwood MB-4000 Mobile Bracket
This mobile bracket is made to be used with the Kenwood
TW-4000 dual band transceiver, and possibly other rigs
as well.
This one is in good shape, with the paper work and hardware.
$15

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference. All will handle full legal power
at HF, have an SO-239 connector on each end, and are designed
for 50 ohm systems.

Bencher YA-1, high power, low pass TVI filter
If you need a more heavy duty filter for the output of
your amplifier, this one is ideal. It will take full legal
power plus, and has at least 80 db signal attenuation at
TV channel 2.
It is also in a very sturdy metal case.
This one works great, and looks close to new. Someone added some
felt to the bottom, so that it protects better. It is in its
original box, with paper work. Bencher currently sells these

for about $90. This one is only $65.

B & W FL-10/1500 (Also known as model 425)
This filter cuts off just above 10 meters, and is the latest model B & W filter. It is in very nice condition; it looks very close to new. With paper work $40.

Drake TV-5200-LP
This is the more modern version of the Drake TV-1000 Low Pass Filter. This is the filter that may also be used on the low end of six meters, as well as HF. It is good for about 200 W up to 52 MHz, but full power on HF. It works fine, and is in very nice shape. $35

Drake TV-3300-LP
This modern low pass filter has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF (over 80 db attenuation at 41 MHz). This one looks great, and includes the paper work. $30

Drake TV-42-LP Low pass filter
Rated for 100 W thru 30 MHz.
Similar characteristics as the TV-3300, but lower power rating. It works fine and looks like new. $ 15

HT accessories:

Lithium battery for Yaesu VX-2 or VX-3 HTs
Spare Lithium Ion battery pack for Yaesu VX-2 or VX-3.
It fits the new VX-3, as well as the earlier VX-2.
1200 mahr capacity. It holds a charge fine, and is basically new. $20

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and PB-4 battery packs. It can also be used with the smaller PB-2 and PB-3 battery packs, by putting a filler in the case. Black color. In very nice condition. $15

Case for Drake TR-33C
This is the black case that fits the Drake TR-33C, and has cutouts in the back for antenna, power, etc. It includes the shoulder strap, and is in good shape. $12

Case for Drake TR-22
As above, but for the TR-22. No shoulder strap. $10

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200, ST-142, ST-144, ST-440, etc. The real leather case includes a built in belt clip, plus a removable leather shoulder strap. $25

Accessories for the Kenwood TR-2400 HT

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Belt clip for TR-2400 HT, complete with hardware - $8

Wrist strap for TR-2400, and most other HTs - $4

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Santec HT Accessories For Sale:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood BH-2 for Kenwood TH-21 / 31 / 41 series HTs
Kenwood TR-2400
Motorola
Yaesu FT-207
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TR-2400
Yaesu FT-209

Service Manuals:

These are original service manuals in extremely good condition.

Service manual for Kenwood TH-21 series HTs (2 meter), plus most accessories for this series HT $20

Service manuals for Kenwood TH-41, 440 MHz HT, plus most accessories $20

Service manual for Kenwood TW-4000 dual bander $20

Service Manual for Kenwood TR-2600, 2 meter HT $15

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a service pack. It has schematics, circuit explanations, voltages, etc. $18

Communications Speaker
This 4 inch square speaker is optimized for communications frequencies (300 to 3000 Hz). It is a Realistic Radio Shack speaker in a black enclosure, and is an 8 ohm speaker. It has a cord with a 1/8 inch (3.5 mm) mono plug on the end. This one works fine and looks OK also. $15

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

Regular BNC, about 6.5 inches long
Alinco Stubby w/BNC Connector, 4.6 inches long

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

BNC Stubby for 440 MHz, 3 inches long

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the battery of the Azden PCS-300, 2 meter HT, outside of the HT itself. Usually, one must have the battery inside the HT, but this lets you charge a second battery outside of the HT. The original charger is used. If you have a PCS-300 HT, you need this adapter.
It works fine, and looks like new. $3

3 pin mic plug
This is the small 3 pin mic plug that fits the Drake TR-22 mic jack. It is much smaller than most of the mic connectors. I thought these were completely gone, but one appeared from a silent key. This one has been used, but should still be

usable some more. $12

Coax Cable with Type "N" Connectors
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

World Map with Kenwood Logo
This map is laminated, and lists DXCC Countries, as
of 1985. Obviously, it is not completely up to date,
but still is a very nice map. Like new. $5

Kenwood MB-4000 Mobile Bracket
This mobile bracket is made to be used with the Kenwood
TW-4000 dual band transceiver, and possibly other rigs
as well.
This one is in good shape, with the paper work and hardware.
$15

AEA Power Supply
AEA AC-1
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive,
so it can be used on many different things that require
12 V DC at up to an amp, such as keyers, antenna tuners, etc.
$15

Phone Patches / Digital Interfaces:

Waters "Universal Hybrid Coupler II" Model 3002

Most of us would likely call this a phone patch, but it
is really much more than that. It does that, but also
will interface with a tape recorder, and permit recording
and play back of on-the-air QSOs. Nothing says that the
tape recorder input must be used that way. Connect the
sound card in your computer in this position, and you
have a very effective interface.

Model 3002 includes a speech compressor powered by a 9
volt battery. The front panel is finished on both
sides, with one side having it set in a horizontal
position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only
found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Heath HD-15 Phone Patch
This is the unit with the VU meter on the left and 3 knobs

that match the SB series to the middle and right. Low or
high Z output to the transmitter. It can also be used as
an interface to the computer for PSK31, etc. It is in
extremely good condition. No scratches or imperfections.
Paper work included for $25.

Weston Precision MilliVolt Meter Model 1
This is an extremely precision meter, with mirrored
scale about 6 inches long. It weighs about 5 1/2 pounds!
It has terminals for scales of 150, 1500, 15000, and
150000 millivolts.
Also included is the calibration information (from 1944)
indicating that it is "dot on" for calibration.
In addition, it is in an extremely nice protective case,
that appears to be real leather.
To put it another way, this is an extremely nice meter!
$80

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Prices do not include shipping from Florida.

Thanks.

rx/tx, made from Howes kits, with vfo. 5W o/p, rx has rf tune, irt, sidetone, tx has atu, metered rf output, needs 12v dc. Ideal for experimenting, portable, suitcase etc.
The rf tune and atu tune are Eddystone capacitors, new and worth the cost alone.

pics at www.qsl.net/g4bxd/qmstores.htm

£60 plus post.

cheers, Ben.

Buddipole Deluxe

The antenna is complete and in excellent condition with a few minor scratches on the tripod from opening and closing it. It works fine but I don't nee it and it has been sitting in the closet for a couple years. $300.00, which is 25% less than new, plus shipping CONUS only. Picture available.

It includes:
2 ☐ coils
5 ☐ clips
2 ☐ antenna arms
2 ☐ whips
1 ☐ coax assembly

This is the Deluxe system which includes these additional items:
1 - rotating arm kit
1- carrying case
1 ☐ Buddipole Tripod
1 ☐ collapsible mast

Extras:
2 ☐ extra clips
1 ☐ extra whip

From: Dr. Esteban Wilson
Topic: 5442 Message: 5442

I am looking for a Sharp Zaurus SL5500 or better (SL-5600, SL-6000, etc.) PDA for portable PSK31/RTTY/CW use. I have for possible trade a mint TenTec 1330 QRP rig, OR SOME cw KEYS, or I can do PayPal.

Note: NOT interested in any of the early non-Linux versions (ZR series).

Thanks in advance.

Steve, XE1UFO a.k.a. KA5SUT

5444. for sale or trade yaesu FT817ND and accessories

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-01-21 14:58:35 UTC
From: John Miller
Topic: 5444 Message: 5444

I have for sale or trade, a mint condition yaesu FT-817ND 160-70CM including 60 meters QRP radio, with a bunch of accessories. Boxes and manuals included. Here's the deal, if I sell it outright, or trade for something that's not another qrp radio, I need this to go as a package however I might look at another QRP radio I might be able to use a little easier and then I can use some of the accessories. Accessories included are, an MFJ 1899T telescopic antenna for 80-6 meters and I'll throw in the counterpoises I made for it which are speaker wire so most cover 2 bands, the MFJ power supply for it, LDG z817 auto antenna tuner, the CW key that can mount to the side of the radio which has yet to be used, the soft case for the radio, rt systems software and USB cable to program the radio and that cable can also be used for rig control software with the radio, all original boxes, manuals, interconnect cables, and accessories are included. Everything's in mint condition, very few hours on any of it, and some not even used. Nothing's a year old most bought last May/June. I'd like to get $800 plus shipping for the whole setup, I might consider reasonable offers but won't venture far. As I said earlier, I'll trade for something reasonably close in value straight up, or with cash for equipment worth more or less by a good margin, obviously if the value is close I'm not going to worry about a slight difference. Not interested in UHF/VHF gear, but HF equipment of any kind I'm always interested in. Good condition is a must inside and out, I have nothing in my station less than a 9.5 in looks and want to keep it that way. Email me if interested, let's see what we can do. 73

5445. FS: Comet CA-HV HF Mobile antenna

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-01-21 03:33:07 UTC
From: John - W5JMC
Topic: 5445 Message: 5445

I have for sale a Comet CA-HV (Model UHV-6) mobile antenna system. This antenna will work 80-10m w/appropriate resonator, and 6m-70cm as is. I have resonators for 80m, 40m, 20m, 17m, 15m, and 10m coils. This antenna comes with a Diamond UHF trunk-lip mount. I have enjoyed this antenna and have always gotten very good reports. Asking $150 shipped.

From: Ken Simpson, W8EK
Topic: 5448 Message: 5448

Microphones For Sale:

All of these microphones have been tested and work well.

Shure 444 D Dual Impedance Desk Microphone
The 444 D has voice shaping built in to it, providing greater articulation at communications frequencies. Of course it has a PTT switch on the base, that can be used as a momentary switch, or can be locked in position. Also under the base are switches for High or Low Z.
This mic is the black color, and is in very nice shape, with paper work for $75.

Johnson Hi Z Hand Microphone
This high impedance hand mic is a gray color, with the Johnson logo with the Indian on it. It has a PTT switch and coiled cord, and produces a nice pattern on the scope. It looks good also. $30

Generic Hi Z Hand Microphone
This hand mic is black in color, and looks like it might have come from a HyGain rig. It has a PTT switch and black coiled cord. $25

Shure 401 B, Low Z Hand Microphone
This mic has characteristics similar the the Shure 444 Desk Mic, but this one is a hand mic. It is a controlled magnetic mic, with frequency response tailored for voice communications. It has a rugged case, and a heavy duty coiled cord. 4 pin connector. With paper work for $40.

Shure 104 C, Low Z hand Microphone
This is a very heavy duty Shure mic. It appears to be new, with stripped and tinned ends that have never been on a connector. It is in its original box, with the original instruction manual. $30

Chrome Low Z Hand Microphone
This mic is chrome plated. My memory says it may have come from a Polycom rig. The mic is a good solid metal case with chrome plating all around, with a black PTT switch and black coiled cord. There are some pits on the chrome, but it works fine. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color. With 4 pin connector. $25

With no connector. $22

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is
needed. Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

Icom HM-8 touchtone microphone
The HM-8 has a 12 digit touch tone (DTMF) pad on the front
of it, along with an on-off switch for the tones. Of course
it also has the normal PTT switch.
The HM-8 is used on the 25A Red LED, 245, 290, 402, 202S, 451,
471A, plus other rigs.
This particular microphone has an 8 pin round connector, works
fine, looks like new, is in its original box, and includes
paper work for $50.

KDK DM TT-1 DTMF Touch Tone Microphone
This mic has a 12 digit touch tone pad on it, along with a
switch to turn the pad on and off. I presently has a 4 pin
plug on it, and can be used on most any rig. It works fine,
and looks great. $35

KDK TM-2 DTMF Touch Tone Microphone
This mic has a 12 digit touch tone pad on it, along with up
and down switches. It presently has a 6 pin connector, as
used on the KDK FM-2030, FM-2033, and other KDKs using the
6 pin plug. Of course the plug could be changed, and it
could be used on any brand rig.
This one works fine and looks very close to new. $40

CES 655 L "Microdialer" DTMF Microphone
You can manual dial a number, or automatically have it
stored in the mic, and "speed dial" with this mic. 12
digit touch tone pad on the front, with the microphone
part above the pad. This one presently has a 4 pin plug
on it, but of course that can be changed. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
With paper work for $40.

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Speaker Microphones:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Azden SDX-316
This is the rounder style speaker mic that fits nicely in
the palm of your hand. Has 3.5 mm and 2.5 mm plugs for
Azden, Icom, some Yaesu, and others. $ 20

Prices do not include shipping from Florida.

Thanks.

Antennas and antenna related items for sale:

B & W 377 Coaxial Antenna Relay:

I had never seen one of these before. Most of us are familiar with the Dow Key Antenna relays that many of us used 40 or 50 years ago. This unit serves the same function, but is somewhat unique.

The B & W 377 is housed in a hexagon box. It has three SO-239 connectors coming out three of the sides, a length of wire on one side that goes to the coil of the relay, and two sides that are blank.

The coil is rated to work on 48 to 130 volts AC. The original single page instruction sheet says that it is a unique relay design permitting this large variation in voltage. It is good to 150 MHz, and will handle 2000 Watts PEP, or 1000 watts continuous.

It appears that this unit has never been used. It has the original instruction sheet, and original box. The unit itself does not appear to have been used, and looks perfect. $75

Heath HD-1234 Coaxial antenna switch:
This coax switch has SO-239 connectors arranged so the coax comes out like the spokes of a wheel. It will switch up to 4 antennas, and also ground all of the antennas. This particular switch works fine and looks fine also. With paper work for $35.

CalComm #9856 SWR Meter
The included paper work says this meter is good for 3 to 150 MHz, so one can use it on 2 meters, and on 6 meters as well as on the HF bands. It can also be used as a field strength meter.
It has an SO-239 connector on each end, and is made to be mounted in a vertical position, with the meter at the top, and the adjustment knob at the bottom.
This meter includes the paper work (and even the warranty info), and the original box, although the box has seen better days. The meter itself works fine, and is in extremely nice condition. The back of it has holes for mounting it to a wall. A former owner removed some of the paint from around these mounting holes, so that it would get a better electrical ground. $20

ParaDynamics PDC-5 Wattmeter
This unit has a wattmeter with scales of 100 W, 10 W, and
1 W. It has an SWR Bridge built in, with an antenna tuner.
It was obviously made for 11 meter use, but it works well
on other frequencies. The tuner portion works fine on 10 m,
12 m, and 15 m. The wattmeter seems accurate from 20 meters
thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal
for portable use.
The wattmeter and antenna tuner portion work fine, however,
the SWR portion of this unit is inoperative. It looks fine. $12

Larsen VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.

Larsen NMO-Q Quarter Wave Antenna, fits any NMO mount
For two meters. $10
For 450 MHz. $6

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $9

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount,
and others. It can be cut for 2 meters, 220 MHz, or
450 MHz bands. $8

Trunk Lip Mount with 5/16 inch stud
Ideal for use with the "Q" above, or any other antenna
that requires a 5/16 inch stud. Very nice for $18.

Avanti "On Glass" antenna for 440 MHz:

This antenna was made by Avanti to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Hustler HF mobile resonators:
All work fine and are in good cosmetic condition.

"Super" high power resonators (good for 2 KW PEP):
80 meter RM-80 S
can be cut for CW or phone, and also used on a 4BTV
Vertical to give 80/75 meter coverage
(basically make it into a 5BTV) $38

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

Bencher YA-1, high power, low pass TVI filter
If you need a more heavy duty filter for the output of
your amplifier, this one is ideal. It will take full legal
power plus, and has at least 80 db signal attenuation at
TV channel 2.
It is also in a very sturdy metal case with SO-239 connectors
on each end, and is a 50 ohm filter.
This one works great, and looks close to new. Someone added
some felt to the bottom, so that it protects better. It is in its
original box, with paper work. Bencher currently sells these
for about $90. This one is only $65.

B & W FL-10/1500 (Also known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. With paper work $40.

Drake TV-5200-LP
This is the more modern version of the Drake TV-1000 Low Pass
Filter. This is the filter that may also be used on the low
end of six meters, as well as HF. It is good for 1000 Watts
average below 30 MHz, and about 200 W up to 52 MHz. It works
fine, and is in very nice shape. $35

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation
in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work. $30

Drake TV-42-LP Low pass filter
Rated for 100 W thru 30 MHz.
Similar characteristics as the TV-3300, but lower power rating.
It works fine and looks like new. $15

AEA "Hot Rod" Gain antenna for 2 meters:

This antenna has a BNC connector on it, and offers gain over
other HT antennas. It is telescoping, and about 3 feet long.

This is a half wave antenna with matching coil, so it does not
depend upon the ground plane (or lack thereof) on your HT.

It is rated to have 3 db gain over a quarter wave antenna.
However, the rubber duck used on most HTs is no where close
to being as efficient as a quarter wave antenna. Typically they
are 6 to 10 db lower. The result is that this antenna should
give you an easy 10 db gain over most HT antennas.

This one works fine, and looks good as well. $18

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC Regular length, 6 1/2 inches long
Alinco Stubby w/BNC Connector, 4.6 inches long

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

BNC Stubby for 440 MHz, 3 inches long

Coax Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Antenna adapter for Kenwood TH-21/31/41 HTs
Adapts the antenna connector found on these HTs to a
standard PL-259 connector. $6

Prices do not include shipping from Florida.

Thanks.

5452. Kenwood ts-820s plus extras

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-01-23 23:46:27 UTC
From: rtnmi
Topic: 5452 Message: 5452

I have a very nice TS-820S with VFO-820, MC-50
Works perfectly fine.

10 meters thru 160 meters - CW SSB FSK - No issues with digital display, band switch or anything else. Full output (6146's), drives my Drake L7 to 1000K watts output with no problem at all. Cosmetic 9 out of 10, operation 10 out of 10 lots of unsolicited FB signal reports as well.

I am wanting a radio that can be computer controlled - Same band coverage including WARC and with Internal CW Keyer, Notch, DSP not an absolute must (in fact probably better without it).
Otherwise I would definitely be keeping this one.

Dears,

My FT-23R HH TRX is in need of electrolytic capacitors, which have gone bad due to storage over long period [4+ years of non use].

Can any one help me in acquiring the complete set of these capacitors. Any help at all in getting these back on air will be highly appreciated.

Best Regards

5454. FS: Icom HT accessories

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-01-25 23:05:54 UTC
From: John Geiger
Topic: 5454 Message: 5454

I have for sale the following accessories for Icom HTs. Prices include shipping in the US, and international shipping can be worked out. Here is what I have available:

1. HM-46 slimline speaker mic. Fits most Icom HTs that have the 2 separate pins for speaker and mic. Also works on Alinco HTs and older Yaesu HTs. Asking $20.

2. CP-11L cigarette lighter cord for the Icom T90A HT. Probably works on others also, but puts out around 11.5 volts, with a noise filter installed. This is a Batteries America product, not an Icom one, but works fine. Asking $18.

3. Batteries America rapid charger for the Icom T90A LiON battery and will probably work with others as well. Sells new for $50 plus shipping, I am asking $35. Charges the battery in 2.5 hours.

I can take paypal/check/MO.

73s John AA5JG

5457. FS: Icom T90A triband HT

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-01-26 18:32:40 UTC
From: John Geiger
Topic: 5323 Message: 5457

I have for sale a mint condition Icom T90A with all the standard accessories (battery, wall charger, manual, antenna, and box). Even has the warranty card and original sales receipt from Memphis Amateur, showing it was purchased about 14 months ago. Looks like it has seen very little use, though. It is missing the belt clip, but you can get those from Icom for a couple of bucks.

This HT does 5 watts on 6m/2m/70cm and has wideband receive, from 550khz to 1000mhz. It covers broadcast band AM and FM, shortwave stations, all the public service frequencies, and a couple of additional ham bands for receive. I have owned close to every HT on the market and this is one of the easier ones to use and is definitely the best looking HT out there today.

I am asking $165 shipped for it and can take paypal/check/MO. I have have a few accessories like a rapid charger, speaker mic, and cigarette lighter cord I could throw in with it for a package deal.

I have for sale a like new, hardly used yaesu FT-817ND, 160-70CM qrp radio with 60 meters, no longer interested in trades as I have too much going on and need to scale back a little. Radio comes with everything that was in the box, the NiCad pack, the AA tray, shoulder strap, rubber duck and the extended tip for 6 meters, microphone, charger, CD power cord for a power supply. for additional accessories I bought it comes with the MFj power supply and the MFJ 1899T telescopic antenna good from 80-6 meters and has been reported to work on 2 meters and I'll throw in my counter poises I made for it, the soft case for the radio, the CW key that can mount to the side of the radio which I haven't even used, LDG z817 auto tuner, and rt systems software and usb cable and the cable can also be used to control the radio from rig control software if you desire. I have manuals and everything that came with all of it included, everything has very very low hours on it and some not used at all. Asking $800 plus shipping for it I might talk a little on that price but everything's about as close to brand new as you'll find, I might take out an accessory or so if I can actually use it with something else I have for a reduction in the price but some things I can't use and wont' take out. I will take paypal or money orders

5460. FS: Kenwood TH-25AT with BC-10 desk charger and SMC-31 spkr/mike

I have a very nice Kenwood TH-25AT 2m HT, original owner, used as backup 2m rig, includes PB-8 battery pack, belt clip, antenna and original box, will also include BC-10 desk charger. PB-8 battery pack works but needs fresh batteries. Everything in great condition, hardly a mark on anything. $80 plus shipping. I also have a Kenwood SMC-31 speaker/mike for this radio, never used, purchased new, still in box for an additional $40.

I am looking for high tolerance, 1% or better, like 0.5% or even 0.1% resistor and capacitors.

5462. New David Clark PTT headset for Mot Jedi radios

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-01-29 20:35:57 UTC
From: John Hassebrock
Topic: 5462 Message: 5462

This is a NEW David Clark behind-the-head headset (made for Motorola) with PTT switch right on the headset. Still has the David Clark "Excellence" tag attached. Designed to be worn with or without a helmet and used by many in the public safety sector. The Motorola model number of the headset is BDN6645A. Comes with Motorola adapter cable BDN6673A that plugs right into the Jedi radio. Fits the HT1000, JT1000, MTX8000 and MTX9000. May fit others but I can't say so positively. Just called Motorola and both of these items are still available. The headset price is $352.00 dealer ($439.00 retail). The price for the adapter cable is $184.00 dealer ($230.00 retail). I am asking $295.00 for the set. If you are interested I will be glad to send you some photos. Let me know if you need any other info. and I will try to get it for you. Thanks for reading.

This is a David Clark H3442 behind-the-head headset with the David Clark C3031 adapter box, IN-LIKE-NEW condition, for use with the Kenwood TK-690/790/890 series of mobile radios. It has the comfortable gel ear cushions. There is a push-to-talk switch on the headset itself as well as the one on the adapter box. It has an adjustable velcro strap that goes over the top of the head and is designed to be worn with or without a helmet and is used by many public safety organizations. The cable from the C3031 adapter has the plug that plugs right into the Kenwood series 90 microphone jack. Also comes with a sheet showing the parts breakdown of the headset and also a sheet with the schematic of the adapter box. I am asking $295.00 for the set. This set would sell new for from $500.00 to $700.00. If you are interested I will be glad to send you some photos. Also, let me know if you need any other information and I will try to get it for you. Thanks for reading.

From: Ruben Echevarria
Topic: 5469 Message: 5477

Selling my 100% working Kenwood TS440SAT, has the IC10 chips installed ready for CAT Control & PSK.
Doesn't have the dot problem. Clean radio with new paint job both covers repainted radio looks close to new.
100% Used on PSK. Just bought a Kenwood TS940S and won't be needing the 440. Radio was serviced by Clif
about a year ago. Firm price $450.00 plus you pay shipping. Radio not listed on eBay just here and Ham4Sale group.
Contact me direct. TNX .. Pics available.

5478. FS/FT: W4RT Antenna Boss II for Icom

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-02-06 16:01:06 UTC
From: John - W5JMC
Topic: 5478 Message: 5478

I have for sale or trade a W4RT Antenna Boss II screwdriver antenna controller. This is the Icom version and is currently wired for a Tarheel antenna. The unit comes like-new in the original box with operating instructions. Will sell for $100 plus s/h, or entertain trade offers. Am looking for the following items specifically: Heil headset for FT-857D, Powerpole DC outlet strip (i.e. West Mountain Rigrunner or MFJ-1128), a 222mhz radio, 900mhz gear, or..what do you have?

5479. FS/FT: Icom IC-27a 2 meter mobile

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-02-06 15:43:43 UTC
From: John - W5JMC
Topic: 5479 Message: 5479

I have an Icom IC-27A 2 meter radio for sale or trade. This radio is in good operating condition; powers up, transmits and receives. It has 5 and 25 watt power settings, scans, has MR and VFO, 9 memories and 32 PL tones. It comes with an HM-23 DTMF mic, mobile mounting bracket (though it has never been mobile that I know of), a power cable and operating manual. The radio is in excellent cosmetic condition; guaranteed not to be DOA. The only thing I can find wrong with the radio is the digital display is out in a few places. i.e. some LCD "bars" are missing on a number of digits. You can still read the operating frequency. I can send pics on request. I am asking $60 + s/h. please email w5jmc(dot)john-at-gmail(dot)com. Am willing to trade...make me an offer.

Yaesu FH-1 Remote Control keypad for the Yaesu FT-1000MP, FT-1000MP Mark V, and Yaesu FT-1000MP Mark V Field in **Excellent** shape. This great little device permits the following remote control features :
a) Contest Memory Keyer control
b) VFO/memory control,
c) Main/Sub VFO control.
d) Tune Control
e) Preprogram CW messages such as your call, exchange, etc.
It has the 3.5mm mini plug that plugs in to the back of the transceiver. Simple to use and very useful. (especially in CW pile-ups!) The documentation is contained in the MP's manual or at the various MP websites (VA3CR, etc.)--
85.00 PLUS SHIPPING (PREFER PAYPAL)

5489. TRADE: Icom 706MKII for Yaesu FT100D/FT857D

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-02-07 18:58:25 UTC
From: John Geiger
Topic: 5489 Message: 5489

I have an Icom 706MKII that I am looking to trade for a Yaesu FT100D or FT857D. This is the 706 model that does 100 watts on HF and 6m and 20 watts on 2m. It operates perfectly and looks very good also except for one little nick on the upper right side of the case. Other than that, looks very well. It has the power cord, mic, and manual with it.

If you are more of an Icom person than a Yaesu person and want to get back to Icom, here you go. Or if you are planning on going mobile and need to remote mount the face, this is the rig for you. It is much easier to remote than the Yaesu's are, as the mic jack and speaker jack are on the faceplate of the rig, not on the body, so you don't need the extra extension cables. The display is also much larger on the 706 than on the FT857D.

If you are interested in a trade, lets work something out. I can be reached by email or at 580-591-6885. You can check my ebay feedback under my call if you like.

5490. MISC Equipment (Power Supply, Ohm Meter, rubber duck, etc)

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-02-07 21:53:37 UTC
From: John - W5JMC
Topic: 5490 Message: 5490

FS: Vintage Ohm Meter

I have an old Simpson 269 Series 3 "Ultra high sensitivity volt-ohm microammeter." I have no idea what condition this meter is in nor do I know what it is worth, but have no need for it. If you are interested, make me an offer (including trades). If you would like better/more picture, let me know.

FS: 10 Amp Power Supply

I have a used Precision Regulated Power Supply for sale. It is rated at 13.8 volts and 10 amps. The unit powers up just fine, but for some reason, puts out 24 volts. This might be easy to fix, but I have no need for the supply here in the shack. If interested, make me an offer ☐ trade offers welcome.

FS: Rubber Duck Antenna

I have a rubber duck antenna for sale. It does not have any markings on it, but probably covers 2m and 440. It has a BNC connector (all my HTs are SMA, or I would test it for you). It is 15 ½ inches long. Asking $12 shipped.

5495. FS: Special Yaesu VX5R Manual

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-02-09 03:23:32 UTC
From: John Geiger
Topic: 5495 Message: 5495

I have for sale a special Yaesu VX5R manual which would be perfect for anyone who has trouble reading the small print on the factory manual, or just anyone who doesn't have a manual with their VX5R. This manual has been enlarged so it is on 8 1/2" by 11" pages, and is spiral bound with a nice plastic cover on it.

I am asking $7 shipped for it and can take paypal/check/MO.

73s John AA5JG

5496. FS: SMA triband antenna

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-02-08 23:14:51 UTC
From: John Geiger
Topic: 5496 Message: 5496

I have for sale the triband (6m/2m/70cm) antenna from the Yaesu VX5R HT. It has both the 6 meter coil with it, and the smaller tip for it when the 6m coil isn't being used. This antenna also works good on wideband receive. I have found that it is better than the stock triband antenna for the Icom T90 and for Yaesu VX2R/VX3R. It is in very good condition and works fine. I am asking $15 shipped and can take paypal/check/MO.

This is a NEW David Clark behind-the-head headset (made for Motorola) with PTT switch right on the headset. Still has the David Clark "Excellence" tag attached. Designed to be worn with or without a helmet and used by many in the public safety sector. The Motorola model number of the headset is BDN6645A. Comes with Motorola adapter cable BDN6673A that plugs right into the Jedi radio. Fits the HT1000, JT1000, MTX8000 and MTX9000. May fit others but I can't say so positively. Just called Motorola and both of these items are still available. The headset price is $352.00 dealer ($439.00 retail). The price for the adapter cable is $184.00 dealer ($230.00 retail). I am asking $295.00 for the set. If you are interested I will be glad to send you some photos. Let me know if you need any other info. and I will try to get it for you. Thanks for reading.

Date: 2010-02-14 00:04:11 UTC
From: John Geiger
Topic: 5507 Message: 5507

I have for sale the antenna from a Yaesu VX7R HT. It is missing the 6 meter coil but works fine on 2m and 70cm, and should also work on 222 since the VX7R covers that band, so it is really a triband antenna. I am asking $15 shipped in the US and can take paypal/check/MO.

5513. FS: Icom 706MKII

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-02-15 03:10:08 UTC
From: John Geiger
Topic: 5513 Message: 5513

I have for sale an Icom 706MKII HF/6m/2m transceiver in very good condition. This is the model that does 100 watts on HF and 6m and 20 watts on 2m. It works very good and looks very good also other than 1 small mark on the top of the case on the right side. It has the UT-106 DSP unit installed for the noise reduction and autonotch features. I have had a couple of 706MKIIs before and this is probaby the best operating one I have seen. It comes with the hand mic, short power cord, and operating manual.

I am asking $450 plus shipping for it. I can take paypal/check/MO. Hate to sell it but I am replacing it with another rig that also does 70cm SSB for VHF contesting and the SSB satellites.

5517. FS: Yaesu FC-20 auto antenna tuner

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-02-16 16:49:31 UTC
From: John Geiger
Topic: 5517 Message: 5517

I have for sale a Yaesu FC-20 HF/6m automatic antenna tuner for the Yaesu FT100D, FT857, FT897, and FT847 series of radios. It hooks up to the control jack on the radio so it doesn't require external power, will tune at the push of the tune button on your radio, and will tune 2 separate antennas using an A/B antenna selection button on the front of the tuner. It comes with the control cable and a coax jumper to go between the tuner and the radio. Also comes in the original boxes.

The tuner has some wear on the case, so it isn't in mint condition, but if you can overlook this it will make a nice addition to your Yaesu setup. I am asking $130 plus shipping and can take paypal/check/MO.

73s John AA5JG

5520. FS: Icom W32A dualband HT

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-02-16 22:08:13 UTC
From: John Geiger
Topic: 4849 Message: 5520

I have for sale an Icom W32A dualband (2m/70cm)HT in very good condition. Does dual receive including dual inband receive. It also does 5 watts on high power or 500mw on low power. It comes with a BP173 9.6v NiCD battery, wall charger, belt clip, and a Pryme AL800 antenna in place of the stock antenna. THis is a dual purpose antenna that can either be a normal size dualband whip, or a telescoping long antenna for extra gain.

HT works fine and is in very good condition. It doesn't have the manual but you can find those on-line.

I am asking $150 plus shipping for this HT package. I can take paypal/check/MO.

From: Ronald
Topic: 5525 Message: 5525

I have too many amps. I need to thin the heard a bit. Open to offers.
One
I have a Swan Mark I that I got from family of a SK. He just put new tubes in it and then got sick so tubes have few hours but it had set a while. I brought it up slow on 110 volts and it puts down 800 watts key down in tune mode with 70 watts of drive. I have not put it back on 220 yet but it will do the full legal limit on 220 and on ssb. Looks like someone set a coffee cup on top but rest looks fine.
Two
I have an Ameritron AL-811 three tube model. Full output 160-10 Looks fine but missing three or four screws lost in shipping and just not ordered yet.
Three
I have a Drake L4B . looks fine full output. It would do the legal limit if the power supply upgrade from the Heathkit shop were done. I have one extra 3-500z
Four
I have a IC-706 Mark II G Not new but Looks good ,works good.

No Smoke as far as I know on any. I Know history on last few years on all.
I live in Southeast Oklahoma 20 miles from Texas ans 20 miles from Ark. Pick up would be great.

5527. For Sale or Trade Titan GAP DX

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-02-18 15:48:32 UTC
From: ka1oeo
Topic: 5527 Message: 5527

I have for sale or Trade a GAP Titan DX Antenna 10-80M. It is like new. It was assembled once for about a half hour. When it came to putting it up it was to close to the power lines for my liking. I would like $300.00 for it. I would be willing to trade for cash and items or even trade depending what the item is. These are the items I would like: Ipod Touch, 2 meter moble radio, 2 meter/ 440 moble radio, 2m/440 HT, HF Transciever. I would consider any of these items to take as a trade plus cash depending on the item.This is just to give you an idea of what I would take in trade or trade and cash. I am not looking to give you cash for your item with the trade. Located in NH will not ship.

FS: RS 19-345 Simplex Repeater

This is in the original box with original docs
and connecting cable.

I know that they are selling for absurdly big bucks
these days but this one will require a little TLC.

The prior owner neglected to remove the batteries
and the Ham handling his estate never inspected
it to notice (and disclose) the battery damage.

There is no apparent harm to circuitry, only to
the battery contacts.

Too many projects and too little probability I will
get to this one any time soon - and could use a little
Paypal play money.

Anyone interested for $35. including standard USA
shipping?

From: John Geiger
Topic: 5538 Message: 5538

I have for sale a pair of the Yaesu FNB-78 batteries for the Yaesu FT897D radio. They are about 1 year old and have been charged maybe 3 or 4 times. Still hold a very good charge. Also have the CD-24 4 hour charger for the batteries. The batteries list at $125 a piece, and the charger is $119. Not sure what to ask on the used market so will take offers on the package or on each separate piece. I can take paypal/check/MO.

This would make a nice emergency setup if you have a Yaesu FT897D.

5541. Drake L4-B Amplifier for sale: Lex, KY

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-02-23 04:12:28 UTC
From: Bill Cotter
Topic: 5541 Message: 5541

I have for sale an exceptionally nice Drake L4-B Amplifier in perfect condition. The L4-B is one of the most ruggedly-designed dual 3-500Z amplifiers for 80-10M ever made. It will work with any transceiver capable of 90W or more drive to achieve 1,200W output. I have owned this amp for over 30years and it has provided reliable service on CW and SSB.

The tubes were replaced in 1985 with a new set of Eimac 3-500Z metal plates, the most desirable and expensive tubes. They have tested out at full power, and will yield at least another 1,000hrs with normal duty. At the same time I installed the AG6K parasitic suppressor kit, the negative-feedback grid kit, meter protection diodes, and the power supply glitch resistor. All of these improvements reduce the chances of a catastrophic tube failure.

The power supply was re-capped in 2005 with new equalizer resistors and diodes, step-start circuit, MOV's across the power line, and two dual-speed whisper fans to keep the power supply at a lower temperature. It is presently wired for 220VAC @20A. Included with the amplifier is the original manual, and a control cable for a Kenwood TS-830S. It is easily modified for any transceiver that uses a PTT relay.

Pictures can be seen at:
http://web.qx.net/bcotter/forsale/L4-B/

Reviews
http://www.eham.net/reviews/detail/407

Manual
http://bama.edebris.com/manuals/drake/l4b/

I presently have five HF amplifiers, and I am seeking to replace four of them with an Alpha 89 for 1.5kW and QSK. Price $750 and Local Pickup only.

From: John Geiger
Topic: 5544 Message: 5544

I have for sale a CSC-92 Vinyl Carry Case for the Yaesu VX-3R duaband HT. It sells new for $12.95 plus shipping, I am asking $8 shipped and can take paypal/check/MO.

73s John AA5JG

5545. FS: Maldol MH-255 SMA antenna

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-02-24 22:00:28 UTC
From: John Geiger
Topic: 5545 Message: 5545

I have for sale a Maldol MH-255 dualband antenna in very good shape.

* Great for 2-way Handhelds or Scanners with an "SMA" Connector!
* The New MH-255 is Tuned for xmit the 152-157, & 460-475 V/U Bands!
For Xmit & receive. Rcv rated 108-960Mhz, but also works 25-1300Mhz.
* Perfect for MARS/CAP Modified Amateur HandHelds, GMRS/FRS, BR-330T & BCD396T, Scanners & Commercial HT's that have an "sma" antenna connector.
* Very Small, About 3" tall, Super Soft & flexible Too!

Sells new for $28 plus shipping, I am asking $14 shipped.

73s John AA5JG

5546. FS: NC-72B wall charger

Date: 2010-02-25 00:26:15 UTC
From: John Geiger
Topic: 5546 Message: 5546

I have for sale a Yaesu NC-72B 12v wall charger that works with many of the Yaesu HTs like the VX5R/6R/7R/150/170 and so forth. It is also the wall charger for the FT817ND HF/VHF/UHF radio. I am asking $17 shipped for it and can take paypal/check/MO.

73s John AA5JG

5547. FS: cigarette lighter cord for Yaesu HTs

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-02-25 00:30:13 UTC
From: John Geiger
Topic: 5547 Message: 5547

I have for sale an aftermarket cigarette lighter cord/wall charger that works with many of the Yaesu HTs like the VX5R/6R/7R/150/170 and so forth. It is NOT filtered like the Yaesu EDC-5 is. It will also work fine on the FT817ND HF/VHF/UHF radio. I am asking $11 shipped for it and can take paypal/check/MO.

73s John AA5JG

5549. FS: Yaesu VX7R quadband HT

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-02-25 06:44:47 UTC
From: John Geiger
Topic: 5168 Message: 5549

I have for sale a Yaesu VX7R (silver version) quadband HT in very good condition. This HT covers 6m, 2m and 70cm at 5 watts and 222mhz at 300mw. Plus it even does 6 meter AM! It has wideband receive also, and does dual receive as well. Everything works fine on it.

It comes with the stock antenna (but missing the 6m coil for the antenna), 2 batteries, and either the wall charger or an aftermarket cigarette lighter cord (your choice) which will also charge the battery on the HT. One battery is about dead and holds a slight charge, while the other one holds a better charge, but I can't guarantee the life of the batteries.

It does not come with a box or manual but you can find the manuals on-line.

I am asking $160 plus $5 for shipping in the US and can take paypal/check/MO.

73s John AA5JG

5550. WTB 2meter440 portable antenna

5553. FS: Yaesu FT3000M 70w 2m rig (with 70cm receive)

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-02-26 03:01:01 UTC
From: John Geiger
Topic: 5553 Message: 5553

If you want to be a big gun on 2m FM, this rig is for you!! I have for sale another Yaesu FT3000M that does 70 watts out on 2m (just sold one a few weeks ago). It also has wideband receive, covering the 70cm band and 800mhz so you can listen to the police frequencies. It hears very well on 70cm and I have been it on the FM satellites with good results. This radio comes with the hand mic, manual, and power cord. It will also do crossband repeat from 70cm to 2m in case you need some extra power to get into the repeater while using your HT. You can even control the rig with the TTP on your HT.

I am asking $115 shipped for it, and can take paypal/check/MO.

5555. CW Paddles, Microphones, Filters, and more FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-02-26 16:39:55 UTC
From: Ken Simpson, W8EK
Topic: 5555 Message: 5555

CW Paddle and Cables, Microphones, Speaker, Low Pass TVI Filters, Coaxial Antenna Relay, Power Supplies, and much more For sale:

CW Items:

Vibroplex Brass Racer Triangular Iambic Paddle

The Brass Racer Paddles are unique in that there are no springs in the design. Tension on the paddle is infinitely adjustable by the use of magnets. It is a convenient, space saving portable keyer paddle unit crafted from solid brass with a lacquer coated brushed finish mounted on a hardwood base. Designed for use with an external keyer or a keyer built into the radio. It has a long shielded cord with a 1/4 inch stereo plug. It works fine and looks good. $100

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it, as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

Microphones:

All of these microphones have been tested and work well.

Johnson Hi Z Hand Microphone
This high impedance hand mic is a gray color, with the Johnson logo with the Viking on it. It has a PTT switch and coiled cord, and produces a nice pattern on the scope. It looks good also. $30

Generic Hi Z Hand Microphone
This hand mic is black in color, and looks like it might have come from a HyGain rig. It has a PTT switch and black coiled cord. $25

Shure 401 B, Low Z Hand Microphone
This mic has characteristics similar the the Shure 444 Desk Mic, but this one is a hand mic. It is a controlled magnetic mic, with frequency response tailored for voice communications. It has a rugged case, and a heavy duty

coiled cord. 4 pin connector. With paper work for $40.

Shure 104 C, Low Z hand Microphone
This is a very heavy duty Shure mic. It appears to be new, with stripped and tinned ends that have never been on a connector. It is in its original box, with the original instruction manual. $30

Chrome Low Z Hand Microphone
This mic is chrome plated. My memory says it may have come from a Polycom rig. The mic is a good solid metal case with chrome plating all around, with a black PTT switch and black coiled cord. There are some pits on the chrome; it works fine. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color.
With 4 pin connector. $25
With no connector. $22

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed. Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

KDK DM TT-1 DTMF Touch Tone Microphone
This mic has a 12 digit touch tone pad on it, along with a switch to turn the pad on and off. I presently has a 4 pin plug on it, and can be used on most any rig. It works fine, and looks great. $35

CES 655 L "Microdialer" DTMF Microphone
You can manual dial a number, or automatically have it stored in the mic, and "speed dial" with this mic. 12 digit touch tone pad on the front, with the microphone part above the pad. This one presently has a 4 pin plug on it, but of course that can be changed. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with a low impedance microphone. This one has the 8 pin modular plug (like a computer LAN) on it. This mic has not been used, so it is in really great condition.
With paper work for $40.

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a normal low impedance microphone. With 4 pin plug.
Like new. $38

Speaker Microphones:

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. $15

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. $ 20

Communications Speaker
This 4 inch square speaker is optimized for communications frequencies (300 to 3000 Hz). It is in a black enclosure, and is an 8 ohm speaker. It has a cord with a 1/8 inch (3.5 mm) mono plug on the end.
This one works fine and looks OK also. $15

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted in the coax line after the transmitter or transceiver) to reduce harmonic interference.

Bencher YA-1, high power, low pass TVI filter
If you need a more heavy duty filter for the output of your amplifier, this one is ideal. It will take full legal power plus, and has at least 80 db signal attenuation at TV channel 2.
It is also in a very sturdy metal case with SO-239 connectors on each end, and is a 50 ohm filter.
This one works great, and looks close to new. Someone added some felt to the bottom, so that it protects better. It is in its original box, with paper work. Bencher currently sells these for about $90. This one is only $65.

B & W FL-10/1500 (Also known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters, and will handle 1500 Watts. SO-239 connector on each end. This is the latest model B & W filter. It is in very nice condition; it looks very close to new. With paper work $40.

Drake TV-5200-LP
This is the more modern version of the Drake TV-1000 Low Pass Filter. This is the filter that may also be used on the low end of six meters, as well as HF. It is good for 1000 Watts average below 30 MHz, and about 200 W up to 52 MHz. It works fine, and is in very nice shape. $35

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter and antenna, and has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. It is good for 1000 Watts "average" according to the manual, and has over 80 db attenuation at 41 MHz. This one looks great, and includes the paper work. $30

B & W 377 Coaxial Antenna Relay:

I had never seen one of these before. Most of us are familiar with the Dow Key Antenna relays that many of us used 40 or 50 years ago. This unit serves the same function, but is somewhat unique.

The B & W 377 is housed in a hexagon box. It has three SO-239 connectors coming out three of the sides, a length of wire on one side that goes to the coil of the relay, and two sides that are blank.

The coil is rated to work on 48 to 130 volts AC. The original single page instruction sheet says that it is a unique relay design permitting this large variation in voltage. It is good to 150 MHz, and will handle 2000 Watts PEP, or 1000 watts continuous.

It appears that this unit has never been used. It has the original instruction sheet, and original box. The unit itself does not appear to have been used, and looks perfect. $75

Heath HD-15 Phone Patch
This is the unit with the VU meter on the left and 3 knobs that match the SB series to the middle and right. Low or high Z output to the transmitter. It can also be used as an interface to the computer for PSK31, etc. It is in extremely good condition. No scratches or imperfections. Paper work included for $25.

Weston Precision MilliVolt Meter Model 1
This is an extremely precision meter, with mirrored scale about 6 inches long. It weighs about 5 1/2 pounds!
It has terminals for scales of 150, 1500, 15000, and 150000 millivolts.
Also included is the calibration information (from 1944) indicating that it is "dot on" for calibration.
In addition, it is in an extremely nice protective case, that appears to be real leather.
To put it another way, this is an extremely nice meter!
$80

Service Manuals:

These are original service manuals in extremely good condition.

Service manual for Kenwood TH-21 series HTs (2 meter), plus most
accessories for this series HT $20

Service manuals for Kenwood TH-41, 440 MHz HT, plus most
accessories $20

Service manual for Kenwood TW-4000 dual bander $20

Service Manual for Kenwood TR-2600, 2 meter HT $15

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a service
pack. It has schematics, circuit explanations, voltages, etc. $18

Kenwood MB-4000 Mobile Bracket
This mobile bracket is made to be used with the Kenwood
TW-4000 dual band transceiver, and possibly other rigs
as well.
This one is in good shape, with the paper work and hardware.
$15

TenTec Power Supplies:

TenTec Model 280 power supply, 20 amps at 13 V DC.
This supply is quite heavy duty electrically.
It has 2 pass transistors, instead of the one that
some have. It also has an ammeter on it.
This one works fine, and looks OK as well.
A previous owner removed the molded in TenTec power
cable on the back and added very heavy binding posts,
so that it can be used with many different rigs and
not just TenTec. It also has a couple RCA jacks for
lower power use.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is very quiet, and well
shielded, and does not produce any electrical noise that
I could find. $150

AEA Power Supply:
AEA AC-1
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive,
so it can be used on many different things that require
12 V DC at up to an amp, such as keyers, antenna tuners,

etc. $15

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

5556. FS: Yaesu VX3R dualband HT

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-02-26 14:18:25 UTC
From: John Geiger
Topic: 5556 Message: 5556

I have for sale a Yaesu VX3R dualband mini HT that does 1.5 watts on 2m and 1 watt on 70cm. The power doubles if you run it off of the cigarette lighter cord (not included). It comes with the box, antenna, wall charger, but no manual-but the manual is available at the Yaesu website. This one has been modified for wideband transmit which has raised the noise level on 2m, so you have to turn up the squelch a little more. Works fine though.

Sold as working with the knowledge that the noise level is higher due to the modification (which I didn't do myself).

I am asking $110 shipped for it and can take paypal/check/MO.

73s John AA5JG

5557. WTB: H-60/PT handset

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-02-26 19:58:33 UTC
From: hitekgearhead
Topic: 5557 Message: 5557

I know this isn't "exactly" a ham radio item but I know we all collect a variety of "stuff". So I am hoping that maybe someone has a nice one of these in a forgotten corner somewhere.

As the title states: I am looking for a nice H-60/PT handset. This was the handset used on a couple different US field phones.

Send me an email or contact me thru the group.
Thanks in advance.
Albert

5558. Heil iCM for trade

5559. Standard UHF/VHF Dual Band HT Model C508A

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-02-28 13:23:07 UTC
From: ranaylor@aol.com
Topic: 5559 Message: 5559

I have a Standard Dual Band HT, Model C508, 350MW output unit in really good condition
except for the antenna. The rubber that covers the coil has separated so I taped it together just to
keep moisture out of it. It works fine the way it is, but probably could use a longer antenna. This
unit uses AA batteries, either rechargeable or alkaline.

Since I moved out the country, with all the hills and such, I just don't have the line of sight necessary
for UHF or most of the other VHF repeaters. I think I have the manual on the unit as well.

Will take $125.00 for it plus $4.80 shipping priority mail.

You can contact me via email, k5lrs@... or via this forum.

Thanks

Richard K5LRS

5564. Antenna and tower for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-02-28 20:12:08 UTC
From: ranaylor@aol.com
Topic: 5564 Message: 5564

There is an 80 foot custom tower for sale along with Cushcraft A4S tri-band antenna for sale
in Bella Vista, Arkansas. There is also a AEA 5 position remote coax switch to go with the antenna.
The gear is from the estate of a silent key. His wife is trying to get rid of the stuff she cannot
use or does not have purpose.

The tower is still standing. Needs to be disassembled and lowered to the ground. Antenna has
already been lowered and disassembled except for the boom and major element pieces. All that has
been color coded and made ready for re-assembly. The antenna is in nice condition. The coax switch will not
be sold separately from the antenna. Make a bid on the tower being you have to take it down.

Price of the antenna and coax switch is $400.00 and you pick up.

I have pictures that I can email you if you need them.

To negotiate with the SK's spouse, contact her at the following email address:

schriner@...

Thanks

Rich K5LRS

5565. FS: 220mhz 5/8 + dual band mobile antennas

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-02-28 19:29:13 UTC
From: John - W5JMC
Topic: 5565 Message: 5565

I have the following items for sale. Email me at w5jmc.john@... if interested.

Maxrad 220 Mhz 5/8 Wave Mobile Ant

I have a Maxrad 220 mhz 5/8 mobile antenna (good for 200-250) with NMO base. The antenna is brand new. Asking $25 shipped. Paypal or USPS MO ok.

Comet SBB-2 Dual Band Antenna

I have a Comet SBB-2 VHF/UHF antenna for sale. This is 18 inches tall and is the version with the UHF mount. It is a 1/4 wave on 2 meters providing 2.15 dB gain and a 5/8 wave on 440 MHz providing 3.8 dB gain. VSWR 1.5 : 1 or less. This antenna can handle up to 60 watts. Sells for $37+s/h; this one is yours for $25 shipped.

FS: Rubber Duck Antenna

I have a rubber duck antenna for sale. It does not have any markings on it, but probably covers 2m and 440. It has a BNC connector (all my HTs are SMA, or I would test it for you). It is 15 ½ inches long. Asking $10 shipped.

[Non-text portions of this message have been removed]

5566. WTB: 300hz CW filter for FT897/857/817

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-03-01 02:16:00 UTC
From: John Geiger
Topic: 5566 Message: 5566

I am looking for the 300hz CW filter for my FT897D-also used in the FT857 and FT817. EIther the Yaesu, W4RT, or INRAD version is fine. I prefer to pay with paypal. Anyone have one available?

From: kd8dvy@ymail.com
Topic: 5568 Message: 5568

Hello All,

I just came into a radio with no mic. I know some of you are going to say why did I get a radio with no mic, well the ham I go it from is a big CW guy and he used it as a primary CW rig and was unable to locate the mic. I am in need of a microphone for this radio. The radio that I need a mic for is a TS-430. The microphone is an 8 pin. If anyone has an extra one or a mic that does not work and want to get rid of it please let me know I can pick up at a meeting or arrange a meeting place.

Harold/KD8DVY

5569. Icom '706MIIG F/S

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-03-04 17:32:55 UTC
From: KC6STT
Topic: 5569 Message: 5569

For Sale: Well used, but not abused, Icom 706MIIG. Unit has been used as a base and mobile. Never hade any failures or problems with it. 100% functional with no bad LEDs, bad connectors, or display problems. Full power out on all bands/modes. It has the 60 meter mod.

Unit is a 8 of 10 cosmetically. It has a few scratches on the tranceiver unit, but no other issues.

Includes:

mobile mounting bracket
5 ft power cord (fuses intact)
remote kit
mic extension cord with mountable jack unit
Original mic
Icom DTMF mic
original instruction manual

Asking $500 OBO (+ SHIP, ABT $15)

Please reply to KC6STT@...

Tnx & 73 de Stacy.

5571. HT accessories FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-03-06 17:35:10 UTC
From: Ken Simpson, W8EK
Topic: 3604 Message: 5571

HT accessories and related items for sale::

Protective cases:

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1
and PB-4 battery packs. It can also be used with the smaller
PB-2 and PB-3 battery packs, by putting a filler in the case.
Black color. In very nice condition. $15

Case for Drake TR-33C
This is the black case that fits the Drake TR-33C, and has
cutouts in the back for antenna, power, etc. It includes
the shoulder strap, and is in good shape. $12

Case for Drake TR-22
As above, but for the TR-22. No shoulder strap. $10

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap. $25

Speaker Microphones:

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits
the TH-21/31/41 series HTs, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. $15

Azden SDX-316
This is the rounder style speaker mic that fits nicely in
the palm of your hand. Has 3.5 mm and 2.5 mm plugs for
Azden, Icom, some Yaesu, and others. It works great, and
looks great also. $20

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Rubber Duck antennas for your HT:
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

Regular BNC, about 6.5 inches long
Alinco Stubby w/BNC Connector, 4.6 inches long

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

BNC Stubby for 440 MHz, 3 inches long

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Accessories for the Kenwood TR-2400 HT:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Belt clip for TR-2400 HT, complete with hardware - $8

Wrist strap for TR-2400, and most other HTs - $4

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.

It is in good shape, and works fine. $3

Accessories for the Azden PCS-300 HT:

Azden SDX-316
This is the rounder style speaker mic that fits nicely in
the palm of your hand. Has 3.5 mm and 2.5 mm plugs for
Azden, Icom, some Yaesu, and others. It works great, and
looks great also. $20

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the battery
of the Azden PCS-300, 2 meter HT, outside of the HT itself.
Usually, one must have the battery inside the HT, but this
lets you charge a second battery outside of the HT. The
original charger is used. If you have a PCS-300 HT, you
need this adapter.
It works fine, and looks like new. $3

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood BH-2 for Kenwood TH-21 / 31 / 41 series HTs
Kenwood TR-2400
Motorola
Yaesu FT-207

Wrist Straps for various HTs - $4 each
Kenwood TR-2400
Yaesu FT-209

Service Manuals:

These are original service manuals in extremely good condition.

Service manual for Kenwood TH-21 series HTs (2 meter), plus most
accessories for this series HT $20

Service manuals for Kenwood TH-41, 440 MHz HT, plus most
accessories $20

Service manual for Kenwood TW-4000 dual bander $20

Service Manual for Kenwood TR-2600, 2 meter HT $15

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a service
pack. It has schematics, circuit explanations, voltages, etc. $18

Communications Speaker
This 4 inch square speaker is optimized for communications

frequencies (300 to 3000 Hz). It is a Realistic Radio Shack speaker in a black enclosure, and is an 8 ohm speaker. It has a cord with a 1/8 inch (3.5 mm) mono plug on the end. This one works fine and looks OK also. $15

3 pin mic plug
This is the small 3 pin mic plug that fits the Drake TR-22 mic jack. It is much smaller than most of the mic connectors. I thought these were completely gone, but one appeared from a silent key. This one has been used, but should still be usable some more. $12

Coax Cable with Type "N" Connectors
This cable is made of RG-8 coax and is about 6 feet long. It has a male type "N" connector on each end. $15

Kenwood MB-4000 Mobile Bracket
This mobile bracket is made to be used with the Kenwood TW-4000 dual band transceiver, and possibly other rigs as well.
This one is in good shape, with the paper work and hardware. $15

AEA Power Supply
AEA AC-1
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive, so it can be used on many different things that require 12 V DC at up to an amp, such as keyers, antenna tuners, etc. $15

Coax connectors and adapters:
Prices are per connector. Several of each are available. These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Crystals for 2 meter ham rigs:

Does anyone have an older two meter ham rig and need crystals?

Maybe I can help. I have some 2 meter crystals available -- both
transmit and receive. Most are in the 146 and 147 MHz band segments,
with very, very few in the 145 MHz segment, and none in the 144 MHz
segment. These are for ham rigs only, and not commercial rigs.

These are all the small HC-25 crystals, like are used in most
of the solid state 2 meter mobiles and HTs. Please e-mail
the operating frequency you need. I have them listed by
operating frequency and rig, and not by actual xtal frequency.
Send the frequencies you need (transmit or receive), and
the rig that you have, and I will see if I can help. I have
cross references for the various rigs, so I will know what
you need if you give the rig. Crystals are $6 each.

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

FS: Shure 51 "Rockabilly Mic"
Customized as a desk mic with included base. Will also
include a cable with 1/4 or 1/8 plug installed, or you
install the correct plug to match your equipment.
This is the same mic in original form:
http://bluesmics.com/zencart/index.php?main_page=product_info&products_id=6
Element looks good on a scope, otherwise untested.
More pictures are available on request.
Asking $75. including USPS Priority Mail in USA.

5575. TM-D710A - clean - FOR SALE by original owner

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-03-06 22:12:05 UTC
From: m)O(
Topic: 5575 Message: 5575

I was relocated to an area not having APRS coverage, and so don't need this much radio. Unit has never been mobile mounted, and was set up at my home desk for a brief period. It has been boxed up up until now.

Whole system, including radio head is in excellent condition with no scratches, dents, or any other signs of abuse. It operates flawlessly as well.

Comes with:
Original box
Original cabling, including USB cable
Owners' Manual (original hard copy)
Owners' Manual on CD (extended operators information + PC software)

and all other accessories originally included in kit.

Excellent for ARES & MARS use. Nice packet radio/TNC/APRS unit. The control head is detached and comes with remote cable for easy installation.

$ 500.oo firm + actual insured shipping cost to your location.

Please email for jpgs and to ask questions.

The TM-VD710A is a true dual-band operation radio so VHF+VHF/VHF+UHF/UHF+UHF operation is possible.

General Features
☐ High RF Power Output (50W)
☐ 1,000 Multifunction Memory Channels
☐ Dual Receive on Same Band (VxV, UxU)
☐ EchoLink® MEMORY (Automatic Dialer)
☐ EchoLink® Sysop Mode For Node Terminal Operation
☐ Multiple Scan
☐ Invertible Front Panel
☐ Choice of 2 Backlight Colors (AMBER/GREEN) For The LCD Panel
☐ 104-Code Digital Code Squelch
☐ "FIVE-IN-ONE" Programmable Memory

5576. FS: Parts that may be of some use in Amplifiers

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-03-06 20:20:41 UTC
From: Radio WC6W
Topic: 5163 Message: 5576

1N2804A -- 6.8V 50 Watt Zener Diodes, TO-3 case, NOS -- $10 each

More Semiconductors may be seen at:

http://wc6w.50webs.com/wc6wfsw/index.html?fr20.html

********** Transformers **********

Powerstat 10B 120 volt, 1.75 amp, Variac, used good condition with dial & knob.

Stancor Transformers

P-6308 107/117V Primary 50/60 Hz -- 6.3 VCT @ 10A Secondary, Used -- $20

F-106 115/230V Primary 50/60 Hz -- 10 VCT @ 6.5A Secondary, S case Used $20

F-610 115/230V Primary 50/60 Hz -- 6.3 VCT @ 10A Secondary, S case Used $20

Triad Transformers -- 115V 60CPS Primary

F21A 6.3VCT @ 10A Secondary, Used -- $20

F28U 6.3/7.5 VCT @ 25A Secondary, NOS -- $40

More Transformers may be seen at:

http://wc6w.50webs.com/wc6wfsw/index.html?fr36.html

********** Capacitors **********

Cardwell -- XR-1000HS (about 950pF max measured) These have slightly contoured plates for improved tuning resolution at minimum C. .030 air gap. About 4.5" x 4" x 3.5" overall including plate travel. Used, Good condition. $20 ea.

National Type TMC-300, 300pF variable capacitor, .070" air gap, approx. 8" X 4" x 2.5" with plates closed. Nice n' shiny like new! $40

Sprague 3600pF @ 30KV Doorknob capacitor. Red epoxy encased style -- $25

More Capacitors may be seen at:

http://wc6w.50webs.com/wc6wfsw/index.html?fr34.html

********** Coils **********

28uH Roller Coil, 42 Turns #12, a skosh over 2" in diameter, 8 TPI, 3" x3" x 7" overall plus 3" shaft. Fiberglass coil supports. I think that this is the coil employed in the MFJ-989 antenna tuner. Excellent condition. $50

Toroidal Tank coil -- The core is fiberglass & resin encased. It is currently wound with 20 turns of #12 wire. There are notches in the form for up to 40 turns. It is a bit over 4 inches in diameter and about 1-3/4" thick. This was made by Bob, W6YUY. See his article in August 1985 Ham Radio magazine "Design a Toroidal Tank Circuit for you Vacuum Tube Amplifier". $50

More coils may be seen at:

http://wc6w.50webs.com/wc6wfsw/index.html?fr35.html

********** Tube Sockets **********

Eimac -- Databook set circa 1985 in two large yellow Eimac 3 ring binders. Includes data sheets from 1976 edition and earlier. Very good condition. $200

Eimac HR-8 plate dissipator used, a mite tarnished $10

Eimac HR-6 plate dissipators used, tarnished, pair $10

Eimac SK-620 sockets, "unused" pair. One is a SK-620; the other a SK-620A. Probably 40 years old, a bit tarnished from storage, and unused except the heater pins on one were once soldered... probably to check some tubes. $60 for the pair.

Johnson 122-101 ceramic septar 7 pin socket (accepts 826, 832, 4D32, PL6549, PL6569, etc). These were likely a special order as they have the standard ground shield but, no ground clips. NOS though, a bit dusty & tarnished from long storage -- $10ea

Johnson 122-237 ceramic 7 pin giant socket for 813, etc. NOS, $15

Johnson 122-248 ceramic 7 pin septar socket (accepts 7094, 8877, 832A), with base ring & ceramic spring retained (parallel) plate bar for 832A. Used, good condition. $10

Johnson 124-115-2 UHF socket similar to Eimac SK-620. NOS, but, a mite tarnished from age. $40

More sockets and some tubes may be seen at:

http://wc6w.50webs.com/wc6wfsw/index.html?fr41.html

********** Connectors -- All NOS , US manufacture **********

Amphenol MHV connectors -- Two 28100 right angle cable males & two 27025 panel mount females. -- $40 all.

UG-932 A/U MHV Male Cable connectors -- $10 ea

UG-961 A/U MHV Female Panel connector -- $12

UG-560/U HN Female panel mount connector -- $15 ea

UG-30C/U N Female-Female Bulkhead Connector -- $10 ea

More connectors may be seen at:

http://wc6w.50webs.com/wc6wfsw/index.html?fr44.html

********** Miscellaneous **********

Synchro Transmitters -- IMC Magnetics, Model 008-216, 26V 400Hz, .75" diameter housing, .120" dia. shaft, flying leads. These will drive a typical Radio Compass Indicator. NOS. $20 ea.

Water cooled heatsinks -- 12" x 8" used, drilled for a flock of TO-3's plus a few diodes. Back is flat. 3/8" water lines. $50 pair

ILG Electric Ventilation -- 17-18-022A squirrel cage type fan. Encased motor with 181-009-EA fan 115/230 VAC 1.6A/.8A 50/60Hz 3000 RPM 4+" round intake, 3+" x 4-3/4" rectangular output flange, weighs 25 lbs. used -- $25

****

And of course some meters, panel meter, time meters & RF ammeters, please see:

http://wc6w.50webs.com/wc6wfsw/index.html?fr32.html

****

73 & Good morning,
Marv WC6W

1.I have for sale a near new Alinco DR-135T MKII used for about 1 week with all that it came with in the box. The wife got me a new dual band radio so this one is excess to my needs.. Still has the plastic over the screen.. Never mobile . Bought 11/06/09 . Asking $110.00 plus shipping

2. Diamond SX20c HF/VHF SWR/Power meter.. Its the cross needle style with 30/300 watt settings.. It does have 2 small holes on the bottom where it was used to mount it.. In no way affects how it works..
Will sell for $35.00 shipped..

3. MFJ-260B 300 Watt dry dummy load. Works and looks great.. Asking $35.00 plus shipping.

I am selling in hope to get some money to try to help buy a 1KW tuner.. The wife just got me a near new 811H with new 572 tubes..

Date: 2010-03-15 12:33:47 UTC
From: Bob
Topic: 5592 Message: 5592

I'm looking for a radio I can use as an echolink link station mainly. But what I need to be able to do is cause the radio to go from the simplex link to connecting to a repeater for our county skywarn. What we're trying to do is connect 2 repeaters via echolink. Since I'm not always at home sitting in front of the station I need to be able to do this remotely via DTMF and do it on the CHEAP since it's out of my pocket and not the county's.

Anyone have a suggestion on a radio that will do this or have one that they want to sell?
Thanks,
Bob

From: sarge43@att.net
Topic: 5598 Message: 5598

I'm looking for Gordon West Technician Class Tapes and work book.

I have a friend who wants to be a ham operator so bad. Problem is he struggles with dyslexia and reading comprehension.

Here is a 20 year old guy that you can hand a dual band radio to that he has never seen before and he can program it for you in about an hour. Same way with a scanner or what have you. But reading and or writing is a road block.

He is very helpful and he wants to get his Tech lic.

He can learn by listening to tapes and such and then we can have him tested verbally.

If someone has the tapes or something that they'd sell cheap, I'll buy it for him myself.

Thanks,
Sarge W5SRG

Subject: [Marc-list] Item For Sale
Date: Mon, 22 Mar 2010 12:36:32 -0500
From: Lew Nyman <lnyman@...>
To: MARC list marc-list@...

I am selling a Yaesu HF amplifier if anyone is interested. It's a model FL-2100B and is the same model that the club shack has. It's rated at 1200 watts PEP, 1000 watts CW and 600 watts AM. Because of its age doesn't cover the WARC bands. Otherwise it covers 80-10 meters. It's in good working order and in nice condition. In fact it has a new pair of 572B's finals. I thought I would be installing it in my ham shack, but it needs either 220 volts or a separate 120 volt circuit since it draws 18 amps at 120 volts. It's built like a tank. It weighs 41 lbs. I'm asking only $395 firm for it. I have the manual also. If interested call me at 354-1933 or email me at K1AZE@....

5608. 2 meter multimode, power supplies, mics, and many other ham items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-03-27 23:15:21 UTC
From: Ken Simpson, W8EK
Topic: 5608 Message: 5608

Many Ham Items For Sale
Multimode 2 meter transceiver, Power Supplies, SWR Bridge,
Microphones (Hand Mics, DTMF Touch Tone Mics, Speaker Mics),
Communication Speaker, CW Paddles, Low Pass TVI Filters,

Kenwood TR-9130 Multimode 2 meter transceiver:

The Kenwood TR-9130 2 meter multimode transceiver provides 2
meter operation in FM, LSB, USB and CW modes. Power output may
be selected at 5 watts (FM/CW) or 25 watts (FM/SSB/CW). It
includes an RF gain, RIT, analog S/RF meter, noise blanker,
dual VFOs, all-mode squelch and memories. Both memory scan
and band scan are supported. It requires 13 VDC at about 5.5
amps.

This particular unit works fine and looks extremely nice. It
includes the mobile mounting bracket with hardware, DC cord,
chrome bail, and touch tone DTMF hand mic, all in the original
box. It even has the multi-color, multi-page sales brochure
with it, and a bag of hardware that came with it originally.

With paper work for $230.

TenTec Power Supplies:

TenTec Model 280 power supply, 20 amps at 13 V DC.
This supply is quite heavy duty electrically.
It has 2 pass transistors, instead of the one that
some have. It also has an ammeter on it.
This one works fine, and looks OK as well.
A previous owner removed the molded in TenTec power
cable on the back and added very heavy binding posts,
so that it can be used with many different rigs and
not just TenTec. It also has a couple RCA jacks for
lower power use.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is very quiet, and well
shielded, and does not produce any electrical noise that
I could find. $150

AEA Power Supply:
AEA AC-1
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive,
so it can be used on many different things that require
12 V DC at up to an amp, such as keyers, antenna tuners,
etc. $15

Vanco SWR-1 SWR Bridge and Field Strength Meter
Covers from 3.5 thru 150 MHz with 5% accuracy, according to the
specs on the box, and is 6 inches by 2 inches by 2 7/8 inches
in size. If you need an SWR bridge that will cover both the
HF bands, plus 6 meters and 2 meters, this is it.
This particular meter works fine, and is in its original box,
complete with original instructions, and wrapped in its bubble
pack. $25

Microphones:

All of these microphones have been tested and work well.

Johnson Hi Z Hand Microphone
This high impedance hand mic is a gray color, with the
Johnson logo with the Viking on it. It has a PTT switch and
coiled cord, and produces a nice pattern on the scope. It
looks very nice also. $30

Generic Hi Z Hand Microphone
This hand mic is black in color, and looks like it might
have come from a HyGain rig. It has a PTT switch and black
coiled cord. $25

Shure 401 B, Low Z Hand Microphone
This mic has characteristics similar the the Shure 444
Desk Mic, but this one is a hand mic. It is a controlled
magnetic mic, with frequency response tailored for voice
communications. It has a rugged case, and a heavy duty
coiled cord. 4 pin connector. With paper work for $40.

Shure 104 C, Low Z hand Microphone
This is a very heavy duty Shure mic. It appears to be new,
with stripped and tinned ends that have never been on a
connector. It is in its original box, with the original
instruction manual. $30

Chrome Low Z Hand Microphone
This mic is chrome plated. My memory says it may have come
from a Polycom rig. The mic is a good solid metal case with
chrome plating all around, with a black PTT switch and black
coiled cord. There are some pits on the chrome; it works
fine. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color.
With 4 pin connector. $25
With no connector. $22

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed. Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

KDK DM TT-1 DTMF Touch Tone Microphone
This mic has a 12 digit touch tone pad on it, along with a switch to turn the pad on and off. I presently has a 4 pin plug on it, and can be used on most any rig. It works fine, and looks great. $35

CES 655 L "Microdialer" DTMF Microphone
You can manual dial a number, or automatically have it stored in the mic, and "speed dial" with this mic. 12 digit touch tone pad on the front, with the microphone part above the pad. This one presently has a 4 pin plug on it, but of course that can be changed. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with a low impedance microphone. This one has the 8 pin modular plug (like a computer LAN) on it. This mic has not been used, so it is in really great condition.
With paper work for $40.

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a normal low impedance microphone. With 4 pin plug.
Like new. $38

Speaker Microphones:

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. $15

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. $ 20

Communications Speaker
This 4 inch square speaker is optimized for communications frequencies (300 to 3000 Hz). It is in a black enclosure, and is an 8 ohm speaker. It has a cord with a 1/8 inch (3.5 mm) mono plug on the end.
This one works fine and looks OK also. $15

Kenwood MB-4000 Mobile Bracket
This mobile bracket is made to be used with the Kenwood TW-4000 dual band transceiver, and possibly other rigs as well.
This one is in good shape, with the paper work and hardware. $15

ParaDynamics PDC-5 Wattmeter
This unit has a wattmeter with scales of 100 W, 10 W, and 1 W. It has an SWR Bridge built in, with an antenna tuner. It was obviously made for 11 meter use, but it works well on other frequencies. The tuner portion works fine on 10 m, 12 m, and 15 m. The wattmeter seems accurate from 20 meters thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal for portable use.
The wattmeter and antenna tuner portion work fine, however, the SWR portion of this unit is inoperative. It looks fine. $12

CW Items:

Vibroplex Brass Racer Triangular Iambic Paddle

The Brass Racer Paddles are unique in that there are no springs in the design. Tension on the paddle is infinitely adjustable by the use of magnets. It is a convenient, space saving portable keyer paddle unit crafted from solid brass with a lacquer coated brushed finish mounted on a hardwood base. Designed for use with an external keyer or a keyer built into the radio. It has a long shielded cord with a 1/4 inch stereo plug. It works fine and looks good. $100

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it, as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

B & W 377 Coaxial Antenna Relay:

I had never seen one of these before. Most of us are familiar with the Dow Key Antenna relays that many of us used 40 or 50

years ago. This unit serves the same function, but is somewhat unique.

The B & W 377 is housed in a hexagon box. It has three SO-239 connectors coming out three of the sides, a length of wire on one side that goes to the coil of the relay, and two sides that are blank.

The coil is rated to work on 48 to 130 volts AC. The original single page instruction sheet says that it is a unique relay design permitting this large variation in voltage. It is good to 150 MHz, and will handle 2000 Watts PEP, or 1000 watts continuous.

It appears that this unit has never been used. It has the original instruction sheet, and original box. The unit itself does not appear to have been used, and looks perfect. $75

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted in the coax line after the transmitter or transceiver) to reduce harmonic interference.

Bencher YA-1, high power, low pass TVI filter
If you need a more heavy duty filter for the output of your amplifier, this one is ideal. It will take full legal power plus, and has at least 80 db signal attenuation at TV channel 2.
It is also in a very sturdy metal case with SO-239 connectors on each end, and is a 50 ohm filter.
This one works great, and looks close to new. Someone added some felt to the bottom, so that it protects better. It is in its original box, with paper work. Bencher currently sells these for about $90. This one is only $65.

B & W FL-10/1500 (Also known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters, and will handle 1500 Watts. SO-239 connector on each end. This is the latest model B & W filter. It is in very nice condition; it looks very close to new. With paper work $40.

Drake TV-5200-LP
This is the more modern version of the Drake TV-1000 Low Pass Filter. This is the filter that may also be used on the low end of six meters, as well as HF. It is good for 1000 Watts average below 30 MHz, and about 200 W up to 52 MHz. It works fine, and is in very nice shape. $35

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter and antenna, and has been optimized to have more attenuation

in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work. $30

Hustler HF mobile resonators:
All work fine and are in good cosmetic condition.

"Super" high power resonators (good for 2 KW PEP):
80 meter RM-80 S
can be cut for CW or phone, and also used on a 4BTV
Vertical to give 80/75 meter coverage
(basically make it into a 5BTV) $38

Coax Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Antenna adapter for Kenwood TH-21/31/41 HTs
Adapts the antenna connector found on these HTs to a
standard PL-259 connector. $6

Prices do not include shipping from Florida.

Thanks.

5612. Antennas and related items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-04-02 14:54:21 UTC
From: Ken Simpson, W8EK
Topic: 5416 Message: 5612

Antennas and related items for sale:

B & W 377 Coaxial Antenna Relay:

I had never seen one of these before. Most of us are familiar with the Dow Key Antenna relays that many of us used 40 or 50 years ago. This unit serves the same function, but is somewhat unique.

The B & W 377 is housed in a hexagon box. It has three SO-239 connectors coming out three of the sides, a length of wire on one side that goes to the coil of the relay, and two sides that are blank.

The coil is rated to work on 48 to 130 volts AC. The original single page instruction sheet says that it is a unique relay design permitting this large variation in voltage. It is good to 150 MHz, and will handle 2000 Watts PEP, or 1000 watts continuous.

It appears that this unit has never been used. It has the original instruction sheet, and original box. The unit itself does not appear to have been used, and looks perfect. $75

Larsen VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on the 70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $9

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount, and others. It can be cut for 2 meters, 220 MHz, or 450 MHz bands. $8

Trunk Lip Mount with 5/16 inch stud
Ideal for use with the "Q" above, or any other antenna that requires a 5/16 inch stud. Very nice for $18.

Avanti "On Glass" antenna for 440 MHz:

This antenna was made by Avanti to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Hustler MOS Monitor Antenna:
The Hustler MOS monitor antenna is for use on indoor scanners.
It features a suction cup to hold it to the top of the table.
A Motorola type connector can be moved up and down the antenna
so that it is just the right height to plug directly in to
your scanner.
Basically, this antenna will attach to the table behind your
desktop scanner, out of the way, but will provide a significant
amount of gain over the internal antenna.
This particular antenna works fine, and looks very close to new.
$20

Hustler HF mobile resonators:
All work fine and are in good cosmetic condition.

"Super" high power resonators (good for 2 KW PEP):
80 meter RM-80 S
can be cut for CW or phone, and also used on a 4BTV
Vertical to give 80/75 meter coverage
(basically make it into a 5BTV) $38

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

Bencher YA-1, high power, low pass TVI filter
If you need a really heavy duty filter for the output of
your amplifier, this one is ideal. It will take full legal
power plus much more, and has at least 80 db signal
attenuation at TV channel 2.
It is in a very sturdy metal case with SO-239 connectors
on each end, and is a 50 ohm filter.
This one works great, and looks very close to new. It has felt
on the bottom, so that it protects better. It is in its original
box, with paper work.
Bencher currently sells these for about $90. This one is only
$65

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter and antenna, and has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. It is good for 1000 Watts "average" according to the manual, and has over 80 db attenuation at 41 MHz. This one looks great, and includes the paper work. $30

B & W FL-10/1500 (Also known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters, and will handle 1500 Watts. SO-239 connector on each end. This is the latest model B & W filter. It is in very nice condition; it looks very close to new. With paper work $40.

Drake TV-5200-LP
This is the more modern version of the Drake TV-1000 Low Pass Filter. This is the filter that may also be used on the low end of six meters, as well as HF. It is good for 1000 Watts average below 30 MHz, and about 200 W up to 52 MHz. It works fine, and is in very nice shape. $35

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC Regular length, 6 1/2 inches long
BNC, Original antenna from Kenwood TH-215
Alinco Stubby w/BNC Connector, 4.6 inches long

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

BNC Stubby for 440 MHz, 3 inches long

ParaDynamics PDC-5 Wattmeter
This unit has a wattmeter with scales of 100 W, 10 W, and 1 W. It has an SWR Bridge built in, with an antenna tuner. It was obviously made for 11 meter use, but it works well on other frequencies. The tuner portion works fine on 10 m, 12 m, and 15 m. The wattmeter seems accurate from 20 meters thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal for portable use.

The wattmeter and antenna tuner portion work fine, however,
the SWR portion of this unit is inoperative. It looks fine. $12

Coax Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Antenna adapter for Kenwood TH-21/31/41 HTs
Adapts the antenna connector found on these HTs to a
standard PL-259 connector. $6

Prices do not include shipping from Florida.

Thanks.

5614. FS - Surface Mount Capacitor Kit

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-04-03 21:07:00 UTC
From: n8oep_mike
Topic: 5614 Message: 5614

Kit consists of MLC Chip Capacitors (350 of them) (0603) - C1608 - (kit from TDK)

These are tiny... 0.063 X 0.031 inches -

10 each of the following TDK surface mount capacitors
(all val's in pF).

50VDC <6800pF
25VDC 10000pF-47000pF
16VDC 100000pF-330000pF

0.5 10 100 1000 10000 100000
1 12 120 2200 22000 220000
2 15 180 3300 47000 330000
3 18 220 4700
5 22 330 6800
7 27 470
8 33 680
9 47
68

They are in 10 unit strips in a standard 10 page six slot, 4X6" plastic binder with engineering notes.

Please make me an offer, (shipped from 48331, add $2 for USPS shipping to con. US and indicate your method of payment cash,check,paypal etc).

Mike - N8OEP

Yes I'll take a buck or two over the shipping cost.

5624. Icom T90A HT w/Accessories For Sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-04-06 07:38:59 UTC
From: Warren
Topic: 5624 Message: 5624

I have for sale an Icom IC-T90A HT for sale. It operates on 6m, 2m, and 70cm with no problems at all. Cosmetically it is a 9 out of 10. Accessories include rubber duck antenna with tips that allow operation on all 3 bands, 2 7.4v/1600 mAh batteries from Batteries America, wall wart charger and cigarette lighter charger.

I rarely use this radio anymore so I need to clear it out of the shack. $235 gets you the whole package. PayPal is preferred, but I will accept a postal money order.

5625. WTB: AMP

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-04-06 14:54:34 UTC
From: kd8dvy@ymail.com
Topic: 5625 Message: 5625

Hello all I know this is not really an amp cause amps are 500w or more but I am looking for an amp that only puts out 100-250w max on all HF bands. 80-10 is good but if I can get one that goes down up to 50mhz would be nice but once again not necessary.

I would like to spend no more that $150 with shipping to GA.

If anyone has such an amp or know where I can purchase one please email me at KD8DVY@... or contact me direct, I am good on QRZ.

Thanks
Harold/KD8DVY

5626. MFJ-259B Antenna Analyzer

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-04-06 19:20:14 UTC
From: Dick Merryman
Topic: 5626 Message: 5626

This is a dear old friend that died an untimely death and was returned to MFJ for repair. Upon its return to me I was so excited to renew our friendship that I inadvertently grabbed a 12VAC wall wart instead of 12VDC. The results were memorable: a flash of light, a loud pop and smoke.

Today I opened it up and found that diode D-9 had exploded. There is no other evidence of burning or damage. D-9 is a $0.30 surface mount device that needs younger eyes than mine to replace. There may also be other damage. Or not.

So, for the adventurous technician I offer an inoperative MFJ-259B in it's original box with original manual for $50 plus shipping. I'll even throw in a file containing the schematic and service manual that I downloaded from the Internet.

This may be a great deal. Or not.

5628. W2IHY 8 band EQ and noise gate for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-04-06 20:16:32 UTC
From: John Miller
Topic: 5628 Message: 5628

I have for sale a w2ihy 8 band EQ and noise gate for sale. It's a year old with very low use. I'll also include the Kenwood 8 pin cable, audio tecnica atr30A mic, and XLR cable to connect the 2. Sounded great on my TS-2000 but I need to scale back now. Of course the wall wart plug is included and if I can find it a cable to connect the mic direct to the radio. Asking $220 plus shipping, or best offer. paypal preferred.

5632. Power Supplies, Microphones, Speaker, Filters, and more FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-04-10 13:59:25 UTC
From: Ken Simpson, W8EK
Topic: 5632 Message: 5632

Many Ham Items For Sale
Power Supplies, Microphones (Hand Mics, DTMF Touch Tone Mics, Speaker Mics), Communication Speaker, Low Pass TVI Filters, and more

10 amp Motorola NPN1007A Power Supply
This supply looks like an Astron! Same color paint, same styling, etc. In fact I thought it was an Astron until I read the Motorola name tag.
This one works 100%, and looks very close to new. I can not find a scratch on it. $40

TenTec Power Supplies:

TenTec Model 280 power supply, 20 amps at 13 V DC.
This supply is quite heavy duty electrically.
It has 2 pass transistors, instead of the one that some have. It also has an ammeter on it.
This one works fine, and looks OK as well.
A previous owner removed the molded in TenTec power cable on the back and added very heavy binding posts, so that it can be used with many different rigs and not just TenTec. It also has a couple RCA jacks for lower power use.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is very quiet, and well shielded, and does not produce any electrical noise that I could find. $150

AEA Power Supply:
AEA AC-1
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive, so it can be used on many different things that require 12 V DC at up to an amp, such as keyers, antenna tuners, etc. $15

Microphones:

All of these microphones have been tested and work well.

Johnson Hi Z Hand Microphone
This high impedance hand mic is a gray color, with the Johnson logo with the Viking on it. It has a PTT switch and coiled cord, and produces a nice pattern on the scope. It looks extremely nice also. No scratches, and it even shines! It presently has a 1/4 inch stereo plug on it, which of course can be changed. $30

Generic Hi Z Hand Microphone
This hand mic is black in color, and looks like it might have come from a HyGain rig. It has a PTT switch and black coiled cord. $25

Shure 401 B, Low Z Hand Microphone
This mic has characteristics similar the the Shure 444 Desk Mic, but this one is a hand mic. It is a controlled magnetic mic, with frequency response tailored for voice communications. It has a rugged case, and a heavy duty coiled cord. 4 pin connector. With paper work for $40.

Shure 104 C, Low Z hand Microphone
This is a very heavy duty Shure mic. It appears to be new, with stripped and tinned ends that have never been on a connector. It is in its original box, with the original instruction manual. $30

Chrome Low Z Hand Microphone
This mic is chrome plated. My memory says it may have come from a Polycom rig. The mic is a good solid metal case with chrome plating all around, with a black PTT switch and black coiled cord. There are some pits on the chrome; it works fine. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color.
With 4 pin connector. $25
With no connector. $22

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed. Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

KDK DM TT-1 DTMF Touch Tone Microphone
This mic has a 12 digit touch tone pad on it, along with a switch to turn the pad on and off. I presently has a 4 pin plug on it, and can be used on most any rig. It works fine, and looks great. $35

CES 655 L "Microdialer" DTMF Microphone
You can manual dial a number, or automatically have it stored in the mic, and "speed dial" with this mic. 12 digit touch tone pad on the front, with the microphone part above the pad. This one presently has a 4 pin plug on it, but of course that can be changed. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with a low impedance microphone. This one has the 8 pin modular plug (like a computer LAN) on it. This mic has not been used, so it is in really great condition. With paper work for $40.

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a normal low impedance microphone. With 4 pin plug. Like new. $38

Speaker Microphones:

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. $15

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. $ 20

Communications Speaker
This 4 inch square speaker is optimized for communications frequencies (300 to 3000 Hz). It is in a black enclosure, and is an 8 ohm speaker. It has a cord with a 1/8 inch (3.5 mm) mono plug on the end.
This one works fine and looks OK also. $15

Kenwood MB-4000 Mobile Bracket
This mobile bracket is made to be used with the Kenwood TW-4000 dual band transceiver, and possibly other rigs as well.
This one is in good shape, with the paper work and hardware. $15

Mobile Bracket for Icom IC-27:
This mobile bracket fits the Icom IC-27, 37, 47, and that series of Icom rigs. This mount goes completely around

the rig, so it would work with most any other rig that
is about 5 1/2 inches wide and 1 1/2 inches high.
This one is in very nice, close to new condition. $20

ParaDynamics PDC-5 Wattmeter
This unit has a wattmeter with scales of 100 W, 10 W, and
1 W. It has an SWR Bridge built in, with an antenna tuner.
It was obviously made for 11 meter use, but it works well
on other frequencies. The tuner portion works fine on 10 m,
12 m, and 15 m. The wattmeter seems accurate from 20 meters
thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal
for portable use.
The wattmeter and antenna tuner portion work fine, however,
the SWR portion of this unit is inoperative. It looks fine. $12

CW Items:

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it,
as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector
on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

Bencher YA-1, high power, low pass TVI filter
If you need a more heavy duty filter for the output of
your amplifier, this one is ideal. It will take full legal
power plus, and has at least 80 db signal attenuation at
TV channel 2.
It is also in a very sturdy metal case with SO-239 connectors
on each end, and is a 50 ohm filter.
This one works great, and looks close to new. Someone added
some felt to the bottom, so that it protects better. It is in its
original box, with paper work. Bencher currently sells these
for about $90. This one is only $65.

B & W FL-10/1500 (Also known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. With paper work $40.

Drake TV-5200-LP
This is the more modern version of the Drake TV-1000 Low Pass Filter. This is the filter that may also be used on the low end of six meters, as well as HF. It is good for 1000 Watts average below 30 MHz, and about 200 W up to 52 MHz. It works fine, and is in very nice shape. $35

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter and antenna, and has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. It is good for 1000 Watts "average" according to the manual, and has over 80 db attenuation at 41 MHz. This one looks great, and includes the paper work. $30

Hustler HF mobile resonators:
All work fine and are in good cosmetic condition.

"Super" high power resonators (good for 2 KW PEP):
80 meter RM-80 S
can be cut for CW or phone, and also used on a 4BTV Vertical to give 80/75 meter coverage (basically make it into a 5BTV) $38

Coax Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long. It has a male type "N" connector on each end. $15

Coax connectors and adapters:
Prices are per connector. Several of each are available. These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male (PL-259) connection - $5

Antenna adapter for Kenwood TH-21/31/41 HTs
Adapts the antenna connector found on these HTs to a
standard PL-259 connector. $6

Prices do not include shipping from Florida.

Thanks.

FS: MFJ-925 HF Autotuner

Looks as-new and comes with original box and manual.

From MFJ:
"... automatic antenna tuner for any transceiver that
has an output power of 2-200 watts SSB/CW from 1.8-30 MHz
with antenna impedances from 6-1600 ohms. With more than
10,000 non-volatile VirtualAntennaTM Memories ... fast
automatic tuning of unbalanced or single-wire antennas."
http://www.mfjenterprises.com/Product.php?productid=MFJ-925

Manual: http://www.mfjenterprises.com/man/pdf/MFJ-925.pdf

Reviews here:
http://www.eham.net/reviews/detail/6838

$125. including standard USA shipping.

5645. FS: MFJ-941D HF Antenna Tuner & Switch & Meter

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-04-16 14:53:43 UTC
From: kd4e
Topic: 5645 Message: 5645

FS: MFJ-941D HF Antenna Tuner & Switch & Meter

This is an amazing multi-purpose tuner.

It does an excellent job of tuning a variety of
antennas 160-10M, plus it provides average and
peak reading metering, plus it provides switching
between six selections. Handles up to 300w.

Looks good, works fine, includes the manual.

$75. including shipping to standard USA locations.

5660. FS: MFJ-986 Differential-T 3 KW roller inductor tuner

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-04-22 02:45:31 UTC
From: kd4e
Topic: 5660 Message: 5660

FS: MFJ-986 Differential-T 3 KW roller inductor tuner

* RANGE: 1.8 ~ 30MHz (including MARS and WARC bands)
* Handles 3KW PEP SSB amplifier input power
* AirCore Roller Inductor
* 3-digit turns counter, plus a spinner knob for precise tunning
* Cross-Needle meter for SWR, forward and reflected power
(reads peak or average power on 2000 or 200 Watt ranges)
* 6-position antenna switch
* TrueCurrentBalun for balanced lines
* Ceramic feedthru insulators for balanced lines
* Single differential capacitor
* Roller inductor
* Simple 2-knob tuning

This is a working-but-needs-a-little TLC tuner.

The Inductance counter "dial string" needs to be replaced,
the spinner knob has been replaced with a larger one, the
clear plastic counter "window" is not original, and the
roller inductor feels a little loose. The cover must have
been lost in an estate or a move as the one that came with
was not original. I've been using it here at 100W as I do
not have an amp (I bought it when I hoped to have one).

As-Is Needs TLC $115. including standard USA shipping.

Topic: 5668 Message: 5668

I have for sale a 6 pin molex power cord used on most Kenwood, Icom, and Yaesu HF radios (as well as the Alinco DX70 and DX77). It doesn't contain in-line fuses or fuse holders, but you can add those yourself. I am asking $15 shipped for it.

73s John AA5JG

5669. Audio Filter, SWR Bridge, Keyer and much more FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-04-24 20:42:20 UTC
From: Ken Simpson, W8EK
Topic: 5669 Message: 5669

Many Ham Items For Sale
Audio Filter, SWR Bridge, Keyer, Power Supplies, Microphones
(Hand Mics, DTMF Touch Tone Mics, Speaker Mics),
Communications Speaker, Low Pass TVI Filters, etc.

Autek QF-1 A, Active Audio Filter

This is an audio filter that goes between your rig and speaker.
It runs off of 110 V AC, and will peak, notch, or become a low
pass or high pass filter. Selectivity (bandwidth) and frequency
are adjustable from the front panel. This is the "A" model that
also has an additional notch filter added. The input is an 1/4 inch
phone plug, and the output is a 1/4 inch jack on the rear panel.

This particular unit looks very, very nice, and works 100%.
With paper work for $55.

Dual Meter SWR Bridge

This meter is a Siltronics / Swan SWR-2. Back in the 1970's and
80's, this meter was relabeled by many different manufacturers
with their own label, but is basically the same meter that was
made in Japan. It has two separate meters -- one for forward
power and one for reading the SWR. It works from 160 thru 2
meters, so is useful on most any frequency you would want.
The SWR-2 has SO-239 connectors on each end. It differs
from the SWR-1 that had the connectors on the back.

This particular meter works fine. Cosmetically the forward
power meter lens has a crack in it. The SWR meter is fine.
Since it is only necessary to set the forward meter to full
scale, this really does not detract from its usefulness.

With paper work for $18.

CW Items:

MFJ 422 C electronic keyer
This keyer uses the Curtis chip, and includes sidetone, has
adjustments for volume, tone frequency, and weighting, as well
as speed. It will key either positive or negative voltages,
and is powered by an internal 9 V battery, or external 5 to
9 volt supply. It is made to go on the back of a Bencher
Paddle. It works 100%, and looks great also. With paper
work for $45.

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it,
as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector
on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

Power Supplies:

10 amp Motorola NPN1007A Power Supply
This supply looks like an Astron! Same color paint, same
styling, etc. In fact I thought it was an Astron until I
read the Motorola name tag.
This one works 100%, and looks very close to new. I can not
find a scratch on it. $40

TenTec Model 280 power supply, 20 amps at 13 V DC.
This supply is quite heavy duty electrically.
It has 2 pass transistors, instead of the one that
some have. It also has an ammeter on it.
This one works fine, and looks OK as well.
A previous owner removed the molded in TenTec power
cable on the back and added very heavy binding posts,
so that it can be used with many different rigs and
not just TenTec. It also has a couple RCA jacks for
lower power use.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is very quiet, and well
shielded, and does not produce any electrical noise that
I could find. $150

AEA AC-1
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive,
so it can be used on many different things that require
12 V DC at up to an amp, such as keyers, antenna tuners,
etc. $15

Microphones:

All of these microphones have been tested and work well.

Johnson Hi Z Hand Microphone
This high impedance hand mic is a gray color, with the Johnson logo with the Viking on it. It has a PTT switch and coiled cord, and produces a nice pattern on the scope. It looks very nice also. $30

Generic Hi Z Hand Microphone
This hand mic is black in color, and looks like it might have come from a HyGain rig. It has a PTT switch and black coiled cord. $25

Shure 401 B, Low Z Hand Microphone
This mic has characteristics similar the the Shure 444 Desk Mic, but this one is a hand mic. It is a controlled magnetic mic, with frequency response tailored for voice communications. It has a rugged case, and a heavy duty coiled cord. 4 pin connector. With paper work for $40.

Shure 104 C, Low Z hand Microphone
This is a very heavy duty Shure mic. It appears to be new, with stripped and tinned ends that have never been on a connector. It is in its original box, with the original instruction manual. $30

Chrome Low Z Hand Microphone
This mic is chrome plated. My memory says it may have come from a Polycom rig. The mic is a good solid metal case with chrome plating all around, with a black PTT switch and black coiled cord. There are some pits on the chrome; it works fine. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color.
With 4 pin connector. $25
With no connector. $22

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed. Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. Looks to be unused. $40

KDK DM TT-1 DTMF Touch Tone Mic
This mic has a 12 digit touch tone pad on it, with a switch to turn the pad on and off. With 4 pin plug.
It works fine, and looks great. $35

Data Signal "Data-Coder 5" Touch Tone Mic
This mic has a 12 digit touch tone pad on it, plus a normal

low impedance microphone. With 4 pin plug. Like new. $38

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the mic, and "speed dial". 12 digit touch tone pad on the front, with the microphone part above the pad. With an 8 pin modular plug (like a computer LAN) on it, which can be changed.
Looks to be new. $40

Speaker Microphones:

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. $15

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. $ 20

Communications Speaker
This 4 inch square speaker is optimized for communications frequencies (300 to 3000 Hz). It is in a black enclosure, and is an 8 ohm speaker. It has a cord with a 1/8 inch (3.5 mm) mono plug on the end.
This one works fine and looks OK also. $15

Kenwood MB-4000 Mobile Bracket
This mobile bracket is made to be used with the Kenwood TW-4000 dual band transceiver, and possibly other rigs as well.
This one is in good shape, with the paper work and hardware. $15

ParaDynamics PDC-5 Wattmeter
This unit has a wattmeter with scales of 100 W, 10 W, and 1 W. It has an SWR Bridge built in, with an antenna tuner. It was obviously made for 11 meter use, but it works well on other frequencies. The tuner portion works fine on 10 m, 12 m, and 15 m. The wattmeter seems accurate from 20 meters thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal for portable use.
The wattmeter and antenna tuner portion work fine, however, the SWR portion of this unit is inoperative. It looks fine. $12

Phone Patch / Digital Interface:

Heath HD-15 Phone Patch
This is the unit with the VU meter on the left and 3 knobs that match the SB series to the middle and right. Low or high Z output to the transmitter. It can also be used as an interface to the computer for PSK31, etc. It is in great shape. Paper work included for $25.

Waters "Universal Hybrid Coupler II" Model 3002

Most of us would likely call this a phone patch, but it is really much more than that. It does that, but also will interface with a tape recorder, and permit recording and play back of on-the-air QSOs. Nothing says that the tape recorder input must be used that way. Connect the sound card in your computer in this position, and you have a very effective interface.

Model 3002 includes a speech compressor powered by a 9 volt battery. The front panel is finished on both sides, with one side having it set in a horizontal position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted in the coax line after the transmitter or transceiver) to reduce harmonic interference.

B & W FL-10/1500 (Also known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters, and will handle 1500 Watts. SO-239 connector on each end. This is the latest model B & W filter. It is in very nice condition; it looks very close to new. With paper work $40.

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter and antenna, and has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. It is good for 1000 Watts "average" according to the manual, and has over 80 db attenuation at 41 MHz. This one looks great, and includes the paper work. $30

Coax Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long. It has a male type "N" connector on each end. $15

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Antenna adapter for Kenwood TH-21/31/41 HTs
Adapts the antenna connector found on these HTs to a
standard PL-259 connector. $6

Prices do not include shipping from Florida.

Thanks.

5670. FS: DRAKE ML-2 Hybrid 2M Mobile

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-04-24 23:21:40 UTC
From: kd4e
Topic: 5670 Message: 5670

FS: DRAKE ML-2 Hybrid 2M Mobile w/built-in AC
and DC power supply.

I have one that is complete with a mic (not sure
if mic is original). I also have most of the
original manual (cover is missing) and the
original schematic.

I have a second that is complete with mic, no cover.

These are all-transistor except for a 6160 tube in
the final, which makes them somewhat unique.

http://www.dproducts.be/Drake_Museum/ML2.htm

They are untested because I would want to replace
the electrolytics, at least, before putting power
to them. Need to concentrate on my HF boatachors.

I have pictures to send on request.

$65. for the complete ML-2, $40. for the one w/o
cover. $90. for both. They are a little heavy
but I will cover the shipping to standard USA
addresses.

5671. FS: 8 pin to RJ45 mic adaptor/extender

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-04-26 23:51:42 UTC
From: John Geiger
Topic: 5671 Message: 5671

I have for sale a Kenwood mic adaptor/extender cable that came from the RC-2000 remote kit for the TS2000, but it should also be able to make it work with Icom and Yaesu radios. On one end is an 8 pin male plug (you plug your hand or desk mic into this end) and on the other end is an 8 pin RJ45 connector. The cable is about 6 inches long. It also comes with a double female RJ45 adaptor so you could plug another RJ45 cable in to extend its length. I do not know how the adaptor is wired, but you might be able to use it to plug a desk mic or 8 pin hand mic into a RJ45 radio, or extend the length of your mic cable if you are going mobile and need to remote mount the body of the radio. I am sure you could always rewire the RJ45 end if necessary.

I am asking $12 shipped for the adaptor and can take paypal/check/MO.

5675. FS: LiON battery for VX5R/6R/7R

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-04-27 22:35:25 UTC
From: John Geiger
Topic: 5675 Message: 5675

I have for sale an aftermarket 7.4v LiON battery that fits the Yaesu VX5R, VX6R and VX7R series of HTs. This battery charges fine in the Rapid charger, but won't fully charge directly thru the HT. It will charge some and then the LCD on the HT shows "charge error". Not sure why it does this, but it does. For this reason, I am asking $10 shipped for it. Would be fine to use if you have the drop in charger for the HT.

From: Saad Mahaini
Topic: 5673 Message: 5676

Hello, I have a real nice Drake SPR-4 that i decided to sell or trade. It's in excellent, original non modified condition. No flaws, no scratches, no dents, sparkling clean no corrosion chassis, super nice and works perfectly. Comes in the standard configuration with no additional options or extra rocks. $350 plus shipping and trades will be considered. I have a matching MS-4 speaker that i will offer the buyer for an additional $50 or will sell separately for $75 after the receiver sells. This is very well cared for receiver and its hard to find one in such condition. 73 Saad N5FF

5682. Antennas and related items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-05-01 12:57:46 UTC
From: Ken Simpson, W8EK
Topic: 5416 Message: 5682

Antennas and related items for sale:

Dual Meter SWR Bridge:

This meter is a Siltronics / Swan SWR-2. Back in the 1970's and 80's, this meter was relabeled by many different manufacturers with their own label, but is basically the same meter that was made in Japan. It has two separate meters -- one for forward power and one for reading the SWR. It works from 160 thru 2 meters, so is useful on most any frequency you would want. The SWR-2 has SO-239 connectors on each end. It differs from the SWR-1 that had the connectors on the back.

This particular meter works fine. Cosmetically the forward power meter lens has a crack in it. The SWR meter is fine. Since it is only necessary to set the forward meter to full scale, this really does not detract from its usefulness.

With paper work for $18.

Larsen VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.

Larsen LM-150, 2 meter antenna for Larsen LM Mount
Has 3 db gain on 2 meters.
This coil is still in its original box, and appears to never have been used. It even has its rubber washer with it, along with instructions.
Coil only for $20.
Coil, with 4 foot used whip. $26

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on the 70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna. Can be cut for 2 m, 220 MHz, or 440 MHz. $9

Trunk Lip Mount with 5/16 inch stud
Ideal for use with the "Q" above, or any other antenna that requires a 5/16 inch stud. Very nice for $18.

Avanti "On Glass" antenna for 440 MHz:

This antenna was made by Avanti to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Hustler MOS Monitor Antenna:
The Hustler MOS monitor antenna is for use on indoor scanners.
It features a suction cup to hold it to the top of the table.
A Motorola type connector can be moved up and down the antenna
so that it is just the right height to plug directly in to
your scanner.
Basically, this antenna will attach to the table behind your
desktop scanner, out of the way, but will provide a significant
amount of gain over the internal antenna.
This particular antenna works fine, and looks very close to new.
$20

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation
in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work. $30

B & W FL-10/1500 (Also known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. With paper work $40.

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC Regular length, 6 1/2 inches long
BNC, Original antenna from Kenwood TH-215
Alinco Stubby w/BNC Connector, 4.6 inches long

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

BNC Stubby for 440 MHz, 3 inches long

ParaDynamics PDC-5 Wattmeter
This unit has a wattmeter with scales of 100 W, 10 W, and
1 W. It has an SWR Bridge built in, with an antenna tuner.
It was obviously made for 11 meter use, but it works well
on other frequencies. The tuner portion works fine on 10 m,
12 m, and 15 m. The wattmeter seems accurate from 20 meters
thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal
for portable use.
The wattmeter and antenna tuner portion work fine, however,
the SWR portion of this unit is inoperative. It looks fine. $12

Coax Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Antenna adapter for Kenwood TH-21/31/41 HTs
Adapts the antenna connector found on these HTs to a
standard PL-259 connector. $6

Prices do not include shipping from Florida.

Thanks.

5683. FS: Yaesu VX8R quadband HT

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-05-01 18:56:15 UTC
From: John Geiger
Topic: 5683 Message: 5683

I have for sale a Yaesu VX8R quadband HT in very good condition. This is the model that does dual receive, and does 5 watts on 6m/2m/70cm and 1.5 watts on 222mhz. It also has the built in TNC for APRS use and is waterproof. It comes with all the stock acessories including all antenna pieces for the stock antenna. It has the original box and manual with it as well.

I am asking $260 plus shipping which is about $100 off the new price. I would also consider a Yaesu VX6R plus cash for a trade. I can take paypal/check/MO.

73s John AA5JG

5684. FS: Yaesu VX2R/VX3R accessories

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-05-01 21:43:08 UTC
From: John Geiger

I have for sale the following accessories for the Yaesu VX2R and VX3R HTs:

1. EDC-21 DC cigarette lighter cable with plug (2 available)-Run your VX2/vx3 from a lighter for higher power, or charge the battery while moble. $25 each
2. FBA-37 Cell Holder (holds 3 x AA). These only work with the VX3R. 2 available-$12 each
3. Nifty mini manual quick reference for the VX2R-$6
4. Comet SMA503 flexible dualband antenna $17
5. Yaesu VX2R empty box with quick reference guide. Even comes with warranty card and empty box for wall charger-$10

All prices include shipping in the US. I can take paypal/check/MO.

73s John AA5JG

5691. FS: Yaesu VX5R for parts or fixing up (but it is usable)

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-05-02 21:15:36 UTC
From: John Geiger
Topic: 5691 Message: 5691

I have for sale a yaesu VX5R triband HT (6m/2m/70cm) in good physical condition that someone might want as a parts unit or fixer upper, but it is usable as is also. The problem is that the squelch on it doesn't work. If you turn on the squelch, it won't open for any signals, so you have to leave the squelch open all of the time. The same problem occurs with tone squelch-it also won't open even for the correct tone.

The VX5R comes with a battery that holds a slight charge only-no antenna or charger.

I am asking $60 shipped for it, and can take paypal/check/MO.

Clip Microphone with EarBud. Complete with In Line Push to Talk Switch and original packaging. This headset can be used with TH-F6A and TH-D7 Kenwood radios. Used but in like new condition. Asking $15.00 which includes shipping to the Continental USA. Contact Jim KC2SZ jameslhiggins0527@gmail.com

5695. FS: FNB80 LiON battery for VX5/6/7

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-05-04 16:34:46 UTC
From: John Geiger
Topic: 5695 Message: 5695

I have a like new FNB-80li LiON battery for the VX5R, VX6R and VX7R HTs. I bought this recently from W and W associates (it is their model) and have only charged it 2 or 3 times. I am asking $40 shipped for it and can take paypal/check/MO.

73s John AA5JG

5696. FS: Cigarette lighter cord for Yaesu HTs

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-05-04 16:37:35 UTC
From: John Geiger
Topic: 5696 Message: 5696

I have for sale a cigarette lighter plug and cord for Yaesu HTs including the VX5R/6R/7R/150/170/177 and others. Plugs into the cigarette lighter and will power your HT or charge the battery. This is an after market cord without the noise filter that the Yaesu model has. I am asking $12 shipped in the US and can take paypal/check/MO.

73s John AA5JG

5697. WTB: Mosley TA-32 or TA-33 Junior or equivalent

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-05-04 23:08:13 UTC
From: John - W5JMC
Topic: 5697 Message: 5697

I am interested in buying a Mosley TA-32 or TA-33 junior tri-band beam - or another of equivalent (compact) size. If you have one you'd like to let go, please let me know the condition and price. I live in northern Virginia and would be willing to meet you a reasonable distance, considering the cost of gas vs. shipping. Thanks!

1N2804A -- 6.8V 50 Watt Zener Diodes, TO-3 case, NOS -- $10 each

More Semiconductors may be seen at:

http://wc6w.50webs.com/wc6wfsw/index.html?fr20.html

********** Transformers **********

Powerstat 10B 120 volt, 1.75 amp, Variac, used good condition with dial & knob. -- $20

Stancor Transformers

P-6308 107/117V Primary 50/60 Hz -- 6.3 VCT @ 10A Secondary, Used -- $20

F-106 115/230V Primary 50/60 Hz -- 10 VCT @ 6.5A Secondary, S case Used $20

F-610 115/230V Primary 50/60 Hz -- 6.3 VCT @ 10A Secondary, S case Used $20

Triad Transformers -- 115V 60CPS Primary

F21A 6.3VCT @ 10A Secondary, Used -- $20

F28U 6.3/7.5 VCT @ 25A Secondary, NOS -- $40

More Transformers may be seen at:

http://wc6w.50webs.com/wc6wfsw/index.html?fr36.html

********** Capacitors **********

Cardwell -- XR-1000HS (about 950pF max measured) These have slightly contoured plates for improved tuning resolution at minimum C. .030 air gap. About 4.5" x 4" x 3.5" overall including plate travel. Used, Good condition. $20 ea.

National Type TMC-300, 300pF variable capacitor, .070" air gap, approx. 8" X 4" x 2.5" with plates closed. Nice n' shiny like new! $40

Sprague 3600pF @ 30KV Doorknob capacitor. Red epoxy encased style -- $25

More Capacitors may be seen at:

http://wc6w.50webs.com/wc6wfsw/index.html?fr34.html

********** Coils **********

28uH Roller Coil, 42 Turns #12, a skosh over 2" in diameter, 8 TPI, 3" x3" x 7" overall plus 3" shaft. Fiberglass coil supports. I think that this is the coil employed in the MFJ-989 antenna tuner. Excellent condition. $50

Toroidal Tank coil -- The core is fiberglass & resin encased. It is currently wound with 20 turns of #12 wire. There are notches in the form for up to 40 turns. It is a bit over 4 inches in diameter and about 1-3/4" thick. This was made by Bob, W6YUY. See his article in August 1985 Ham Radio magazine "Design a Toroidal Tank Circuit for you Vacuum Tube Amplifier". $50

More coils may be seen at:

http://wc6w.50webs.com/wc6wfsw/index.html?fr35.html

********** Tube Sockets & Accessories **********

Eimac -- Databook set circa 1985 in two large yellow Eimac 3 ring binders. Includes data sheets from 1976 edition and earlier. Very good condition. $200

Coaxial Planar Tube -- shielded heater/cathode contact assembly. Fits 2C39, 3CX100A5 or similar. Silver plated, NOS -- $10 each

Eimac HR-8 plate dissipator used, a mite tarnished $10

Eimac SK-620 sockets, "unused" pair. One is a SK-620; the other a SK-620A. Probably 40 years old, a bit tarnished from storage, and unused except the heater pins on one were once soldered... probably to check some tubes. $60 for the pair.

Johnson 122-101 ceramic 7 pin septar socket (accepts 826, 832, 4D32, PL6549, PL6569, etc). These were likely a special order as they have the standard ground shield but, no ground clips. NOS though, a bit dusty & tarnished from long storage -- $10ea

Johnson 122-237 ceramic 7 pin giant socket for 813, etc. NOS, $15

Johnson 122-237 ceramic 7 pin giant socket for 813, etc. Used, $10

Johnson A pair of used 122-237 ceramic 7 pin giant sockets for 813, etc. including eight base clips. $25

Johnson 122-247A or 122-248 ceramic 7 pin septar socket (accepts 7094, 8877, 832A, etc.) Used, $10

Johnson 124-115-2 UHF socket similar to Eimac SK-620. NOS, but, a mite tarnished from age. $40

Millen 9/16" Ceramic Plate Caps (fit 813 or similar) Used. $10 pair.

National 9/16" Ceramic Plate Caps (fit 813 or similar) Used. $5 ea.

More sockets and some tubes may be seen at:

http://wc6w.50webs.com/wc6wfsw/index.html?fr41.html

********** Connectors -- All NOS , US manufacture **********

Amphenol MHV connectors -- Two 28100 right angle cable males & two 27025 panel mount females. -- $40 all.

UG-932 A/U MHV Male Cable connectors -- $10 ea

UG-961 A/U MHV Female Panel connector -- $12

UG-560/U HN Female panel mount connector -- $15 ea

UG-30C/U N Female-Female Bulkhead Connector -- $10 ea

More connectors may be seen at:

http://wc6w.50webs.com/wc6wfsw/index.html?fr44.html

********** Miscellaneous **********

Synchro Transmitters -- IMC Magnetics, Model 008-216, 26V 400Hz, .75" diameter housing, .120" dia. shaft, flying leads. These will drive a typical Radio Compass Indicator. NOS. $20 ea.

Water cooled heatsinks -- 12" x 8" used, drilled for a flock of TO-3's plus a few diodes. Back is flat. 3/8" water lines. $50 pair

ILG Electric Ventilation -- 17-18-022A squirrel cage type fan. Encased motor with 181-009-EA fan 115/230 VAC 1.6A/.8A 50/60Hz 3000 RPM 4+" round intake, 3+" x 4-3/4" rectangular output flange, weighs 25 lbs. Removed from a RCA transmitter that employed a 4CX5000A. Used -- $45

****

And of course some meters, panel meters, time meters & RF ammeters, please see:

http://wc6w.50webs.com/wc6wfsw/index.html?fr32.html

****

5701. Looking for FT-817 or FT-857

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-05-06 19:12:33 UTC
From: fred
Topic: 5701 Message: 5701

I am looking for a FT-817 or FT-857 as a second rig for portable use.
I have a number of items that I would consider as a trade if someone is looking.
I have a pristine HW-9, AMP TR-180 mono band 80 meter LSB/CW rig (20 watts),variuos unbuilt QRP kits. Realsitic DX-394 shortwave receiver,old Yaesu Memorizer 2 meter rig.
List of kits include:
Tiny Tornado for 40 meters-Partially built
Rockmite 40-unbuilt
Rockmite 20-unbuilt
Norcal keyer-unbuilt
D700 Keyboard interface kit-Unbuilt
ELSIE L-C meter kit-unbuilt
DC40 Transciever kit-unbuilt...

I probably have other stuff as well.
I have a DX-35 and DX-40 for restoration as well some older tube type CB radios that I was going to restore. But are also for trade for one of the above listed rigs.

Contact me off the list at:
ve3fal@...

Thanks
Fred

From: kd4e
Topic: 5718 Message: 5718

Gonset Commander II 160-6M AM/CW Transmitter.

These are somewhat "rare", in fact several usually
well-informed boatanchor Hams assured me in the past
that no such transmitter existed. There were, in
fact, three models: Commander, Commander II, and
Commander B.

Includes two plug-in coil sets and the parts (cap,
choke, diodes, transformer) to build the 300v 200ma
HV PS it requires (also needs 6.3v 3.1a - I believe
it may also be rewired for 12v filaments).

Pictures on request.

$175. plus the actual cost to ship.

SWAP: Will consider a swap for an HF amp with bad
tubes that is easily converted to a GI-6b/GI-7b.
e.g. Amp Supply LA-1000, Dentron GLA-1000, etc.

5726. FS/FT: Maxon UHF radio // two Heavy Duty Maxon Microphones

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-05-22 16:56:44 UTC
From: John - W5JMC
Topic: 5726 Message: 5726

I have a Maxon SM-2450 UHF radio for sale or trade. The radio is in like-new condition, but does not come with a microphone, so I have not tested them on transmit. The unit has a power cord and a mounting bracket. It is 4 channel, PC programmable to 12.5/25khz spacing, 1 or 25 watts output, scan, CTCSS/DCS and a time-out-timer function. I also have two ACC-700 heavy duty Maxon microphones. I thought the mic would fit the 2450, but it doesn't. The microphones are brand new (and run ~$50/each from retail). I am open to trade or cash (Paypal) offers for the radio and mics. Pictures on request. W5jmc.john@... 73's!

5727. WTB: 2/220/440 Triplexer and Triband Antenna

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-05-22 16:55:28 UTC
From: John - W5JMC
Topic: 5727 Message: 5727

I am looking for a triplexer for 2m/220/440, such as the Comet CFX-324 and also a triband antenna for 2m/220/440 (i.e. a Comet SBB224, Diamond CR320A, or Diamond X3200A -- or equivalent). The antenna and triplexer will be used at my QTH to run an IC-27a/37a/47a matching set. Please let me know what you have, what condition it is in, and the price including shipping. W5jmc.john@... Thanks!

Selling antennas for all bands.
Have long beam horz and vertical for 440 and 2 meters with switching.
3 element beams for 6 meters and 220.
HF looks like old TA33 (need some minor work)

Local pickup will not ship.
$150.00 for all.

5730. FS: KD1JV Power-SWR Meter Kit w/Oscillator Modules

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-05-23 00:54:50 UTC
From: kd4e
Topic: 5730 Message: 5730

FS: KD1JV Power-SWR Meter Kit w/Oscillator Modules

$45. for everything, incl. std. shipping

Pic and info:
http://electronicparts-kits.blogspot.com/2008/04/kd1jv-power-and-swr-meter-kit.html

The Oscillator modules are little rectangular
metal cans with "legs".

1.8432MHz
3.686400MHz
7.2MHz
10.000MHz
14.31818MHz
18.0000MHz
20.725000MHz
24.000MHz
28.322MHz
49.884MHz

OK, so here was the scheme ...

Build a QRP Power-SWR Meter Kit with the output
wired to a relay-driver connected to a coaxial
switch. [Relay-driver and switch not included.]

The normal position of the switch is to a dummy
load. (Dummy load not included)

Use small oscillator modules with a buffer-amp
stage for each band to provide the necessary
test-signal to measure SWR. [Oscillator modules
only, no board or buffer-amp.]

Each band has an antenna specifically optimized
for that band so that no tuner is required. (A
multiband antenna is OK so long as it is truly
flat-swr for all bands used, and not because of
a resistor in the design!) [Antennas not incl.]

When the bandswitch is turned to the antenna
of choice the oscillator is actvated and the
SWR meter measures the return signal.

If the SWR is "safe" (in this case the LED for
a low SWR is powered and that signal is processed
into the relay-driver) then the relay switches

from dummy load to antenna.

The idea was a error-proof way to defend an amp
from being switched into the wrong antenna, or
an antenna/coax system that had been damaged.
[Amp. not included ... giggle.]

WDYT?

Eddystone S.640 HF rx FS
Eddystone S.640 HF rx. single-conversion superhet (I.F. = 1600 KHz) with a 3-section tuning gang and electrical bandspread. It has a good selection of operator controls to provide good reception of signals in the short-wave bands from 1.7 to 32 MHz over 3 switched ranges. It is designed to be powered from a.c. mains, 230-v. It requires an external aerial and an external loudspeaker in the impedance range 2.5 to 25 ohms (approx). It uses 9 valves in the Octal range which are still readily obtainable. £65 post to UK address £10

pics at: www.qsl.net/g4bxd/qmstores.htm

cheers, Ben.

5740. FS: Harvey Wells Bandmaster Z-Match Antenna Tuner

Date: 2010-05-27 22:29:58 UTC
From: kd4e
Topic: 5740 Message: 5740

FS: Harvey Wells Bandmaster Z-Match Antenna Tuner

Classic 1950's shack accessory - it was marketed for
80-10M continuous but it will tune down to 160m.

(Note: Ham access to 160m was allowed but severely
restricted in 1955, then loosened some in 1968.)

Internal SWR/Power Meter:
Switched 0-10, 0-100, 0-1000 Watt scales.

Internal 50 Ohm dummy load.

High quality EF-Johnson variable capacitors and Air-Dux
inductors.

Matches 50 ohm tx to reactive and nonreactive loads of
10-2500 Ohms. It is said by some to be superior to the
excellent "EF Johnson 275 Match Box". I bought this
for my boatanchor station which I recently sold.

Pictures on request.

Asking $95., or reasonable offer, plus actual shipping.

From: Paul
Topic: 5743 Message: 5743

Hi,

I need to buy two Mini-Circuits type PSC-2-1 power splitters.
The cheapest I could get from the States is here:

http://www.alltronics.com/cgi-bin/item/PSC_2_1/search/Mini-Circuits-PSC-2-1

But they are claiming $30 for postage, which is ridiculous. I have received complete kits from the States to Malta with postage ranging from $3.90 to $12.

I am looking for a kind heart from the States, who can order it for me.

Thanks
Paul

5746. FS: Yaesu FT920 HF/6m radio

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-05-29 13:55:26 UTC
From: John Geiger
Topic: 5746 Message: 5746

I have for sale a Yaesu FT920 100 watt HF/6m radio in decent condition. It works fine, but isn't mint physically. There are some scratches on the case and the previous owner put a Yaesu sticker on the top cover (which actually doesn't look too bad). The face looks fine but is kind of dusty. It comes with the hand mic, power cord, and manual. This is a larger, base type radio (a little too big for my current setup) and has about every feature you can imagine on it (except for the FM board). It has built in DSP, a CW memory keyer that also does contest serial numbers, a built in voice keyer, and a few nice features I have never seen on another radio before.

For some reason the internal tuner is acting a little funny. It tunes on 6m ok but isn't finding a match right now on HF, and that includes using it on a dummy load (which is already a perfect match).

I am selling it for $575 (below market value) due to the scratches and tuner issue, and would always entertain interesting trades. I might be interested in an Icom 756 or Yaesu FT897D. Maybe an Icom 706MKIIG also.

I can deliver it to the OKC area this weekend for an in-person deal or trade. I can also bring it to the Dallas/Fort Worth area next weekend. Would like to do an in-person deal if possible but shipping would also work if you pay shipping costs.

FS: AMECO 1.8-54MHz Nuvistor PreAmp Model: PCL-P

Add a extra little signal to your boatanchor rx
and have a nice looking brass/copper and black
look accessory on your op desk.

Works fine, faceplate is good, cabinet could use
a touch-up spray.

$40. shipped standard USA.

From: John Geiger
Topic: 5755 Message: 5755

If you are looking for a 13.8 volt Power Supply that will handle about any radio (and then some), here you go. I have for sale an Astron RS50M 50 amp power supply with the voltage and current meters on the front. It also has a couple of short jumpers with powerpoles on it in case you use powerpoles in the shack. It sells new for $270 plus shipping (and it weighs 46 pounds so shipping isn't cheap). I am asking $145 for it.

I can deliver it to the DFW or North Texas area on Wednesday or Sunday/Monday.

If I can do an in-person deal by Monday I will consider shipping but it is heavy.

5756. FS: TopTen 6-way antenna relay coax switch box

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-06-04 01:02:06 UTC
From: kd4e
Topic: 5756 Message: 5756

FS: TopTen 6-way antenna relay coax switch box

Mint condition (still in orig wrapper).

Use with their control box or switch with 12v
through a simple rotary switch in the shack.

If you have 6 feedlines in the shack you can
mount the relay box behind the table and use
a short control cable.

OR ...

You can run a 7 wire control cable out to the
antennas and just use 1 feedline to the shack.

$100. shipped std USA

5757. FS: Standard C1208DA 2m with wide receive

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-05-31 23:31:11 UTC
From: John Geiger
Topic: 5757 Message: 5757

I have for sale a Standard C1208 2m radio with wideband receive. It will receive on the 70cm ham band, as well as 800mhz for public service, and plenty of other frequencies. It does 50 watts out on 2m and will do dual receive. This is the model that has the display and controls on the microphone. It also has a data in and out jack to use for packet and APRS. It comes with the mic unit, a power cord, and the manual.

THe dual receive and 70cm receive makes it very good for satellite use and it will do full duplex.

Those of you familiar with Standard radios know that they were by far the best FM rigs on the market, with a price to match that. I am asking $140 plus shipping and can take paypal/check/MO.

5760. For Sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-06-05 01:06:09 UTC
From: Dave
Topic: 764 Message: 5760

Classic Heath station for sale. Clean and working. Used on both ssb and cw. Prefer pick up or will meet someone within central Michigan.

RX-1 Mohawk Receiver, with manual and matching speaker (matching speaker is very rare). Speaker has small rub mark on the upper left hand corner of the wooden cabinet, but otherwise complete and working. Both for $350

HX-1 Marauder Transmitter, with manual. Spot control could use some work but otherwise operational. Recently re-tubed. $270

HA-10 Warrior Amplifier Works using 4 healthy 811 tubes. $350
Station includes Dow key relay and associated wiring, manuals (old but complete).

Prefer pick-up but will meet someone within 100 miles of Lansing, Michigan.

Would love to sell as a package, make me an offer.

5762. For sale or trade: 40' ROHN HDBX tower, Spaulding X64BO screw base, and rotor

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-06-05 18:51:01 UTC
From: Al
Topic: 5762 Message: 5762

I have a 40' Rohn HDBX tower (sections 8/base, 7, 6, 5, 4) that I'd like to either sell or trade for a Hy-Gain Hy-Tower JR; a mobile all mode, all band transceiver (80 thru 2M) that can be used in an RV; cash, or other ham equipment.

This tower evidently started as a 64' but it was already down to 40' when I got it. The tower is down, disassembled, and needs painting but is in good shape otherwise. This also includes the Schedule 80 steel mast, bearings, and mounting plates. I also have a CDE rotor mounted in the bottom section with the necessary shafting to run up the tower to the mast and beam.

The Spaulding X64BO screw base is complete and in good shape but is still in the ground so would have to be removed. I have the documentation for the base and can scan and send along if desired.

I'm not sure what to ask for this but if you're interested, we can discuss particulars. I can supply pictures if desired. Local pickup would be best but if needed, could be shipped (extra cost). I could also transport for additional cost if needed.

Please contact me via either Callbook address or email at WoodcarvingGypsy@...

Thanks

Al
WD9AGT

5764. For Sale: *D-STAR* DV-Dongle

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-06-06 23:01:21 UTC
From: w2gld
Topic: 5764 Message: 5764

For Sale:

I mint condition, hardly used *D-STAR* DV-Dongle. This device is a USB interface that allows users access to the D-STAR Gateways via the personal Microsoft Windows or Apple Mac OS X computer.

The device has the latest firmware installed:
Boot Firmware: 1.04
App Firmware: 1.11
Serial Number: DV051346

I am a non-smoker, and the device has only been used a handful of times. I am selling this because with school and other life events, I simply do not have the time to play with all aspects of amateur radio.

Asking: $175.00 o.b.o. shipped via USPS Priority Mail, PayPal users add 3% to cover the associated PayPal fees.

Interested parties, please e-mail me directly at: W2GLD@...

5765. ROHN 25 TOWER

Hello All,

I have for sale 4-10 ft. sections of streight and 2-9 ft. top sections of Rohn 25 tower.

Sections are in good very useable shape but need cleaning up... (Surface rust)
Selling all $250.00

Pickup in Largo Florida
Will deliver within 30 miles of Largo Florida for $25.00 more to cover fuel cost.

Selling all because can't find anyone to help me put it up.

Please email me directly or call the following phone number

Thank you,

Don Rosselli
KG4COQ
kg4coq@...
813) 928-1838
Largo,Florida 33773

Sorry for forgetting to mention this but I will trade my tower for a ICOM AH-4 TUNER or something else I may need.

5767. Wattmeters, SWR Bridges, Antenna tuners, and antenna related items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-06-10 21:54:39 UTC
From: Ken Simpson, W8EK
Topic: 5767 Message: 5767

Wattmeters, SWR Bridges, Antenna Tuners, and antenna related items For Sale:

Dentron W-1 HF Wattmeter / SWR Bridge:

This wattmeter is designed for use on the HF bands (1.8 to 30 MHz), and has full scale readings of 2000 Watts and 200 Watts. It is also a calibrated SWR Bridge. It is in a nice black enclosure that will match most ham gear.

This one works fine, and looks very close to new. No scratches, dents, or dings.

With paper work for $55.

MFJ-906 Antenna Tuner/Wattmeter/SWR Bridge for 6 meters:

The MFJ-906 6 Meter antenna tuner for the Magic Band gives you low SWR with practically any coax-fed antenna.

With low SWR, your rig will be more efficient; you will get more power out of your 6 meter transceiver and into your antenna for more DX, it will run cooler and last longer.

A lighted Cross-Needle SWR/Wattmeter shows SWR, forward and reflected power simultaneously in 300/60 forward and 30/6 reflected Watt ranges and has an ON/OFF lamp switch. With a built-in bypass switch, you can bypass your tuner and connect your transceiver directly to your antenna.

The MFJ-906 handles 100 Watts FM and 200 Watts SSB PEP. The MFJ-906 measures 8" x 2?" x 3". The meter lamp uses 12 Vdc.

This one works fine and looks very close to new. MFJ sells them for about $100. With paper work for $65.

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.

Similar to the HM-102, but for VHF frequencies, with 250 and 25 watt scales. It can also be used to check SWR, and has a remote sensor that can either be left inside the meter, or separated from the actual meter. SO-239 connectors in and out.

This particular meter works great. It looks good, but has a small defect on the left side of the meter that does not effect operation.

Paper work included for $40.

Dual Meter SWR Bridges:

All of these feature two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna. They were made in Japan, and labeled with various names, including Swan, Siltronix, and Quement. All have SO-239 connectors on each end, and work fine.

All will work on HF, and VHF, covering 3 to 150 MHz, so are ideal for the new rigs that include 6 and 2 meters.

Siltronix SWR-2
This one is in its original box, and appears that it has never been used. With original paper work for $50

Swan SWR-1
This one is in its original box, but the meter itself says Siltronix on it. The original instruction sheet has both Swan and Siltronix on it. $45

Quement SWB-2
No box for this one, but it works fine and looks great. With paper work for $40

SWR Bridges / Field Strength Meters:

Midland 23-126 SWR Bridge / Field Strength Meter
This is an HF SWR Bridge, but it can be used up thru 2 meters, with slightly reduced accuracy. It is also a field strength meter. SO-239 connectors.
This one works fine, and looks extremely nice. I do not see any scratches on it; it may not have ever been used. In its original box with original instructions and small telescoping antenna. $35

ThordTest SWFS-2 SWR Bridge / Field Strength Meter
Appears to be the same as the Midland above, but the outer case is beige instead of black.
In original box, with original instruction sheet, and antenna. $30

B & W 551 A "Transfer" or "Bypass" Coax Switch:

This switch is designed to switch an auxiliary piece of equipment in and out (For example, bypass a linear amplifier, transverter, preamp, etc.). It has four SO-239 connectors coming out the sides.

It is in good shape for $40 plus shipping from Florida.

B & W 377 Coaxial Antenna Relay:

Most of us are familiar with the Dow Key Antenna relays that many of us used 40 or 50 years ago. This unit serves the same function, but is somewhat unique.

The B & W 377 is housed in a hexagon box; probably the same as some of the B & W coax switches used. It has three SO-239 connectors coming out three of the sides, a length of wire on one side that goes to the coil of the relay, and two sides that are blank.

The coil is rated to work on 48 to 130 volts AC, at 15 ma. The instruction sheet says that it is a unique relay design permitting this large variation in voltage. It also says it is good to 150 MHz, and will handle 2000 Watts PEP, or 1000 watts continuous.

This unit is in extremely nice condition, looking close to new, other than dymo labels that have been added.
With the paper work for $50.

B & W VS-300 A Antenna Tuner:

Handles 300 watts, with a wattmeter for 300 W forward and 30 W reverse included. Antenna switch for 3 coax antennas, plus a balun for open wire line. Antenna switch also includes a "bypass" position.

This one is in good shape. It works fine and looks great also.

Paper work included for $70.

HF Antenna Balun:

HyGain BN-86 Balun

The case of the BN-86 is constructed so that one can use it to hang a dipole or inverted V, or a U-bolt can be added to attach it to the boom of an HF beam antenna. The specs say it is good for 3 to 30 MHz, and will handle 1500 watts.

This particular balun works fine, but does show some physical use.
It includes the paper work for $40.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce harmonic interference. Both have SO-239 connectors.

B & W FL-10/1500 low pass filter
This 50 ohm filter cuts off just above 10 meters, and will handle 1500 Watts. This is the latest model B & W filter. It is in very nice condition; it looks very close to new.
With paper work $40.

B & W 425 low pass filter
It cuts off just above 10 meters, and will handle 1500+ Watts. Maximum attenuation is at 52 MHz, with at least 70 db across the band. This is an older model that seems much heavier duty. It weighs almost twice as much as the newer model, and looks like it would take more power. It even has a serial number on it, and "Patent applied for". Paper work included. $35

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter and antenna, and has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. It is good for 1000 Watts "average" according to the manual, and has over 80 db attenuation at 41 MHz. This one looks great, and includes the paper work. $30

Larsen VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on the 70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna. Can be cut for 2 m, 220 MHz, or 440 MHz. $9

Larsen NLA-MM Mag Mount
Can be used with any NLA type antenna, including those above. Includes the mag mount itself, plus coax with PL-259 connector. $20

Larsen LM-150, 2 meter antenna for Larsen LM Mount
Has 3 db gain on 2 meters.
This coil is still in its original box, and appears to never have been used. It even has its rubber washer with it, along with instructions.
Coil only for $20.
Coil, with 4 foot used whip. $26

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount, and others. It can be cut for 2 meters, 220 MHz, or 450 MHz bands. $8

Trunk Lip Mount with 5/16 inch stud
Ideal for use with the "Q" or LM-150above, or any other antenna that requires a 5/16 inch stud. Very nice for $18.

Hustler MOS Monitor Antenna:
The Hustler MOS monitor antenna is for use on indoor scanners.
It features a suction cup to hold it to the top of the table.
A Motorola type connector can be moved up and down the antenna
so that it is just the right height to plug directly in to
your scanner.
Basically, this antenna will attach to the table behind your
desktop scanner, out of the way, but will provide a significant
amount of gain over the internal antenna.
This particular antenna works fine, and looks very close to new.
$20

Avanti "On Glass" antenna for 440 MHz:

This antenna was made by Avanti to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

ParaDynamics PDC-5 Wattmeter
This unit has a wattmeter with scales of 100 W, 10 W, and
1 W. It has an SWR Bridge built in, with an antenna tuner.
It was obviously made for 11 meter use, but it works well
on other frequencies. The tuner portion works fine on 10 m,
12 m, and 15 m. The wattmeter seems accurate from 20 meters
thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal
for portable use.
The wattmeter and antenna tuner portion work fine, however,
the SWR portion of this unit is inoperative. It looks fine. $12

Prices do not include shipping from Florida.

Thanks.

5768. Bird Wattmeteeer Model 43

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-06-11 13:44:44 UTC
From: Carrie S
Topic: 5768 Message: 5768

Bird Wattmeter, Model 43 - for sale. Like new, no box, but in bag and probably never used. $250 via PayPal or Money Order

Also have various plug-in elements - email if interested. $50 each, new in sealed plastic tube.

The Industry Standard - Birds Famous General Purpose Wattmeter

A field-proven portable, insertion-type instrument designed to measure both forward and reflected CW power in coaxial transmission lines under any load condition. With a full-scale accuracy of ± 5%, it accurately measures RF power with low added VSWR and insertion loss. QC (quick change) type connectors and a full range of plug-in elements provide a wide choice of frequency ranges and power levels giving the Model 43 amazing flexibility. Two extra elements can be stored in the housing, one on each side. The Model 43 is easy to use and simple to service in the field.

* Accurate CW field power measurement over 450 kHz to 2.7 GHz and 100 mW to 10 KW.
* Uses industry standard Bird elements with space to store 2 additional within the meter housing
* Rugged metal housing for the most demanding environments
* Quick Change (QC) connectors to minimize the need for adapters when making critical measurements

Specifications

Power Range
100 mW to 10 kW using Bird® Plug-in Elements
Frequency Range
450 kHz - 2.7 GHz (depending on element)
Accuracy
± 5% of full scale
Insertion VSWR
with N Connectors 1.05 max. to 1000 MHz
Connectors
QC Type (Female N normally supplied)
Finish
Gray Powder Coat
Nominal Size [inches (mm)]
6-7/8" x 5-1/8" x 3-5/8", including connectors (H x W x D) 175 x 130 x 92 mm
Weight
3 lbs. (1.4 kg)

5769. F/S Icom HM-77 hand mic

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-06-12 21:34:48 UTC
From: Art
Topic: 5769 Message: 5769

It came with an Icom IC 3220h that I bought with low audio out-put. I found out that the mic and radio is incompatible with one another,so I am "divorcing" the mic ,and would like to move it "out of state". it is very nice condition,all lettering look's like "new" .
I am looking for $40.00 shipped "to lower 48}.
Thanks for looking at my ad.
73,
Art

5772. Misc Ham Accessories FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-06-13 13:29:30 UTC
From: Ken Simpson, W8EK
Topic: 5772 Message: 5772

Various Miscellaneous Accessory Items For Sale:

Autek QF-1 A, Active Audio Filter

This is an audio filter that goes between your rig and speaker.
It runs off of 110 V AC, and will peak, notch, or become a low
pass or high pass filter. Selectivity (bandwidth) and frequency
are adjustable from the front panel. This is the "A" model that
also has an additional notch filter added. The input is an 1/4 inch
phone plug, and the output is a 1/4 inch jack on the rear panel.

This particular unit looks very, very nice, and works 100%.
With paper work for $55.

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.

Similar to the HM-102, but for VHF frequencies, with 250 and
25 watt scales. It can also be used to check SWR, and has a
remote sensor that can either be left inside the meter, or
separated from the actual meter. SO-239 connectors in and out.

This particular meter works great. It looks good, but has a
small defect on the left side of the meter that does not
effect operation.

Paper work included for $40.

Dual Meter SWR Bridges:

All of these feature two separate meters -- one for reading
forward power and another for reading SWR. This permits one
to easily monitor both the power going out, and the SWR on
the antenna. They were made in Japan, and labeled with various
names, including Swan, Siltronix, and Quement. All have SO-239
connectors on each end, and work fine.

All will work on HF, and VHF, covering 3 to 150 MHz, so are
ideal for the new rigs that include 6 and 2 meters.

Swan SWR-1
This one is in its original box, but the meter itself says
Siltronix on it. The original instruction sheet has both
Swan and Siltronix on it. $45

Quement SWB-2
No box for this one, but it works fine and looks great.
With paper work for $40

SWR Bridges / Field Strength Meters:

Midland 23-126 SWR Bridge / Field Strength Meter
This is an HF SWR Bridge, but it can be used up thru 2 meters, with slightly reduced accuracy. It is also a field strength meter. SO-239 connectors.
This one works fine, and looks extremely nice. I do not see any scratches on it; it may not have ever been used. In its original box with original instructions and small telescoping antenna. $35

ThordTest SWFS-2 SWR Bridge / Field Strength Meter
Appears to be the same as the Midland above, but the outer case is beige instead of black.
In original box, with original instruction sheet, and antenna. $30

Cables for keys and keyers:

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it, as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

Power Supplies:

TenTec Model 280 power supply, 20 amps at 13 V DC.
This supply is quite heavy duty electrically.
It has 2 pass transistors, instead of the one that some have. It also has an ammeter on it.
This one works fine, and looks OK as well.
A previous owner removed the molded in TenTec power cable on the back and added very heavy binding posts, so that it can be used with many different rigs and not just TenTec. It also has a couple RCA jacks for lower power use.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is very quiet, and well shielded, and does not produce any electrical noise that I could find. $150

AEA Power Supply:
AEA AC-1
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive,
so it can be used on many different things that require
12 V DC at up to an amp, such as keyers, antenna tuners,
etc. $15

Communications Speaker
This 4 inch square speaker is optimized for communications
frequencies (300 to 3000 Hz). It is in a black enclosure,
and is an 8 ohm speaker. It has a cord with a 1/8 inch
(3.5 mm) mono plug on the end.
This one works fine and looks OK also. $15

ParaDynamics PDC-5 Wattmeter
This unit has a wattmeter with scales of 100 W, 10 W, and
1 W. It has an SWR Bridge built in, with an antenna tuner.
It was obviously made for 11 meter use, but it works well
on other frequencies. The tuner portion works fine on 10 m,
12 m, and 15 m. The wattmeter seems accurate from 20 meters
thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal
for portable use.
The wattmeter and antenna tuner portion work fine, however,
the SWR portion of this unit is inoperative. It looks fine. $12

Phone Patch / Digital Interface:

Heath HD-15 phone patch

This is the unit with the VU meter on the left and 3 knobs that
match the SB series to the middle and right. Low or high Z output
to the transmitter. It can also be used as an interface for PSK31,
and other digital modes.

It is in excellent condition. It has a couple of modifications that
are very professionally done. There is a modular jack added for the
phone line. Two RCA phono jacks have been added for speaker in and
out. In both cases, they are in parallel with the original terminal
strip, so either may be used. The actual meter movement has been
replaced with a slightly larger, and more professional looking meter.

Paper work included for $30.

As above, but without any modifications, with paper work. $25

Waters "Universal Hybrid Coupler II" Model 3002

Most of us would likely call this a phone patch, but it
is really much more than that. It does that, but also
will interface with a tape recorder, and permit recording
and play back of on-the-air QSOs. Nothing says that the

tape recorder input must be used that way. Connect the sound card in your computer in this position, and you have a very effective interface.

Model 3002 includes a speech compressor powered by a 9 volt battery. The front panel is finished on both sides, with one side having it set in a horizontal position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Coax Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Prices do not include shipping from Florida.

Thanks.

5777. Kenwood Items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-06-22 17:57:40 UTC
From: Ken Simpson, W8EK
Topic: 5777 Message: 5777

An assortment of various Kenwood items For Sale:

Linear Amp Switching Cable for Kenwood Rigs:

This cable goes between a Kenwood transceiver and a linear amplifier to switch the amp from transmit to receive. One end has a DIN connector, as is used with most Kenwood rigs. The other end has an RCA phono plug, as used by most linear amplifiers. Before using this cable, please check to be certain that the voltages and currents needed by your amplifier match the switching capabilities of your transceiver. There is a second coax cable with RCA phono plug for ALC control, if desired. $18

As above, but without the ALC cable. Most modern amps do not need the ALC connection, so this cable has only one coax for switching the relay. $12

Kenwood Paper Items:

Kenwood Log Book
Completely unused, new condition. It has standard log book pages, with a world map on the inside cover, and a DXCC list (as of 1983) in the back. Cover is a brownish color with the Kenwood Logo. $8

World Map with Kenwood Logo
This map is laminated, and lists DXCC Countries, as of 1985. Obviously, it is not completely up to date, but still is a very nice map. Like new. $5

Generic Hi Z Hand Microphone
This hand mic is black in color. It has a PTT switch and black coiled cord. It works fine and looks very close to new. Ideal for the Kenwood "Hybrid" rigs such as the TS-520, 530, 820, 830, etc. $25

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. $15

Dual Meter SWR Bridges:

These feature two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily

monitor both the power going out, and the SWR on the antenna. They are from Japan, and labeled with various names, including Swan, Siltronix, and Quement. Both have SO-239 connectors on each end, and work fine.

Both will work on HF, and VHF, covering 3 to 150 MHz, so are ideal for the new rigs that include 6 and 2 meters.

Swan SWR-1
This one is in its original box, but the meter itself says Siltronix on it. The original instruction sheet has both Swan and Siltronix on it. $45

Quement SWB-2
No box for this one, but it works fine and looks great. With paper work for $40

SWR Bridges / Field Strength Meters:

Midland 23-126 SWR Bridge / Field Strength Meter
This is an HF SWR Bridge, but it can be used up thru 2 meters, with slightly reduced accuracy. It is also a field strength meter. SO-239 connectors.
This one works fine, and looks extremely nice. I do not see any scratches on it; it may not have ever been used. In its original box with original instructions and small telescoping antenna. $35

ThordTest SWFS-2 SWR Bridge / Field Strength Meter
Appears to be the same as the Midland above, but the outer case is beige instead of black.
In original box, with original instruction sheet, and antenna. $30

Accessories for Kenwood TH-215, TH-225, TH-415, and other HTs in that series:

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. $15

Kenwood PB-2 Battery pack
8.4 V at 500 mahr. Holds charge fine. $25

Kenwood Wall Wort Charger for PB-2 above. $12

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and PB-4 battery packs. It can also be used with the smaller PB-2 and PB-3 packs. Black color. Great condition. $15

Kenwood BH-1 Belt clip with screws
Used on many Kenwood HTs. $8

Kenwood Wrist Strap for TH-215, plus many other HTs. $4

Original Kenwood Rubber Duck antenna from Kenwood TH-215. $10

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

Accessories for the Kenwood TR-2400 HT:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Belt clip for TR-2400 HT, complete with hardware - $8

Wrist strap for TR-2400, and most other HTs - $4

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC Regular length, 6 1/2 inches long
BNC - Original from Kenwood TH-215, 5 inches long
Alinco Stubby w/BNC Connector, 4.6 inches long

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

BNC Stubby for 440 MHz, 3 inches long

HT Belt Clips and Wrist Straps:

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood BH-1 for Kenwood TH-215 / 225 / 415, etc.
Kenwood BH-2 for Kenwood TH-21 / 31 / 41 series HTs
Kenwood TR-2400
Motorola
Yaesu FT-207

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, etc.
Kenwood TR-2400
Yaesu FT-209

Original Operating Manuals for Kenwood equipment:

All manuals are in very nice condition, for Kenwood equipment.
All are original and are not copies.

BC-5 DC charger/adapter $4
HS-5 Headphones $4
LF-30A Low Pass Filter $5
MC-30 and MC-35 hand microphones $5
MC-85 desk microphone $4
PB-1, PB-2, PB-3, and PB-4 battery packs $3
PS-6 power supply $6
PS-30 power supply $5
SMC-24 speaker mic $4
SMC-25 speaker mic $4
SP-430 speaker $4
YK-88SN Narrow SSB Filter $4

Operating manual for TW-4000 dual bander $15
Service manual for TW-4000 dual bander $20
Operating manual for TH-21 HT for 2 meters $8
Operating manual for TH-225, 2 meter HT $12
Operating manual for TM-221/421 mobile $15
Operating manual for TH-241/441/541 mobile FM transceivers
..For 2 meters, 440 MHz, and 1200 MHz. $12
Operating manual for TR-2200, 2 meter "portable"
..This is very similar to the Drake TR-22. $15
Operating manual for TR-2400, 2 meter HT $12
Operating manual for TR-2500, 2 meter HT $14

These are original Kenwood manuals only.

Spanish version of the Operating Manual
for the Kenwood TM G-707 dual band transceiver
This is the original operating manual only, in Spanish.
It looks like it is quite extensive and detailed.
It is basically new, only being opened to observe that
it is in Spanish only. It is original from Kenwood.

$10
Please note: All other manuals are in English.

Service Manuals:

These are service manuals (not operating manuals) in extremely
good condition.

Service Manual for Kenwood TR-9130 multimode 2 meter transceiver
This manual is a very good copy. $10

Service manual for Kenwood TW-4000 dual bander, $20

Service manual for TR-2600, 2 meter HT $12

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a service
pack. It has schematics, circuit explanations, voltages, etc. $18

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it,
as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector
on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

Prices do not include shipping from Florida.

Thanks.

5782. Lightning Protection, Headset, DMM, and much more FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-06-24 15:21:36 UTC
From: Ken Simpson, W8EK
Topic: 5782 Message: 5782

Lightning Protection, Communications Headset,
Microphones and Heil "Shock Mount", DMM, SWR
Bridges, Cables, and Crystals For Sale:

Polyphaser IS-VU50HN-MA Lightning Protector

Polyphaser is well know for extremely good lightning
protection equipment. This coaxial antenna protector
is designed to be inserted in the coaxial cable at the
bottom of a tower, or just as it enters your house.
This unit has two SO-239 connectors, and is rated to
take 750 Watts and operate from 50 to 300 MHz (VHF)
and from 380 to 550 MHz (UHF).

This particular unit includes the spec sheet, and appears
that it might not have been used. It is not oxidized,
or corroded, although it appears that someone must have
measured the SWR, as it says "4.5 MHz to 54 MHz, 1.1 to
1.4" on the back.

These sell for about $75 new. Buy this one for $55.

"Blitz Bug" Lighting protectors
These are not as sophisticated as the Polyphaser above,
but still protect against lightning. Two versions are
available. One has an SO-239 connector on each end.
The other has a PL-259 on one end and an SO-239 on
the other end. Take your choice for $8 each.

Communications Headset:

Telex A-610 Dual Headset

This is a pair of 600 ohm communications headphones.
Telex is commonly used in aviation circles, and is designed
for good voice communications from the ground to the plane.
Of course if they work good for the aircraft industry, they
should work well for hams. It also tells one something about
the ruggedness and reliability of these headphones.

They have a 1/4 inch mono plug.

This particular pair works fine, and looks extremely good.
No defects that I can find. $40

Heil SM-1 Microphone "Shock Mount"

The SM-1 "Shock Mount" is Heil Sound's 8-point flexible suspension support system that helps suppress low-frequency rumble on the microphone line by absorbing and damping vibrations picked up from the studio desk or console. It is a professional suspended shock mounting system, black in color. The SM-1 is designed for use with the slim-line Heil Sound microphones, such as the GoldLine GM series, HM-10-DUAL and the PR-20. Its standard 5/8" threads mount onto the PL-2T "Topless" and other mounts, for easy installation.

This shock mount works with the GM-5 and similar body sizes.

This particular unit works fine, and looks very close to new.
$50

Micronta 21-194 Digital Multimeter For Sale:

This DMM not only does the traditional things that DMMs do (measure voltage, current, etc.), but is also a transistor tester and a capacitance meter. Voltage ranges are up to 1000 Volts, current to 10 Amps, and capacitance to 20 microfarads.

This particular meter looks good, and functions fine on all modes except resistance.

Probes included for $15.

Dual Meter SWR Bridges:

These feature two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna. They are from Japan, and labeled with various names, including Swan, Siltronix, and Quement. Both have SO-239 connectors on each end, and work fine.

Both will work on HF, and VHF, covering 3 to 150 MHz, so are ideal for the new rigs that include 6 and 2 meters.

Swan SWR-1
This one is in its original box, but the meter itself says Siltronix on it. The original instruction sheet has both Swan and Siltronix on it. $45

Quement SWB-2
No box for this one, but it works fine and looks great. With paper work for $40

SWR Bridges / Field Strength Meters:

Midland 23-126 SWR Bridge / Field Strength Meter
This is an HF SWR Bridge, but it can be used up thru 2

meters, with slightly reduced accuracy. It is also a field strength meter. SO-239 connectors.
This one works fine, and looks extremely nice. I do not see any scratches on it; it may not have ever been used. In its original box with original instructions and small telescoping antenna. $35

ThordTest SWFS-2 SWR Bridge / Field Strength Meter
Appears to be the same as the Midland above, but the outer case is beige instead of black.
In original box, with original instruction sheet, and antenna. $30

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.

Similar to the HM-102, but for VHF frequencies, with 250 and 25 watt scales. It can also be used to check SWR, and has a remote sensor that can either be left inside the meter, or separated from the actual meter.
SO-239 connectors in and out.

This particular meter works great. It looks good, but has a small defect on the left side of the meter that does not effect operation.

Paper work included for $40.

Hand Microphones:

Icom HM-12 microphone:
The HM-12 has a round 8 pin connector on it, and includes up-down switches on the top and a lock switch on the back. It is used with most of the modern Icom rigs using a round 8 pin connector.
The mic works as it should, and the mic itself looks very, very good. The cord has seen some of the Florida sun and has some deterioration. $40

Generic Hi Z Hand Microphone
This hand mic is black in color. It has a PTT switch and black coiled cord. It works fine and looks very close to new. $25

Shure 104 C, Low Z hand Microphone
This is a very heavy duty Shure mic. It appears to be new, with stripped and tinned ends that have never been on a connector. It is in its original box, with the original instruction manual. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color. Looks and works great. With 4 pin connector. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is
needed. Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. Looks to be unused. $40

KDK DM TT-1 DTMF Touch Tone Mic
This mic has a 12 digit touch tone pad on it, with a
switch to turn the pad on and off. With 4 pin plug.
It works fine, and looks great. $35

Data Signal "Data-Coder 5" Touch Tone Mic
This mic has a 12 digit touch tone pad on it, plus a normal
low impedance microphone. With 4 pin plug. Like new. $38

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the
mic, and "speed dial". 12 digit touch tone pad on the front,
with the microphone part above the pad. With an 8 pin modular
plug (like a computer LAN) on it, which can be changed.
Looks to be new. $40

HT Speaker Microphones:

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits
the TH-21/31/41 series HTs, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. $15

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Azden SDX-316
This is the rounder style speaker mic that fits nicely in
the palm of your hand. Has 3.5 mm and 2.5 mm plugs for
Azden, Icom, some Yaesu, and others. $20

Communications Speaker:

This 4 inch square speaker is optimized for communications
frequencies (300 to 3000 Hz). It is in a black enclosure,
and is an 8 ohm speaker. It has a cord with a 1/8 inch
(3.5 mm) mono plug on the end.
This one works fine and looks OK also. $15

Linear Amp Switching Cable for Kenwood Rigs:
This cable goes from a Kenwood transceiver to a linear

amplifier to switch the amp from transmit to receive. One
end has a DIN connector, as is used with most Kenwood rigs.
The other end has an RCA phono plug, as used by most linear
amplifiers. Before using this cable, please check the
switching capabilities of your transceiver.
This cable has one coax for switching the relay. $12

Cables for keys and keyers:

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it,
as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector
on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

Coax Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Crystals - FT-243, HC-6, etc.:

1000.00 KHz for crystal calibrator (octal plug)

FT-243 Crystals for 40, 20, 15, and 10 meter ham bands

Crystals can be used at fundamental, or multiplied for
20, 15, or 10 meters. E.g. the 7081 could be used at 7081,
14162, 21243, or 28324 KHz.

7081 (HC-6), 7094 (HC-6), 7174 (HC-6), 7175, 7186,
7189, 7198.5 (HC-6), 7200 (HC-6), 7200, 7207, 7225,
7236.2 (HC-6), 7248, 7261 (FT-243 & HC-6), 7283.33 (HC-6)
7325, 7375, 7395, 7400, 7404, 7410,

HC-6 Crystals
These may be used as heterodyning crystals in many
Collins, Drake, Heath, Yaesu, and other rigs.
Freq of crystal in MHz.
7.98, 9.5, 12.0, 12.545, 15.0, 16.0, 17.0, 24.7, 30.75,
32.5, 39.0, 41.9, 42.7, 44.5, 46.0, 46.7, 49.9, 51.1,

All crystals are $8 each, plus shipping from Florida.

I also have many 2 meter crystals in HC-25 holders.
Please e-mail your needs.

Prices do not include shipping from Florida.

Thanks.

5783. FS - Mini-Circuits RF modules

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-06-26 20:16:50 UTC
From: n8oep_mike
Topic: 5783 Message: 5783

Bias Tee (50 Ohm 10-4200MHz)
Model - ZFBT-4R2G
SMA connectors (2F - 1M)

Coaxial Switch (50 Ohm 10-3000MHz)
Model - ZSDR-230 w/ bracket
SPDT Pin Diode - TTL drive
SMA female connectors (3F)
DC/Switching input via 4 external binding posts

Included Adapters:
SMA Male/Male (22mm long)
SMA Male w/ 300mm twisted pair (DC power for ZFBT)
SMA Female to ?

These are not the lead free type (RoHS or + type in the Mini-Circuits identification) they were pulled from a working Sirius/XM radio receiver test set up.

For more detailed info look up the model number(s) at http://www.minicircuits.com/
or I can send you the PDF's if needed.

Asking $25 + $5 for flat rate USPS shipping to US

Mike - N8OEP@...

5785. HF Station 4 Sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-07-02 00:47:05 UTC
From: Warren Rothberg
Topic: 5785 Message: 5785

Due to the overwhelming pressures of these sad economic times, I am forced to sell my complete HF station. Times are tuff. Bills have to be paid. Priorities have to be put in order.

Everything is one owner. This is the station that got me 291 countries with 100 watts.

Kenwood TS-940S/AT - Serial #20500105
Kenwood SP-940 External Speaker
Kenwood MC-60 Desk Mic
Heil ProSet w HC-4 DX Element
MFJ-941D Versa Tuner II
Piexx 940 Serial Interface
Belkin F5U409 Serial to USB Converter
TS-940S/AT Original User Manual and schematics
Bencher BY-2 Chrome Iambic Paddles
MFJ 422B Electronic Curtis Keyer
SignaLink USB Digital Sound Card
Heavy Duty Foot Pedal
Patch cords and USB cables as necessary

Please do not ask me to break up the package. Selling as one lot. Asking $1400.00 Pickup in greater West Palm Beach, FL area. Or plus shipping and insurance.

Serious inquiries only to w4wr@... Pictures available on request.

5786. Johnson Desk Mic, other mics, SWR Bridges FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-07-03 12:38:17 UTC
From: Ken Simpson, W8EK
Topic: 5786 Message: 5786

For Sale:

Johnson Desk Microphone
It looks like a Shure 444, except it says Johnson on the front instead of Shure, and has the Johnson logo on it. I am assuming that it is a Shure 444 that Johnson simply had their name and logo placed on it.
This one has a very nice pattern on the scope and looks extremely nice. $45

Heil SM-1 Microphone "Shock Mount":
The SM-1 "Shock Mount" is Heil Sound's 8-point flexible suspension support system that helps suppress low-frequency rumble on the microphone line by absorbing and damping vibrations picked up from the studio desk or console.
It is a professional suspended shock mounting system, black in color. The SM-1 is designed for use with the slim-line Heil Sound microphones, such as the GoldLine GM series, HM-10-DUAL and the PR-20. Its standard 5/8" threads mount onto the PL-2T "Topless" and other mounts, for easy installation.
This shock mount works with the GM-5 and similar body sizes.
This particular unit works fine, and looks very close to new.
$50

Heil Microphone Cable:
Heil CC-1 K microphone cable
This has an 8 pin round female connector wired for Kenwood on one end and a 4 pin XLR female on the other end. It also has the 1/4 inch socket that can be used for a foot switch, or other PTT switch. It is about 8 feet long.
It can be used to connect a Heil GM-5 microphone to most Kenwood rigs that take the round 8 pin connector, although it probably could be used with other units as well.
This one works fine and looks very close to new. In fact I doubt you could tell it from new. $25

Hand Microphones:

Generic Hi Z Hand Microphone
This hand mic is black in color, and looks like it might have come from a HyGain rig. It has a PTT switch and black coiled cord. $25

Shure 104 C, Low Z hand Microphone
This is a very heavy duty Shure mic. It appears to be new,

with stripped and tinned ends that have never been on a connector. It is in its original box, with the original instruction manual. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color.
With 4 pin connector. $25
With no connector. $22

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed. Stripped and tinned leads.
It works fine, and looks good also. $25

Dual Meter SWR Bridges:

These feature two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna. They are from Japan, and labeled with various names, including Swan, Siltronix, and Quement. Both have SO-239 connectors on each end, and work fine.

Both will work on HF, and VHF, covering 3 to 150 MHz, so are ideal for the new rigs that include 6 and 2 meters.

Swan SWR-1
This one is in its original box, but the meter itself says Siltronix on it. The original instruction sheet has both Swan and Siltronix on it. $45

Quement SWB-2
No box for this one, but it works fine and looks great.
With paper work for $40

SWR Bridges / Field Strength Meters:

Midland 23-126 SWR Bridge / Field Strength Meter
This is an HF SWR Bridge, but it can be used up thru 2 meters, with slightly reduced accuracy. It is also a field strength meter. SO-239 connectors.
This one works fine, and looks extremely nice. I do not see any scratches on it; it may not have ever been used. In its original box with original instructions and small telescoping antenna. $35

ThordTest SWFS-2 SWR Bridge / Field Strength Meter
Appears to be the same as the Midland above, but the outer case is beige instead of black.
In original box, with original instruction sheet, and antenna.
$30

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.

Similar to the HM-102, but for VHF frequencies, with 250 and
25 watt scales. It can also be used to check SWR, and has a
remote sensor that can either be left inside the meter, or
separated from the actual meter.
SO-239 connectors in and out.

This particular meter works great. It looks good, but has a
small defect on the left side of the meter that does not
effect operation.

Paper work included for $40.

Prices do not include shipping from Florida.

Thanks.

5788. HF Rig, PS, Wattmeters, Ant Tuner, Dual Band HT and much more FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-07-09 22:55:48 UTC
From: Ken Simpson, W8EK
Topic: 5788 Message: 5788

TenTec 585 Paragon, Power supplies, Automatic Antenna Tuner,
Dual Band HT, Wattmeter / SWR Bridges, Cables, Lightning
Protection, and other items For Sale:

TenTec 585 Paragon HF Transceiver:

The Paragon is a top of the line transceiver that includes a
general coverage receiver. It covers 160-10 meters, including
WARC bands, with 100 watts output. The receiver is fantastic.
It has dual VFOs and many memories built in, along with a
speech processor. Basically, it has about every feature that
a ham could want in an HF rig.

This particular unit works 100% as best I can tell. Since the
rig does so many things, I am sure that there is something I
didn't test, but I don't know what it is (or I would have
tested it!).

Cosmetically, it is in extremely nice shape. The front panel
is extremely good. Most all of the lettering is clean and
crisp. There are a couple of very minor scratches on the heat
sink that certainly will not be noticeable in operation.

Large manual and power cord included for $650.

TenTec Model 280 power supply, 20 amps at 13 V DC

This supply is quite heavy duty electrically.
It has 2 pass transistors, instead of the one that
some have. It also has an ammeter on it.

This one works fine, and looks OK as well.
A previous owner removed the molded in TenTec power
cable on the back and added very heavy binding posts,
so that it can be used with many different rigs and
not just TenTec. It also has a couple RCA jacks for
lower power use.

With paper work for $100.

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,

but says "Switcher/25" on it. It is very quiet, and well shielded, and does not produce any electrical noise that I could find. $150

Icom AH-3 Automatic Antenna Tuner:

The Icom AH-3 automatic tuner will tune continuously from 1.8 MHz through 30 MHz, i.e. from the low end of the 160 meter band to top of the 10 meter band, including 60 meters and all WARC bands. The AH-3 is a full HF tuner. Note that the newer Icom AH-4 tuner is not listed to tune below 3.5 MHz, while the the AH-3 is. It requires at least 5 watts to automatically tune, and will handle up to 120 watts. It requires 13 V DC to operate.

The AH-3 works with any Icom radio with standard 4 pin rear tuner connector, such as the Icom 703, 703+, 706 series, 718, 746, 746 Pro, 756 series (including Pros), 7000, 7200, and many others. It can also be used with most any other radio with a simple interface (information provided).

This AH-3 is in excellent condition. Paper work is included for $200.

Yaesu VX-1 Dual Band HT:

This is a dual-band HT which provides small size combined with wide frequency coverage while weighing about 4 ounces.

It can produce up to 1 Watt output power in the 2 meter & 440 MHz bands. The VX-1 provides extraordinarily wide frequency receive coverage of 500-1700 kHz plus 76-999 MHz, which includes AM BC, FM BC, public safety, and audio from most TV channels. The operating mode (AM, FM-Narrow, FM-Wide) can be automatically preset.

It includes an FNB-52LI High-Capacity Lithium-Ion battery. The memory system includes two main channel groups, plus additional memories bringing the memory total to 291 channels!

To put it another way, the VX-1 will do more than most hams need!

This one includes the HT, LIon Battery, Charger, Rubber Duck antenna, and an extensive manual. It works fine, and looks very close to new. $125

Battery pack for Yaesu VX-2 or VX-3 HT
Lithium Ion Battery Pack that fits both the VX-2 and the VX-3
3.7 volts, 1200 mahr, works great, and holds a charge like new.
$15

Yaesu Hat
This "Ball Cap" has Yaesu on the front of it in big letters.
It is white and says "Yaesu" on the front, with the Yaesu

logo. It has never been used. $6

Wattmeters and SWR Bridges:

HF Digital Peak and Average Reading Wattmeter

Radio Shack MTA-20 (21-527) Digital Wattmeter will read either peak or average power. It is a digital meter with no moving parts, although it does have a sort of analog bar graph on it.

It is rated to cover 1.8 thru 30 MHz, so it covers all of the HF bands. It will measure up to 2000 Watts, in ranges of 2000, 200, or 20. It will also indicate SWR, which requires at least 1/2 Watt. It has a nice back light, and requires 13 V DC for operation. There is about a 3 foot cable between the digital display and the remote sensor. This is a great meter.

This particular meter is in its original box, and appears to not have been used. It has been tested, and works fine. $100

Dual Meter SWR Bridges:

These feature two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna. They are from Japan, and labeled with various names, including Swan, Siltronix, and Quement. Both have SO-239 connectors on each end, and work fine.

Both will work on HF, and VHF, covering 3 to 150 MHz, so are ideal for the new rigs that include 6 and 2 meters.

Swan SWR-1
This one is in its original box, but the meter itself says Siltronix on it. The original instruction sheet has both Swan and Siltronix on it. $45

Quement SWB-2
No box for this one, but it works fine and looks great. With paper work for $40

SWR Bridges / Field Strength Meters:

Midland 23-126 SWR Bridge / Field Strength Meter
This is an HF SWR Bridge, but it can be used up thru 2 meters, with slightly reduced accuracy. It is also a field strength meter. SO-239 connectors.
This one works fine, and looks extremely nice. I do not see any scratches on it; it may not have ever been used. In its original box with original instructions and small telescoping antenna. $35

ThordTest SWFS-2 SWR Bridge / Field Strength Meter
Appears to be the same as the Midland above, but the outer
case is beige instead of black.
In original box, with original instruction sheet, and antenna.
$30

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.

Similar to the HM-102, but for VHF frequencies, with 250 and
25 watt scales. It can also be used to check SWR, and has a
remote sensor that can either be left inside the meter, or
separated from the actual meter.
SO-239 connectors in and out.

This particular meter works great. It looks good, but has a
small defect on the left side of the meter that does not
effect operation.

Paper work included for $40.

120 Volt AC Power cables:

These are power cables that plug in to the 120 V AC line.
They have the standard 3 prong plug on one end, and have the
"International" 3 slot socket on the other end, as is used
on most computers, plus many other pieces of electronic
equipment, such as ham gear and test equipment.

These all function fine, and look very good. Some have been
used, and some may not have been.

Buy one for $1, six for $5, or 14 for $10.

Lightning Protectors:

"Blitz Bug" Lighting protectors
These are not as sophisticated as the Polyphaser below,
but still protect against lightning. Two versions are
available. One has an SO-239 connector on each end.
The other has a PL-259 on one end and an SO-239 on
the other end. Take your choice for $8 each.

Polyphaser IS-VU50HN-MA Lightning Protector

Polyphaser is well know for extremely good lightning
protection equipment. This coaxial antenna protector
is designed to be inserted in the coaxial cable at the
bottom of a tower.
This unit has two SO-239 connectors, and is rated to take
750 Watts from 50 to 300 MHz and from 380 to 550 MHz.

This particular unit includes the spec sheet, and appears
that it might not have been used. It is not oxidized,
or corroded.

These sell for about $75 new. Buy this one for $55.

Prices do not include shipping from Florida.

Thanks.

TenTec 585 Paragon HF Transceiver, Power Supplies, HF Digital Wattmeter, HF Vertical Antennas, and Lightning Protection For Sale:

TenTec 585 Paragon HF Transceiver:

The Paragon is a top of the line transceiver that includes a general coverage receiver. It covers 160-10 meters, including WARC bands, with 100 watts output. The receiver is fantastic. It has dual VFOs and many memories built in, along with a speech processor. Basically, it has about every feature that a ham could want in an HF rig.

This particular unit works 100% as best I can tell. Since the rig does so many things, I am sure that there is something I didn't test, but I don't know what it is (or I would have tested it!). It has had all of the "Updates" performed on it by TenTec.

Cosmetically, it is in extremely nice shape. The front panel is extremely good. Most all of the lettering is clean and crisp. There are a couple of very minor scratches on the heat sink that certainly will not be noticeable in operation.

Large manual and power cord included for $650.

TenTec Model 280 power supply, 20 amps at 13 V DC

This supply is quite heavy duty electrically.
It has 2 pass transistors, instead of the one that some have. It also has an ammeter on it.

This one works fine, and looks OK as well.
A previous owner removed the molded in TenTec power cable on the back and added very heavy binding posts, so that it can be used with many different rigs and not just TenTec. It also has a couple RCA jacks for lower power use.

With paper work for $100.

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel

basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is very quiet, and well shielded, and does not produce any electrical noise that I could find. $150

HF Digital Peak and Average Reading Wattmeter:

Radio Shack MTA-20 (21-527) Digital Wattmeter will read either peak or average power. It is a digital meter with no moving parts, although it does have a sort of analog bar graph on it.

It is rated to cover 1.8 thru 30 MHz, so it covers all of the HF bands. It will measure up to 2000 Watts, in ranges of 2000, 200, or 20. It will also indicate SWR, which requires at least 1/2 Watt. It has a nice back light, and requires 13 V DC for operation. There is about a 3 foot cable between the digital display and the remote sensor. This is a great meter.

This particular meter is in its original box, and appears to not have been used. It has been tested, and works fine. $100

Two HF Vertical Antennas for pick up near Ocala Florida:

These two HF Vertical antennas are located near Ocala, Florida, near I-75. They are disassembled, on the ground, ready for pickup, and reassembly at your QTH. Paper work is included, as are all parts, to the best of my knowledge. I was careful with disassembly, so it should be easy to reassemble them. Due to their size, it is just not practical to ship them.

HyGain HyTower HF Vertical Antenna:

The HyGain HyTower HF vertical covers 80, 40, 20, 15, and 10 meters. The WARC bands (and 160 meters) can be added, but are not a part of this antenna at present. This is an extremely rugged antenna, consisting of about 30 feet of actual tower, with additional stubs for tuning. Total height is about 50 feet.

Automatic band selection is achieved through a unique stub decoupling system so that an electrical 1/4 wavelength (or odd multiple) exists on all bands. Unity gain on 20, 40, 80; 2 dB on 10/15 Meters.

This particular antenna is in extremely good condition. As far as I know, all hardware is included. The galvanizing on the tower sections is very good. The hardware is all stainless and still shines, with the exception of the galvanized bolts that Rohn uses on most all of their tower to hold the sections together. I do not find any rust.

Due to size, this is pick up only, near Ocala FL, close to I-75.

This antenna sells for about $1000 new. With paper work for $450.

Gap "Titan" HF Vertical Antenna:

The Titan is an 8 Band Multiband DX Antenna. It covers 80 thru 10 meters, including the WARC bands. It covers the entire band on 40 thru 10, and about 100 KHz on 75/80 meters. It is about 25 feet tall, and includes a counterpoise, so that no radials are required.

One of the primary virtues of the Titan is the GAP center feed. By elevating the feed the earth loss is dramatically decreased, which means the RF is going out to make the contact instead of into the ground to warm the earth. Reducing the earth loss eliminates the need for a radial system. The Titan requires NO RADIALS.

This particular antenna is in extremely nice shape with no corrosion. Most of the aluminum is still shiny. If I were putting it up myself, I would clean the connections with a Scotchbrite sponge, but it is in great condition. I will even furnish the sponge!

These sell new for about $400. This one is close to new, with paper work for $250. Pick up only near Ocala FL.

Lightning Protectors:

"Blitz Bug" Lighting protectors
These are not as sophisticated as the Polyphaser below, but still protect against lightning. Two versions are available. One has an SO-239 connector on each end. The other has a PL-259 on one end and an SO-239 on the other end. Take your choice for $8 each.

Polyphaser IS-VU50HN-MA Lightning Protector

Polyphaser is well know for extremely good lightning protection equipment. This coaxial antenna protector is designed to be inserted in the coaxial cable at the bottom of a tower.
This unit has two SO-239 connectors, and is rated to take 750 Watts from 50 to 300 MHz and from 380 to 550 MHz.

This particular unit includes the spec sheet, and appears that it might not have been used. It is not oxidized, or corroded.

These sell for about $75 new. Buy this one for $55.

Prices do not include shipping from Florida.

Thanks.

5795. Yaesu Standard C5718DA

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-07-16 21:16:33 UTC
From: John E
Topic: 5795 Message: 5795

Hi I have a Yaesu Standard C5718DA that will not power up. I have checked to see that the radio does have voltage internally.
This one has all of the controls in the microphone.

I am looking for a owners manual and or a service manual . Or any thing else that I could look for.

Thanks de John K0CQW

5798. For Sale - MFJ-209 Antenna Analyzer

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-07-18 19:35:21 UTC
From: Robert
Topic: 5798 Message: 5798

I purchased this analyzer new and I have used it for several years. It works fine.

The MFJ-209 will help you build and check antennas. Just plug in your coax to find the SWR of any HF antenna on any ham band from 2-160 Meters (1.8-170 MHz). The MFJ-209 can also be used as a frequency source. The coverage for each band may slightly vary from the coverage labeled on the cover. The frequency selector switch covers the following frequency ranges using six positions:

1.8 - 4.0 MHz, 4.0 - 10 MHz, 10 - 26.2 MHz, 26.2 - 62.5 MHz, 62.5 - 113 MHz, 113 - 170 MHz

The standard RCA phono jack for an external frequency counter has been replaced with a BNC jack. The unit has some scratches and a small spot of paint rubbed off from normal use. This is a used item and it works perfectly. The meter operates smoothly and agrees with my Bird 43. The dummy load shown in one of the photos is not included. The scale on the tuning dial is as close as it can be. A printed copy of the manual is included. Sold AS-IS

Uses 8 AA batteries (not included) or optional MFJ-1312D.

The MFJ-209 can be used to measure or adjust the following:
Antennas: SWR, resonant frequency, bandwidth, efficiency
Antenna tuners: SWR, frequency
Amplifiers: Input and output networks
Coaxial transmission lines: SWR, velocity factor, losses, resonance
Balanced transmission lines: Impedance, velocity factor, resonance
Matching or tuning stubs: SWR, resonant frequency, bandwidth
Traps: Resonant frequency
Tuned Circuits: Resonant frequency
Small capacitors: Value
RF chokes and inductors: Self resonance, series resonance, value
Transmitters and oscillators: Frequency

The manual is available at http://www.mfjenterprises.com/man/pdf/MFJ-209.pdf

This unit is still available from MFJ and lists for $159.95

I am asking $75 plus $11 USPS flat rate shipping.
Pictures are available.
Payment by USPS money order or PayPal only.
US buyers only.

From: Ben
Topic: 5802 Message: 5802

Very nice 160 and 80Mtr transmitter, AM and CW, 10W o/p. Tx uses 5763 in pa, plate and screen modulation, netting switch, am/cw switch, key and mic jack sockets, mic gain, aux o/p on rear. Needs psu of 6.3 and 300v or so. Nice crackle black case, very well made inside. Two meters to measure drive and plate current. Builtin aerial changeover relay fitted. Working. £50 post £10

pic at: www.qsl.net/g4bxd/amtx2.jpg

5803. FS: HT1000 and Icom F420-10

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-07-25 04:36:51 UTC
From: sarge43@att.net
Topic: 5803 Message: 5803

The HT1000 will do GMRS and 70cm. 430 to 470mhz. Has 2 great batteries that hold full charge, new antenna, drop in charger, CD with RSS. Cable is available on ebay from kawamall for around $15.00. It's 16channels 5 watts. $75.00 plus $10.00 Priority Mail flat rate to the 48 states.

F420 won't go to ham band but is loaded with GMRS freqs. Comes with radio, mic., power pigtail, CD with manuals, and RSS and the programming cable. $125.00 plus $10.00 Priority Mail shipping to the 48 states.

Both are in fine condition (non smoking environment) and work FB.

Thanks,
Sarge W5SRG/WQHX869

5813. TenTec HF Rig, Ant tuners, Interface, filter, mic and more FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-08-06 13:59:57 UTC
From: Ken Simpson, W8EK
Topic: 5813 Message: 5813

TenTec and related Items For Sale:

HF Transceiver, Antenna Tuners, Interface, Tuning Pod, Wattmeters,
Power Supplies, Microphone, and more

TenTec 585 Paragon HF Transceiver:

The Paragon is a top of the line transceiver that includes a
general coverage receiver. It covers 160-10 meters, including
WARC bands, with 100 watts output. The receiver is fantastic.
It has dual VFOs and many memories built in, along with a
speech processor. Basically, it has about every feature that
a ham could want in an HF rig.

This particular unit works 100% as best I can tell. Since the
rig does so many things, I am sure that there is something I
didn't test, but I don't know what it is (or I would have
tested it!). It has had all updates completed by TenTec.

Cosmetically, it is in extremely nice shape. The front panel
is extremely good. Most all of the lettering is clean and
crisp. This one also has the Giehl chip in it making it
similar to a Paragon II.

Large manual and power cord included for $650.

TenTec 238 Roller Inductor Antenna Tuner:

This HF antenna tuner will handle the full legal limit, and will
match almost anything. It is rated to match loads up to 3000 ohms.
TenTec
It is an "L" network, which means that there is only one correct
matching point, and not false readings like some tuners. It has a
roller inductor that permits matching all HF bands, including the
WARC bands.

In addition to the tuner, it also includes a wattmeter with 200
and 2000 watt scales, plus SWR bridge. There is also an antenna
switch built in, so this unit will handle all of your antenna
needs.

This particular unit works fine, and looks extremely nice. I can
not find a scratch or defect on it. With paper work for $395.

MFJ 949 E Antenna Tuner

The MFJ-949E deluxe 300 watt Versa Tuner II gives you full coverage
from 1.8 to 30 MHz, with a peak and average reading cross-needle

SWR/power meter. It features a custom designed inductor switch, 1000 volt tuning capacitors, Teflon insulation washers and proper L/C ratio to ensure arc-free operation with up to 300 Watts. MFJ's Cross-Needle Meter shows you SWR, forward and reflected power simultaneously. It reads both peak and average power on 300 or 30 watt ranges. A dummy load is built in. It includes an antenna switch for the two coaxial cables and one random wire or balanced line, in addition to the dummy load. It needs 12 V DC to illuminate the meter.

This is the current model that MFJ is selling. This particular unit works fine, and looks close to new. With paper work for $125.

TenTec Model 258 RS-232 interface board w/258-IBM Software
This accessory will add a computer interface to TenTec HF transceivers. I know for sure it works with the 585 Paragon, and my memory says it also works with the Omni V, and I think the Omni VI, although I think certain interations of the Omni VI included it as standard. It consists of a plug in board, plus cabling to a DB-25 connector.
In addition to the hardware, I also have the software, for use on a standard PC.
It is in good shape and works fine.
$135 for both the hardware and software

TenTec 301 "Tuning Pod"
This unit can be used with an Omni V and Omni VI, and I think most of the TenTec rigs that use an optical encoder. It permits one to tune the rig from a semi-remote location. This one works fine and looks very close to new. With paper work for $125.

TenTec 288, 1800 Hz filter
1800 hz for wide CW, narrow SSB or digital use
Fits Corsairs, Paragons, Omni V and VI, and others.
It looks like new, with paperwork. $75

MFJ 815 B Cross Needle Wattmeter:

The MFJ-815B cross-needle meter allows you to monitor both forward and reflected power, and SWR simultaneously. There are buttons to select either Peak or Average reading and power ranges of 200/2000 watts forward and 50/500 watts reflected. Frequency coverage is 1.8 to 60 MHz, so it covers 6 meters in addition to the HF bands, making it ideal for some of the new rigs that include 6 meters.
The peak reading function of this meter and meter light require external 12 V DC.

This particular unit works fine, and looks very close to new. With paper work for $65.

MFJ 815 (not the B model) similar to above.
It works fine, and looks good. With paper work for $50.

TenTec Power Supplies:

TenTec 961 power supply with speaker
Produces 20+ amps at 13.8 Volts DC.
This supply matches the Corsair II, Paragon, and Omni V/VI series.
A nice speaker is included. This particular unit works 100% and
looks very good. Paper work is included for $150.

TenTec Model 280 power supply, 20 amps at 13 V DC
This supply is quite heavy duty electrically. It has 2 pass
transistors, instead of the one that some have. It also has an
ammeter on it.
This one works fine, and looks OK as well.
A previous owner removed the molded in TenTec power
cable on the back and added very heavy binding posts,
so that it can be used with many different rigs and
not just TenTec. It also has a couple RCA jacks for
lower power use.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply:
This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is very quiet, and well
shielded, and does not produce any electrical noise that
I could find. $150

TenTec 705 desk microphone
This electret desk mic has the 4 pin connector, with PTT and
"hold" buttons. It works great, and looks like new.
With paper work for $75.

Prices do not include shipping from Florida.

Thanks.

Antenna Tuners, Wattmeters / SWR Bridges, Packet TNC, Digital Interfaces, Lightning Protection, DMM, Cables For Sale:

TenTec 238 Roller Inductor Antenna Tuner:

This HF antenna tuner will handle the full legal limit, and will match almost anything. It is rated to match loads up to 3000 ohms.

It is an "L" network, which means that there is only one correct matching point, and not false readings like some tuners. It has a roller inductor that permits matching all HF bands, including the WARC bands.

In addition to the tuner, it also includes a wattmeter with 200 and 2000 watt scales, plus SWR bridge. There is also an antenna switch built in, so this unit will handle all of your antenna needs.

This particular unit works fine, and looks extremely nice. I can not find a scratch or defect on it. With paper work for $395.

MFJ 949 E Antenna Tuner

The MFJ-949E deluxe 300 watt Versa Tuner II gives you full coverage from 1.8 to 30 MHz, with a peak and average reading cross-needle SWR/power meter. It features a custom designed inductor switch, 1000 volt tuning capacitors, Teflon insulation washers and proper L/C ratio to ensure arc-free operation with up to 300 Watts. MFJ's Cross-Needle Meter shows you SWR, forward and reflected power simultaneously. It reads both peak and average power on 300 or 30 watt ranges. A dummy load is built in. It includes an antenna switch for the two coaxial cables and one random wire or balanced line, in addition to the dummy load. It needs 12 V DC to illuminate the meter.

This is the current model that MFJ is selling. This particular unit works fine, and looks close to new. With paper work for $125.

MFJ 815 B Cross Needle Wattmeter:

The MFJ-815B cross-needle meter allows you to monitor both forward and reflected power, and SWR simultaneously. There are buttons to select either Peak or Average reading and power ranges of 200/2000 watts forward and 50/500 watts reflected. Frequency coverage is 1.8 to 60 MHz, so it covers 6 meters in addition to the HF bands, making it ideal for some of the new rigs that include 6 meters.

The peak reading function of this meter and meter light
require external 12 V DC.

This particular unit works fine, and looks very close to new.
With paper work for $65.

MFJ 815 (not the B model) similar to above.
It works fine, and looks good. With paper work for $50.

SWR Bridges / Field Strength Meters:

Midland 23-126 SWR Bridge / Field Strength Meter
This is an HF SWR Bridge, but it can be used up thru 2 meters,
with slightly reduced accuracy. It is also a field strength
meter. SO-239 connectors.
This one works fine, and looks extremely nice. I do not see
any scratches on it; it may not have ever been used. In its
original box with original instructions and small telescoping
antenna. $35

ThordTest SWFS-2 SWR Bridge / Field Strength Meter
Appears to be the same as the Midland above, but the outer
case is beige instead of black.
In original box, with original instruction sheet, and antenna.
$30

AEA PK-88, Packet Terminal Node Controller
This unit is a hardware interface between your computer and your
rig. It has actual hardware, instead of using computer software
to generate and decode the signal. Using the PK-88 is like using
a real modem, as opposed to a "WinModem" for internet access.
The PK-88 has good filtering, and does a super job on Packet.
Of course it can also be used for APRS.
This one works fine and looks fine also. Actually, it looks close
to new; I can not find a scratch on it.
The big thick manual is included, as is the computer cable, radio
to TNC cable, and power cable, all in the original box, for $65.

AEA AC-1
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive,
so it can be used on many different things that require
12 V DC at up to an amp, such as keyers, antenna tuners,
etc. $17

AEA "Wall cube" as above, but only 1/2 amp rating,
which is enough for the PK-88. $12

Heath HD-15 phone patch / digital interface

This is the unit with the VU meter on the left and 3 knobs that
match the SB series to the middle and right. Low or high Z output

to the transmitter. It can also be used as an interface for PSK31, and other digital modes, using it as a sound card interface.

It is in excellent condition. It has a couple of modifications that are very professionally done. There is a modular jack added for the phone line. Two RCA phono jacks have been added for speaker in and out. In both cases, they are in parallel with the original terminal strip, so either may be used. The actual meter movement has been replaced with a slightly larger, and more professional looking meter.

Paper work included for $30.

HD-15 as above, but without the nice modifications. Everything is original. No scratches or imperfections. $25

Waters "Universal Hybrid Coupler II" Model 3002:

Most of us would likely call this a phone patch, but it is really much more than that. It does that, but also will interface with a tape recorder, and permit recording and play back of on-the-air QSOs. Nothing says that the tape recorder input must be used that way. Connect the sound card in your computer in this position, and you have a very effective interface.

Model 3002 includes a speech compressor powered by a 9 volt battery. The front panel is finished on both sides, with one side having it set in a horizontal position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Lightning Protectors:

"Blitz Bug" Lighting protectors
These are not as sophisticated as the Polyphaser below, but still protect against lightning. Two versions are available. One has an SO-239 connector on each end. The other has a PL-259 on one end and an SO-239 on the other end. Take your choice for $8 each.

Polyphaser IS-VU50HN-MA Lightning Protector

Polyphaser is well know for extremely good lightning protection equipment. This coaxial antenna protector is designed to be inserted in the coaxial cable at the bottom of a tower.
This unit has two SO-239 connectors, and is rated to take

750 Watts from 50 to 300 MHz and from 380 to 550 MHz.

This particular unit includes the spec sheet, and appears
that it might not have been used. It is not oxidized,
or corroded.

These sell for about $75 new. Buy this one for $55.

Micronta 21-194 Digital Multimeter:

This DMM not only does the traditional things that DMMs do
(measure voltage, current, etc.), but is also a transistor
tester and a capacitance meter. Voltage ranges are up to
1000 Volts, current to 10 Amps, and capacitance to 20
microfarads.

This particular meter looks good, and functions fine on all
modes except resistance.

Probes included for $15.

Linear Amp Switching Cable for Kenwood Rigs:
This cable goes from a Kenwood transceiver to a linear
amplifier to switch the amp from transmit to receive. One
end has a DIN connector, as is used with most Kenwood rigs.
The other end has an RCA phono plug, as used by most linear
amplifiers. Before using this cable, please check the
switching capabilities of your transceiver.
This cable has one coax for switching the relay. $12

Cables for keys and keyers:

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it,
as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector
on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

Coax Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Prices do not include shipping from Florida.

Thanks.

I have a less than year old (bought on Oct. 29th, 2009 for $931) includes radio, 2 hand mic's MH-31 and MH-59 DTMF remote mic, LDG FT meter (blue), laminated niffty mini manual, separation kit, all original boxes, 2CD's with info and manuals for the FT-857D original operators manual CAT usb cable and amplifier relay cable. I have the receipts from HRO in Phoenix AZ. I am asking $760 or partial trade for an older fully working HF radio like a TS-530 or similar plus balance of $760 in cash.
Price: $ 760

*** Tube Sockets and Accessories***

Eimac -- Databook set circa 1985 in two large yellow Eimac 3 ring binders. Includes data sheets from 1976 edition and earlier. Both binders are stuffed to the max! Very good condition. $200

Acorn tube 5 pin ceramic sockets. NOS -- $5 ea

Birnbach 434 "50 watt" socket. Base is cracked clean through adjacent to opposite contacts, not noticeable from the top. Still quite useable as-is, or glue it. $8

Coaxial Planar Tube -- shielded heater/cathode contact assembly. Fits 2C39, 3CX100A5 or similar. Silver plated, NOS -- $10 each

Collins -- 22 assorted tube shields, 7 & 9 pin, short & tall. RFE. $20 all

Eimac SK-620 sockets, "unused" pair. One is a SK-620; the other a SK-620A. Probably 40 years old, a bit tarnished from storage, and unused except the heater pins on one were once

soldered... probably to check some tubes. $60 for the pair.

Eimac 3" (or so) diameter Grid lead contact & 6" wire to lug as used on 3CX2500, 3CX3000, leaded versions etc. $5 pair

Johnson 122-101 ceramic 7 pin septar socket (accepts 826, 832, 4D32, PL6549, PL6569, etc). These were likely a special order as they have the standard ground shield but, no ground clips. NOS though, a bit dusty & tarnished from long storage -- $10ea

Johnson 122-237 ceramic 7 pin giant socket for 813, etc. NOS, $15

Johnson 122-237 ceramic 7 pin giant socket for 813, etc. Used, $10

Johnson A pair of used 122-237 ceramic 7 pin giant sockets for 813, etc. including eight base clips. $25

Johnson 122-247A or 122-248 ceramic 7 pin septar socket (accepts 7094, 8877, 832A, etc.) Used, $10

Johnson 124-115-2 UHF socket similar to Eimac SK-620. NOS, but, a mite tarnished from age. $40

Millen 36001 or National SPP-9 -- 9/16" Ceramic Plate Caps (fit 813 or similar) Used. Your choice, $3 ea

6 inch plate leads with National medium (.566") clips on one end; solder lugs on the other. The leads are covered with 16 each 5/16" diam. ceramic insulators. $5 pair

Pomona Electronics TVS-7 & TVS-9 test extender sockets for 7 & 9 pin miniature tubes. Little used. $40 both.

4 Pin Octal size female cable connector with hood. Used -- $3

6 Pin Octal size female cable connector with hood. NOS -- $5

9 pin Octal size Plugs with hoods. NOS -- $7 ea.

11 pin Octal size Plugs. Amphenol 86-CP11 or similar. New -- $5 ea.

11 pin Octal size Plugs. Amphenol 86-CP11 or similar. Used -- $3 ea.

11 pin Octal size sockets, round (may be used on cable or chassis). Used -- $3 ea.

11 pin Octal size sockets, chassis mount w/ears. NOS -- $7 ea

11 pin Octal size M&F pair cable connectors with hoods. NOS -- $15

IERC Heat Dissipating tube shield, size T12. $10

Eight assorted 7 & 9 pin miniature tube shields. $4 all

5823. FS: Dual band Kenwood tk-630H / Tk-830H 6meters 440/70cm high power radio system

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-08-12 13:35:34 UTC
From: n0pbm1
Topic: 5823 Message: 5823

I have for sale a dual band Kenwood 630H / 830H radio system.
The TK-630H is a 110 watt low-band radio 40-50 MHz (that does to 54 MHz easy)

the TK-830H is a 75 or 80 watt UHF (not sure which) 450-475 MHz (that does down to 440 easy)

It has with it the full featured KCH-4 control head, ext speaker, mic, and control cable and interface cable for between the 2 RF decks i expanded it to 160 channels.

What it does not have with it is power cables for the rf decks (this is the standard 6 pin molex style plug like the older HF rigs use), no brackets sorry i never bought the KMB-9 mounting brackets and not sure where i put the speaker bracket or the control head bracket.

Programming can be done if needed you tell me what you what in it and i will let you no my price.

Shipping is on you what i mean is you pay for shipping let me know you address and i will figure out shipping via UPS.

I have some pictures of the radio system if someone would like to see them. Give your email address and i will send them.

I built this radio system to use in the truck for 6m and 440mhz then found that i no longer needed it, so now its time for it to move on to a new home.

Gary N0PBM
glaforce at centurytel dot net

I guess i should include a price here I'm asking $350.00 heck if you pay the asking price i will even ship it to you in the lower 48 states on me. If you don't like the asking price then make an offer the worst that will happen is i will say NO.

BTW I ONLY SHIP TO THE LOWER 48 STATES.

Gary N0PBM

5826. Antennas, Tuners, Wattmeters, and antenna related items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-08-13 11:44:50 UTC
From: Ken Simpson, W8EK
Topic: 5826 Message: 5826

For Sale:
HF Antennas and related items such as Antenna Tuners, Wattmeters, SWR Bridges, Lightning Protectors, Low Pass Filters, Mobile Antennas, Rubber Duck Antennas, and Connectors

HyGain 18 HT HyTower HF Vertical Antenna:

The HyGain HyTower HF vertical covers 80, 40, 20, 15, and 10 meters. The WARC bands (and 160 meters) can be added, but are not a part of this antenna at present. This is an extremely rugged antenna, consisting of about 30 feet of actual tower, with additional stubs for tuning.

Automatic band selection is achieved through a unique stub decoupling system so that an electrical 1/4 wavelength (or odd multiple) exists on all bands. Unity gain on 20, 40, 80; 2 dB on 10 and 15 Meters.

This particular antenna is in extremely good condition. It has stainless steel hardware. The galvanizing on the tower is very good. As far as I know all hardware is included. The base insulators are new.

Due to size, this is pick up only, near Ocala FL, close to I-75.

This antenna sells for about $1000 new. With paper work for $450.

Gap "Titan DX" HF Vertical Antenna:

The Titan is an 8 Band Multiband DX Antenna. It covers 80 thru 10 meters, including the WARC bands. It covers the entire band on 40 thru 10, and about 100 KHz on 75/80 meters. It is about 25 feet tall, and includes a counterpoise, so that no radials are required.

One of the primary virtues of the Titan is the GAP center feed. By elevating the feed the earth loss is dramatically decreased, which means the RF is going out to make the contact instead of into the ground to warm the earth. Reducing the earth loss eliminates the need for a radial system. The Titan requires NO RADIALS.

This particular antenna is in extremely nice shape with no corrosion. Most of the aluminum is still shiny.

These sell new for about $400. This one is close to new, with paper work for $250. Pick up only near Ocala FL.

TenTec 238 Roller Inductor Antenna Tuner:

This HF antenna tuner will handle the full legal limit, and will match almost anything. It is rated to match loads up to 3000 ohms.

It is an "L" network, which means that there is only one correct matching point, and not false readings like some tuners. It has a roller inductor that permits matching all HF bands, including the WARC bands.

In addition to the tuner, it also includes a wattmeter with 200 and 2000 watt scales, plus SWR bridge. There is also an antenna switch built in, so this unit will handle all of your antenna needs.

This particular unit works fine, and looks extremely nice. I can not find a scratch or defect on it. With paper work for $395.

MFJ 949 E Antenna Tuner:

The MFJ-949E deluxe 300 watt Versa Tuner II gives you full coverage from 1.8 to 30 MHz, with a peak and average reading cross-needle SWR/power meter. It features a custom designed inductor switch, 1000 volt tuning capacitors, Teflon insulation washers and proper L/C ratio to ensure arc-free operation with up to 300 Watts. MFJ's Cross-Needle Meter shows you SWR, forward and reflected power simultaneously. It reads both peak and average power on 300 or 30 watt ranges. A dummy load is built in. It includes an antenna switch for the two coaxial cables and one random wire or balanced line, in addition to the dummy load.
This is the current model that MFJ is selling. This particular unit works fine, and looks close to new. With paper work for $125.

HF Digital Peak and Average Reading Wattmeter:

Radio Shack MTA-20 (21-527) Digital Wattmeter will read either peak or average power. It is a digital meter with no moving parts, although it does have a sort of analog bar graph on it.

It is rated to cover 1.8 thru 30 MHz, so it covers all of the HF bands. It will measure up to 2000 Watts, in ranges of 2000, 200, or 20. It will also indicate SWR, which requires at least 1/2 Watt. It has a nice back light, and requires 13 V DC for operation. There is about a 3 foot cable between the digital display and the remote sensor. This is a great meter.

This particular meter is in its original box, and appears to not have been used. It has been tested, and works fine. $100

MFJ 815 B Cross Needle Wattmeter:

The MFJ-815B cross-needle meter allows you to monitor both forward and reflected power, and SWR simultaneously. There are buttons to select either Peak or Average reading and

power ranges of 200/2000 watts forward and 50/500 watts
reflected. Frequency coverage is 1.8 to 60 MHz, so it covers
6 meters in addition to the HF bands, making it ideal for
some of the new rigs that include 6 meters.
The peak reading function of this meter and meter light
require external 12 V DC.

This particular unit works fine, and looks very close to new.
With paper work for $65.

MFJ 815 (not the B model) similar to above.
It works fine, and looks good. With paper work for $50.

SWR Bridges:

Quement SWB-2 Dual Meter
This unit features two separate meters -- one for reading forward
power and another for reading SWR. This permits one to easily
monitor both the power going out, and the SWR on the antenna.
It has SO-239 connectors on each end.
It will work on HF, and VHF, covering 3 to 150 MHz, so is
ideal for the new rigs that include 6 and 2 meters.
Works fine and looks great. With paper work for $40

Midland 23-126 Single Meter SWR Bridge / Field Strength Meter
This is an HF SWR Bridge, but it can be used up thru 2 meters,
with slightly reduced accuracy. It is also a field strength
meter. SO-239 connectors.
This one works fine, and looks extremely nice. I do not see
any scratches on it; it may not have ever been used. In its
original box with original instructions and small telescoping
antenna. $32

ThordTest SWFS-2 SWR Bridge / Field Strength Meter
Appears to be the same as the Midland above, but the outer case
is beige instead of black.
In original box, with original instruction sheet, and antenna.
$30

Lightning Protectors:

"Blitz Bug" Lighting protectors
These are not as sophisticated as the Polyphaser below,
but still protect against lightning. Two versions are
available. One has an SO-239 connector on each end.
The other has a PL-259 on one end and an SO-239 on
the other end. Take your choice for $8 each.

Polyphaser IS-VU50HN-MA Lightning Protector

Polyphaser is well know for extremely good lightning
protection equipment. This coaxial antenna protector
is designed to be inserted in the coaxial cable at the

bottom of a tower.
This unit has two SO-239 connectors, and is rated to take
750 Watts from 50 to 300 MHz and from 380 to 550 MHz.

This particular unit includes the spec sheet, and appears
that it might not have been used. It is not oxidized,
or corroded.

These sell for about $75 new. Buy this one for $55.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce
harmonic interference. All have SO-239 connectors, and include
paper work.

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500
Watts. It is the latest model B&W filter.
In very nice condition, it looks very close to new. $40.

B & W 425
It cuts off just above 10 meters, and will handle 1500+ Watts.
Maximum attenuation is at 52 MHz, with at least 70 db across
the band. This is an older, heavier duty model. It weighs
almost twice as much as the newer model. $35

Drake TV-3300-LP
This is a modern low pass filter has been optimized to have
more attenuation in the 40 MHz region, where many TVs have
their IF. It is good for 1000 Watts "average" according to
the manual, and has over 80 db attenuation at 41 MHz.
This one looks great. $30

Larsen LM type VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Stacked whip is included. $12

Larsen LM-150, 2 meter antenna for Larsen LM Mount
Has 3 db gain on 2 meters.
This coil is still in its original box, and appears to
never have been used. It even has its rubber washer with
it, along with instructions.
Coil only for $20.
Coil, with 4 foot used whip. $26

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount,
and others. It can be cut for 2 meters, 220 MHz, or
450 MHz bands. $9

Avanti "On Glass" antenna for 440 MHz:
This antenna was made by Avanti to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.
Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Coaxial Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Coax connectors and adapters:

Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5
-
UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Antenna adapter for Kenwood TH-21/31/41 HTs
Adapts the antenna connector found on these HTs to a
standard PL-259 connector. $8

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC Regular length, 6 1/2 inches long
BNC - Original from Kenwood TH-215, 5 inches long
Alinco Stubby w/BNC Connector, 4.6 inches long

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

BNC Stubby for 440 MHz, 3 inches long

Prices do not include shipping from Florida.

Thanks.

5827. Interfaces for computer/digital modes FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-08-14 13:00:18 UTC
From: Ken Simpson, W8EK
Topic: 5827 Message: 5827

Various Interfaces for computer control, digital modes,
etc. For Sale:

Kenwood IF-232c Interface / Converter

The IF-232c is the interface adapter for connection between
the RS-232C terminal of a personal computer and the interface
terminals of transceivers capable of computer control, such
as the TS-440S, TS-940S, the TS-811/711 series, and others.

The interface acts as a voltage converter between the RS-232C
port (-12 to + 12V) and the TTL levels of the transceiver
(0 to +5V), and as a noise-suppressor.

This one includes a wall wart power supply, DIN plug, and
paper work for $60.

Heath HD-15 phone patch / digital interface
This is the unit with the VU meter on the left and 3 knobs
that match the SB series to the middle and right. Low or
high Z output to the transmitter. It can also be used as
an interface for PSK31, and other digital modes.
It is in excellent condition. It has a couple of modifications
that are very professionally done. The actual meter movement
has been replaced with a slightly larger, and more professional
looking meter. Knobs are original. There is a modular jack
added for the phone line. Two RCA phono jacks have been added
for speaker in and out. In both cases, they are in parallel
with the original terminal strip, so either may be used.
It works fine and looks close to new. A terrific unit.
Paper work included for $30.

Heath HD-15 Phone Patch
As above, but with no modifications, in extremely good condition.
No scratches or imperfections. Paper work included for $25.

Waters "Universal Hybrid Coupler II" Model 3002:

Most of us would likely call this a phone patch, but it
is really much more than that. It does that, but also
will interface with a tape recorder, and permit recording
and play back of on-the-air QSOs. Nothing says that the
tape recorder input must be used that way. Connect the
sound card in your computer in this position, and you
have a very effective interface.

Model 3002 includes a speech compressor powered by a 9 volt battery. The front panel is finished on both sides, with one side having it set in a horizontal position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Earthmate GPS by DeLorme, with software

The GPS unit plugs into a USB port on your computer. DeLorme Street Atlas Software is included, so plan your route, and also let the GPS tell you where you are, and give you voice directions, if desired. You can even ask it questions!

It will calculate your route and tell you exactly where and when to turn, plus figure statistics such as mileage.

The GPS hardware unit is powered from the USB port, so no additional power supply is needed.

This particular unit is in close to new condition, in its original box, with the GPS unit, and the software. I would think that it could be used with APRS. $65

Linear Amp Switching Cable for Kenwood Rigs:
This cable goes from a Kenwood transceiver to a linear amplifier to switch the amp from transmit to receive. One end has a DIN connector, as is used with most Kenwood rigs. The other end has an RCA phono plug, as used by most linear amplifiers. Before using this cable, please check the switching capabilities of your transceiver.
This cable has one coax for switching the relay. $12

Books about Digital subjects:

The Radio Amateur's Digital Communications Handbook
By KR3T, J Mayo, Hardback Book Published by Tab
Like New, 208 pages, $12

CQ: The Packet Radio Operators Manual
By Buck Rogers, K4ABT, Close to new condition, $14

Your Packet Companion by Steve Ford, WB8IMY
ARRL, 1995, First Edition, $5

Computers by Long and Long
Large book with about 750 pages. Answers to problems included. Like new. $20

Prices do not include shipping from Florida.

Thanks.

---------- Forwarded message ----------
From: John Dilks, K2TQN <oldradio@...>
Date: Sun, Aug 15, 2010 at 18:57
Subject: [AWA] For Sale at AWA meet in Rochester = K2TQN
To: AWA-Group <antiquewirelessassociation@yahoogroups.com>,
cc-awa@yahoogroups.com

I'm bringing some nice, rare and expensive things to sell at the meet.

#1 Hallicrafters S-1 - The First receiver they made (Asking $3800.)
as shown in QST November 2000.
http://www.eht.com/oldradio/arrl/2000-11/index.html

#2 Heathkit AR-1 with cabinet, as shown in QST January 2005
The first Heath amateur receiver. (Asking $900.)
http://p1k.arrl.org/cgi-bin/topdf.cgi?id=713&pub=qst (ARRL members only)

#3 Utah Jr. - the one pictured, (modified - 3 photos going down on the right side of page.) (Asking $325.) As shown in QST March 2007
http://www.eht.com/oldradio/arrl/2007-03/Utah_jr_transmitter.htm

#4 Mechanical TV, Pioneer Scanning Disk TV, model T-3, exactly like the ad on this web page.... These are very rare! (Asking $2500.) As
as shown in QST October 2002.
http://www.eht.com/oldradio/arrl/2002-10/early-ham-tv.htm

#5 Lab Tube Tester, like no other you have ever seen (Asking $3800.)
"Daystrom Weston CA-1630 Electron Tube Analyzer", tests every
tube known, even big transmitter tubes. Read the specs here
.... Mine is just like it.
http://www.tubedepot.com/tt-ca-1630.html

#- Selling for a friend (Asking $650)
A DeWald A301 Brown Catalin, Like the one below, but rare "brown catalin"
http://morphyauctions.auctionflex.com/ai2/31120/6506/2318696_2HK0WHGVH.jpg

---> Less expensive items follow ....

#6 Hickok 800A tube tester (red case), Like this one below... (Asking $250)
http://bellsouthpwp.net/p/a/padgett46/laterh.htm

#7 B&K 5" Scope with 1 probe, dual channel, 20 mhz (Asking $110)
no photo

#8 Several Horn Speakers, Magnavox, RCA, & Western Electric Double
Cone (frame only)
Like this one http://www.liveauctioneers.com/item/5847380
RCA
http://www.worthpoint.com/worthopedia/rca-radiola-uz-1325-horn-radio-speaker-ca-1920

#9 A replica of a vintage code (cw) transmitter that used slats from
an orange crate for a chassis, sucker sticks to support the home
wound coil, and Fahnestock clips to connect antenna and key. (Asking
$75.) As shown in QST January 2008.
http://www.eht.com/oldradio/arrl/2008-01/classic-xmtr-kit.htm

#10 A crude original version, sort of like above. (Asking $50) no photo....

See you there, 73, John Dilks, K2TQN

*** Vintage Electronic Manuals ***

These are originals unless noted.
Priced as shown or... $400 for all of them

Altec -- M14 Microphone system -- $4

Ampex

Model 600 Tape Recorder -- $10
Mddel 601 Tape Recorder (copy) -- $5

Army / Airforce / Navy

AN/URM25D Signal Gen (partial copy) -- $5
BC-314G Receiver (schematic copy only) -- $1
BC-344D Receiver (schematic copy only) -- $1
SCR-211 A-T plus AA-AL Frequency Meter -- $10
Hughes HTR-12A/C HTR-13A/C Radar -- $10
Navy Mark V Sextant (AN-05-35-22) unbound copy -- $7

Concord Data Systems -- 224 Autodial Modem -- $3

Collins Radio

32S-1 Transmitter -- $40
520 5430 00 Vernier Tuning Knob -- $4

Cushcraft

Ringo Antennas AR-2, AR-25, AR-220, AR-450 -- $4
Ringo Rangers ARX-2, ARX-220, ARX-450 -- $4

Gilbert -- Model 4½ Erector Set Manual, 1950's vintage, cover a bit worn, insides fine, $10.

Görler -- UT-345 AFC / UT-343 FM Tuner -- $2

Groth -- TC2/TC3 Turn Count Dial data sheet -- $1

Heathkit
309C RF Probe -- $3
A-9C Audio Amplifier -- $7
FM-3 FM Tuner -- $7
FM-4 FM Tuner -- $7

0-12 'Scope schematic copy -- $1
WA-P2 Preamplifier -- $7

Hewlett Packard
150A/AR Oscilloscope -- $5
152 Dual Trace Amplifier -- $3
200CD Wide Range Oscillator -- $10
202D Oscillator (copy) -- $1
400A VTVM -- $3
400C VTVM -- $3
400D/H/L VTVM -- $7
3312A Function Generator -- $15
6200A DC Power Supply -- $10
6201B DC Power Supply -- $10
6203B DC Power Supply -- $10
6204B DC Power Supply -- $10
7035B X-Y Recorder -- $15
8556A Spectrum Analyzer LF unit -- $30
Spectrum Analyzer App Note 150-2 Pulsed RF w/Perrygraf calculator -- $10
281A Operating Note 2/66 -- $1
8740A Transmission Test Unit Operating Note 3/68, 20 pages (copy) -- $2
10001A-D, 10002A-D, 10003A-B Probes Operating Note (specs & service info) $3

Hustler -- 4-BTV Trap Vertical -- $2

Hy-Gain
204BA 4 Element, 20 Meter beam manual. Partial original/copy from 2 manuals. Includes dimensions & SWR graphs -- $3
TH3 (copy) $2

Jennings -- Type RC5, RC6, RC10, RC21E, RC21G, RC40 data sheets -- $3 all

Magnecord
M-30 Tape Recorder + Sams manual -- $7
PT6-AH Schematic (blueprint) -- $2

Motorola
Motran (136-174 MHz) FM transceiver manual, 68P81043A45C $10
Motran (150.8-174 MHz) FM transceiver service manual (copy) 68P81041A15 -- $5
Model X53GJV-1091A Two-Way FM Radio (160-174 MHz) service manual (copy) -- $5
NU178-A Microphone (copy) -- $1
M68HC04EVM Evaluation Module User's Manual -- $10

McCoy Electronics -- 32B1 & 48B1 filter data sheet -- $2

National Radio
FBX & FBX-A Receiver Alignment instructions (copy - 8 pages) -- $2
SW-3 Receiver (copy - 12 pages) -- $2

Pilot Super Wasp -- Data Sheet #7 K-100 Battery Type kit assembly & operation manual (copy) -- $2

Polaroid -- Land Camera Model 360 User's Manual -- $3

QUME -- Laser TEN/LaserTENPLUS Maintenance manual NISW (new in shrink wrap) -- $7

Radio Shack
CT-101 Cell Phone Owners Manual -- $1
SA-10 Stereo Amplifier -- $1
21-1167A Ceramic Mike -- $1
TRC-83 CB Walkie Talkie -- $1

RCA
Pressure Microphone Type 88-A -- $3
5-E 5KW AM Broadcast Xmtr -- $15
Sabotronics -- 2000 DMM -- $2

Signal One -- CX7A (partial copy -- schematics mostly) -- $3

Sony
BVU-50 Videocassette Recorder Operation & Maint. Manual -- $20
VO-2850 Service Manual -- $20
VO-2860 Service Manual -- $25

Teac
MV-550 VCR Service Manual -- $5
MV-800 VCR Owners Manual -- $1

Tektronix
535/545 Operators Manual (the little one that goes in the top compartment) -- $5
2432 Digital Oscilloscope User Reference Guide New! (small) -- $15
P6006 Probe -- $5
P6047 Probe -- $7
P6201 Probe -- $10
FG503 Function Generator -- $15
PS503 Power Supply -- $15
PS503A Power Supply (back cover missing) -- $10
TG501 Time Mark Generator Comb bound copy -- $10
TELEX Hy-gain -- BN-86 Balun -- $2

Texas Instruments

SR-52 Calculator Operating manual -- $5
TI-89 Titanium Calculator Guidebook -- $10

Van Gordon Engineering -- SD-80 Dipole Antenna Manual (copy) -- $1

W2AU -- Balun Instructions -- $1

Xerox -- D-25 Printer Users Manual -- $2

Yaesu -- FT-101E / FT101 ES (in Japanese) -- $5

****

5831. FS: Inductors -- Air, Variable, Ferrite

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-08-18 16:26:25 UTC
From: Radio WC6W
Topic: 5831 Message: 5831

Roller Coils & Parts

28uH, 42 Turns #12, a skosh over 2" in diameter, 8 TPI, 3" x3" x 7" overall plus 3" shaft. Fiberglass coil supports. I think that this is the coil employed in the MFJ-989 antenna tuner. Excellent condition. $50

New! GE Ceramic end plates, part no. 7463338, for a GE roller coil. I believe these fit the GE coil that was used in the BC-375. $10 pair

****

B&W Air Dux coils -- These are NOS, 10" lengths, unless noted otherwise

#1208T 1.5" dia, 8TPI, #16 wire, slight tarnish -- $20
#1216T 1.5" dia, 16TPI, #20 wire, somewhat tarnished -- $20
#1006T 1.25" dia, 6TPI, #14 wire, somewhat tarnished -- $15

plus a NOS partial length

#1008T 1.25" dia, 8 TPI, #16 wire, 8" long -- $12

--- some other partial lengths, including some Miniductors:

#2410T 3" dia, 10 TPI, #14 wire, 2.5" long slightly tarnished -- $10

#3030 2.5" dia, 8 TPI, #14 wire, 4" long tarnished -- $10
#3031 2.5" dia, 10 TPI, #16 wire, 3" long somewhat tarnished -- $10
#3031 2.5" dia, 10 TPI, #16 wire, 1.75" long somewhat tarnished -- $5
#3035 3" dia, 10 TPI, #16 wire, 4-1/2" long, last inch was squished a bit -- $10

---a few Illumintronic Engineering (early Air Dux) parts:

36T -- 1.75" dia.x 3.25" winding w/ indented turns, 16 TPI, #16, 50 uH, 4.25" overall including plastic center support, used somewhat tarnished -- $20

375 7367-P1 -- 1.5" dia.x 5.75" winding w/ indented turns, 14 TPI, #17,
7" overall including plastic center support, un-used somewhat tarnished -- $25

980-0121-000 -- 2.5" dia. x 7.5" winding w/ indented turns, 8 TPI, #14,
9.5" overall including plastic center support, used somewhat tarnished but, no turns soldered -- $30

More coils:

Miller #4551 4.0 mHy, 400mA, transmitter RF choke. A touch grungy from 40 years in a box but, NOS -- $15 ea.

A large RF choke -- #22 enameled wire space wound 24 TPI for 2.75 on a 1" diameter grooved fiberglass form 5" overall -- $7

Miller 62A024 series (.173-.272uH I think!?) coils, 1/4" diameter wound with a 5 turn coil. Blue (carbonyl SF 40-300 MHz) core. 4 terminals, 2 currently unused. NOS.-- 2/$1

Antique Radio coil -- wound with old green cloth covered wire, 3" diameter & 3" long overall on bakelite form, 138 uH total, tapped at 6 turns. -- $10

Toroidal Tank coil -- The core is fiberglass & resin encased. It is currently wound with 20 turns of #12 wire. There are notches in the form for up to 40 turns. It is a bit over 4 inches in diameter and about 1-3/4" thick. This was made by Bob, W6YUY. See his article in August 1985 Ham Radio magazine "Design a Toroidal Tank Circuit for your Vacuum Tube Amplifier". $50

Ferrite Rods with threaded brass shafts

1-1/8" long x 1/4" diameter w/ 1-1/4" long 4-40 threaded shaft -- $1 ea
1-1/2" long x 3/8" diameter w/ 1-1/2" long 6-32 threaded shaft -- $2.50 ea
2-1/4" long x 3/8" diameter w/ 1-1/2" long 6-32 threaded shaft -- $3.50 ea
3"long x 3/8" diameter w/ 1-1/2" long 6-32 threaded shaft -- $5 ea

****

More parts for sale may be seen here:

5832. FS: AN/SRA-24 (XG-2)

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-08-19 17:42:15 UTC
From: Radio WC6W
Topic: 5832 Message: 5832

AN/SRA-24 (XG-2) -- Navy Bureau of Ships, Receiver Antenna Coupler. 2-32 MHz, in three bands / modules (2-6 MHz, 6-15 MHz, 11-32 MHz) with N connectors. Probably also usable for low power transmitting (10 watts) 19" rack mount, 8-3/4"" high x 15" deep, weighs approx. 35 pounds. Used, outsides a bit dusty, insides immaculate. $100

More silly old stuff for sale at:

http://qsl.net/wc6w/wc6wfsw/index.html

73 & Good morning,
Marv WC6W 310 649 3111

5833. Wanted: Needs-Repair Station Monitor e.g. a Heath SB-610

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-08-20 22:28:17 UTC
From: doc@kd4e.com
Topic: 5833 Message: 5833

Wanted: Needs-Repair Station Monitor

If yours is good but needs a replacement CRT that is fine.

I believe that the Heathkit SB-610, SB-614, HO-5404 models all
used the 3RP1 CRT. I would also consider Kenwood and Yaesu
models if they use that same CRT.

Please send details as to what you have and your asking price,
keeping in mind that the CRT is the most expensive part. :-)

--

Thanks! & 73, doc, KD4E

PS-21 1 pole 11 pos.
PS-23 2 pole 5 pos.

Dialight 570-31 3PDT miniature toggle switch with 5/8" long handle -- 5A 125 VAC NOS $3 ea

Grayhill 46YY2159 Sealed Pushbutton switches, RFE -- These were SPDT but,the NC lead has been cut off flush with housing. The NO & COM terminals are cut short like they were removed from a PCB. Nice metal shaft has about .2" travel. No button nor hardware, 1/4" mounting thread. And there are a bunch of them -- 10/$1

Mallory rotary switches
13124L 2 pole 12 pos. NOS -- $10
4M21611 6 pole 2-11 positions NIB -- $20

Switchcraft lever switches -- 10 pieces. all have black round knobs unless noted -- $15 all

8PDT (#60024L) New in box

Three pos. 2 form B momentary (#3035) New (2 pieces)
Three pos., 2 form F momentary (3000 series) used (2 pieces)
Three pos., 3 form A momentary each side (3000 series) New, white rect. knob

Three pos., 2 form C momentary (#130312) New
Three pos., 2 form C (#130312L) New
Three pos., 3 form A momentary each side (13000 series) New, red rect. knob

Three pos., 2 fom C (DPDT) each side (#160312) New

Commercially made airflow switch assembly consisting of a V4-16 Microswitch (250VAC 5A contact rating) with a 1-3/8" x 1-3/4" sheet metal vane soldered to the switch arm. The switch is mounted in a U shaped anodized aluminum frame about 2.5" deep with mounting ears. Marked S-101 and part no. 467-115 if anyone knows where that's from! NOS $10

*** Relays ***

C.P. Clare HG-1003 Mercury wetted relays. SPDT with two contacts on each side. Dual coils: 700 ohms @ 32 V / 3300 ohms @ 81V, octal plug in style. Used, checked, $15 ea.

Crystal Can DPDT relays with 28V, 600 ohm, coils and 2A 28V contacts made by Leach, Datron and other manufacturers. They have small solder hook pins for connection and a pair of ears on the sides to mount the relay. These are from the 1960's but, as they are hermetically sealed, they should be like new inside! NOS $10 ea (a dozen or so available)

Half Size Crystal Can DPDT relays with 28V, 700ohm, coils and 2A 28V contacts made by Leach and other manufacturers. These have straight pin terminals. They are from the 1960's but, as they' re hermetically sealed, they should be like new inside! NOS $10 ea (a dozen or so available)

Heath Equipment For Sale

Synthesized 2-Meter FM Transceiver HW-2036, Includes
Mic and assembly manual. $40.00

HW 202 2-Meter FM Transceiver w/ assembly manual. $30.00

HWA 202-1 AC Power Supply w/assembly manual. $25.00

Heathkit IM-17 Solid-State Voltmeter. $20.00

Original Heath Manual For Sale

SB-104 Single Sideband Transceiver Assembly Manual. $15.00

SB-104 Single Sideband Transceiver Operation Manual. $15.00

SB-101 SSB Transceiver Assembly Manual $15.00

HW-202 2-Meter FM Transceiver Assembly Manual. $12.00

GR-1132 Lo-Hi VHF/UHF Scanner Assembly Manual. $10.00

GD-1114 FM Wireless Intercom Assembly Manual. $10.00

HA-202 2-Meter FM Amplifier Assembly Manual. $10.00

HM-2102 VHF Wattmeter Assembly Manual. $10.00

HA-201 2 Meter Amplifier Assembly Manual. $9.00

IT-28 Capacitor Checker Assembly Manual $5.00

Please contact for additional information.
Shipping is not included. I will accept cash, Pay-Pal or Postal
MO. Please contact off-list. Items are located in Dayton Ohio.

5836. 2 meter HT, many HT Accessories, etc. FS

Yahoo group: ham4sale (2007 — 2015)

Two meter HT, HT Accessories, and VHF/UHF related equipment for sale,
such as Protective Cases, GPS for APRS, Speaker Microphones,
Batteries, Belt Clips, Wrist Straps, Rubber Ducks, Wattmeters,
Power Cables, DMM, and much more:

ADI-201, 2 meter HT:

The ADI-201 is a really great HT. It features up to 5 watts
power output (actually about 5 W, 2.5 W and 0.3 W in three
power ranges). It can be powered by many different voltages
from 5 V to 16 V DC, producing different power outputs. It
covers not only the 2 meter band, but also receives in the
public service bands, including the weather frequencies, so
it is ideal for such things as Skywarn. It has full tone
capabilities, handling subaudible CTCSS PL tone encode and
decode, along with some paging functions. DTMF tones are
also available. Of course it has 40 memories, scan features,
and all of the things one would expect in a modern 2 meter HT.

This particular HT has the 12 V high power battery with it.
It looks very, very good (I can not find a scratch on it),
and works 100%. It includes the HT, rubber duck antenna,
belt clip, wrist strap, charger, and paper work for $75.

Yaesu HT Accessories:

Real Yaesu Battery pack for Yaesu VX-2 or VX-3 HT
FNB-82 LI Lithium Ion Battery Pack fits both the VX-2 and the
VX-3. 3.7 volts, 1000 mahr, works great, and holds a charge
like new. $22

FNB-52 LI Lithium Battery for VX-1 HT
Fits VX-1 dual band HT. It works fine. Holds a good charge
and is in good health. $25

CSC-71 Case for VX-1 dual band HT
Close to new condition. No visible wear. $16

FBA-20 "Empty battery Pack" for VX-1
Takes a single AA cell, which can be alkaline, NiCad, NiMH,
etc. Like new. $18

Belt Clip for Yaesu FT-207, with hardware. $8

Wrist Strap for Yaesu FT-209, and probably others $4

Yaesu Hat
This "Ball Cap" has Yaesu on the front of it in big letters.

It is white and says "Yaesu" on the front, with the Yaesu logo. It has never been used. $6

Speaker Microphones:

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. Coiled cord is somewhat stretched, but it works fine. $12

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. $ 20

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC Regular length, 6 1/2 inches long
BNC - Original from Kenwood TH-215 HT, 5 inches long
Alinco Stubby w/BNC Connector, 4.6 inches long

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

BNC Stubby for 440 MHz, 3 inches long

Protective Cases:

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and PB-4 battery packs. It can also be used with the smaller PB-2 and PB-3 packs. Black color. Great condition. $15

Case for Drake TR-33C
This is the black case that fits the Drake TR-33C, and has cutouts in the back for antenna, power, etc. It includes the shoulder strap, and is in good shape. $12

Case for Drake TR-22
As above, but for the TR-22. No shoulder strap. $10

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case. It fits most of the Santec HTs, such as the HT-1200, ST-142, ST-144, ST-440, etc. The real leather case includes a built in belt clip, plus a removable leather shoulder strap. $25

Earthmate GPS by DeLorme, with software

The GPS unit plugs into a USB port on your computer. DeLorme Street Atlas Software is included, so plan your route, and also let the GPS tell you where you are, and give you voice directions, if desired. You can even ask it questions!

It will calculate your route and tell you exactly where and when to turn, plus figure statistics such as mileage.

The GPS hardware unit is powered from the USB port, so no additional power supply is needed.

This particular unit is in close to new condition, in its original box, with the GPS unit, and the software. I would think that it could be used with APRS. $65

Accessories for the Kenwood TR-2400 HT:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. This adapter can be used on any HT with a BNC connector. $5

Belt clip for TR-2400 HT, complete with hardware - $8

Wrist strap for TR-2400, and most other HTs - $4

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually, one must have the battery inside the HT, but this lets you charge a second battery outside of the HT. The original charger is used. It is in good shape, and works fine. $3

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Accessories for Kenwood TH-205, TH-215, TH-225, TH-415,
and other HTs in that series:

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger
PB-1 and PB-4 battery packs. It can also be used with
the smaller PB-2 and PB-3 packs. Black color. Great
condition. $15

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits
the TH-21/31/41 series HTs, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. Coiled cord is somewhat stretched, but works
fine. $12

Dead PB-2 Battery for rebuilding, or use the case to adapt
other batteries. Looks fine.
For Kenwood TH-205, TH-215, TH-415, TH-225, etc.
Two available. $6 each.
Buy both for $10.

Kenwood Wall Wort Charger for PB-2. $12

Kenwood BH-2 Belt clip with screws
Used on many Kenwood HTs. $8

Kenwood Wrist Strap for TH-215, plus many other HTs. $4

Original Kenwood Rubber Duck antenna from Kenwood TH-215. $10

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

Accessories for the Azden PCS-300 HTs:

Azden SDX-316
This is the rounder style speaker mic that fits nicely in
the palm of your hand. Has 3.5 mm and 2.5 mm plugs for

Azden, Icom, some Yaesu, and others. It works great, and
looks great also. $20

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the battery
of the Azden PCS-300, 2 meter HT, outside of the HT itself.
Usually, one must have the battery inside the HT, but this
lets you charge a second battery outside of the HT. The
original charger is used. If you have a PCS-300 HT, you
need this adapter.
It works fine, and looks like new. $3

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Battery pack for Yaesu VX-2 or VX-3 HT
Lithium Ion Battery Pack that fits both the VX-2 and the VX-3
3.7 volts, 1200 mahr, works great, and holds a charge like new.
$15

Dead Battery Packs:

Please note that all of these battery packs are dead. There
is no voltage from them. They are being sold for the purpose
of rebuilding, or to be used to build a regulator in them,
or whatever.

Batteries for Icom 2AT, 3 AT, 4 AT, 02AT, 03AT. 04AT, 24,
and others:
BP-2, looks very nice $5
BP-3, looks like it may have gotten warm, and may be slightly
deformed $4
BP-4, "Empty case" for alkalines, etc. Needs cleaning. $8
BP-5, larger pack, looks good, but has former owners call
sign scratched in case, $5
Buy all four of the above for $20.

Dead Kenwood PB-2 Battery for rebuilding, or use the case to
adapt other batteries. Looks fine.
For Kenwood TH-205, TH-215, TH-415, TH-225, etc.
Two available. $6 each.
Buy both for $10.

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood BH-2 for Kenwood TH-215 / 225 / 415, etc.
Kenwood BH-3 for Kenwood TH-21 / 31 / 41 series HTs
Kenwood TR-2400
Motorola
Yaesu FT-207

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, etc.
Kenwood TR-2400
Yaesu FT-209

Micronta 21-194 Digital Multimeter:

This DMM not only does the traditional things that DMMs do (measure voltage, current, etc.), but is also a transistor tester and a capacitance meter. Voltage ranges are up to 1000 Volts, current to 10 Amps, and capacitance to 20 microfarads.

This particular meter looks good, and functions fine on all modes except resistance.

Probes included for $15.

Prices do not include shipping from Florida.

Thanks.

*** Electronic Books ***

*** These are originals unless noted. ***

ABC's of Transistors by George Mann, First Edition, Fourth Printing, August 1961. Very Good condition. 96 pages. $4

Allied's Electronics Data Handbook -- Second Edition, 1959. Previous owners name written on cover, otherwise excellent condition, 64 pages. $2

Alternating Current Circuits -- by Kerchner & Corcoran. Previous owners name written inside cover, otherwise excellent condition, 540 pages. Cpy 1943. Printed 1948 --$5

Amateur Single Sideband by Collins Radio. 1962 Hardbound. Excellent condition except one previous owner's name in ink on p.106. 143 pages -- $60

The Analytical Engine-- by Jeremy Bernstein. 1964 Hardbound. Verry good condition except previous owner's name whited out inside cover. Dust cover is in fair condition. 110 pages -- $5

Applied Thermodynamics -- by Faires. Previous owners name written inside cover, otherwise excellent condition, 475 pages. 1947. $5

ARRL

Antenna Book, 13th edition, 1974, good condtion -- $7
Proceedings of Microwave Update '89, 200 pages -- $10
Radio Amateur's Handbook, 1983. Very good condition -- $10
Radio Amateur's Handbook, 1977. Cover a mite worn, insides fine, no apparent writing --$10
Radio Amateur's Handbook Ninth Edition, 1931. Has a typewritten note glued to the frontspiece stating that it belongs in the radio room of the USS Maryland (the Battleship which was moored just inshore of the USS Oklahoma on the first Pearl Harbor Day). Cover somewhat rough, torn at spine, index and first two chapters missing up to page 24, otherwise good, no writing in text nor torn pages. Softbound, about 200 pages left -- $500
Vertical Antenna Classics, 1995, like new -- $7
Hands-On Radio Experiments, 2008, like new -- $7

Antique Radio Classifieds -- May, June, July (2 copies), August 1985 -- $1 all

Communication Networks Vol.2 -- by Guillemin. Previous owners name written inside cover, otherwise goodcondition, 580 pages. Cpy 1935, Printed 1949. $5

Confidential Frequency List by Ferrell, 6th edition, 1984. 300 pages. -- $3

The Contact Modulator -- 8 booklet series by the Engineering Staff of Airpax with more than anyone ever needed to know about choppers. About 30 pages per booklet. Very good condition 1958-1960 -- $50

Dictionary of Electronic Terms by Allied Radio Corp, Eighth Edition, First Printing, May 1968. 112 pages. $4

Electrical Communication -- by Albert. Previous owners name written inside cover, otherwise excellent condition, 580 pages. 1950 -- $5

Electron Tube Circuits -- by Seely. Previous owners name written inside cover, otherwise excellent condition, 510 pages. 1950 -- $7

Electronics Engineering Manual, Volume 5 -- Electronics Magazine article compendium. Very good condition. 252 pages -- $10

Electronics in Engineering by Hill, McGraw Hill, second edition, 1961. Hardbound. Excellent condition. 340 pages. $7

Electronic Shortcuts for Hobbyists by Sylvania Electric Products. Second edition, first printing, 1951. Cover separated, otherwise good condition. 35 pages. $3

5 Meter Radiotelephony by Frank Jones -- This is a REPRINT of a 1934 booklet Excellent condition 20 pages or so $2

Flight Instructor's Manual -- Civil Aeronautics Administration bulletin #5, 3rd editon, September 1941. 146 pages. Cover a bit worn, insides fine. $15

General Electric Nickel-Cadmium Battery Application Engineering Handbook -- 1971 plus supplemental volume 1973. Just a bit of writing on the cover of the first book, otherwise very good condition. $10 both books.

GE Transistor Manual -- 7th edition 1964. Paperback. Good condition 650 pages. $5

Handbook of Electronic Communication by Gary Miller, Prentice Hall 1979. Hardbound, very good condition, owner's name written on frontleaf, 339 pages. $5

Handbook of Industrial Electronic Circuits by Markus & Zeluff 1948. Hardbound. Very good condition. 272 pages. $10

Having Fun with Transistors by Len Buckwalter, Howard W. Sams, First Edition, First Printing, 1962. Very good condition. 127 pages. $4

Hewlett Packard Meaursement News February/March issue... somewhere in the 60's. $1

Hughes 0-5KW Power Amplifier Equipment -- June 1962. Includes block diagrams plus background on Hughes facilities & staff. Labeled "exhibit B", appears to have been part of a project proposal. 55 pages. $7

Hughes 10 KW HF Automatically Tuned Transmitter -- June 1962. Includes block diagrams plus background on Hughes facilities & staff. Labeled "exhibit B", appears to have been part of a project proposal. 63 pages. $7

Hughes 10 KW HF Transmitter -- December 1961. Includes block diagram, abbreviated schematic, some photos. 22 pages. $7

Hughes Aircraft Digital Computer Course book -- circa 1957 based on some propietary core memory system of that era. 100 or pages in a 3 ring binder plus some blueprints, $10

Hughes Aircraft -- The Hacon Story A slice of history regarding a transmitter fitted on the Convair B-58 bomber, $10

Hughes Aircraft -- Vectors -- Company newsmagazine, 20 pages, 4th Quarter 1963. -- $3

The Instrument Sketch Book -- Weston Electrical Instruments, 32 pages, © 1941. Softbound, good condition with some writing on first five or so blank facing pages that were intended for note taking in this educational piece. $10

Intel ASM86 Language Reference Manual -- 1981. $5

Introduction to the Mechanics of Solids by Popov. Prentice Hall, 1968, 570 pages. Hardbound, good condition. $5

Logic Machines and Diagrams by Martin Gardner. McGraw Hill, 1958, 155 pages. Hardbound, good condition w/dustcover(rough). $5

Low Level Measurements by Keithley. 1984, 125 pages. Softbound, excellent condition. $5

Magnetic Amplifier Circuits by Geyger, McGraw Hill, second edition, 1957. Hardbound, cover ripped at spine, previous owner(s) info inside front, insides good. 392 pages. $10

Components for Microcomputer System Design by Dave Bursky, Hayden, 1980. Large format, softbound, excellent condtion, 250 pages. $5

Most Often Needed 1926-1938 Radio Diagrams -- originally published by Supreme Publications 1941. This is a REPRINT, by Vintage Radio. 240 pages, solid schematics! Like new, $10

MOSPOWER Applications -- by Siliconix, 1985. Approx. 200 pages. Excellent condition, $40.

Motorola
APR2/D Digital Stereo 10 Band Graphic Equalizer using the DSP56001 -- $5
APR12/D Twin CODEC Expansion Board for the DSP56000 Application Development System -- $3
Echelon Neuron Chip Application Notes: EB146/D, EB147/D, EB148/D, EB149/D, EB150/D, EB151/D, EB152/D, EB153/D, EB155/D, EB157/D, EB159/D, EB160/D & EB161/D $10 all.
RF Amplifier Application Notes: AN-593, AN-749, AN-758, AN-791, AN1033, AN1034, AR164, & 176. $5 all.
The Semiconductor Data Library Vols. 1 & 2, First edition 1972 plus Reference Vol. Third editon, 1973. $30
Power Transistor Handbook 1960, First edition. Spiral bound. Good condition 200 pages. $10

National
NS16000 Programmer's Reference manual, preliminary, 1982. Appx. 100 pages. $5
The COPS Programming Manual. Early draft copy, 210 pages. Circa 1980. $5

National Bureau of Standards -- Report #5589 Facilites & Services of the Electronic Calibration Center Radio Standards Laboratory, 1958.-- $3

Navy Department -- Bureau of Aeronuatics Manufacturing Operations Section 20 booklets, 5" x 7½" totaling 2½" thick of perhaps a set of 30, detailing metal forming for aircraft construction. A couple of the covers are loose, otherwise very good condition. Copyright 1943-44 -- $25

101 Easy Audio Projects by Brown & Kneitel, First Edition, First Printing, 1968. 168 pages. $4

102 Simple Transistor Projects by Kneitel, Seventh Printing, 1969. 120 pages. $4

Principles of Permanent Magnet Moving Coil & Movable Iron Types of Instruments -- Monograph B-7 by Weston Electrical Instrument Corp, 1933. Cover a mite worn, insides excellent. 95 pages. $20

Radar Electronic Fundamentals T.O.16-1-195 -- US Navy Technical manual. June 1, 1944. Good Condition except for water damage on front edge; no pages stuck nor ink bleed. 474 pages. $5

Radio Collector's Guide 1921-1932 -- revised edition. Langley & McMahon, Vintage Radio. Excellent conditon. 1981. $7

Radio Frequency Measurements by Hugh A. Brown, McGraw Hill. 2nd edition, 1938. Good condition, 384 pages. $7

Radio Fundamentals TM11-455 -- US ARMY Technical manual. 22 May 1944. Good Condition except for owner's sticker inside front cover and a little writing on title page. 333 pages. $5

RCA
Linear Integrated Circuits & MOS Devices plus application notes, 2 book set: SSD-201 & SSD-202, 1972. About 1000 pages total. Good condition. $20
Transistor Manual SC-13, 1967. Paperback. Good condition 540 pages. $10
Silicon Power Circuits Manaual SP-50. 1967. Paperback. Good condition 415 pages. $10
RC-18 Receiving Tube Manual 1956. Spine broken, no pages missing, a bit of water damage around the edges. 340 pages, $4
RC-14 Receiving Tube Manual 1940. Front cover rough and half of spine cover missing. Insides good. 255 pages, $5
Television DC Component by K.R. Wendt. RCA Laboratories. Library bound. 1948. $5
Television Vol. 1, RCA Institutes, 1936. A collection of papers concerning the genesis of television. Softbound, a couple small tears at the bottom of the cover, insides in very good condition, 452 pages. $250
Transistor Servicing Guide. 194 pages. 1968. 194 pages. $5

Servomechanisms & Regulating System Design -- by Chestnut & Mayer. Previous owners name written inside cover, otherwise excellent condition, 500 pages. 1951 -- $7

Sharp LH9124 Application Note collection: Fast Fourier Transform, DFT Filter Bank, Time Domain Convolution, Medical Tomograpy Imaging, Multichannel Echo Cancellation, Spectral Analysis, Image Correlation, Image Compression, 2-D TimeDomain Convolution, Fast Convolution, Constant False Alarm Rate Analysis. Like new. $7 all

Superheterodyne Converters and IF Amplifiers by Alexander Schure. Rider. Second edition 1963. 100 pages. Very Good condition. $5

Sylvania Gold Brand 26.5 Volt Subminiature Tubes Complete data, including many curves, on this product line. 1960, Large format, softbound, 84 pages. Very Good condition. $10

TMS320 DSP Designer's Notebook -- by Texas Instruments -- Notes 1-77 inclusive plus index, 1992 - 1996. Loose sheets. $10

Top Secret Registry of U.S. Government Radio Frequencies by Kneitel. 1987 192 pages. $5

5840. FS: Kenwood TS2000 HF/VHF/UHF transceiver

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-08-26 15:32:57 UTC
From: John Geiger
Topic: 5840 Message: 5840

I have for sale or trade a 2008 model Kenwood TS2000 that does 100 watts on HF, 6m, and 2m, and 50 watts on 70cm. I bought this radio used from Ham Radio Outlet at the beginning of June, so it has been checked out recently and found to work perfectly. Really like it but life things come up and I need to downsize the shack a bit.

This radio has IF DSP so no optional filters are needed. It also has full duplex for the satellites, a built in TCXO, a 2m/70cm subreceiver for listening to the local repeaters while operating on the main receiver, and a built in TNC. It will also do crossband repeat so you can get on HF or 6m while walking around town with an HT-what a neat feature!

It is in very good condition with a couple of light scratches on the top of the case (I doubt they would show up in a picture). It comes with the hand mic, power cord, and manual. I think I still have the original box but it is missing the stryofoam inserts, though.

I am asking $1000 for it plus shipping, but can also meet for an inperson deal in the Southwest Oklahoma/OKC/North Texas area. You will not be disappointed with this radio-it does it all and does it all
pretty well.

73s John AA5JG
Lawton, OK

5841. FS: Separation kit for FT100D (YSK-100)

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-08-26 15:58:04 UTC
From: John Geiger
Topic: 5841 Message: 5841

I have for sale a complete YSK-100 separation kit for the Yaesu FT100D series of radios. This comes in the original box and contains everything-all three cords, the faceplate bracket, and the package of screws and double sided tape for mounting. I am asking $90 shipped in the US for it and can take paypal/check/MO. Don't let this one get away as these are getting very difficult to find.

73s John AA5JG

5842. FS: Daiwa VHF/UHF duplexer

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-08-27 15:42:05 UTC
From: John Geiger
Topic: 5842 Message: 5842

I have for sale a Daiwa VHF/UHF duplexer (actually the correct term in a diplexer) that splits off 1.8-150mhz from 400-450mhz. This will allow you to run a 2m/70cm radio with one SO239 with 2 separation antennas, or to use a dualband antenna with 2 different rigs or with 1 rig with separate antenna jacks for 2m and 70cm (like the TS2000 and FT847). It has leads for the HF/VHF and UHF side, and each lead is terminated in a PL259. It uses an SO239 for the mix connector.

It looks and works fine, I am asking $30 shipped and can take paypal/check/MO.

73s John AA5JG

5843. Antenna Tuner, HF Rig, Wattmeters, etc. FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-08-27 19:36:23 UTC
From: Ken Simpson, W8EK
Topic: 5843 Message: 5843

For Sale:

Antenna Tuner, HF Transceiver, Power Supplies, Microphone,
Wattmeters / SWR Bridges, Vertical Antenna, and more

TenTec 238 Full Power Roller Inductor Antenna Tuner:

This HF antenna tuner will handle the full legal limit, and will
match almost anything. It is rated to match loads up to 3000 ohms.

It is an "L" network, which means that there is only one correct
matching point, and not false readings like some tuners. It has a
roller inductor that permits matching all HF bands, including the
WARC bands.

In addition to the tuner, it also includes a wattmeter with 200
and 2000 watt scales, plus SWR bridge. There is also an antenna
switch built in, so this unit will handle all of your antenna
needs.

This particular unit works fine, and looks extremely nice. I can
not find a scratch or defect on it. With paper work for $395.

TenTec 585 Paragon HF Transceiver:

The Paragon is a top of the line transceiver that includes a
general coverage receiver. It covers 160-10 meters, including
WARC bands, with 100 watts output. The receiver is fantastic.
It has dual VFOs and many memories built in, along with a
speech processor. Basically, it has about every feature that
a ham could want in an HF rig.

This particular unit works 100% as best I can tell. Since the
rig does so many things, I am sure that there is something I
didn't test, but I don't know what it is (or I would have
tested it!). It has had all updates completed by TenTec.

Cosmetically, it is in extremely nice shape. The front panel
is extremely good. Most all of the lettering is clean and
crisp. This one also has the Giehl chip in it making it
similar to a Paragon II.

Large manual and power cord included for $650.

TenTec Power Supplies:

TenTec Model 280 power supply, 20 amps at 13 V DC
This supply is quite heavy duty electrically. It has 2 pass

transistors, instead of the one that some have. It also has an
ammeter on it.
This one works fine, and looks OK as well.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply:
This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is very quiet, and well
shielded, and does not produce any electrical noise that
I could find. $150

TenTec 705 desk microphone
This electret desk mic has the 4 pin connector, with PTT and
"hold" buttons. It works great, and looks like new.
With paper work for $75.

AEA items:

AEA PK-232 MBX, multi-mode digital controller.
More than just a TNC. It will handle packet, RTTY, Amtor,
ASCII, CW, etc. I think it has the latest firmware, as it
includes Pactor in it. It works fine, and looks very close
to new. The large, inch thick manual is included for $125.

AEA AC-1
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive,
so it can be used on many different things that require
12 V DC at up to an amp, such as keyers, antenna tuners,
etc. $17

Wattmeters and SWR Bridges:

MFJ 815 Cross Needle Wattmeter
The MFJ-815 cross-needle meter allows you to monitor both
forward and reflected power, and SWR simultaneously. There
are buttons to select power ranges of 20/200/2000 watts
forward and 5/50/500 watts reflected.
Frequency coverage is 1.8 to 60 MHz, so it covers 6 meters
in addition to the HF bands, making it ideal for some of
the new rigs that include 6 meters.
There is a meter light that requires a source of 12 V DC.
This particular unit works fine, and looks extremely good.
With paper work for $50.

HF Digital Peak and Average Reading Wattmeter
Radio Shack MTA-20 (21-527) Digital Wattmeter will read either peak or average power. It is a digital meter with no moving parts, although it does have a sort of analog bar graph on it. It is rated to cover 1.8 thru 30 MHz, so it covers all of the HF bands. It will measure up to 2000 Watts, in ranges of 2000, 200, or 20. It will also indicate SWR, which requires at least 1/2 Watt. It has a nice back light, and requires 13 V DC for operation. There is about a 3 foot cable between the digital display and the remote sensor. This is a great meter.
This particular meter is in its original box, and appears to not have been used. It has been tested, and works fine. $100

SWR Bridges:

Quement SWB-2 Dual Meter
This unit features two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna. It has SO-239 connectors on each end.
It will work on HF, and VHF, covering 3 to 150 MHz, so is ideal for the new rigs that include 6 and 2 meters.
Works fine and looks great. With paper work for $40

ThordTest SWFS-2 SWR Bridge / Field Strength Meter
This is an HF SWR Bridge, but it can be used up thru 2 meters, with slightly reduced accuracy. It is also a field strength meter. SO-239 connectors.
This one works fine, and looks extremely nice. It is in original box, with original instruction sheet, and antenna. $30

HyGain 18 HT HyTower HF Vertical Antenna:

The HyGain HyTower HF vertical covers 80, 40, 20, 15, and 10 meters. The WARC bands (and 160 meters) can be added, but are not a part of this antenna at present. This is an extremely rugged antenna, consisting of about 30 feet of actual tower, with additional stubs for tuning.

Automatic band selection is achieved through a unique stub decoupling system so that an electrical 1/4 wavelength (or odd multiple) exists on all bands. Unity gain on 20, 40, 80; 2 dB on 10 and 15 Meters.

This particular antenna is in extremely good condition. It has stainless steel hardware. The galvanizing on the tower is very good. As far as I know all hardware is included. The base insulators are new.

Due to size, this is pick up only, near Ocala FL, close to I-75.

This antenna sells for about $1000 new. With paper work for $450.

Lightning Protectors:

"Blitz Bug" Lighting protectors
These are not as sophisticated as the Polyphaser below,
but still protect against lightning. Two versions are
available. One has an SO-239 connector on each end.
The other has a PL-259 on one end and an SO-239 on
the other end. Take your choice for $8 each.

Polyphaser IS-VU50HN-MA Lightning Protector

Polyphaser is well know for extremely good lightning
protection equipment. This coaxial antenna protector
is designed to be inserted in the coaxial cable at the
bottom of a tower.
This unit has two SO-239 connectors, and is rated to take
750 Watts from 50 to 300 MHz and from 380 to 550 MHz.

This particular unit includes the spec sheet, and appears
that it might not have been used. It is not oxidized,
or corroded. $55.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce
harmonic interference. All have SO-239 connectors, and include
paper work.

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500
Watts. It is the latest model B&W filter.
In very nice condition, it looks very close to new. $40.

B & W 425
It cuts off just above 10 meters, and will handle 1500+ Watts.
Maximum attenuation is at 52 MHz, with at least 70 db across
the band. This is an older, heavier duty model. It weighs
almost twice as much as the newer model. $35

Drake TV-3300-LP
This is a modern low pass filter has been optimized to have
more attenuation in the 40 MHz region, where many TVs have
their IF. It is good for 1000 Watts "average" according to
the manual, and has over 80 db attenuation at 41 MHz.
This one looks great. $30

Knife Switch
A knife switch is often used to switch antennas using open
wire or "twin line" feeders, but can be used for other purposes.
This knife switch is DPDT. The base is about 2 1/2 by 1 1/2
inches in size, and is phenolic.
This one works fine and is in good condition. $7

Coaxial Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Coax connectors and adapters:

Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5
-
UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Antenna adapter for Kenwood TH-21/31/41 HTs
Adapts the antenna connector found on these HTs to a
standard PL-259 connector. $8

Prices do not include shipping from Florida.

Thanks.

5844. FS: Kenwood SWT-1 2m antenna tuner

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-08-28 05:51:19 UTC
From: John Geiger
Topic: 5844 Message: 5844

I have for sale a Kenwood SWT-1 2 meter antenna tuner in excellent condition. It comes with the manual and original box. It handles 200 watts on SSB/CW and 100 watts on FM. I bought this recently but my station plans have changed so I no longer need it. It would make a nice Kenwood collectors item for an all Kenwood station if you don't need an antenna tuner on 2m. I am asking what I paid for it, $35 plus shipping. I can take paypal/check/MO.

5846. rigblaster plus for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-08-28 18:55:28 UTC
From: John Miller
Topic: 5846 Message: 5846

Hi all, I have a rigblaster plus for sale. It's a great sound card interface for PSK31 or whatever digital mode/s you may want to do with it. This is the one with the keyer hookup so you can use it to send CW with the computer even with the cable which I do have though never used. You can also plug a foot PTT switch to this unit. currently wired for 8 pin Kenwood with the round mic connector but can be configured with internal jumpers for any 8 pin radio modular or round and with other optional cables could be converted to pin configurations, 4 or 6 pin. This one comes with the USB cable, Serial cable, all included cables that came with it as well as the longer mic cable which is shielded, the cable to connect it to your power supply, wall wart plug that I believe came with it, software, probably more I'm not remembering as well. It works perfect but funds are tight here so time to let a few lesser used items go. Sells new for $159 plus all the accessories I got separate like the CW cable, longer mic cable, power supply cable which has Anderson power pole connectors on it now, I'll ship it for $100, or BRO. I take paypal or money orders.

5847. Cushcraft A3S 10-15-20M beam for sale

Topic: 5847 Message: 5847

I have a Cushcraft A3S tri-band beam for sale. It is down and ready for pickup in NE Ohio. It is in good condition. I don't have space for a tower at my QTH. Any questions please email me at kc8wvg@... or kc8wvg@...m . I would like $200.00.

5848. FS: Yaesu FT450 HF/6m transceiver

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-08-30 15:00:45 UTC
From: John Geiger
Topic: 5848 Message: 5848

I have for sale a Yaesu FT450 HF and 6 meter transceiver in very good condition. It does 100 watts on HF and 6 meters and has the 60 meter channels built into it. This is the radio with IF DSP so you don't need to buy any optional filters, they are all there already-provided by the DSP. Also don't need to buy a TCXO for increased frequency stability, it is included in this radio. It also has a built in voice keyer and built in CW memory keyer. There is nothing to add to this radio, except maybe the carry handle which is optional. The voice synthesizer even comes standard on the FT450. This is the model without the internal tuner, but the tuner for this model isn't any good anyways.

This radio is probably the best buy on the market today. Ask anyone who has owned one about their opinion of the FT450.

Mine comes with the power cord, mic, manual and original box. Looks great and works fine. I am asking $520 for it plus any shipping if necessary. I can take paypal/check/MO. Why am I selling such a great radio-maybe I am crazy, I don't know. I just decided to keep my Yaesu FT100D instead since it will also do 2m and 70cm.

From: doc@kd4e.com
Topic: 5851 Message: 5851

FS: Icom IC-91AD w/Extras

Real nice HT, and in real nice condition, but I am not using
it and have too much invested to collect dust. Info here:
http://www.universal-radio.com/catalog/ht/0091.html

I strongly prefer to sell this as a lot but will consider
selling the extras once the HT itself has been sold.
(I don't want to end up with orphaned accessories.)

Icom IC-91AD
Icom HM-75A Speaker-Mic
Icom BC-139 Desktop Charger w/box & BC-123A transformer
Icom CP-19R Filtered & Regulated DC Adapter
Icom BC-167A 12hr slow charger
Icom BP-216 AA Battery Pack
Serial to IC-91AD Programming Cable (not Icom labeled)
3.5mm to 3.5mm Cloning Cable (not Icom labeled)

ASKING $495. for everything, including std. USA shipping
(some locations may be extra)

I will consider a cash and swap offer that includes a small
2/440 HT in very good cosmetic and operating condition with
an as-new rechargeable battery, DC adapter, charger, and
preferably an AA or AAA (depending on the HT) battery pack.

5853. Equipment for digital modes FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-09-04 12:11:45 UTC
From: Ken Simpson, W8EK
Topic: 5853 Message: 5853

Equipment for the Digital Modes For Sale:

AEA items:

AEA PK-232 MBX / DSP,
multi-mode digital controller with the DSP Option
More than just a TNC. It will handle packet, RTTY, Amtor,
ASCII, CW, Pactor, etc.
This unit has the latest Version 7.2 firmware, and has the
DSP option installed, so it has considerable upgrades compared
to most PK-232's you find for sale.
It works fine, and looks very close to new.
The large, inch thick manual is included for $175.

AEA AC-1
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive,
so it can be used on many different things that require
12 V DC at up to an amp, such as keyers, antenna tuners,
etc. $17

Heath HD-15 phone patch / digital interface

This is the unit with the VU meter on the left and 3 knobs that
match the SB series to the middle and right. Low or high Z output
to the transmitter. It can also be used as an interface for PSK31,
and other digital modes that use a sound card. The meter makes
it great for setting levels.

This one is in excellent condition. It has a couple of great
modifications that are very professionally done. The meter has
been replaced with a slightly larger, and more professional
looking meter. There is a modular jack added for the phone line.
Two RCA phono jacks have been added for speaker in and out. In
both cases, they are in parallel with the original terminal strip,
so either the original terminal strip or the new connections may
be used.

Paper work included for $30.

Heath HD-15 digital interface / phone patch
As above, but this one is all original. It is in excellent
condition. Cosmetically, I can not find a scratch on it.
Everything on it is original.
Paper work included for $25.

Waters "Universal Hybrid Coupler II" Model 3002

Most of us would likely call this a phone patch, but it is really much more than that. It does that, but also will interface with a tape recorder, and permit recording and play back of on-the-air QSOs. Nothing says that the tape recorder input must be used that way. Connect the sound card in your computer in this position, and you have a very effective interface.

Model 3002 includes a speech compressor powered by a 9 volt battery. The front panel is finished on both sides, with one side having it set in a horizontal position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Earthmate GPS by DeLorme, with software

The GPS unit plugs into a USB port on your computer. DeLorme Street Atlas Software is included, so plan your route, and also let the GPS tell you where you are, and give you voice directions, if desired. You can even ask it questions!

It will calculate your route and tell you exactly where and when to turn, plus figure statistics such as mileage.

The GPS hardware unit is powered from the USB port, so no additional power supply is needed.

This particular unit is in close to new condition, in its original box, with the GPS unit, and the software. I would think that it could be used with APRS. $60

Wattmeters and SWR Bridges:

M C Jones VHF/UHF Wattmeter
This MC Jones Wattmeter is a vintage unit, probably from just after WW II. At that time, it was the gold standard of wattmeters, basically equivalent to a Bird today.
This particular meter has N connectors in and out. It reads 12 Watts full scale in the forward position, and 4 Watts full scale in reflected. It also has an SWR calibrate and SWR scale on the meter. I think the frequency range is from 20 to 1000 MHz, but I am not 100% positive of that. It works well on 2 meters and 440 MHz. The RF sensor unit inside is model 576.3.
This one functions fine, and looks extremely nice for its age.
$60

MFJ 815 Cross Needle Wattmeter
The MFJ-815 cross-needle meter allows you to monitor both
forward and reflected power, and SWR simultaneously. There
are buttons to select power ranges of 20/200/2000 watts
forward and 5/50/500 watts reflected.
Frequency coverage is 1.8 to 60 MHz, so it covers 6 meters
in addition to the HF bands, making it ideal for some of
the new rigs that include 6 meters.
There is a meter light that requires a source of 12 V DC.
This particular unit works fine, and looks extremely good.
With paper work for $50.

HF Digital Peak and Average Reading Wattmeter
Radio Shack MTA-20 (21-527) Digital Wattmeter will read either
peak or average power. It is a digital meter with no moving
parts, although it does have a sort of analog bar graph on it.
It is rated to cover 1.8 thru 30 MHz, so it covers all of the
HF bands. It will measure up to 2000 Watts, in ranges of 2000,
200, or 20. It will also indicate SWR, which requires at least
1/2 Watt. It has a nice back light, and requires 13 V DC for
operation. There is about a 3 foot cable between the digital
display and the remote sensor. This is a great meter.
This particular meter is in its original box, and appears to
not have been used. It has been tested, and works fine. $100

SWR Bridges:

Quement SWB-2 Dual Meter
This unit features two separate meters -- one for reading forward
power and another for reading SWR. This permits one to easily
monitor both the power going out, and the SWR on the antenna.
It has SO-239 connectors on each end.
It will work on HF, and VHF, covering 3 to 150 MHz, so is
ideal for the new rigs that include 6 and 2 meters.
Works fine and looks great. With paper work for $40

ThordTest SWFS-2 SWR Bridge / Field Strength Meter
This is an HF SWR Bridge, but it can be used up thru 2 meters,
with slightly reduced accuracy. It is also a field strength
meter. SO-239 connectors.
This one works fine, and looks extremely nice. It is in original
box, with original instruction sheet, and antenna. $30

19 inch Relay Rack Shelves

This black shelf in made to fit a standard 19 inch relay rack.
The shelf itself is 17 5/8 inches wide (standard width for
inside of the rack) by 18 inches. It attaches to the rack so
that 4 inches of it extends in front of the rack and 14 inches
behind the rack (or you could reverse it for 14 inches in front
and 4 behind). It has vent holes so that equipment that is set
on it can get some air. It requires 4 inches of rack space.

It is similar to one seen here
http://www.l-com.com/item.aspx?id=8487
or
http://www.rackmounts.com/Middle-Atl...MS-DF2984.html
except 4 inches of it extends past the mounting point.

These are in extremely good condition. I can not find a scratch
on them. They look new. Two are available. Buy one for $35,
or both together for $65.

Prices do not include shipping from Florida.

Thanks.

5854. Tower and antenna related items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-09-05 19:01:50 UTC
From: Ken Simpson, W8EK
Topic: 5854 Message: 5854

Antennas and related items For Sale:
Tower, Mast, Full Power Antenna Tuner, Wattmeters and SWR
Bridges, Lightning Protectors, VHF and UHF Mobile antennas,
Coax Connectors, etc.

The first two items are pickup only near Ocala, Florida,
close to I-75. The other items can be shipped.

Antenna tower:

A total of 35 feet of antenna tower is available, consisting
of one top section, 2 "middle" sections, and a 5 foot section
for the base.

This tower is "American" tower, which has a horizontal brace
about every 22 inches. It is suitable for VHF antennas, very
large TV antennas, or small tribanders.

This particular tower is in good condition, although there
is some slight surface rust.

It is pickup only near Ocala, FL, just off of I-75. $125

Heavy Duty Antenna Mast:

18 foot long heavy duty galvanized antenna mast.
2 inch OD with 1/4 inch wall.
This is heavy! But also very strong!

It is in good condition and is located near Ocala Florida,
near I-75. $125

TenTec 238 Roller Inductor Antenna Tuner:

This HF antenna tuner will handle the full legal limit, and will
match almost anything. It is rated to match loads up to 3000 ohms.

It is an "L" network, which means that there is only one correct
matching point, and not false readings like some tuners. It has a
roller inductor that permits matching all HF bands, including the
WARC bands.

In addition to the tuner, it also includes a wattmeter with 200
and 2000 watt scales, plus SWR bridge. There is also an antenna
switch built in, so this unit will handle all of your antenna needs.

This particular unit works fine, and looks extremely nice. I can
not find a scratch or defect on it. With paper work for $395.

M C Jones VHF/UHF Wattmeter:

This MC Jones Wattmeter is a vintage unit, probably from just after WW II. At that time, it was the gold standard of wattmeters, basically equivalent to a Bird today.

This particular meter has N connectors in and out. It reads 12 Watts full scale in the forward position, and 4 Watts full scale in reflected. It also has an SWR calibrate and SWR scale on the meter. I think the frequency range is from 20 to 1000 MHz, but I am not 100% positive of that. It works well on 2 meters and 440 MHz. The RF sensor unit inside is model 576.3.

This one functions fine, and looks extremely nice for its age. $60

MFJ 815 Cross Needle Wattmeter
The MFJ-815 cross-needle meter allows you to monitor both forward and reflected power, and SWR simultaneously. There are buttons to select power ranges of 20/200/2000 watts forward and 5/50/500 watts reflected.
Frequency coverage is 1.8 to 60 MHz, so it covers 6 meters in addition to the HF bands, making it ideal for some of the new rigs that include 6 meters.
There is a meter light that requires a source of 12 V DC.
This particular unit works fine, and looks extremely good. With paper work for $50.

HF Digital Peak and Average Reading Wattmeter:

Radio Shack MTA-20 (21-527) Digital Wattmeter will read either peak or average power. It is a digital meter with no moving parts, although it does have a sort of analog bar graph on it.

It is rated to cover 1.8 thru 30 MHz, so it covers all of the HF bands. It will measure up to 2000 Watts, in ranges of 2000, 200, or 20. It will also indicate SWR, which requires at least 1/2 Watt. It has a nice back light, and requires 13 V DC for operation. There is about a 3 foot cable between the digital display and the remote sensor. This is a great meter.

This particular meter is in its original box, and appears to not have been used. It has been tested, and works fine. $100

ParaDynamics PDC-5 Wattmeter
This unit has a wattmeter with scales of 100 W, 10 W, and 1 W. It has an SWR Bridge built in, with an antenna tuner. It was obviously made for 11 meter use, but it works well on other frequencies. The tuner portion works fine on 10 m, 12 m, and 15 m. The wattmeter seems accurate from 20 meters thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal for portable use.

The wattmeter and antenna tuner portion work fine, however,
the SWR portion of this unit is inoperative. It looks fine. $12

SWR Bridges:

Quement SWB-2 Dual Meter
This unit features two separate meters -- one for reading forward
power and another for reading SWR. This permits one to easily
monitor both the power going out, and the SWR on the antenna.
It has SO-239 connectors on each end.
It will work on HF, and VHF, covering 3 to 150 MHz, so is
ideal for the new rigs that include 6 and 2 meters.
Works fine and looks great. With paper work for $40

ThordTest SWFS-2 SWR Bridge / Field Strength Meter
Appears to be the same as the Midland above, but the outer case
is beige instead of black.
In original box, with original instruction sheet, and antenna.
$30

Lightning Protectors:

"Blitz Bug" Lighting protectors
These are not as sophisticated as the Polyphaser below,
but still protect against lightning. Two versions are
available. One has an SO-239 connector on each end.
The other has a PL-259 on one end and an SO-239 on
the other end. Take your choice for $8 each.

Polyphaser IS-VU50HN-MA Lightning Protector

Polyphaser is well know for extremely good lightning
protection equipment. This coaxial antenna protector
is designed to be inserted in the coaxial cable at the
bottom of a tower.
This unit has two SO-239 connectors, and is rated to take
750 Watts from 50 to 300 MHz and from 380 to 550 MHz.

This particular unit includes the spec sheet, and appears
that it might not have been used. It is not oxidized,
or corroded.

These sell for about $75 new. Buy this one for $55.

Larsen LM type VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Stacked whip is included. $12

Larsen LM-150, 2 meter antenna for Larsen LM Mount
Has 3 db gain on 2 meters.
This coil is still in its original box, and appears to
never have been used. It even has its rubber washer with
it, along with instructions.
Coil only for $20.
Coil, with 4 foot used whip. $26

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount,
and others. It can be cut for 2 meters, 220 MHz, or
450 MHz bands. $9

Avanti "On Glass" antenna for 440 MHz:
This antenna was made by Avanti to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.
Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Coaxial Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Coax connectors and adapters:

Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5
-
UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Antenna adapter for Kenwood TH-21/31/41 HTs
Adapts the antenna connector found on these HTs to a
standard PL-259 connector. $8

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC Regular length, 6 1/2 inches long
BNC - Original from Kenwood TH-215, 5 inches long
Alinco Stubby w/BNC Connector, 4.6 inches long

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

BNC Stubby for 440 MHz, 3 inches long

Prices do not include shipping from Florida.

Thanks.

5855. Trade for amp and other.

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-09-07 21:31:56 UTC
From: kg4coq
Topic: 5855 Message: 5855

Hello All,

Looking to trade the following below for a Icom 706 Mark 2 or other radio of same type in good working order.

---

1. Ameritron 811-A Amplifier
2. Matched 3 811-A tubes (Brand new-still in original shipping carton.)
3. Icom IC-W32A Dual Band FM Transceiver (2M and 70 CM).

This equipment is owned by a elderly ham who needs to replace his radio and is in nice shape.

This equipment will be shipped to cont US ONLY.
PLEASE CONTACT OFF LIST AT EMAIL BELOW:
kg4coq@...

Thank you,
KG4COQ

I have a brand new in the box, just purchased MD-100A8X Microphone. I bought this to use on a FT-757 but it will not key up with the ptt button but will work with the vox. I cannot find how to rewire this to the ft757 so I am selling it. Just bought for $181.31 with tax and shipping on Sept 8 2010. Will sell for $140.00 including shipping will take paypal.

5860. HF Rig, Tuner, Ant Analyzer, Mics, Wattmeters, and more FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-09-11 13:48:58 UTC
From: Ken Simpson, W8EK
Topic: 5860 Message: 5860

For Sale:

HF Transceiver, Antenna Tuner, Antenna Analyzer, Power
Supplies, Microphones, Wattmeters / SWR Bridges, and more

TenTec 585 Paragon HF Transceiver:

The Paragon is a top of the line transceiver that includes a
general coverage receiver. It covers 160-10 meters, including
WARC bands, with 100 watts output. The receiver is fantastic.
It has dual VFOs and many memories built in, along with a
speech processor. Basically, it has about every feature that
a ham could want in an HF rig.

This particular unit works 100% as best I can tell. Since the
rig does so many things, I am sure that there is something I
didn't test, but I don't know what it is (or I would have
tested it!). It has had all updates completed by TenTec.

Cosmetically, it is in extremely nice shape. The front panel
is extremely good. Most all of the lettering is clean and
crisp. This one also has the Giehl chip in it making it
similar to a Paragon II.

Large manual and power cord included for $650.

TenTec 238 Full Power Roller Inductor Antenna Tuner:

This HF antenna tuner will handle the full legal limit, and will
match almost anything. It is rated to match loads up to 3000 ohms.

It is an "L" network, which means that there is only one correct
matching point, and not false readings like some tuners. It has a
roller inductor that permits matching all HF bands, including the
WARC bands.

In addition to the tuner, it also includes a wattmeter with 200
and 2000 watt scales, plus SWR bridge. There is also an antenna
switch built in, so this unit will handle all of your antenna
needs.

This particular unit works fine, and looks extremely nice. I can
not find a scratch or defect on it. With paper work for $395.

TenTec Power Supplies:

TenTec Model 280 power supply, 20 amps at 13 V DC
This supply is quite heavy duty electrically. It has 2 pass

transistors, instead of the one that some have. It also has an ammeter on it.
This one works fine, and looks OK as well.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply:
This is a 25 amp switching power supply in a case that matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is very quiet, and well shielded, and does not produce any electrical noise that I could find. $150

TenTec 705 desk microphone
This electret desk mic has the 4 pin connector, with PTT and "hold" buttons. It works great, and looks like new.
With paper work for $75.

Collins Hand Microphone:

Collins MM-1 Mobile Microphone
The Collins MM-1 is a pressure-operated dynamic microphone designed to fit your hand comfortably. This mike is engineered for maximum voice response, and its die-cast case is finished in brushed satin chrome.

This one works fine; there are a couple extremely small pits (smaller than a pin head) on the chrome, but it looks very good. The coiled cord is a bit stiffer than when it was new.
With PJ-068 connector (often used on Collins and Drake equipment) for $100.

Antenna Analyzer:

MFJ 249 Antenna Analyzer:

This antenna analyzer covers from 1.8 to 170 MHz, so it covers all of the HF bands, plus 6 and 2 meters.

Use this unit to find your antennas true resonant frequency. Trim dipoles and verticals. Adjust your Yagi, quad, loop and other antennas, change antenna spacing and height and watch SWR, resistance and reactance change instantly. Perfectly tune critical HF mobile antennas in seconds. Take the guesswork out of building and adjusting matching networks and baluns. You can determine velocity factor, coax cable loss in dB, length of coax and distance to a short or open in feet. You can read SWR, return loss and reflection coefficient. Two line LCD screen clearly displays your information. Built-in frequency counter.

This particular unit works fine, and looks extremely nice.
With paper work for $150.

Astron RS-12 A, 13.8 Volt DC Power Supply:

This power supply is rated at 9 amps continuous and 12 amps ICS.
It is ideal for most 2 meter rigs, including the 50 Watt rigs.

This Astron power supply features solid-state electronic
regulation, EMI filter, fold back current limiting for protection
from excessive current and shorted output, and crowbar over-voltage
protection.

This particular supply works 100% and looks the same. I can not find
a scratch on it. With paper work for $50.

Wattmeters and SWR Bridges:

MFJ 815 Cross Needle Wattmeter
The MFJ-815 cross-needle meter allows you to monitor both
forward and reflected power, and SWR simultaneously. There
are buttons to select power ranges of 20/200/2000 watts
forward and 5/50/500 watts reflected.
Frequency coverage is 1.8 to 60 MHz, so it covers 6 meters
in addition to the HF bands, making it ideal for some of
the new rigs that include 6 meters.
There is a meter light that requires a source of 12 V DC.
This particular unit works fine, and looks extremely good.
With paper work for $50.

M C Jones VHF/UHF Wattmeter:

This MC Jones Wattmeter is a vintage unit, probably from just
after WW II. At that time, it was the gold standard of wattmeters,
basically equivalent to a Bird today.

This particular meter has N connectors in and out. It reads 12
Watts full scale in the forward position, and 4 Watts full scale
in reflected. It also has an SWR calibrate and SWR scale on the
meter. I think the frequency range is from 20 to 1000 MHz, but I
am not 100% positive of that. It works well on 2 meters and 440
MHz. The RF sensor unit inside is model 576.3.

This one functions fine, and looks extremely nice for its age.
$60

SWR Bridge:

Quement SWB-2 HF and VHF Dual Meter SWR Bridge
This unit features two separate meters -- one for reading forward
power and another for reading SWR. This permits one to easily
monitor both the power going out, and the SWR on the antenna.
It has SO-239 connectors on each end.
It will work on HF, and VHF, covering 3 to 150 MHz, so is

ideal for the new rigs that include 6 and 2 meters.
Works fine and looks great. With paper work for $40

Lightning Protector:

Polyphaser IS-VU50HN-MA Lightning Protector

Polyphaser is well know for extremely good lightning
protection equipment. This coaxial antenna protector
is designed to be inserted in the coaxial cable at the
bottom of a tower.
This unit has two SO-239 connectors, and is rated to take
750 Watts from 50 to 300 MHz and from 380 to 550 MHz.

This particular unit includes the spec sheet, and appears
that it might not have been used. It is not oxidized,
or corroded. $55.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce
harmonic interference. All have SO-239 connectors, and include
paper work.

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500
Watts. It is the latest model B&W filter.
In very nice condition, it looks very close to new. $40.

B & W 425
It cuts off just above 10 meters, and will handle 1500+ Watts.
Maximum attenuation is at 52 MHz, with at least 70 db across
the band. This is an older, heavier duty model. It weighs
almost twice as much as the newer model. $35

Drake TV-3300-LP
This is a modern low pass filter has been optimized to have
more attenuation in the 40 MHz region, where many TVs have
their IF. It is good for 1000 Watts "average" according to
the manual, and has over 80 db attenuation at 41 MHz.
This one looks great. $30

Knife Switch
A knife switch is often used to switch antennas using open
wire or "twin line" feeders, but can be used for other purposes.
This knife switch is DPDT. The base is about 2 1/2 by 1 1/2
inches in size, and is phenolic.
This one works fine and is in good condition. $7

Coaxial Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Coax connectors and adapters:

Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5
-
UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Antenna adapter for Kenwood TH-21/31/41 HTs
Adapts the antenna connector found on these HTs to a
standard PL-259 connector. $8

Prices do not include shipping from Florida.

Thanks.

5861. Ameritron AL-84 Amplifer, 10-160 Meters Sale or Swap For 817ND qrp rig

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-09-11 19:04:41 UTC
From: nbohioham
Topic: 5861 Message: 5861

Nice ameritron AL-84 HF amplifer, this works and looks great, inside and out, output is around 5-600 watts, comes with copy of the manual, and is 10 through 160 meters, this is not a large amp, kept as a backup amp, and a smoke free envirment , Selling for $450 plus shipping costs, or a possible swap for a ft-817ND only, please either call me or e mail me, 740-751-8626 e mail nbohioham@... god bless, Bill

5862. Yaesu HT accessories for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-09-12 01:02:27 UTC
From: John Geiger
Topic: 5862 Message: 5862

I have the following accessories available for the Yaesu VX5R/6R/7R series of HTs. Prices include shipping in the US:

1. ADMSVX6 programming software in box with USB programming cable-$20
2. CD-15A rapid charger with box-$18
3. FBA23 AA battery case-$15
4. Generic speaker mic with 4 part plug for these HTs-$10
5. Speaker mic plug cables-has the 4 part plug on one end, bare wires on the other end to wire it to whatever. I have 2, $10 each.

I can take paypal/check/MO.

73s John AA5JG

5863. FS: Yaesu MMb-36 mobile bracket

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-09-12 01:07:21 UTC
From: John Geiger
Topic: 5863 Message: 5863

I have for sale a Yaesu MMB-36 mobile mounting bracket that fits quite a few mobile FM rigs, like the 1802, 1900, 8800, 8900, 7800, 3000, 8000, 7100, 8500 and FTM-10R.
Probably fits other models as well, check your manual. It comes with the screws to attach it to the rig. I got it with a FT3000 and have no need for it. I am asking $18 shipped in the US and can take paypal/check/MO.

73s John AA5JG

5864. FS: Yaesu VX7R quadband HT

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-09-12 15:11:51 UTC

Topic: 5168 Message: 5864

I have for sale a Yaesu VX7R quadband HT. It does 5 watts on 6m, 2m, and 70cm, and 300mw on 222mhz. It is in very good shape and works fine. Comes with a LiON battery that holds a decent charge, wall charger, antenna and manual. The antenna is missing the 6m coil part of it but it works fine on 2m, 222mhz, and 70cm. This HT does dual receive and wideband receive so you can listen to broadcast band AM and FM as well as all of the public service stuff.

This is the black version of the VX7R and it is waterproof as well!
I am asking $210 shipped in the US and can take paypal/check/MO.

73s John AA5JG

Dual Band HT, Two meter HT, HT Accessories, and VHF/UHF
related equipment for sale, such as Protective Cases,
Speaker Microphones, Batteries, Belt Clips,
Wrist Straps, Rubber Ducks, DMM, and much more:

Yaesu VX-3 dual band HT:

The compact VX-3R 2m/70cm FM HT Transceiver is loaded with
convenience features. In additon to top quality performance
on 2m and 70cm, you will also be able to enjoy stereo FM and
AM broadcast band reception.

The Yaesu VX-3R 2 meter/440 MHz handheld has extensive receive
frequency coverage, providing local-area two-way amateur
communications along with unmatched monitoring capability.
The VX-3R receives: 500 - 1800 kHz (AM Band), 1.8 - 30 MHz
(Shortwave), 30 - 76 MHz (VHF Lowband with 6M), 76 - 108 MHz
(FM band), 108 - 137 MHz (Air Band), 137 - 174 MHz (VHF High
band with 2M), 174 - 222 MHz, 222 - 420 MHz (VHF band with 220),
420 - 470 MHz (440), 470 - 800 MHz and 800 - 999 MHz (800 band
[cellular blocked]). You get a huge 1000 channel memory system.

Power output with the supplied Lithium Ion battery is 1.5 watts
VHF and 1 watt UHF. With the optional E-DC-21 DC adapter output
jumps to 3 watts and 2 watts!

This particular HT is like new. It works 100%, and looks like
new, with no scratches. It has its original box, rubber duck
antenna, LiIon Battery, charger, and paper work all for only $175.

ADI-201, 2 meter HT:

The ADI-201 is a really great HT. It features up to 5 watts
power output (actually about 5 W, 2.5 W and 0.3 W in three
power ranges). It can be powered by many different voltages
from 5 V to 16 V DC, producing different power outputs. It
covers not only the 2 meter band, but also receives in the
public service bands, including the weather frequencies, so
it is ideal for such things as Skywarn. It has full tone
capabilities, handling subaudible CTCSS PL tone encode and
decode, along with some paging functions. DTMF tones are
also available. Of course it has 40 memories, scan features,
and all of the things one would expect in a modern 2 meter HT.

This particular HT has the 12 V high power battery with it.
It looks very, very good (I can not find a scratch on it),
and works 100%. It includes the HT, a rubber duck antenna,

belt clip, wrist strap, charger, and paper work for $75.

Yaesu HT Accessories:

Real Yaesu Battery pack for Yaesu VX-2 or VX-3 HT
FNB-82 LI Lithium Ion Battery Pack fits both the VX-2 and the VX-3. 3.7 volts, 1000 mahr, works great, and holds a charge like new. $22

CSC-71 Case for VX-1 dual band HT
Close to new condition. No visible wear. $16

FBA-20 "Empty battery Pack" for VX-1
Takes a single AA cell, which can be alkaline, NiCad, NiMH, etc. Like new. $18

Belt Clip for Yaesu FT-207, with hardware. $8

Wrist Strap for Yaesu FT-209, and probably others $4

Yaesu Hat
This "Ball Cap" has Yaesu on the front of it in big letters. It is white and says "Yaesu" on the front, with the Yaesu logo. It has never been used. $6

Speaker Microphones:

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. Coiled cord is somewhat stretched, but it works fine. $12

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. $ 20

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition, and are $10 each, unless stated otherwise.

BNC Regular length, 6 1/2 inches long
BNC - Original from Kenwood TH-215 HT, 5 inches long
Alinco Stubby w/BNC Connector, 4.6 inches long

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

BNC Stubby for 440 MHz, 3 inches long

Protective Cases:

CSC-71 Case for VX-1 dual band HT
Close to new condition. No visible wear. $16

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger
PB-1 and PB-4 battery packs. It can also be used with
the smaller PB-2 and PB-3 packs. Black color. Great
condition. $15

Case for Drake TR-33C
This is the black case that fits the Drake TR-33C, and has
cutouts in the back for antenna, power, etc. It includes
the shoulder strap, and is in good shape. $12

Case for Drake TR-22
As above, but for the TR-22. No shoulder strap. $10

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap. $25

Accessories for the Kenwood TR-2400 HT:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Belt clip for TR-2400 HT, complete with hardware - $8

Wrist strap for TR-2400, and most other HTs - $4

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the

Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually, one must have the battery inside the HT, but this lets you charge a second battery outside of the HT. The original charger is used. It is in good shape, and works fine. $3

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case. It fits most of the Santec HTs, such as the HT-1200, ST-142, ST-144, ST-440, etc. The real leather case includes a built in belt clip, plus a removable leather shoulder strap.
The case itself is in very nice shape. The leather shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a service pack. It has schematics, circuit explanations, voltages, etc. $18

Accessories for Kenwood TH-205, TH-215, TH-225, TH-415, and other HTs in that series:

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and PB-4 battery packs. It can also be used with the smaller PB-2 and PB-3 packs. Black color. Great condition. $15

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. Coiled cord is somewhat stretched, but works fine. $12

Kenwood BC-2 Wall Wort Charger for PB-2. $12

Kenwood BH-2 Belt clip with screws
Used on many Kenwood HTs. $8

Kenwood Wrist Strap for TH-215, plus many other HTs. $4

Original Kenwood Rubber Duck antenna from Kenwood TH-215. $10

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. (BNC male to UHF female) $5

Accessories for the Azden PCS-300 HTs:

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. It works great, and looks great also. $20

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the battery of the Azden PCS-300, 2 meter HT, outside of the HT itself. Usually, one must have the battery inside the HT, but this lets you charge a second battery outside of the HT. The original charger is used. If you have a PCS-300 HT, you need this adapter.
It works fine, and looks like new. $3

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. This adapter can be used on any HT with a BNC connector. $5

Battery pack for Yaesu VX-2 or VX-3 HT
Lithium Ion Battery Pack that fits both the VX-2 and the VX-3 3.7 volts, 1200 mahr, works great, and holds a charge like new. $15

Dead Battery Packs:

Please note that all of these battery packs are dead. There is no voltage from them. They are being sold for the purpose of rebuilding, or to be used to build a regulator in them, or whatever.

Batteries for Icom 2AT, 3 AT, 4 AT, 02AT, 03AT. 04AT, 24, and others:
BP-2, looks very nice $5
BP-3, looks like it may have gotten warm, and may be slightly deformed $4
BP-4, "Empty case" for alkalines, etc. Needs cleaning. $8
BP-5, larger pack, looks good, but has former owners call sign scratched in case, $5
Buy all four of the above for $20.

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood BH-2 for Kenwood TH-215 / 225 / 415, etc.
Kenwood BH-3 for Kenwood TH-21 / 31 / 41 series HTs
Kenwood TR-2400
Motorola
Yaesu FT-207

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, etc.
Kenwood TR-2400
Yaesu FT-209

Micronta 21-194 Digital Multimeter:

This DMM not only does the traditional things that DMMs do (measure voltage, current, etc.), but is also a transistor tester and a capacitance meter. Voltage ranges are up to 1000 Volts, current to 10 Amps, and capacitance to 20 microfarads.

This particular meter looks good, and functions fine on all modes except resistance.

Probes included for $15.

Prices do not include shipping from Florida.

Thanks.

5868. FS: Yaesu VX6R triband HT

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-09-12 21:43:57 UTC
From: John Geiger
Topic: 5868 Message: 5868

I have for sale a Yaesu VX6R triband HT. It does 5 watts on 2m and 70cm, and 1.5 watts on 222mhz. It is about 3 months old (bought in June from Jun's Electronics) so it is in excellent condition and works fine. Comes with a LiON battery that holds a decent charge, wall charger, antenna, original box and manual. It is missing the belt clip, though. This HT does wideband receive so you can listen to broadcast band AM and FM as well as all of the public service stuff. It is waterproof as well!
I am asking $180 shipped in the US and can take paypal/check/MO.

Gang:

I have the following for sale:

All items were in working order when last used.

1) 2 Telefunken FM25V radios with microphones and external speakers
and mobile mounting brackets (2 channels/crystal) $75.00 for both

2) Bearcat BC895XLT Trunktracker scanner and manual $125.00

3) Yaesu memorizer 2 meter radio (older radio) $50.00

4) Amp TR180 80 meter SSB/CW mobile radio $175.00

5) Icom ICU16 handheld w/charger (needs new battery) $50.00

6) Icom IC R7000 all mode receiver (no remote) $450.00

I would be willing to trade an item or 2 for a mobile 2 meter rig that I
could dedicate to APRS, or any QRP gear that anyone wants to get rid of.

Please contact me off list. All shipping and insurance are extra shipped
from Thunder Bay, Ontario Canada..

HG-52-SS with a copy of the original manual showing base hole information, etc. and an unused factory concrete base. Also has the accessory electric winch mounted to it (condition unknown). Was going to use here with a quad, but plans have changed. Location is Northwest of San Antonio. Not terribly heavy, but will require 3-4 people and a trailer to carry. Can provide photos. $800.

Subject: [FT817] FT-817ND For Sale
To: FT817@yahoogroups.com

I would like to sell my FT-817ND to finance other Ham Radio adventures. I am posting here first then E-Ham, QRZ, QTH, and then Ebay. Every thing works 100% and is 9.5 or better on cosmetic features. The FT-817ND comes with all items that came with it new. Extras: Leather case (Has a scratch on it), Peg Legs (Installed), LDG Z-817, Mini ref. Manual, ADMS 4A-U, Non Yaesu Ct-62 Cable, and Cranker Knob. I would like $675.00 for this set. Blue Star P1 antenna with ground stake and tripod, I would like $130.00 for this set. OPP-817+ Deal by W4RT. I pinched a wire on the battery and fixed it, so I would like $80.00 for battery, charger, and the special door to go on the 817. Miracle Ducker TL, bought in May this year. I would like $100 for it. I would like $975 for everything and I will pay for shipping. Shipping will be extra on sets for all items. Please contact me off group at mycall@...<mycall%40yahoo.com>.
Please email for pictures, payment options and questions on all of the items. Please no penny pinchers and rude comments on prices and/or equipment. I really take care of my equipment the best I can so it will last a long time. Thank You for reading!!

73 To All,
Roger Long

5883. For Sale: MFJ-1118 High Current DC Strips

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-09-24 02:36:45 UTC
From: Mike Scott
Topic: 5883 Message: 5883

I have five of these which are gently used (a county EOC). $30 each plus shipping. I don't know how much the USPS charges to ship but I would guess around $5 so the total price would be around $35. If you order more than one it will not be $5 for each one shipped but whatever USPS charges for that number shipped together.

5884. FS/FT: Alinco DJ-580 VHF/UHF Handheld

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-09-24 01:24:47 UTC
From: John Carpenter, W5JMC
Topic: 5884 Message: 5884

Hi All.

I have an Alinco DJ-580 VHF/UHF handheld transceiver for sale or trade. The radio is in very, very good condition ? an easy 8/10 or better. It comes with the stock rubber duck antenna, a speaker mic with clip, belt clip, a new 1100mAh battery from Batteries America, a AA battery case, and a desktop charge with power cord. I can email you a copy of the manual or you can download it from Alinco?s website. This is an easy to use, reliable radio. It does cross-band repeat and full duplex operation. The receive is also extended through 998mhz and the aircraft band. I am asking $135 shipped, or will consider your trade offer. I am in need of a VX-8R speaker mic (MH-74A7A) and GPS (FGPS-2). I would also be interested in a set of lights for an off-road vehicle. If interested, please email me at w5jmc.john(at)gmail.com. Thanks for reading! 73?s

5885. FS: Speaker mic for Yaesu HTs

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-09-23 21:41:52 UTC
From: John Geiger
Topic: 5885 Message: 5885

I have for sale an aftermarket (can't tell which brand) speaker mic for the Yaesu HTs that take the 4 part single pin, like the VX5R/6/7, FT50, and probably some others.

I am asking $12 shipped for it and can take paypal/check/MO.

5886. FS: yaesu FT3000M manual

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-09-24 23:16:17 UTC
From: John Geiger
Topic: 5886 Message: 5886

I have for sale the complete, original manual for a Yaesu FT3000M transceiver. These are rare to find because all of the on-line copies are missing several crucial pages in them. This one has all of the pages. It does have a little writing on it but overall is good. I am asking $10 shipped for it and can take paypal/check/MO.

73s John AA5JG

5887. FS: Yaesu MH-48 hand mic

From: John Geiger
Topic: 5887 Message: 5887

I have for sale a Yaesu MH-48 DTMF Hand Microphone which works with the FT-7800R, FT-8800R, FT-8900R, FT-2800M, FT-1802M, FT-1900R, FT-7100, FT-2900R, FT3000M, and probably a few others. It will also work with the FT100D but all of the buttons won't operate correctly on that radio.

I am asking $25 shipped for it and can take paypal/check/MO.

73s John AA5JG

5888. FS: MH-36 hand mic for FT100D

Yahoo group: ham4sale (2007 — 2015)

From: John Geiger
Topic: 5888 Message: 5888

I have for sale a Yaesu MH-36 TTP hand mic for the FT100 series of radios. Works fine and the cord is in fine shape also. I am asking $26 shipped and can take paypal/check/MO.

73s John AA5JG

5889. FS: Yaesu MMB-36 mobile bracket

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-09-25 13:02:02 UTC
From: John Geiger
Topic: 5889 Message: 5889

I have for sale a Yaesu MMB-36 mobile mounting bracket that fits quite a few mobile FM rigs, like the 1802, 1900, 8800, 8900, 7800, 3000, 8000, 7100, 8500 and FTM-10R.
Probably fits other models as well, check your manual. It comes with the screws to attach it to the rig. I got it with a FT3000 and have no need for it. I am asking $18 shipped in the US and can take paypal/check/MO.

73s John AA5JG

5890. FS: Yaesu FT50 dualband HT

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-09-25 13:08:26 UTC
From: John Geiger
Topic: 5890 Message: 5890

I have for sale a Yaesu FT50 dualband (2m/70cm) HT in very good condition. This is a 0 serial number range which means it is one of the last ones made. It comes with a fairly new NIMH battery that holds a charge and is a 9.6 volt battery, so the FT50 will put out 5 watts. It also does wideband receive, dual watch, and split frequency operation so you can use it on the satellites. It comes with the wall charger, and a 2 meter monoband antenna. It does PL tones, DCS tones, and has a built in voice recorder so you can record audio off the air or record audio from the mic to use as a voice keyer.

I am asking $120 shipped for this HT and can take paypal/check/MO.
73s John AA5JG

5891. WTB TenTec 526 '6N2' transceiver

From: Tom B
Topic: 5892 Message: 5892

Hello All,

I have for sale a Motorola S1327A service monitor that is not working. The last time it was checked, the heater in the frequency standard was shorted. It may also have other problems that I am not aware of, so I am selling it as not working. It has the deviation meter, scope, and one preselector for 402-420 MHz. The price is $100 plus shipping from 20914.

From: doc@kd4e.com
Topic: 5894 Message: 5894

Many years ago I owned a couple of pieces of the Morrow
mobile gear and created a Web site celebrating the series:
http://www.qsl.net/k1yp/BA/Morrow/ham1/ham1.html but life
happened and I needed to sell my Morrow gear.

I've just found some Morrow gear and need to raise some
quick cash.

FS: National NC-270 "Cosmic Blue" Receiver and WRL Globe
Scout 680A

The NC-270 needs a case and some cleaning to make it all
shiny. The 680A is complete and includes a spare rectifier
tube. Both work but as sold as-is. Pictures on request.

Pickup or a meet-up in the Statesboro-Savannah, GA area
is preferred but I will pack and ship.

Asking $145., or reasonable offer, for the pair plus the
actual cost to ship.

--

5895. FS: JUPITER - just refurbished by Ten-Tec

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-09-29 03:58:31 UTC
From: Tom
Topic: 5895 Message: 5895

For Sale -

Jupiter 538, with antenna tuner installed (Ten-Tec installed), and Ten-Tec small hand mic. I just received this back from Ten-Tec two weeks ago. This radio is very clean. I bought it in with a few problems with transmit and with the intention of using it for a dedicated ARES radio, but due to unforeseen family financial matters, I must sell it. I sent the radio back to Ten-Tec and had them
completely go through the radio and upgrade the chip (for CW), which brings it up to date. The problem was the driver transistors, which were replaced. The screen is still the original green screen. Everything was checked back to factory specs. The radio works and performs flawless. Overall it show very little use. I've made numerous contacts and is as good a receiver/transmitter as my Omni VII.

The price is $900 (firm) shipped to lower 48 only,in original Ten-Tec carton. Manual, new power cable and microphone.

No PayPal - cashier's check or money order.

Please contact me if you would like further information.

Thanks,
Tom, N4GVK
n4gvk@...

5896. FS: WRL Globe 680A 80-10M Transmitter

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-09-29 23:07:44 UTC
From: doc@kd4e.com
Topic: 5894 Message: 5896

Deal fell thru ...

The 680A is complete and includes a spare rectifier tube.

The prior owner said he had it working after he bypassed
one of the caps in the triple-cap assembly but then trouble
returned and the rig was popping rectifier tubes. I have
not had time to troubleshoot - need to make room for the
Morrow gear.

Rig could use a little TLC and is sold as-is for $85.
including shipping to standard locations in the USA and
Canada (some locations may be extra).

5898. Antenna Tuners, Wattmeters, Dummy Load FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-09-30 10:53:21 UTC
From: Ken Simpson, W8EK
Topic: 5898 Message: 5898

For Sale:

Antenna Tuners, Wattmeters / SWR Bridges, Antenna Analyzer,
Dummy Load,

TenTec 238 Full Power Roller Inductor Antenna Tuner:

This HF antenna tuner will handle the full legal limit, and will
match almost anything. It is rated to match loads up to 3000 ohms.

It is an "L" network, which means that there is only one correct
matching point, and not false readings like some tuners. It has a
roller inductor that permits matching all HF bands, including the
WARC bands.

In addition to the tuner, it also includes a wattmeter with 200
and 2000 watt scales, plus SWR bridge. There is also an antenna
switch built in, so this unit will handle all of your antenna
needs.

This particular unit works fine, and looks extremely nice. I can
not find a scratch or defect on it. With paper work for $395.

MFJ 941 C antenna tuner for 160 thru 10 meters

This tuner has a "cross needle" SWR bridge built into it,
so one can read both forward power, reflected power, and
SWR at the same time. The meter has a back light, assuming
12 Volts is applied to the tuner. The wattmeter portion
will read either 30 W or 300 W full scale.

An antenna switch will switch between either balanced line,
two coax antennas, or a built in dummy load. Antennas can
be operated thru the tuner, or the tuner can be bypassed.

This tuner will operate on 160 thru 10 meters, including
the WARC bands.

This particular unit works 100%. It looks extremely nice.
I can not find a scratch on it.

Paper work is included for $100.

MFJ 900 HF Antenna Tuner:
The MFJ 900 covers 160 thru 10 meters, and is rated at 200
watts. I would not put more than 100 watt thru it, however.
It is in a nice Woodgrain / Eggshell color enclosure that is
a perfect match for some of the earlier TenTec gear, such as

the Triton I and II, Argonaut 505 and 509, and others.
This one works fine, and looks fine also. $45

Wattmeter and SWR Bridges:

M C Jones VHF/UHF Wattmeter:

This MC Jones Wattmeter is a vintage unit, probably from just after WW II. At that time, it was the gold standard of wattmeters, basically equivalent to a Bird today.

This particular meter has N connectors in and out. It reads 12 Watts full scale in the forward position, and 4 Watts full scale in reflected. It also has an SWR calibrate and SWR scale on the meter. I think the frequency range is from 20 to 1000 MHz, but I am not 100% positive of that. It works well on 2 meters and 440 MHz. The RF sensor unit inside is model 576.3.

This one functions fine, and looks extremely nice for its age. $60

SWR Bridges:

Quement SWB-2 Dual Meter
This unit features two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna.
It has SO-239 connectors on each end.
It will work on HF, and VHF, covering 3 to 150 MHz, so is ideal for the new rigs that include 6 and 2 meters.
Works fine and looks great. With paper work for $40

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This is an HF SWR Bridge, but it it is rated to be used up thru 2 meters (1.8 thru 150 MHz). It is also a field strength meter.
SO-239 connectors.
This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions. $32

MFJ 249 Antenna Analyzer:
This antenna analyzer covers from 1.8 to 170 MHz, so it covers all of the HF bands, plus 6 and 2 meters.
Use this unit to find your antennas true resonant frequency. Trim dipoles and verticals. Adjust your Yagi, quad, loop and other antennas, change antenna spacing and height and watch SWR, resistance and reactance change instantly. Perfectly tune critical HF mobile antennas in seconds. Take the guesswork out of building and adjusting matching networks and baluns. You can determine velocity factor, coax cable loss in dB, length of coax and distance to a short or open in feet. You can read SWR, return loss and reflection coefficient. Two line LCD screen clearly

displays your information. Built-in frequency counter.
This particular unit works fine, and looks extremely nice.
With paper work for $150.

Heath HN-31 "Cantenna" RF Dummy Load:
This is the traditional Heath dummy load that will handle a
kilowatt. It has a derating curve both printed in the manual
and on the can.
I measured the resistor and it is 47 ohms, so obviously it
is in good shape and a great match for 50 ohms. The cantenna
itself is in really great shape, with no rust, dents or dings.
Paper work is included for $45.

Prices do not include shipping from Florida.

Thanks.

5899. FS: Parts that may be of some use in RF Amplifiers

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-09-30 15:26:12 UTC
From: Radio WC6W
Topic: 5700 Message: 5899

Alert!! Microsoft IE8 or IE9 may not properly display my webpage. Surely Billy G. is hard at work on the fix. Firefox displays it fine, as does IE6 & IE7.

1N2804A -- 6.8V 50 Watt Zener Diodes, TO-3 case, NOS -- $10 each

More Semiconductors may be seen at:

http://qsl.net/wc6wfsw/index.html?fr20.html

AC-DC Electornics model RS5N30-1. 5V @ 30A switching power supply with remote sense terminals, screwdriver voltage adjust, 6" x 2.5" x 10". Employed with an external soft-start (See-- http://qsl.net/wc6wamps/index.html?fr63.html) these can power the heater(s) on a 3CX1000 or a pair of 3-400Z's, 3-500Z's, 4-400A's, etc. Used -- $30 ea. (3 units available)

More Power Supplies may be seen at:

http:/qsl.net/wc6wfsw/index.html?fr15.html

Commercially made airflow switch assembly consisting of a V4-16 Microswitch (250VAC 5A contact rating) with a 1-3/8" x 1-3/4" sheet metal vane soldered to the switch arm. The switch is mounted in a U shaped anodized aluminum frame about 2.5" deep with mounting ears. Marked S-101 and part no. 467-115 if anyone knows where that's from! NOS $10

********** Transformers **********

Stancor Transformers

P-6308 107/117V Primary 50/60 Hz -- 6.3 VCT @ 10A Secondary, Used -- $20

F-106 115/230V Primary 50/60 Hz -- 10 VCT @ 6.5A Secondary, S case Used $20

F-610 115/230V Primary 50/60 Hz -- 6.3 VCT @ 10A Secondary, S case Used $20

Triad Transformers -- 115V 60CPS Primary

F21A 6.3VCT @ 10A Secondary, Used -- $20

F28U 6.3/7.5 VCT @ 25A Secondary, NOS -- $40

More Transformers may be seen at:

http:/qsl.net/wc6wfsw/index.html?fr36.html

********** Capacitors **********

Cardwell -- XR-1000HS (about 950pF max measured) These have slightly contoured plates for improved tuning resolution at minimum C. .030 air gap. About 4.5" x 4" x 3.5" overall including plate travel. Used, Good condition. $20 ea.

National Type TMC-300, 300pF variable capacitor, .070" air gap, approx. 8" X 4" x 2.5" with plates closed. Nice n' shiny like new! $40

Sprague 3600pF @ 30KV Doorknob capacitor. Red epoxy encased style -- $25

More Capacitors may be seen at:

http://qsl.net/wc6wfsw/index.html?fr34.html

********** Coils **********

Toroidal Tank coil -- The core is fiberglass & resin encased. It is currently wound with 20 turns of #12 wire. There are notches in the form for up to 40 turns. It is a bit over 4 inches in diameter and about 1-3/4" thick. This was made by Bob, W6YUY. See his article in August 1985 Ham Radio magazine "Design a Toroidal Tank Circuit for you Vacuum Tube Amplifier". $50

More coils may be seen at:

http://qsl.net/wc6wfsw/index.html?fr35.html

********** Tube Sockets & Accessories **********

Eimac -- Databook set circa 1985 in two large yellow Eimac 3 ring binders. Includes data sheets from 1976 edition and earlier. Very good condition. $200

Coaxial Planar Tube -- shielded heater/cathode contact assembly. Fits 2C39, 3CX100A5 or similar. Silver plated, NOS -- $10 each

Eimac SK-620 sockets, "unused" pair. One is a SK-620; the other a SK-620A. Probably 40 years old, a bit tarnished from storage, and unused except the heater pins on one were once soldered... probably to check some tubes. $60 for the pair.

Johnson 122-101 ceramic 7 pin septar socket (accepts 826, 832, 4D32, PL6549, PL6569, etc). These were likely a special order as they have the standard ground shield but, no ground clips. NOS though, a bit dusty & tarnished from long storage -- $10ea

Johnson 122-237 ceramic 7 pin giant socket for 813, etc. NOS, $15

Johnson 122-237 ceramic 7 pin giant socket for 813, etc. Used, $10

Johnson A pair of used 122-237 ceramic 7 pin giant sockets for 813, etc. including (8) base clips. $25

Johnson 122-247A or 122-248 ceramic 7 pin septar socket (accepts 7094, 8877, 832A, etc.) Used, $10

Johnson 124-115-2 UHF socket similar to Eimac SK-620. NOS, but, a mite tarnished from age. $40

Millen 36001 or National SPP-9 -- 9/16" Ceramic Plate Caps (fit 813 or similar) Used. Your choice, $3 ea

More sockets and some tubes may be seen at:

http://qsl.net/wc6wfsw/index.html?fr41.html

********** Connectors -- All NOS , US manufacture ******************

Amphenol MHV connectors -- Two 28100 right angle cable males & two 27025 panel mount females. -- $40 all.

UG-932 A/U MHV Male Cable connectors -- $10 ea

UG-961 A/U MHV Female Panel connector -- $12

UG-560/U HN Female panel mount connector -- $15 ea

UG-30C/U N Female-Female Bulkhead Connector -- $10 ea

More connectors may be seen at:

http://qsl.net/wc6wfsw/index.html?fr44.html

********** Miscellaneous *************

Synchro Transmitters -- IMC Magnetics, Model 008-216, 26V 400Hz, .75" diameter housing, .120" dia. shaft, flying leads. These will drive a typical Radio Compass Indicator. NOS. $20 ea.

Water cooled heatsinks -- 12" x 8" used, drilled for a flock of TO-3's plus a few diodes. Back is flat. 3/8" water lines. $50 pair

ILG Electric Ventilation -- 17-18-022A squirrel cage type fan. Encased motor with 181-009-EA fan 115/230 VAC 1.6A/.8A 50/60Hz 3000 RPM 4+" round intake, 3+" x 4-3/4" rectangular output flange, weighs 25 lbs. Removed from a RCA transmitter that employed a 4CX5000A. Used -- $45

****

And of course some meters, panel meters, time meters & RF ammeters, please see:

http://qsl.net/wc6wfsw/index.html?fr32.html

****

73 & Good morning,
Marv WC6W

AC-DC Electornics model RS5N30-1. 5V @ 30A switching power supply with remote sense terminals, screwdriver voltage adjust, 6" x 2.5" x 10". Employed with an external soft-start (See-- http://qsl.net/wc6wamps/index.html?fr63.html) these can power the heater(s) on a 3CX1000 or a pair of 3-400Z's, 3-500Z's, 4-400A's, etc. Used -- $30 ea. (3 units available)

More Power Supplies may be seen at:

http://qsl.net/wc6w/wc6wfsw/index.html?fr15.html

Commercially made airflow switch assembly consisting of a V4-16 Microswitch (250VAC 5A contact rating) with a 1-3/8" x 1-3/4" sheet metal vane soldered to the switch arm. The switch is mounted in a U shaped anodized aluminum frame about 2.5" deep with mounting ears. Marked S-101 and part no. 467-115 if anyone knows where that's from! NOS $10

********** Transformers **********

Stancor Transformers

P-6308 107/117V Primary 50/60 Hz -- 6.3 VCT @ 10A Secondary, Used -- $20

F-106 115/230V Primary 50/60 Hz -- 10 VCT @ 6.5A Secondary, S case Used $20

F-610 115/230V Primary 50/60 Hz -- 6.3 VCT @ 10A Secondary, S case Used $20

Triad Transformers -- 115V 60CPS Primary

F21A 6.3VCT @ 10A Secondary, Used -- $20

F28U 6.3/7.5 VCT @ 25A Secondary, NOS -- $40

More Transformers may be seen at:

http://qsl.net/wc6w/wc6wfsw/index.html?fr36.html

********** Capacitors **********

Cardwell -- XR-1000HS (about 950pF max measured) These have slightly contoured plates for improved tuning resolution at minimum C. .030 air gap. About 4.5" x 4" x 3.5" overall including plate travel. Used, Good condition. $20 ea.

National Type TMC-300, 300pF variable capacitor, .070" air gap, approx. 8" X 4" x 2.5" with plates closed. Nice n' shiny like new! $40

Sprague 3600pF @ 30KV Doorknob capacitor. Red epoxy encased style -- $25

More Capacitors may be seen at:

http://qsl.net/wc6w/wc6wfsw/index.html?fr34.html

********** Coils **********

Toroidal Tank coil -- The core is fiberglass & resin encased. It is currently wound with 20 turns of #12 wire. There are notches in the form for up to 40 turns. It is a bit over 4 inches in diameter and about 1-3/4" thick. This was made by Bob, W6YUY. See his article in August 1985 Ham Radio magazine "Design a Toroidal Tank Circuit for you Vacuum Tube Amplifier". $50

More coils may be seen at:

http://qsl.net/wc6w/wc6wfsw/index.html?fr35.html

********** Tube Sockets & Accessories **********

Eimac -- Databook set circa 1985 in two large yellow Eimac 3 ring binders. Includes data sheets from 1976 edition and earlier. Very good condition. $200

Coaxial Planar Tube -- shielded heater/cathode contact assembly. Fits 2C39, 3CX100A5 or similar. Silver plated, NOS -- $10 each

Eimac SK-620 sockets, "unused" pair. One is a SK-620; the other a SK-620A. Probably 40 years old, a bit tarnished from storage, and unused except the heater pins on one were once soldered... probably to check some tubes. $60 for the pair.

Johnson 122-101 ceramic 7 pin septar socket (accepts 826, 832, 4D32, PL6549, PL6569, etc). These were likely a special order as they have the standard ground shield but, no ground clips. NOS though, a bit dusty & tarnished from long storage -- $10ea

Johnson 122-237 ceramic 7 pin giant socket for 813, etc. NOS, $15

Johnson 122-237 ceramic 7 pin giant socket for 813, etc. Used, $10

Johnson A pair of used 122-237 ceramic 7 pin giant sockets for 813, etc. including (8) base clips. $25

Johnson 122-247A or 122-248 ceramic 7 pin septar socket (accepts 7094, 8877, 832A, etc.) Used, $10

Johnson 124-115-2 UHF socket similar to Eimac SK-620. NOS, but, a mite tarnished from age. $40

Millen 36001 or National SPP-9 -- 9/16" Ceramic Plate Caps (fit 813 or similar) Used. Your choice, $3 ea

More sockets and some tubes may be seen at:

http://qsl.net/wc6w/wc6wfsw/index.html?fr41.html

********** Connectors -- All NOS , US manufacture ******************

Amphenol MHV connectors -- Two 28100 right angle cable males & two 27025 panel mount females. -- $40 all.

UG-932 A/U MHV Male Cable connectors -- $10 ea

UG-961 A/U MHV Female Panel connector -- $12

UG-560/U HN Female panel mount connector -- $15 ea

UG-30C/U N Female-Female Bulkhead Connector -- $10 ea

More connectors may be seen at:

http://qsl.net/wc6w/wc6wfsw/index.html?fr44.html

********** Miscellaneous *************

Synchro Transmitters -- IMC Magnetics, Model 008-216, 26V 400Hz, .75" diameter housing, .120" dia. shaft, flying leads. These will drive a typical Radio Compass Indicator. NOS. $20 ea.

Water cooled heatsinks -- 12" x 8" used, drilled for a flock of TO-3's plus a few diodes. Back is flat. 3/8" water lines. $50 pair

ILG Electric Ventilation -- 17-18-022A squirrel cage type fan. Encased motor with 181-009-EA fan 115/230 VAC 1.6A/.8A 50/60Hz 3000 RPM 4+" round intake, 3+" x 4-3/4" rectangular output flange, weighs 25 lbs. Removed from a RCA transmitter that employed a 4CX5000A. Used -- $45

****

And of course some meters, panel meters, time meters & RF ammeters, please see:

http://qsl.net/wc6w/wc6wfsw/index.html?fr32.html

****

73 & Good morning,
Marv WC6W

http://qsl.net/wc6w/

5901. For sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-10-01 00:43:36 UTC
From: Chris Boone
Topic: 557 Message: 5901

Midland 70-530B UHF radios...with bracket, mic and power cable..$40 shipped

Yaesu FT530, FT33R and drop in charger for both..33 has NEW battery and has the DTMF TT4 pad...DISPLAY was perfect until Texas heat got to it this summer...now there is a spot right over the MHz number in the display. NO CTCSS in the radio....530 in great shape but battery needs changing. Have new front panel for it from Yaesu (never got around to changing it) $175 for all shipped.

Have other gear coming soon...including 220 duplexer and more!

Chris
WB5ITT

5902. FS: Yaesu VX7R with SU-1 unit installed

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-10-01 02:30:37 UTC
From: John Geiger
Topic: 5902 Message: 5902

I have for sale a Yaesu VX7R quadband HT with the SU-1 barameter/altmeter unit installed (a $40 option). It does 5 watts on 6m, 2m, and 70cm, and 300mw on 222mhz. It is in excellent shape and works fine. Comes with a new LiON battery, wall charger, antenna and manual. The antenna has all pieces including the 6m coil part of it. This HT does dual receive and wideband receive so you can listen to broadcast band AM and FM as well as all of the public service stuff.

This HT is a 2008 model and comes with the box, manual, and belt clip as well. It is like getting a new HT with the SU-1 installed, at a less that new price.

This is the black version of the VX7R and it is waterproof as well!

I am asking $205 shipped in the US and can take paypal/check/MO.

73s John AA5JG

5906. HF Rigs and Power Supplies FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-10-02 11:41:26 UTC
From: Ken Simpson, W8EK
Topic: 5906 Message: 5906

Several HF Transceivers, and Power Supplies For Sale:

Icom IC-756 Pro, 160 thru 6 meter transceiver

The upgraded Icom IC-756 Pro covers all nine HF ham bands plus 6 meters (receive from 30 kHz - 60 MHz). The high resolution 4.9 inch TFT color dot matrix LCD display provides more operating information than you've ever had before, including a spectrum scope (± 12.5, ± 25, ± 50 or ± 100 kHz). The Pro features a 32-bit floating point DSP Digital IF filter with 41 selectable bandwidths, microphone equalizer, manual notch function, digital twin pass band tuning (PBT), all mode, including PSK31, and much more. No additional filters or high stability crystal oscillators are available or needed. The selectivity lets you pull out weak signals like never before. The rear panel features two antenna inputs plus an RCA type receive antenna jack.

It includes such things as a Voice Keyer, 101 Memories, RIT/XIT, Noise Blanker, Multiple Display Formats, Realtime Spectrum Display, Twin Digital PBT, Voice Recorder, 100 Watt Output, Built-in Auto Antenna Tuner, TCXO Built In, 100% Duty Cycle, Built in RTTY Demod, DSP Notch, 1 Hz Readout, Memory Keyer, RF Attenuator 6/12/18 dB, Automatic Notch and much more.

This particular unit works 100% as best I can tell. I tried to test everything. It looks extremely nice. It is in its original box, with paper work for $1100.

Icom IC-746, 160 thru 2 meter transceiver

The Icom IC-746 covers 160-10 meters plus 6 and 2 meters. 100 Watts of output is available on all bands - HF, 50 MHz and 144 MHz, making the IC-746 a practical choice for all-around base station use. The die-cast aluminum chassis and a large cooling fan help to stabilize the PA circuit, providing 100% full duty cycle operation. It has 100 alphanumeric memories, spectrum display, Twin PBT, CTCSS encode / decode, APF, two stage preamp, keypad entry, automatic antenna tuner and electronic keyer. DSP digitally transposes receive audio components in all modes of operation to produce desired AF frequency characteristics at the IF stage of the transceiver. This built-in DSP provides: noise reduction, automatic notch filter and selectable APF. The digital bar graph meter displays ALC, power output and SWR simultaneously! The radio automatically selects from the three separate antenna inputs (HF, 6 meters, 2 meters). A built-in

automatic antenna tuner operates on the HF bands plus 6 meters. The rear panel has three antenna jacks. The 746 requires 12 VDC at 20 amps.

Features include Spectrum Scope, 102 Memories, RIT/XIT, Noise Blanker, VOX Function, Selectable APF, Dual Display, 100 Watt Output, 40 Watt Output (AM), Built-in Automatic Antenna Tuner 180-6 Meters, Full Break-In CW, CW Keyer, 100% Duty Cycle, Rx Antenna Jack, DSP Notch, 1 Hz Readout, Memory Keyer, RF Attenuator 6/12/18 dB, and much more.

This particular unit works 100% as best I can tell. It looks very close to new, and is in its original box, with paper work for $750.

Icom PS-30 Deluxe Power Supply

The Icom PS-30 power supply delivers 13.8 VDC at 25 amps. This power supply features a meter which can be set to display amperage or voltage. Four outputs are provided on the rear panel. Output 1 is a hard wired, high amperage cable with the Icom standard 6 pin Molex plug. Outputs 2, 3 and 4 provide low amperage 13.8 VDC output. This power supply has a snap-out tilt bracket.

This one works 100% and looks very nice. With paper work for $185.

Kenwood TS-440 S / AT, 100 Watt HF transceiver:

The Kenwood TS-440S/AT was designed for superior performance in the SSB, CW, AM, FM and AFSK modes. An automatic antenna tuner is built in. Coverage is 160 through 10 meters including the WARC bands with 100 watts (40W AM). It includes such things as notch filter, individual selection of optional crystal filters, digital readout, memories, scan capabilities, IF shift, direct frequency entry from a keyboard, and many other features. It requires 13 VDC at about 20 amps.

This particular TS-440 is in great condition. Electrically, it functions 100%. There are no problems with the VCO and PLL like plagues some of these units. Likewise the frequency entry from the keyboard is clean and definite. Cosmetically, it looks good. With paper work for only $450.

Kenwood PS-430 power supply
This 20 amp, 13 V DC power supply matches TS- 140, TS-430, TS-440, and others. It has the heavy 6 pin Kenwood power cable plus an axillary 13 V DC output on back for running other shack accessories.
This one works fine, and looks good. With paper work for $100.

TenTec 585 Paragon HF Transceiver:

The Paragon is a top of the line transceiver that includes a general coverage receiver. It covers 160-10 meters, including WARC bands, with 100 watts output. The receiver is fantastic. It has dual VFOs and many memories built in, along with a speech processor. Basically, it has about every feature that a ham could want in an HF rig.

This particular unit works 100% as best I can tell. Since the rig does so many things, I am sure that there is something I didn't test, but I don't know what it is (or I would have tested it!). It has had all updates completed by TenTec.

Cosmetically, it is in extremely nice shape. The front panel is extremely good. Most all of the lettering is clean and crisp. This one also has the Giehl chip in it making it similar to a Paragon II.

Large manual and power cord included for $650.

TenTec Power Supplies:

TenTec Model 280 power supply, 20 amps at 13 V DC
This supply is quite heavy duty electrically. It has 2 pass transistors, instead of the one that some have. It also has an ammeter on it.
This one works fine, and looks OK as well.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply:
This is a 25 amp switching power supply in a case that matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is very quiet, and well shielded, and does not produce any electrical noise that I could find. $150

TenTec 238 Roller Inductor Antenna Tuner:

This HF antenna tuner will handle the full legal limit, and will match almost anything. It is rated to match loads up to 3000 ohms.
TenTec
It is an "L" network, which means that there is only one correct matching point, and not false readings like some tuners. It has a roller inductor that permits matching all HF bands, including the WARC bands.

In addition to the tuner, it also includes a wattmeter with 200 and 2000 watt scales, plus SWR bridge. There is also an antenna switch built in, so this unit will handle all of your antenna needs.

This particular unit works fine, and looks extremely nice. I can not find a scratch or defect on it. With paper work for $395.

MFJ 989 C Roller Inductor Full Power HF Tuner:

This is the most popular legal limit antenna tuner. It handles 1500 Watts from 1.8 to 30 MHz including MARS/WARC bands.

You can match dipoles, verticals, inverted V's, random wires, beams, balanced lines, coax, mobile whips, shortwave -- nearly any antenna.

It includes a cross needle meter to read forward power, reflected power, and SWR simultaneously. It will read peak or average power. It also has a switched meter light, if you supply 12 Volts to it.
An antenna switch is built in, as is a dummy load.

This one works 100% with absolutely no problems. It looks extremely nice, with no scratches. It includes paper work, and is in its original box.

MFJ sells these for just under $400. Buy this one for $230.

TenTec 705 desk microphone
This electret desk mic has the 4 pin connector, with PTT and "hold" buttons. It works great, and looks like new.
With paper work for $75.

RCA equivalent to a Shure 444 desk microphone
Although the front of this mic says RCA on it, it looks like a Shure 444, and has a controlled magnetic element in it just like the Shure 444. My assumption is that it is a 444 with an RCA label.
Of course most of us know that the 444 is an extremely good communications microphone with great articulation.
This one works fine, and looks very nice. It has a 4 pin connector on it. $50

Prices do not include shipping from Florida.

Thanks.

WESTON MODEL TV-4A/U VACUUM TUBE TESTER

This is a military-type emission tester that will check even the oldest type of vacuum tubes, such as the two digit numbered tubes (40, 50, 80 etc).

Handles: 7 & 9 pin miniature, 8 pin octal, 4, 5, 6 pin large base, and acorn tubes. Tube tester has an attached set of charts and I have some electronic-form documentation as well.

Handles most common audio amplifier tubes such as: 6L6, 5U4, 6SN7, 6V6, 6AQ5, 12AX7 and more.

Kinda heavy for its size and built like a small tank. Untested. Picture on request.

Asking $45. shipped to standard locations.

5916. RE: WANTED: SHORTWAVE CONVERTER FOR MOBILE

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-10-05 20:10:35 UTC
From: Dr. Esteban Wilson
Topic: 5916 Message: 5916

Dear Friends,

I am looking for a mobile shortwave converter for the automobile's AM radio. I would prefer a multi-band converter, such as the one that MFJ used to make. Drop me an email and tell me what you have.

Thanks in advance!

5917. FS or trade: Kenwood TS570SG HF/6m radio

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-10-06 12:56:54 UTC
From: John Geiger
Topic: 5917 Message: 5917

I have sale or trade a Kenwood TS570SG HF/6m 100 watt all mode radio. It is a nice base sized rig that allows all functions to be controlled from the front panel, but it is also small enough to take portable or mobile.
It has a built in antenna tuner, built in CW memory keyer, speech processor, and DSP.

It works fine and the front panel looks really good. The case has some scratches gouges on it. It comes with the hand mic, manual and power cord.

I would sell it for $600 shipped or would be interested in trades involving a Yaesu FT450, Yaesu FT857D, Yaesu FT897D, or Icom 706mKIIG. I would also entertain other trade offers. You never know what I will take, just ask.

I can arrange for an in person trade in the OKC or SW OK area or North Texas area or will ship. I can take paypal/check/MO for payment.

73s John AA5JG

5918. For Trade: Icom T8A triband HT for Yaesu VX2R/VX3R

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-10-06 20:30:36 UTC
From: John Geiger
Topic: 5918 Message: 5918

I have an Icom T8A triband HT (6m/2m/70cm) in good condition which I would like to trade for an Yaesu VX2R or VX3R. It comes with the antenna and 6 AA cell battery case from Batteries America. No charger or manual comes with it. If you have a VX2R or VX3R but need more power, let's trade! I will entertain other trade offers also-you never know what I might take.

5919. FS: TEN-TEC JUPITER - just refurbished by Ten-Tec - PRICE REDUCED

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-10-07 14:12:36 UTC
From: Tom
Topic: 5919 Message: 5919

PRICE REDUCED

For Sale -

Jupiter 538, with antenna tuner installed (Ten-Tec installed - just installed 3 weeks ago), and Ten-Tec small hand mic. I just received this back from Ten-Tec two weeks ago. This radio is very clean. I bought it in with a few problems with transmit and with the intention of using it for a dedicated ARES radio, but due to unforeseen family financial matters, I must sell it. I sent the radio back to Ten-Tec and had them completely go through the radio and upgrade the chip (for CW), which brings it up to date. The problem was the driver transistors, which were replaced. The screen is still the original green screen. Everything was checked back to factory specs. The radio works and performs flawless. Overall it shows very little use. I've made numerous contacts and is as good a receiver/transmitter as
my Omni VII.

The price is $850 (reduced from last post)shipped to lower 48 only,in original Ten-Tec carton. Manual, new power cable and microphone.

Cashier's check or money order. PayPal only if you pay fee

Please contact me if you would like further information.

Thanks,
Tom, N4GVK

Date: 2010-10-10 23:56:39 UTC
From: Marty
Topic: 5931 Message: 5936

http://grayhamfesttn.org/index.htm

This is one Hamfest you don't have to talk the wife into, near Johnston City, TN. My XYL and I love the scenery, drive a few miles north to the Kingsport area and enjoy the leaf colors (take some back roads, INCREDIBLY BEAUTIFUL) AND DON'T MISS "MAMA'S Restaurant" famous cookies (sugar free option too and you've never had sugar free cookies this good!) If you get the right waitress she'll give you a bunch to take back to your motel room:-). Take your wife through the Traders Mall in Kingsport, you'll enjoy it too, sort of an indoor flea market in three adjacent buildings.

OH yeah, for you single guys, the airline stewardesses stay at the La Quinta Inn & Suites, Kingsport TriCities Airport motel, next to Cracker Barrel Restaurant at 81 and Airport Parkway. You can take Airport road route from the motel right to the Gray Hamfest (but take your GPS ;)

Marty

5938. Flea Market Rip Off

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-10-12 13:00:42 UTC
From: Warren Rothberg
Topic: 5938 Message: 5938

Warning: Be careful at future flea markets. In Melbourne, I bought a VHF amplifier from someone in the row closest to the side street about 4 tables in. He wrote down his name and phone number for me in case there was any problem and he would be happy to take it back.

I arrived home and the amp was DOA. The name and number he gave me (Tom from Tampa/St. Pete area) turned out to be bogus. He had a lot of Azden radios on the table. Buyer beware.

Warren, W4WR

5939. FS: BP197 (6 cell AA case) for Icom T8A and T81A

Yahoo group: ham4sale (2007 — 2015)

A more cleanly formatted listing may be seen at:

http://qsl.net/wc6w/wc6wfsw/index.html?fr31.html

Alert!!

Microsoft IE8 or IE9 may not properly display my webpage.

It may help if you click on the "Tools" menu and select "Compatibility Settings". Then check the "Display all websites in compatibility view" box.

Firefox & Chrome displays it fine, as does IE6 & IE7.

****

*** Mechanical Filters ***

450 KHz Collins Mechanical Filters Used, checked OK

526 9901 010 & 526 9902 010 -- LSB & USB set, 2.2 KHz Bandwidth. $200 for the pair

---

*** Crystal Filters***

10.7 MHz, 13 KHz Bandwidth Crystal filters. I believe these are pulls from some Motorola radio. Two carry what I think is a Mot part no. 532-0003-01.

They are all the same size & footprint. About 2+" long by 1" wide by 3/4" high. On the bottom, there are a pair of (4-40?) studs on diagonally opposite corners, in & out pins on the other pair of corners. A ground pin sits in the middle of one side. Assorted mfgrs. used $5 ea

10.7 MHz, 15 KHz Bandwidth Crystal filters. Made by Tyco. Same footprint as above. NOS $10ea

Motorola TLD5340A, 157.590 MHz, RCA connectors -- $5

*** Ceramic Filters ***

Clevite TF-01A, 455KHz center freq.-- $10 ea

Murata CFU455G, 455KHz center freq., 9KHz 6dB bandwidth, 1500 ohms, NOS-- $2 ea

Vernitron which acquired these designs from Clevite

TO-01A, 455KHz center freq., NOS -- $20 ea

TO-02A, 455KHz center freq., NOS -- $20 ea

*** Crytal Oscillators ***

CTS Knights JKTO-47 970-2602 -- 1MHz ovenized oscillator also bears Collins part number: 292-0308-010. Looks like NOS, w/data sheet. Original cost was $325! now only $50

*** Quartz Crytals ***

Electronic Research Co. EROX160-BM5, 1 MHz ovenized crystal. 115VAC heater, octal base. Used $25.

James Knights octal base crystal ovens, 6.3V heaters. JK02 used, $5
JK09 NOS, $10

James Knights Glass octal base (tube style) crystals
Type G9 97 KHz (split electrodes) -- $10

Paraphrased from: http://www.qsl.net/la5ki/org/sw/sw.htm
Swan HF-700-S, "SS-16B SPECIAL" HF SSB transceiver, VERY rare model. 80 - 10 meters. SSB and CW. Power input is 550 watts PEP on SSB and 360 watts DC input on CW. The receiver on this is fantastic and really sounds great, very sharp and sensitive. This radio uses 2pcs 6JE6C/6LQ6/6MJ6 for final output. This radio boasts such great features as: On/Off switch, AF gain control, Cal/Rec/Trans/CW/Tune switch, Mic gain control, Carrier balance control, RF gain control, Panel meter, Main bandswitch, Output level control, Sideband selector (LSB or USB), P.A. bias control, PTT/Vox switch, Cal 100khz-25khz switch, P.A. grid control, P.A. plate control, P.A. Load, fine control, P.A. Load, coarse control, CW Filter selectivity switch. Also has AGC, ALC, grid block keying, CW sidetone monitor, and more.
9.5 of 10, Needs finals & tune-up, PS not incl. Asking $255. plus shipping.

5953. For sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-10-19 02:13:31 UTC
From: Chris Boone
Topic: 557 Message: 5953

Selling some excess gear....if it doesn't sell here, it goes to Ebay..

Rare Comtronix FM-200 6m FM only rig...covers 52-54Mhz in 20/10 kHz steps....also has separate selection for 52.525 simplex...does about 20-30watts out...will provide specs (from my IFR1500) to buyer, Radio has mic and mounting bracket....and is in mint shape. $100

ICOM IC-22U 2mtr FM rig.....BCD switches set the frequency.. one of the best FM receivers every made for amateur use. Has been used as repeater receivers in the past. NO mic or power cable. $40

6 cavity VHF duplexer from DB Products. 8inch Band pass Band reject cans. Comes in cabinet (you can easily remove it if you don't want it. Mint condition. Will tune to your 2mtr freq..PICK UP only-- in EL39. $600 (new they go for over $1200)

~75 ft of Cablewave 7/8in 50ohm hardline (close to Helix but uses their own connectors) no connectors but has a grounding strap on one end. $100. Pickup only in EL39

FT530 dualbander HT and FT33R 220 HT with TT pad option (no PL option in the3 33R). includes drop in charger that charges both. Ft33R has NEW battery and the Texas sun put a dot right over the MHz position on the display (mint radio otherwise). 530 needs battery changed (current battery holds a charge but not for long)--have two other batteries may have some life left but haven't
charged them in a while.. $200 for all.

Hello group!

I have up for sale 2- Kenwood TK-790 Radios. They are the 40 watt ver. Type 2. But they go into the HAM bands just fine. They are the Stock Control head. No remote head kits. They are in Ohio. I would like at least 300.00 for both. But open to offers.

Paypal only...

Thanks

5955. FS: ALDA 103 HF Rig Made in USA

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-10-21 22:48:25 UTC
From: doc@kd4e.com
Topic: 5955 Message: 5955

FS: ALDA 103 HF Rig Made in USA by former Swan guys.

Exceptional condition. This is a well-constructed tri-band
early-solid state SSB/CW HF rig (80, 40, 20m). Very good
noise blanker, rugged MRF-454's in finals output an easy
100w, and it includes the crystal calibrator option.

Includes complete documentation - manual, schematic,
service manual, most of the QST review, and the original
sales brochure. Includes also the mic and DC power cable.

Information and discussion here:
http://www.eham.net/reviews/detail/696
http://forums.qrz.com/showthread.php?t=252906
Also, there is a Review in QST December 1978
(I read somewhere that there is a simple mod to add
bands but have not found that documented anywhere.)

Works fine. Need funds toward an HF amplifier project.
Picture on request.

Asking what I paid for it $215. incl. std. shipping.

UG-657 U Sealed BNC Female panel mount connector -- $3 ea

UG-692/U SM Female Cable connector -- $10 ea

UG-932 A/U MHV Male Cable connectors -- $10 ea

UG-961 A/U MHV Female Panel connector -- $12

Automatic / Cannon SM Right Angle Female Cable connector -- $10 ea

Kings KH-39-11 HN Female Cable connector -- $20

F-81 F-female/F-female barrel connector -- 3/1$

Amp 2-321444-1 BNC Male Cable connector -- $2 ea

Below are all new crimp on connectors, with all hardware, in individual plastic bags; late 80's to early-mid 1990's date codes. I believe that they are all for RG-59 size cable. -- $1 ea

Kings Electronics

KC-59-642-M06 BNC Cable Males
KA-59-385-M06 TNC Cable Males
KA-19-43 TNC Bulkhead Females

Amphenol 558-86 BNC Cable Males

Amp 2-329064-1 BNC Cable Males

*** Used Coax Connectors ***

These are used, fairly clean, mostly vintage Amphenol parts; Quantities up to 20 are available for some of these.

UG-27/U N Right Angle -- $2.50 ea or 5/$10
UG-57B/U N Male-Male connector -- $4 ea
UG-107B/U N F-M-F Tee connector -- $5 ea

UG-131/U N Female to SKL Female -- $5 ea
UG-175/U RG58 Adapter for PL259 -- 5 for $2
UG-201 Male N - Female BNC adapter -- $5 ea
UG-255/U UHF female - BNC male adapters -- $2.50 ea 5/$10
UG-259A/U - 91836 -- HN female to LC female bulkhead adapter -- $30

UG-273/U UHF male - BNC female adapters -- $2.50 ea 5/$10
UG-309/U Male HN to BNC female adapter -- $10 ea
UG-413/U HN F-F-F Tee connector -- $15 ea
UG-496/U HN female panel connector, a bit tarnished -- $7 ea

UG-565A/U Male C to N Female adapter-- $10 ea
UG-625/U BNC Female panel mount connector -- $1 ea

Polarized variant of UG-931/U MHV female panel mount connector with male center pin -- $10 ea

M-358 --UHF F-M-F Tee connector -- $3 ea
Unbranded N Female - BNC male adapters -- $3 ea

SMA Female-Female Bulkhead (barrel with a flange) connector -- $1 ea
SMA Female-Female Sealed Bulkhead (barrel with a flange) connector, gold plated -- $3 ea

N Female Chassis Mount connectors with gold (plated/flashed) PC style. The center pin (extends about 1/8" back from the insulator) -- $1ea

*** More Connectors ***

Amphenol Ultramite Connectors -- 48-06C10-5S6 & 48-00R10-5P6, 5 pin miniature, mating panel and cable connector. NOS -- $10

Amphenol MS connectors -- 3 pairs MS20-1 14 pin military style connectors 3 male panel connectors + 3 female cable connectors with shells (two straight, one 90 degree); some new, some used but clean. $10 all

Amphenol MS connector pair 28-15 size -- 35 pin chassis mount female plus male cable connector. NOS -- $20

AMP 837043 LGH 20 KV Bulkhead connector with one 833807-3 cable cut short to 4" -- RFE, $10

Bendix / Amphenol 10 conductor 6' (unstretched) coily cable assembly -- 18-1S, 10 pin female Mil-C-5015 connectors on each end -- Used, $20

Motorola 1-80754A94AD Connector kit. Looks like a PL-259 w/a UG175 reducer plus some mounting rings (1-1/4" diam.) for an antenna. NIB. $5

PJ-055B & similar 1/4" phone plugs, 10 pieces, used. $10 all.

Reynolds 167-3517 -- 20KV sealed male panel connector. Complete data here -- NOS, $20 ea

A more cleanly formatted listing with photos may be seen here:

http://qsl.net/wc6w/wc6wfsw/index.html?fr44.html

Alert!! Microsoft IE8 or IE9 may not properly display my webpage. Surely Billy G. is hard at work on a fix.

Until then, if you are running one of the above browsers, it may help if you click on the "Tools" menu and select "Compatibility Settings". Then check the "Display all websites in compatibility view" box.

Firefox & Chrome displays it fine, as does IE6 & IE7.

73 & Good morning,
Marv WC6W

5957. FS: VHF/UHF wattmeter and SWR meter

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-10-22 19:30:47 UTC
From: John Geiger
Topic: 5957 Message: 5957

I have for sale a Frontier FSP-40 2m/70cm power and SWR meter. Has a 10 and 60 watt ranges, with SO239 connectors on each side. This is a small, hand held unit, similar to the one Radio Shack used to sell. It is in good condition and works fine.

I am asking $30 shipped in the US and can take paypal/check/MO.

5959. FS: Yaesu FT7800 dualband rig

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-10-23 00:46:07 UTC
From: John Geiger
Topic: 5959 Message: 5959

If anyone is looking for a 2m and 70cm radio to get on the repeaters with, I have a nice Yaesu FT7800 available. It does 50 watts on 2m and 40 watts on 70cm, CTCSS tones, DCS tones, and come with the mic, power cord, and original box. It doesn't have the manual, but you can find that on line.

It doesn't do dual receive, but you can program it to transmit on one band and receive on the other which makes it fine for satellite use.

I am asking $160 for it plus $10 shipping and can take paypal/check/MO.

73s John AA5JG

Mostly like new. Probably can't order much from these but,
they may be useful to service a 2nd Millennium relic

Your choice at $9 per pound including US Postal media rate shipping
or...
$1100 including shipping (CONUS) for all of them

5962. FT101E for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-10-24 14:42:12 UTC
From: Fred VE3FAL
Topic: 5962 Message: 5962

Gang:

I have a FT-101E for sale. This rig is very clean and works great. I have been running the rig for about a week now testing it checking in daily to maritime mobile service net on 14.300 on 20 meters with very good reports.

The rig tunes up on all bands with an easy 100 watts. Receive out blasts any new rig today for signal to noise ratio.

Microphone (YD148) contacts need some TLC but does work.

If interested rig can be seen and tested on the air at my QTH.

This is not my rig but selling it for someone else. I would love to have it but really do not need another rig at this time.

$175.00 kcs OBO....Shipping extra

Pictures available upon request.

Topic: 5966 Message: 5966

I have for sale a mobile power cord for the Yaesu FT100 series of transceivers. One end has the FT100 2 pin power connector on it, the other end has a cigarette lighter plug. It is around 8-10 inches long, but could easily be lengthened as needed. The connector itself sells for $15 shipped from Powerwerx.

I am asking $12 shipped for this cord and can take paypal/check/MO.

5967. WTT: Icom IC-706MkIIg

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-10-25 21:42:47 UTC
From: kb8srx
Topic: 5967 Message: 5967

ok Guys, please dont laugh me off of this board.

I am just putting this out to see if anyone is interested,

I have an Icom IC-706MkIIg thats about 3 years old, and I am the second owner of it, both in non-smoking environments, with the remote data cable and mount plate, also have a brand new TROY Console faceplate designed for the icom specifically.

heres what I would like to know:

I would like to upgrade to an IC-7000, but cant afford out outright, so is there anyone who has one and would like to trade radio plus a little money for the 7000? one that you just dont like, doesn't act the way you want, and you would like to go back to the 706?

and please, if you dont have a 7000 you have no need to comment here, Im just asking if anyone is interested.

5968. Sets of DIN plugs for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-10-27 05:30:36 UTC
From: John Geiger
Topic: 5968 Message: 5968

I have a couple of DIN plug sets that came with a Kenwood TS950 I recently purchased. Both are unopened in the plastic bag. These are the common DIN plugs that will work with most radios.
Bag one has a 7 pin DIN, 8 pin DIN, 13 pin DIN, and 2 automotive type fuses. Asking $15 shipped for this bag.

Bag two has a 7 pin DIN and a 13 pin DIN. Asking $10 shipped
.
I know the 13 pin will also work on some Icom transceivers like the 718 and 706 series. The 7 and 8 pin DINs are also used on the Icom 746 along with many other models.

I can take paypal/check/MO.

5969. FS: Kenwood CW filters

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-10-27 05:31:43 UTC
From: John Geiger
Topic: 5969 Message: 5969

I have for sale the following Kenwood CW filters:
1. YK-88C-1 500hz CW filter for the 8.83mhz IF. It works in the Kenwood TS450/570/690/850/930/940/950 series of radios. Asking $75 shipped.
2. YG-455C-1 500 CW filter for the 455khz IF. It works in the Kenwood 140/450/680/690/850/930/940/950 series of radios. Won't work in the 570. Asking $85 shipped.
Take both filters for $150 shipped. I can take paypal/check/MO.

Several HF Transceivers, Power Supplies and Antenna
Tuners For Sale:

Icom IC-746, 160 thru 2 meter transceiver

The Icom IC-746 covers 160-10 meters plus 6 and 2 meters. 100 Watts of output is available on all bands - HF, 50 MHz and 144 MHz, making the IC-746 a practical choice for all-around base station use. The die-cast aluminum chassis and a large cooling fan help to stabilize the PA circuit, providing 100% full duty cycle operation. It has 100 alphanumeric memories, spectrum display, Twin PBT, CTCSS encode / decode, APF, two stage preamp, keypad entry, automatic antenna tuner and electronic keyer. DSP digitally transposes receive audio components in all modes of operation to produce desired AF frequency characteristics at the IF stage of the transceiver. This built-in DSP provides: noise reduction, automatic notch filter and selectable APF. The digital bar graph meter displays ALC, power output and SWR simultaneously! The radio automatically selects from the three separate antenna inputs (HF, 6 meters, 2 meters). A built-in automatic antenna tuner operates on the HF bands plus 6 meters. The rear panel has three antenna jacks. The 746 requires 12 VDC at 20 amps.

Features include Spectrum Scope, 102 Memories, RIT/XIT, Noise Blanker, VOX Function, Selectable APF, Dual Display, 100 Watt Output, 40 Watt Output (AM), Built-in Automatic Antenna Tuner 180-6 Meters, Full Break-In CW, CW Keyer, 100% Duty Cycle, Rx Antenna Jack, DSP Notch, 1 Hz Readout, Memory Keyer, RF Attenuator 6/12/18 dB, and much more.

This particular unit works 100% as best I can tell. It looks very close to new, and is in its original box, with paper work for $750.

Icom IC-706 Mk II G 160 thru 2 meter transceiver:

The '706' Series represents one of the most popular transceivers in amateur radio histroy. The latest version is the incredibly small Icom IC-706 Mark II G which adds many new features and capabilities not found in previous versions. The "G" is an all-mode transceiver that provides 100 watts on HF and 6 meters and 50 watts on 2 meters plus 20 watts on 440 MHz. It receives from 30 kHz to 199 MHz and from 400 to 470 MHz. It features a removable, remoteable, front panel that allows control of all features. The large LCD display features alphanumeric memory

names (9 character) and soft key descriptions. The LCD even supports a simple band scope display. Other advanced features include: IF Shift, RIT, Tone Squelch, Scanning, Noise Blanker, Speech Compressor, Mini Spectrum Scope and Electronic Keyer. This latest version in the 706 series includes the UT-106 DSP module as a standard feature. Despite its compact size (6.56" x 2.28" x 7.88"), it has big, easy to use control dials. With HM-103 hand mic. One or two optional filters may be added.

Features
* .03-199, 400-470 MHz Receive
* Alpha memories
* RIT
* Preamp/ATT
* VFO A/B
* 1 Hz Display
* IF Shift
* Scanning
* S/RF Meter
* 100 Watts HF+6M
* 50 Watts 2M, 20 Watts 440
* 100 Memories
* All band Multimode
* Removable head
* Mini Spectrum Scope
* Electronic Keyer

This one works 100% as best I can determine. It looks extremely nice. Microphone and paper work is included for $650.

Icom MB-62 Mobile Mounting Bracket:

The MB-62 is the mobile mounting bracket that is used for the Icom 706 series, IC-703, and for the AT-180.

This particular one is new, still in its original box, with all mounting hardware, never used, just as it came from Icom. $25

Kenwood TS-440 S / AT, 100 Watt HF transceiver:

The Kenwood TS-440S/AT was designed for superior performance in the SSB, CW, AM, FM and AFSK modes. An automatic antenna tuner is built in. Coverage is 160 through 10 meters including the WARC bands with 100 watts (40W AM). It includes such things as notch filter, individual selection of optional crystal filters, digital readout, memories, scan capabilities, IF shift, direct frequency entry from a keyboard, and many other features. It requires 13 VDC at about 20 amps.

This particular TS-440 is in great condition. Electrically, it functions 100%. There are no problems with the VCO and

PLL like plagues some of these units. Likewise the frequency entry from the keyboard is clean and definite. Cosmetically, it looks good. With paper work for only $450.

Kenwood YK-88SN, 1.8 KHz filter for narrow SSB or wide CW
This solder in filter fits the TS-440 (above), plus many other Kenwood rigs. It provides a very effective filter for SSB when conditions are tough, and a medium width filter for CW when the going is not as tough. Of course it works fine. It looks fine also, as if that matters when inside a rig. $79

TenTec 585 Paragon HF Transceiver:

The Paragon is a top of the line transceiver that includes a general coverage receiver. It covers 160-10 meters, including WARC bands, with 100 watts output. The receiver is fantastic. It has dual VFOs and many memories built in, along with a speech processor. Basically, it has about every feature that a ham could want in an HF rig.

This particular unit works 100% as best I can tell. Since the rig does so many things, I am sure that there is something I didn't test, but I don't know what it is (or I would have tested it!). It has had all updates completed by TenTec.

Cosmetically, it is in extremely nice shape. The front panel is extremely good. Most all of the lettering is clean and crisp. This one also has the Giehl chip in it making it similar to a Paragon II.

Large manual and power cord included for $650.

TenTec Power Supplies:

TenTec Model 280 power supply, 20 amps at 13 V DC
This supply is quite heavy duty electrically. It has 2 pass transistors, instead of the one that some have. It also has an ammeter on it.
This one works fine, and looks OK as well.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply:
This is a 25 amp switching power supply in a case that matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is very quiet, and well shielded, and does not produce any electrical noise that I could find. $150

TenTec 670 Electronic Keyer / Paddle:

The TenTec 670 is a complete electronic CW keyer in one package. It includes the paddle as well as the electronics, so there is no need to add a paddle as with most keyers. There is a cable with two RCA phono plugs on it it -- one for 12 V DC and one for the keying output. This unit is made to key solid state rigs (typically switching 12 Volts). It is a sort of chocolate brown color styled to match the early Omni series A,B, and C, the TenTec Delta, etc.

This particular unit works fine, and looks extremely nice. I can not find a scratch on it.

Paper work included for $60.

Astron RS-12 A, 13.8 Volt DC Power Supply:

This power supply is rated at 9 amps continuous and 12 amps ICS. It is ideal for most 2 meter rigs, including the 50 Watt rigs.

This Astron power supply features solid-state electronic regulation, EMI filter, fold back current limiting for protection from excessive current and shorted output, and crowbar over-voltage protection.

This particular supply works 100% and looks the same. I can not find a scratch on it. With paper work for $50.

MFJ 900 HF Antenna Tuner:
The MFJ 900 covers 160 thru 10 meters, and is rated at 200 watts. I would not put more than 100 watt thru it, however. It is in a nice Woodgrain / Eggshell color enclosure that is a perfect match for some of the earlier TenTec gear, such as the Triton I and II, Argonaut 505 and 509, and others. This one works fine, and looks fine also. $45

Ameritron ARB-704 Linear Amplifier Keying Interface

The ARB-704 advanced interface is compatible with all common radios and amplifiers.

The input is designed to be compatible with any transmitter or transceiver, and the output is compatible with AC control lines or DC positive or negative amplifier control lines having up to 200 Volts peak open circuit voltage and 300 mA of operating current.

The ARB-704 has many electrical advantages over conventional relay buffer systems. The ARB-704 has no moving parts so it switches almost instantaneously.

This one is new, in its box, with everything that came with it originally, including all cables, and manual. MFJ sells them for about $60. Buy this one for $45.

Ameritron PNP-7D "Quick Connect" Cable for most Kenwood rigs
(TS-440, 950, 130, 2000, etc.) to ARB-704. New. $12

Coaxial antenna switches:

All have SO-239 connectors, and work 100%.

B & W Model CSR-5G (also known as 376)
This model will switch up to 5 antennas, grounding
all unused antennas. It has SO-239 connectors, with
the coax coming out like spokes of a wheel.
This one works 100%. With paperwork for $45.

MFJ 1702 B, 2 position
Heavy die cast housing, with a center position
to ground both antennas. Works great, and looks like
new. $22

SWR Bridges:

Both have SO-239 connectors, and cover from 3 to 150 MHz,
covering HF, 6 meters, and 2 meters, so they are ideal for the new
rigs with 6 meters and 2 meters in them.

Quement SWB-2 Dual Meter
This unit features two separate meters -- one for reading forward
power and another for reading SWR. This permits one to easily
monitor both the power going out, and the SWR on the antenna.
Works fine and looks great. With paper work for $40

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name
on it. In its original box with original instructions. $32

I also have many other accessories available such as
microphones, wattmeters, keyers, etc. Just too many to list
here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

For Sale:

Kenwood TS-140S HF Rig

TX: 10-160 m + WARC
MODE: AM/FM/SSB/CW
RF Power Output: AM: Max 40 W
FM: Max 50 W
SSB/CW: Max 100 W

It is 100% mechanically. Cosmetically it looks rough. I have used it as base and as a mobile. I truly loved using it mobile. The slider pots have been replaced. The buttons for NB1 and NB2 were replace with buttons from another radio. On back you will see ACC1 slot had been fitted with a connector for a transverter. This was done by person I bought it from. I have never used a transverter on it though I planned to one day. Does not include microphone

I am including a MFJ-949D manual tuner.

I am asking $350.00 plus shipping from 74044. Postal Money Order.

Pictures at: http://forums.qrz.com/showthread.php?t=269962&highlight=ts-140s

5974. Kenwood TS950S for sale or trade

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-11-01 17:51:36 UTC
From: John Geiger
Topic: 5974 Message: 5974

I have available for trade a Kenwood TS950S, which was Kenwood's top of the line HF rig until they quit making top of the line HF rigs. This is the model with the built in PS, built in autotuner that loads anything up, and dual
receive, kind of like a Kenwood TS850 deluxe. Also does 150 watts plus on output, which is what it is rated for-not turned up past specs by some CB type, except on 10m where it is only rated for 110 watts but it is doing that as well.

It has 2 optional filters in it-the YG455CN-1 250hz filter at the 455khz IF, and the YG455S-1 2.4khz SSB filter at the 455khz IF. The YK88S-1 2.4khz SSB filter at the 8.83IF is standard, so you have dual 2.4khz filters in it for SSB.

I ran it this past weekend in the CQWW contest and it performed excellent, given my crummy antenna. Has that great sounding Kenwood audio on receive and never had any problems with overloading, no matter how crowded the band got.

Now it isn't mint physically or anything like it. It does have some cosmetic problems. The case is in decent condition, no big scratches, dents or gouges but some marks on it. On the top and sides of the bezel there is something like
plastic tape or so (black in color) put on it to make it look black. I removed some of this on the top of the bezel and there is some pitting there now. Doesn't
look real great there but could be fixed. The TS950SD plate is missing off of the front, so the previous owner put a homemade label with it on there. I removed the labels and there is some black coloring (almost like a marker) covering where the model number plate used to go.
Some of the lettering on the front is rubbing off but you can read everything ok. The letter problems are just at the top, below that everything is ok. There are also a few small black marks on the left side of the front panel, but they aren't real large.

On CW it is working great. In addition to the narrow CW filter it has a audio peak filter, and the CW VBT which will narrow the passband down even further. The only real issue I see is on SSB transmit. It does have the DSP unit attached to it but I unhooked it as it seems that
the DSP unit was affecting the ALC level on CW (not on the other modes). The DSP doesn't do much on receive anyways, so I don't miss it. The DSP unit worked fine on SSB transmit and receive.

The dual receive is great for pileups, or if you want to listen to 2 frequencies at the same time-like checking into an HF net and working other stuff on the band while you are waiting for the net to call you.

Now it is large-really large-radio. Weights about 40 pounds. For those of you old enough to remember the IBM XT computer, it is about the same shape and size as the desktop unit for that computer. It just fits into my station. I like it, but
wouldn't mind something smaller.

Also has hand mic, manual, built in keyer. So why am I looking to trade it? I could use a rig with 6m on it, or maybe something a little smaller. Anyone have something to trade? Some rigs I would be interested in trading for would be an Icom 756, 746, or 736. Maybe a Yaesu FT920 or FT897D. Kenwood TS690 or TS570 with some filters. Make an offer, never know what I will trade for. I would also consider selling it for $750 or so.

Due to the size and weight of this rig I would like to do an in-person deal in the Oklahoma City, Southwest Oklahoma, or North Texas area.

5976. WTB: small HF beam/yagi

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-11-02 15:45:24 UTC
From: John Geiger
Topic: 5976 Message: 5976

I am looking for a small, 2 element HF yagi like the Mosley TA32jr, Mosley Mini 32 or 33, TGM or Mini Products Mini Quad, or Cushcraft MA5B. Don't have a tower up so this will be going on a roof tripod and turned with a light duty rotor, but want something with some gain over my wire antenna.

Anyone have one for sale after upgrading to a larger antenna, or moving to a antenna restricted environment? I can pay with paypal/check/MO or cash. Can pick up in the Oklahoma or North Texas, or would be reasonable shipping.

73s John AA5JG

KL-501 by rm italy. It has the original box and manual - i put into a dummy load and it works beautifully on all bands - puts out about 600 watts SSb and CW about 300 watts AM. i recently took down my beam and tower, don't run power these days so no need for it. Great little Amp! would consider a trade for a low end transceiver or Communications Receiver. thx, john

5983. FS: Yaesu FT-857D in Portable Station

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-11-06 00:27:01 UTC
From: doc@kd4e.com
Topic: 5983 Message: 5983

I mounted this Yaesu FT-857D in a Viking brand
heavy duty aluminum top-opening case that had
previously carried commercial grade test gear.

Also in the case is a MFJ-945E 160-6M Antenna
Tuner, a small speaker, and a bracket which holds
the connectors for the HF/6 and 2/440 antennas as
well as a pair of Powerpole connectors. Included
is the optional MH-59 Remote Mic, Manual, and the
DC power cable. Everything is in nice cosmetic
and operating condition (it is currently my primary
operating rig).

The shape and layout of this case does not work well
in my station and vehicle so, rather than take this
apart, I am selling it intact and will build one in
a different case.

Asking $625. plus the actual cost to ship.

Picture on request. Note: There is a place to mount
the LDG external meter designed for the FT-857 but I
do not have that meter. (I also have the original
Yaesu boxes.)

Will trade for a Yaesu FT-857D in equal condition
(plus some cash). I'd prefer to keep my MH-59 mic
and you keep your stock MH-31 mic and will adjust
the price accordingly.

Would anyone have one of these they would be willing to sell me,
need to find one as a replacement for one I screwed up.

cheers, Ben.

5985. HF Antenna Related items - Tuners, Wattmeters, Dummy Load and more FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-11-05 11:27:33 UTC
From: Ken Simpson, W8EK
Topic: 5985 Message: 5985

HF Antenna Related Items For Sale

Automatic and manual antenna tuners, Wattmeters and SWR Bridges, Dummy Load, Coax and Connectors, Tower, etc.

SGC-239 Automatic Antenna Tuner:

The SG-239 will operate from 1.8 to 30MHz with 1.5 to 200W. It has over 130,000 tuning combinations and 170 memory bins. It gives you the most flexibility because it will work with any antenna and any transceiver. It also has push buttons for a manual tune option. It weighs only 2 pounds, so you can use it for base or portable!

TECHNICAL SPECIFICATIONS
HF Frequency Range: 1.8 to 30 MHz
Power Input Range: 1.5 to 200W (PEP) and 80W (continuous)
DC Input Requirement: +13.8 VDC (nominal) at 300 ma
Recurrent set time: Typical: Less than 10 milliseconds
Antenna Minimum lengths:
40 feet(3.3 to 30 MHz) or 100 feet(1.8 to 30 MHz)
Size:7.5L x 6W x 1.85H inches
Case Construction: Aluminum case with exposed PCB

This particular unit works fine, and appears to be new, still in its original box. With paper work for $150.

MFJ 900 HF Antenna Tuner:

The MFJ 900 covers 160 thru 10 meters, and is rated at 200 watts. I would not put more than 100 watt thru it, however.

It is in a nice Woodgrain / Eggshell color enclosure that is a perfect match for some of the earlier TenTec gear, such as the Triton I and II, Argonaut 505 and 509, and others. But of course it can be used with any HF rig.

This one works fine, and looks fine also. $45

Daiwa CN-465 M, Dual Needle, VHF / UHF Wattmeter:

The Daiwa CN-465 M is a wattmeter designed for VHF and UHF frequencies, covering from 140 to 450 MHz. Since it is a cross needle meter, it can read forward power, reverse power, and SWR simultaneously. It also has a lighted meter if you apply 12 volts to it. The full scale deflections are either

75 or 15 watts forward, and 15 or 5 watts in reverse.

This particular meter works 100% and looks very nice.

With paper work for $55.

M C Jones VHF/UHF Wattmeter:

This MC Jones Wattmeter is a vintage unit, probably from just after WW II. At that time, it was the gold standard of wattmeters, basically equivalent to a Bird today.

This particular meter has N connectors in and out. It reads 12 Watts full scale in the forward position, and 4 Watts full scale in reflected. It also has an SWR calibrate and SWR scale on the meter. I think the frequency range is from 20 to 1000 MHz, but I am not 100% positive of that. It works well on 2 meters and 440 MHz. The RF sensor unit inside is model 576.3.

This one functions fine, and looks extremely nice for its age. $60

ParaDynamics PDC-5 Wattmeter / Antenna Tuner:

This unit has a wattmeter with scales of 100 W, 10 W, and 1 W with an antenna tuner built in.
The tuner portion works on 10 m, 12 m, and 15 m.
The wattmeter seems accurate from 20 meters thru 10 meters.

It is physically small (only 5 X 3 X 1), so would be ideal for portable use.

The wattmeter and antenna tuner portion work fine, however, the SWR portion of this unit is inoperative. It looks great. $12

SWR Bridges:

Both have SO-239 connectors, and cover from 3 to 150 MHz, covering HF, 6 meters, and 2 meters, so they are ideal for the new rigs with 6 meters and 2 meters in them.

Quement SWB-2 Dual Meter
This unit features two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna. Works fine and looks great. With paper work for $40

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions. $32

Heath HN-31 "Cantenna" RF Dummy Load

This is the traditional Heath dummy load that will handle a kilowatt. It has a derating curve both printed in the manual and on the can.

I measured the resistor and it is 47 ohms, so obviously it is in good shape and a great match for 50 ohms. The cantenna itself is in really great shape, with no rust, dents or dings.

Paper work is included for $45.

Coaxial Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long. It has a male type "N" connector on each end. $15

Antenna tower in Florida:

A total of 35 feet of antenna tower is available, consisting of one top section, 2 "middle" sections, and a 5 foot section for the base.

This tower is "American" tower, which has a horizontal brace about every 22 inches. It is suitable for VHF antennas, very large TV antennas, or small tribanders.

This particular tower is in good condition, although there is some slight surface rust.

It is pickup only near Ocala, FL, just off of I-75. $125

Coax connectors and adapters:

Prices are per connector. Several of each are available. These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male (PL-259) connection - $5

I also have many other accessories available such as HF rigs,
microphones, wattmeters, keyers, etc. Just too many to list
here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

5986. WTB: Bottom plate for Kenwood TS950

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-11-05 17:43:08 UTC
From: John Geiger
Topic: 5986 Message: 5986

This is probably a long shot, but here goes anyways. I am looking for the bottom plate piece that goes on a kenwood TS950S. This is the plate that you remove when you install the DSP unit. I have a Kenwood TS950SD but the DSP unit doesn't work right on CW transmit, so I am planning on just removing it. I need the plate, though, to take the place of it. Anyone have one of these metal plates avaiable after installing the DSP unit on their Kenwood TS950?

73s John AA5JG

5987. HF antenna related items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-11-06 12:19:00 UTC
From: Ken Simpson, W8EK
Topic: 5987 Message: 5987

HF Antenna Related Items For Sale

Automatic and manual antenna tuners, Wattmeters and SWR Bridges, Dummy Load, Coax and Connectors, Tower, etc.

SGC-239 Automatic Antenna Tuner:

The SG-239 will operate from 1.8 to 30MHz with 1.5 to 200W. It has over 130,000 tuning combinations and 170 memory bins. It gives you the most flexibility because it will work with any antenna and any transceiver. It also has push buttons for a manual tune option. It weighs only 2 pounds, so you can use it for base or portable!

TECHNICAL SPECIFICATIONS
HF Frequency Range: 1.8 to 30 MHz
Power Input Range: 1.5 to 200W (PEP) and 80W (continuous)
DC Input Requirement: +13.8 VDC (nominal) at 300 ma
Recurrent set time: Typical: Less than 10 milliseconds
Antenna Minimum lengths:
40 feet(3.3 to 30 MHz) or 100 feet(1.8 to 30 MHz)
Size:7.5L x 6W x 1.85H inches
Case Construction: Aluminum case with exposed PCB

This particular unit works fine, and appears to be new, still in its original box. With paper work for $150.

MFJ 900 HF Antenna Tuner:

The MFJ 900 covers 160 thru 10 meters, and is rated at 200 watts. I would not put more than 100 watt thru it, however.

It is in a nice Woodgrain / Eggshell color enclosure that is a perfect match for some of the earlier TenTec gear, such as the Triton I and II, Argonaut 505 and 509, and others. But of course it can be used with any HF rig.

This one works fine, and looks fine also. $45

Daiwa CN-465 M, Dual Needle, VHF / UHF Wattmeter:

The Daiwa CN-465 M is a wattmeter designed for VHF and UHF frequencies, covering from 140 to 450 MHz. Since it is a cross needle meter, it can read forward power, reverse power, and SWR simultaneously. It also has a lighted meter if you apply 12 volts to it. The full scale deflections are either 75 or 15 watts forward, and 15 or 5 watts in reverse.

This particular meter works 100% and looks very nice.

With paper work for $55.

M C Jones VHF/UHF Wattmeter:

This MC Jones Wattmeter is a vintage unit, probably from just after WW II. At that time, it was the gold standard of wattmeters, basically equivalent to a Bird today.

This particular meter has N connectors in and out. It reads 12 Watts full scale in the forward position, and 4 Watts full scale in reflected. It also has an SWR calibrate and SWR scale on the meter. I think the frequency range is from 20 to 1000 MHz, but I am not 100% positive of that. It works well on 2 meters and 440 MHz. The RF sensor unit inside is model 576.3.

This one functions fine, and looks extremely nice for its age. $60

ParaDynamics PDC-5 Wattmeter / Antenna Tuner:

This unit has a wattmeter with scales of 100 W, 10 W, and 1 W with an antenna tuner built in.
The tuner portion works on 10 m, 12 m, and 15 m.
The wattmeter seems accurate from 20 meters thru 10 meters.

It is physically small (only 5 X 3 X 1), so would be ideal for portable use.

The wattmeter and antenna tuner portion work fine, however, the SWR portion of this unit is inoperative. It looks great. $12

SWR Bridges:

Both have SO-239 connectors, and cover from 3 to 150 MHz, covering HF, 6 meters, and 2 meters, so they are ideal for the new rigs with 6 meters and 2 meters in them.

Quement SWB-2 Dual Meter
This unit features two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna. Works fine and looks great. With paper work for $40

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions. $32

Heath HN-31 "Cantenna" RF Dummy Load

This is the traditional Heath dummy load that will handle a kilowatt. It has a derating curve both printed in the manual

and on the can.

I measured the resistor and it is 47 ohms, so obviously it
is in good shape and a great match for 50 ohms. The cantenna
itself is in really great shape, with no rust, dents or dings.

Paper work is included for $45.

Coaxial Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Antenna tower in Florida:

A total of 35 feet of antenna tower is available, consisting
of one top section, 2 "middle" sections, and a 5 foot section
for the base.

This tower is "American" tower, which has a horizontal brace
about every 22 inches. It is suitable for VHF antennas, very
large TV antennas, or small tribanders.

This particular tower is in good condition, although there
is some slight surface rust.

It is pickup only near Ocala, FL, just off of I-75. $125

Coax connectors and adapters:

Prices are per connector. Several of each are available.

Eddystone 358 coils wanted

Looking for F = 600 - 1250 Kc/s, G = 300 - 600 Kc/s, H = 150 - 300 Kc/s
if anyone has such spare.

cheers, Ben.

5992. Desk Mics, Hand Mics, DTMF Mics, Spkr Mics FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-11-07 13:59:27 UTC
From: Ken Simpson, W8EK
Topic: 5992 Message: 5992

A variety of Desk Microphones, Hand Microphones, DTMF
Touch Tone Microphones, and HT speaker microphones for sale:

Desk Microphones:

Kenwood MC-60 A Desk Microphone

The MC-60 A is a deluxe desk microphone that includes up-down
switches, as well as a locking or non-locking PTT switch.
It may be used either in amplified or non-amplified mode.
It has a round 8 pin connector on it, and can be used with
virtually all Kenwood rigs with the round 8 pin connector.

This particular mic comes from a non-smoking environment,
works 100%, and looks very close to new.

Paper work included for $90.

Astatic D-104 Desk Microphone

Most people know that the Astatic D-104 is the "Lollypop"
desk mic. This mic has very nice chrome plating on the mic
itself, and on the PTT grip section. The base is black.

Of course it works fine, and looks extremely nice.

With paper work for $75.

Shure Desk Microphones:

Shure 522
This is a desk mic that looks very close to the same as the
common Shure 444, but it has a dynamic mic element in it, with
good articulation. It has a high and low impedance switch on
the bottom.
This one works fine and looks very close to new. $55

RCA equivalent to a Shure 444 desk microphone
Although the front of this mic says RCA on it, it looks like a
Shure 444, and has a controlled magnetic element in it just
like the Shure 444. My assumption is that it is a 444 with an
RCA label.
Of course most of us know that the 444 is an extremely good
communications microphone with great articulation.
This one works fine, and looks nice. It has a 4 pin
connector on it. $50

TenTec Desk Microphones:

TenTec Model 706 deluxe base microphone
The TenTec model 706 is an electret microphone. It has an 8 pin connector as used on the Orion, Eagle, and the newer TenTec rigs. This particular mic works 100% and looks very close to new. $75

TenTec 709A Desk Microphone
Model 709A is an omni-directional dynamic microphone.
The unit consists of a die-cast zinc shell with molded sliding PTT on/off switch, dynamic microphone element and detachable multi-wire connection cable.
It has an 8 pin connector as used on the Orion, Eagle and newer TenTec rigs.
This particular mic works 100% and is still in its original box. $60

Hand Microphones:

Astatic D-104-M6 Hand Microphone

Most of use know what the D-104 "Lollypop" desk mic is like. This is the hand mic equivalent.

The D104-M6 microphone is a quality performance field effect amplified “power” microphone. The housing is molded black ABS; the front half is chrome plated and the grille screen is chrome plated. The output impedance is compatible with the inputs of almost all commercial transceivers; it has an externally adjustable high gain amplifier to ensure the desired modulation level.
The D104-M6 has an easily accessible control so that the correct modulation level can be set for each operators voice.

This one works fine and looks extremely nice.

With paper work for $40.

DTMF Touch Tone Microphones:

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the mic, and "speed dial". 12 digit touch tone pad on the front, with the microphone part above the pad. With an 8 pin modular plug (like a computer LAN) on it, which can be changed.
Looks to be new. $40

KDK DM TT-1 DTMF Touch Tone Mic
This mic has a 12 digit touch tone pad on it, with a switch to turn the pad on and off. With 4 pin plug.
It works fine, and looks great. $35

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. Looks to be unused. $40

Data Signal "Data-Coder 5" Touch Tone Mic
This mic has a 12 digit touch tone pad on it, plus a normal

low impedance microphone. With 4 pin plug. Like new. $38

HT Speaker Microphones:

Icom HM-70 Speaker Microphone
The Icom HM-70 speaker mic (also known as the EX-1036)
works on the Icom 2SRA, 4SRA, Delta 1, IC-W2/X2 or any
Icom HT which uses the single 3 conductor stereo-style
1/8 inch (3.5 mm) plug.
This one is in the original box, and appears to be unused.
$25

Azden SDX-316
Although it has an Azden name plate, it will also work
with Icom, some Yaesu, and Alinco that needs 3.5 mm and
2.5 mm plugs.
This is the rounder style speaker mic that fits nicely in
the palm of your hand. $20

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. The coiled cord has been stretched a bit, but
it works fine. $12

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Prices do not include shipping from Florida.

Thanks.

5996. FS: FM mobile radio power cord

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-11-09 02:32:48 UTC
From: John Geiger
Topic: 5996 Message: 5996

I have for sale a short 2 wire power cord using the T connector found on most FM mobile radios today. It is about 12 inches long, with fuses in both cords. Right now it is in 2 pieces, one with bare wires, and the other (the side towards the battery) with power poles. I can sell it like this or remove the power pole connectors and solder the 2 pieces together if you like.

I am asking $10 shipped for it and can take paypal/check/MO.

5997. FS: Icom Z1A dualband HT

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-11-09 16:36:50 UTC
From: John Geiger
Topic: 5997 Message: 5997

I have an Icom Z1A dualband (2m/70cm) HT for sale that does full duplex, making it perfect for the FM satellites. It is pretty much like the Icom W32A with one exception-you can remote mount the faceplate. That's right, it is like a mobile rig in that you can remote mount the face! It comes with the remote mount cable, and the display, keypad, mic, and speaker separate from the body of the HT so you have a speaker/mic in your had with the display and keypad. It also has the Icom dualband antenna with it (using a BNC connector for those of you who hate SMAs), a MAHA NiMH 9.6 volt battery for 5 watts out, and the manual. The battery will hold a charge but I can't guarantee for how long. I don't have the wall charger for it, but do have an Icom CP12 cigarette lighter cord, but this is missing the fuse and the metal tip on the end. You can replace the end, cut the end off and use it as a DC cord, and I will throw in a replacement cigarette lighter plug you can wire into it also.

The HT will do dual receive, including dual receive on the same band. It is in good shape physically and works fine.

I am asking $125 plus shipping for this HT. I can take paypal/check/MO/Cash.

Electrovoice 674 microphones (two) $55. for BOTH, incl. shipping std USA.

ELECTRO-VOICE Model 674 Dynamic Cardioid "Continuous-C" Microphone.

Said to be the "Upgrade" mic to the famous EV-664 (smoother sound
curves, more-rugged chrome finish, same bases and connectors).

Often paired with with older Collins and Drake gear.

For the price they are sold as-is and untested. Pics on request.

Spec sheet:
http://music.manualsonline.com/manua...voice/674.html

6000. F/S Iambic Paddles

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-11-11 14:14:13 UTC
From: n4eof
Topic: 6000 Message: 6000

I have two sets of iambic paddles that are surplus to my needs.

1. Older Nye set, works great, looks good. With cord and 1/4" stereo plug. $45 shipped to lower 48.

2. Very nice black Bencher s/n 637386 with cord and 1/8" stereo plug and allen wrench. $ 70 shipped to lower 48.

Can e-mail pictures if needed.

Jack, WD4E@...

6002. FS: Yaesu FT920 HF/6m radio

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-11-13 00:41:13 UTC
From: John Geiger
Topic: 5746 Message: 6002

I have for sale a Yaesu FT920 HF/6m radio. Does 100 watts on HF and 6m, and has a built in tuner, voice keyer, CW memory keyer. Comes with the hand mic, power cord, manual, and original box. In addition, it has the INRAD roofing filter mod installed, and the INRAD filter switchboard with the Yaesu 2.4khz SSB filter and the INRAD 1.8khz SSB filter installed, so you can switch between 2.4khz and 1.8khz bandwidths on SSB. This radio is in excellent condition. The INRAD options also are worth $350. I am asking $800 for it plus shipping, and can take paypal/check/MO.

6003. FS: Kenwood TS950S

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-11-13 05:31:41 UTC
From: John Geiger
Topic: 6003 Message: 6003

Didn't get any trade offers, so figured I would put a price on it and sell it outright.
I have for sale a Kenwood TS950S HF transceiver. This was Kenwood's top of the line transceiver and its performance shows why. The Kenwood 950 continues to be one of the most popular HF radios because the receiver is excellent and you have an internal power supply and auto antenna tuner that will tune almost any antenna you throw at it. Does 150 watts out.

It does dual receive as well, has a built in keyer, slope tuning, and a CW audio peak filter. It comes with 2 optional filters-the 250hz 455khz IF CW filter, and the 2.4khz 455khz IF SSB filter. Also has the manual and hand mic. It works fine but has some cosmetic flaws. The case has some marks on it, but nothing terribly bad. The top and sides of the bezel have some black tape the previous owner put on it to try to cover up some pitting on it. The front has a few black marks on it from a marker, I am guessing.
I am asking $725 plus shipping. Figure shipping and packing to be $50 or so.
I can take paypal/check/MO

6004. HF Rigs, Power Supplies, Ant Tuner, and more FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-11-13 15:27:43 UTC
From: Ken Simpson, W8EK
Topic: 6004 Message: 6004

Several HF Transceivers, Power Supplies, Antenna Tuner,
etc. For Sale:

Icom IC-706 Mk II G 160 thru 2 meter transceiver:

The '706' Series represents one of the most popular transceivers
in amateur radio histroy. The latest version is the incredibly
small Icom IC-706 Mark II G which adds many new features and
capabilities not found in previous versions. The "G" is an
all-mode transceiver that provides 100 watts on HF and 6 meters
and 50 watts on 2 meters plus 20 watts on 440 MHz. It receives
from 30 kHz to 199 MHz and from 400 to 470 MHz. It features a
removable, remoteable, front panel that allows control of all
features. The large LCD display features alphanumeric memory
names (9 character) and soft key descriptions. The LCD even
supports a simple band scope display. Other advanced features
include: IF Shift, RIT, Tone Squelch, Scanning, Noise Blanker,
Speech Compressor, Mini Spectrum Scope and Electronic Keyer.
This latest version in the 706 series includes the UT-106 DSP
module as a standard feature. Despite its compact size (6.56"
x 2.28" x 7.88"), it has big, easy to use control dials. With
HM-103 hand mic. One or two optional filters may be added.

Features
* .03-199, 400-470 MHz Receive
* Alpha memories
* RIT
* Preamp/ATT
* VFO A/B
* 1 Hz Display
* IF Shift
* Scanning
* S/RF Meter
* 100 Watts HF+6M
* 50 Watts 2M, 20 Watts 440
* 100 Memories
* All band Multimode
* Removable head
* Mini Spectrum Scope
* Electronic Keyer

This one works 100% as best I can determine. It looks extremely
nice. Microphone and paper work is included for $650.

Kenwood TS-440 S / AT, 100 Watt HF transceiver:

The Kenwood TS-440S/AT was designed for superior performance in the SSB, CW, AM, FM and AFSK modes. An automatic antenna tuner is built in. Coverage is 160 through 10 meters including the WARC bands with 100 watts (40W AM). It includes such things as notch filter, individual selection of optional crystal filters, digital readout, memories, scan capabilities, IF shift, direct frequency entry from a keyboard, and many other features. It requires 13 VDC at about 20 amps.

This particular TS-440 is in great condition. Electrically, it functions 100%. There are no problems with the VCO and PLL like plagues some of these units. Likewise the frequency entry from the keyboard is clean and definite. Cosmetically, it looks good. With paper work for only $450.

Sangean ATS-803 A Short Wave Receiver:

The Sangean ATS-803A is a "top of the line" receiver. This digital world band radio has dual-conversion covering all shortwave frequencies (1.6-30 MHz), long wave (150-519 kHz), AM (520-1710 kHz) and FM (87.5-108 MHz). A BFO control is included for smooth SSB and CW reception. An LCD display with dial lamp shows frequency, 24 hour time, battery indicator and signal strength. The receiver features an RF gain, tone, wide-narrow selectivity, keypad entry, manual tuning knob, plus 14 memories. There is an external RCA phone antenna jack on the rear panel.
The left panel has a 3.5mm earphone jack plus a DIN type jack for tape recording. It can be powered by either batteries or a wall wart power supply.

This one works fine and looks really great as well.
With paper work for $100.

TenTec 585 Paragon HF Transceiver:

The Paragon is a top of the line transceiver that includes a general coverage receiver. It covers 160-10 meters, including WARC bands, with 100 watts output. The receiver is fantastic. It has dual VFOs and many memories built in, along with a speech processor. Basically, it has about every feature that a ham could want in an HF rig.

This particular unit works 100% as best I can tell. Since the rig does so many things, I am sure that there is something I didn't test, but I don't know what it is (or I would have tested it!). It has had all updates completed by TenTec.

Cosmetically, it is in extremely nice shape. The front panel is extremely good. Most all of the lettering is clean and crisp. This one also has the Giehl chip in it making it similar to a Paragon II.

Large manual and power cord included for $650.

TenTec Power Supplies:

TenTec Model 280 power supply, 20 amps at 13 V DC
This supply is quite heavy duty electrically. It has 2 pass transistors, instead of the one that some have. It also has an ammeter on it.
This one works fine, and looks OK as well.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply:
This is a 25 amp switching power supply in a case that matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is very quiet, and well shielded, and does not produce any electrical noise that I could find. $150

Astron RS-12 A, 13.8 Volt DC Power Supply:

This power supply is rated at 9 amps continuous and 12 amps ICS. It is ideal for most 2 meter rigs, including the 50 Watt rigs.

This Astron power supply features solid-state electronic regulation, EMI filter, fold back current limiting for protection from excessive current and shorted output, and crowbar over-voltage protection.

This particular supply works 100% and looks the same. I can not find a scratch on it. With paper work for $50.

MFJ 900 HF Antenna Tuner:
The MFJ 900 covers 160 thru 10 meters, and is rated at 200 watts. I would not put more than 100 watt thru it, however. It is in a nice Woodgrain / Eggshell color enclosure that is a perfect match for some of the earlier TenTec gear, such as the Triton I and II, Argonaut 505 and 509, and others.
This one works fine, and looks fine also. $45

SWR Bridges:

Both have SO-239 connectors, and cover from 3 to 150 MHz, covering HF, 6 meters, and 2 meters, so they are ideal for the new rigs with 6 meters and 2 meters in them.

Quement SWB-2 Dual Meter
This unit features two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna.
Works fine and looks great. With paper work for $40

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name
on it. In its original box with original instructions. $32

CW Keys:

Nye Viking Speedex 310-001 "Oval Base" Key
Nice action, with nickel hardware. This originally had a black
base, but someone painted the base to look like it is brass.
Nye sells these for $58. This one is only $35.

Heavy Metallic Base for CW Key
This is a heavy metal base that weighs about a pound and a half,
black color with red felt on the bottom. Attach most any key to
it and it will stay in place on your desk! $20

Autek QF-1 A, Active Audio Filter:

This is an audio filter that goes between your rig and speaker.
It runs off of 110 V AC or 13 Volt DC, and will peak, notch, or
become a low pass or high pass filter. Selectivity (bandwidth)
and frequency are adjustable from the front panel. This is the
"A" model that also has an additional notch filter added.
The input is an 1/4 inch phone plug, and the output is a 1/4
inch jack on the rear panel.

This particular unit works 100%, and looks very, very nice.
I can not find a scratch on it.

With paper work for $60.

Heath HN-31 "Cantenna" RF Dummy Load

This is the traditional Heath dummy load that will handle a
kilowatt. It has a derating curve both printed in the manual
and on the can.

I measured the resistor and it is 47 ohms, so obviously it
is in good shape and a great match for 50 ohms. The cantenna
itself is in really great shape, with no rust, dents or dings.

Paper work is included for $45.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce
harmonic interference. All have SO-239 connectors, and include
paper work.

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500
Watts. It is the latest model B&W filter.
In very nice condition, it looks very close to new. $40.

B & W 425
It cuts off just above 10 meters, and will handle 1500+ Watts.
Maximum attenuation is at 52 MHz, with at least 70 db across
the band. This is an older, heavier duty model. It weighs
almost twice as much as the newer model. $35

Drake TV-3300-LP
This is a modern low pass filter has been optimized to have
more attenuation in the 40 MHz region, where many TVs have
their IF. It is good for 1000 Watts "average" according to
the manual, and has over 80 db attenuation at 41 MHz.
This one looks great. $30

Coax connectors and adapters:

Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

I also have many other accessories available such as
microphones, wattmeters, etc. Just too many to list here.
Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

6006. radios, microphones misc for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-11-15 13:25:31 UTC
From: John Miller
Topic: 6006 Message: 6006

Hi all, trying to fund a new project but need to sell stuff first, if all this goes there is more I will probably list.

First for sale, Kenwood MC-80 electrit condenser microphone, mic is in great shape, is amplified powered by Kenwood radios, most of them anyway, is in good shape and comes with box and manual. Asking $50 plus shipping.

Yaesu VX-3R duel band radio 2 meters and 440 with receive DC to daylight just about, 1.5 watts high power, I added a cell phone belt clip to the back of it, also have soft case, this has very low hours on it I don't like yaesu and really don't find it much fun to use, I had it in my netbook bag for emergencies and public service events but still opt for something else when I'll use an HT so there's no point keeping the thing. It's less than a year old, works fine for the maybe 2 hours I've used it since February when I bought it brand new, I'll include the soft case for $100 plus shipping, offers considered, I have the box for this as well as everything that came with it.

Vertex FTL-1011, VHF low mobile, comes with mic, I'm told this will cover the FM portion of 10 meters, I bought it to see if I could get it in to 6 meters, since I've moved in an apartment in a highly apartmented area I've decided not to try it, I'm really pushing my luck now especially where I have all the antennas I think I can here, radio has been tested seems to work fine, it's in great shape few if any marks on it. asking $85 plus shipping, again, offers considered.

Kenwood TK-880 mhf commercial mobile, this will go down to the upper portion of the 440 MHz ham band, I used it for GMRS and a repeater for the club I belong to on 440 , but can't afford to renew my GMRS license and 440 is about useless around me, and again where I live now, I'll never put the antenna up anyway if I do renew the license, no point watching the radio sit in a box, this has some scratches but works perfect, mic mobile bracket and power cord included $225 plus shipping I'll program it for you if asked $25 first up to 25 channels, we'll talk beyond that.

I accept paypal and money orders *only* unless you're local and want to come give me the cash

6007. Flex Radio SDR-1000

6009. FS/FT: Alinco DJ-580 Dual Band HT + Accessories

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-11-18 03:15:09 UTC
From: John W5JMC
Topic: 6009 Message: 6009

Hi All:

I have an Alinco DJ-580 VHF/UHF handheld transceiver for sale or trade. The radio is in very, very good condition ? an easy 8/10. It comes with the stock rubber duck antenna, a speaker mic with clip, belt clip, a NEW1100mAh battery from Batteries America, a AA battery case, and a desktop charge with power cord. I can email you a copy of the manual or you can download it from Alinco?s website. This is an easy to use, reliable radio. It does cross-band repeat and full duplex operation. The receive is also extended through 998mhz and the aircraft band. I am asking $125 shipped, or will consider your trade offer.

I would specifically be interested in any of the following: West Mountain Rig Runner, SSB filters for an IC-706 or TS-480, an Icom HM-15T microphone, an MC-60A desk mic, a Kenwood SP-23 or Yaesu SP-8 speaker, a Tiny Trac+GPS combo, an MFJ-886 (or similar) frequency counter, an antenna analyzer, a Gap Hear It speaker or West Mountain CLR/SPKR, or portable HF antennas.

Please email me at w5jmc(dot)john(at)gmail(dot)com if interested.

Cheers!

John, w5jmc**

6010. ATV DUPLEXER FORSALE

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-11-18 11:53:14 UTC
From: n0pbm1
Topic: 6010 Message: 6010

I have for sale a NEW set of TXRX Systems duplexer. This duplexer was bought in 1993 to be part of a ATV repeater that never was finished (it never really got off the ground). These duplexers have never be installed in anything they have set in a storage room for the last 17 years (NO BS)they are 100% ok other then a little dust on them. they have never even seen the repeater site..

The are complete with the the expection of 2 short coax cables and a tee that combines the rx side and tx side antenna ports to one antenna connection. (if needed i will include 4' of good RG-142 style cable and 4 "N" male connectors and a tee)you will have to make your own cables.

Please feel free to ask any question you have i will try to answer them. I have looked at both side of the duplexer on my R-2600 service monitor and the both look very good i have pics of the unit as well as pics of the sweeps if anyone would like to see them just drop me an email and i will be glad to send them to you.

These list new today from tx/rx for $2020.00 and the Amateur Net price is $1515.00. I'm asking $900.00 plus shipping or you can make an offer. I would prefer not to ship outside of the lower 48 states. I would ask the payment be made thru pay-pal, no checks or money orders please, local pick is an option if you would like. I will double box this unit to help protect them from UPS.

Please feel free to ask any questions you may have by either of the following

email
glaforce at centurytel dot net

or

Call me 573-819-0709 i'm in CST no calls after 9pm or before 6:30 am please if i don't answer please leave a message with # and i will call you back.

FS: Two HAM-type Rotors with Controllers

1. HAM-III with CDE Controller. Working condition and
controller looks nice. $175. + shipping.

2. HAM-M Model 5 (stamped "5 630" underneath) with CDE
Controller. Working condition with weld-repair to
previously damaged upper section (proably stronger than
original). $155. + shipping.

Neither has been rebuilt or serviced recently, asking price
would be double if they had been. They are being replaced by
a prop-pitch. Sold as-is.

Picked up in the Statesboro-Savannah, GA area saves shipping.

Date: 2010-11-21 22:17:08 UTC
From: Chris Boone
Topic: 6016 Message: 6017

BTW please note this is for radios only.no cables or brackets, etc..just the radio itself.
The UHF models are 25w (no heat sink)..I MAY have some 30-35w (WITH Heat sink) available..but they are not included in this sale.
Thanks to those who have responded already...

remember to reply DIRECT to me..not to the list as some of them I am subbed in the DIGEST mode and will not get anything for a day.

Tnx
Chris

AR22R controller and rotor for sale.

It works fine. I have a few feet of four wire flat lead to go with it.
Bottom of rotor has stamped, R22R SER1 840.
Controller has Cornell-Dubiler AR-22R and Series 1-840 on it.

This should handle a small beam. Like a 6 meter and/or 2 meter and/or
440MHz, etc.

How about $85 plus shipping. I can easily ship for $15.
So, how about $99 shipped to CONUS.

Topic: 6025 Message: 6025

I have the following items for sale. Prices do not include shipping. In person deals
in the Southwest Oklahoma/North Texas area are also possible.
Here is what I have:

1. A Cushcraft A270-10S dualband yagi. Covers 2m and 70cm, with 5 elements on both bands. It has a 6 foot boom and takes a single feedline for both bands. Good antenna for the satellites, to get you into more distance repeaters, or for SSB/CW work on both bands. I am asking $85 for it. I have the original box for it so shipping is not a problem.

2. A collection of 2 Radio Shack rotors and control boxes. There is also some 3 conductor rotor cable to go with it. Both rotors had problems getting stuck at one time, but I cleaned, relubed and regreased each one. They work ok now but can't guarantee for how long. I am asking $50 for the whole package of rotors, controllers, and cables.

3. A MFJ dualband 1/4 wave mag mount mobile antenna. Comes with around 15 feet or so of coax, and a nice strong magnent. Great mobile antenna for a dualband rig. Covers 2m and 70cm. Asking $15.

4. A Maha universal rapid charger. Works with both NiCD and NiMH batteries. Has adjustable tabs so you can set it up to charge any size battery. Comes with the wall charger. I am asking $25 for it. Charges HT batteries in 2 hours or so.
5.Yaesu MH-67 speaker mic for recent Yaesu HTs. This mic has the 4 part single
plug on it so make sure your HT needs this type of plug. I am asking
$20 for it.

I can take paypal/check/MO.
